The teacher of America might naturally have been drier, more quaint, less perfumed and essenced,—without being less high-bred or refined. But “there was no thought of pleasing” the *Athenæum* when Mr. Willis took up the ruby pen and the opera-glass. We must accept him, with his sense and his nonsense,—his enthusiasm and his affectation,—his poetry and his jargon,—“for better, for worse,”—without expecting change or demanding that which is absent;—and to show how he touches sights and singularities, we cannot do better than offer “a rag” from ‘The Rag-Bag,’—which, after all, is a rag of not a bad quality.—

“—The lower part of Broadway—below Barnum, that is to say—is pretty much given over to business and the masculine gender. Ladies seen south of St. Paul’s, except in omnibuses, excite that certain indefinable curiosity, which, like the active attention to a glimpse of a petticoat in a monastery, arises from our sinner’s interest in things apparently astray. The impression, consequently, from seeing a lady come out of Delmonico’s, contains a certain indefinable difference from the impression of seeing the same lady come out of the New-York Hotel—define it at your leisure. This, or perhaps the magnetism of a pair of boots such as usually contain a voter, but were then occupied by one of the unconstituted sex, drew a crowd of two or three hundred persons, the other day, to the front of the masculine Hotel above mentioned—patient spectators, all, of the very ordinary phenomenon of a lady about mounting a horse. The horse had his objections. A man’s hat, a riding habit of cloth of our wear, boots of indefinite extent, and whip held with an air of unmistakable efficacy, seemed to fail of their ordinary control. The stable-man drew the spirited animal again and again to the edge of the side walk, and, as often, the lady tried in vain to get her foot in the stirrup. After repeated failures she re-ascended the steps of the Hotel, and stood observing the groom’s efforts to quiet the horse, not at all disconcerted by the very large audience that was assembled, and, in fact, the whole affair, with the circular Bowling Green below, looking like a scene in a circus. Presently came along a plainly dressed man who had an idea, and no objection to lend it. He knew how to produce submission (probably in quadrupeds only) to female domination. The horse was coaxed up to the side-walk once more, and, stepping to the other side, the man took up the off fore leg, and held it while the lady mounted, the animal having evidently no confidence in resistance on three legs. Once in the saddle, she put on the whip, caracoled up and down in front of the Hotel till the pace was disciplined to her mind, and then, quietly dropping the reins, walked her steed tranquilly toward the South Ferry. The crowd looked after her till she was out of sight, it being very busily whispered about, that the load, thus unwillingly borne away, was no less than the indomitable will of the celebrated Mrs. Fanny Kemble.”

The Lady of “indomitable will” would, we fancy, herself be first and foremost to laugh at a tale told like the above, with such quiet comicality. The good or bad taste of “everybody pencilling everybody” is another affair. But the English (as we have a thousand times said) have “glass windows” in their own houses.

Ancient Jerusalem. A New Investigation into the History, Topography, and Plan of the City, Environs, and Temple. By Joseph Francis Thrupp, M.A. Cambridge, Macmillan & Co.; London, Bell & Daldy.

THE interest which attaches to the ancient metropolis of Palestine is all but universal. Pilgrims still visit its sacred places, believing everything they are told. They pass from spot to spot in a state of rapturous bewilderment, which deadens thought, silences inquiry, and in which they are ready to worship the very stones of the so-called Holy City. But these are far from being the only persons to whom

Jerusalem is an object of regard. Students of the Bible find it necessary to make themselves intimately acquainted with the relative situations of localities of memorable import to the whole human race; and those who take delight in investigating the progress of society cannot avoid feeling an interest in a city, the several phases of whose history, when considered by themselves, are in the highest degree remarkable, and when taken in connexion with the mighty consequences which have flowed from them, throw into the shade the lustre of all other capitals. It is chiefly to the second of these classes that Mr. Thrupp addresses himself. Biblical illustration is his principal aim; but in following it out he has entered generally upon the history of the city and the Temple, and on the identification of most of the principal localities both in Jerusalem and its environs. His style is clear and occasionally animated; his general tone of remark is calm and candid; and he has a thorough acquaintance with all that has been written upon his subject, from Josephus down to Tobler, Williams, and De Sauley.

The uncertainty that hangs over all the celebrated Christian localities can scarcely be considered remarkable. For many centuries these spots were left, altogether unthought of, to the operation of natural decay and to the alterations consequent upon incidents the most calamitous. War in its worst form did its work upon the whole city over and over again; “temple and tower” were involved in indiscriminate destruction, and their remains and sites were left to the insults and desecration of the fanatical disciples of Mohammed. Then followed centuries of fraud. The general superstition of ages of ignorance was taken advantage of. Devotion was led astray by cunning. Mammon became the tutelary guardian of the Holy Places. Pretended miracles and lying wonders were vouched as proofs of the genuineness of the most palpable frauds, and wealth, generously bestowed by princely enthusiasts, was squandered, not in maintaining, but in altering and adorning presumed sacred sites. All identity was thus destroyed, and thenceforth deception reigned unchecked and paramount.

A period of scepticism has followed of course. Everything has since been doubted. Scarcely a single site from Bethlehem to Calvary, the Chapel of the Sepulchre, and the place of the Ascension, but has been questioned; and our Ordnance Survey, and in fact all that has yet been done and written, have gone but a very little way towards a satisfactory determination of the infinitude of questions which have risen up on every hand.

The tendency of Mr. Thrupp’s book is to still greater unsettlement. He throws, indeed, the weight of his opinion into the scale on behalf of the alleged positions of Calvary, the Chapel of the Sepulchre, and most of the other Christian sites,—but with respect to some of the elder, that is, the Judaical localities, Mr. Thrupp proposes entirely new readings. Thus he throws doubt upon the Temple having been built upon Mount Moriah, and he endeavours to show—and this is the great point of his book—that the hill on which Solomon’s celebrated fabric was erected was anciently called Mount Zion, and that consequently the hill now known by that name is so designated improperly.

Both questions turn upon little points of construction of passages in the Sacred History, the consideration of which is not very well suited to our pages; but we have gone through the texts quoted and referred to by Mr. Thrupp, and are bound to say that we do not think he has made out his case on either point. Mount Moriah is mentioned in only two places

in the Bible. One of them, if it stood alone, would seem to favour Mr. Thrupp’s construction, that Moriah was the name of a district, and not of a single hill; but the other is fatal to him. It runs thus:—“Solomon began to build the house of the Lord at Jerusalem in mount Moriah, where the Lord appeared unto David his father, in the place that David had prepared in the threshing-floor of Ornan the Jebusite” (2 Chron. iii. 1). No ingenuity can get over this passage. It is clear that, whatever may have been the case elsewhere, here the writer intended to denote not a district, but a specific spot—a spot which he identifies by a reiterated variety of indications. It was situated in Jerusalem; it was the site of Ornan’s or Araunah’s threshing-floor; it was a spot set apart for this specific purpose by David, and on which, as we are told elsewhere, he had erected an altar. Finally, the place was identified by a name which is applied to the Temple Hill at this day.

The case as to Mount Zion is very different. It depends upon a variety of particulars far too minute for us to enter into with our readers; but we will state Mr. Thrupp’s views.

Jerusalem is situated on a tongue of land, which is surrounded, except at its base, by a deep ravine. The point, or southernmost portion of the tongue, is forked,—that is, it terminates in two eminences, with a valley between them. One of these eminences—the westernmost and the higher of the two—is termed Mount Zion. The other eminence, which lies to the east, and is considerably lower than the former, is the site of the Temple. On these two hills, by the testimony of Josephus and Tacitus, the ancient city stood, and gradually enlarged itself on the northern slopes of both of them. Now, Mr. Thrupp’s point is thus stated by himself:—

“That the Jews after their return from the captivity used the name Zion of [for?] a different part of the city to what they had previously done. Strange as it may at first sight appear that so important an error should have originated with the Jews themselves, it admits of the clearest demonstration that such is the case. In the books of Samuel, Kings, and Chronicles, Zion is expressly identified with the City of David: in the first book of Maccabees it is as clearly distinguished from it.”

We cannot concur with Mr. Thrupp either in this statement of the facts, or in his conclusions. “Zion,” as it seems to us, is a name clearly applied in the Bible to Jerusalem itself. It was one of its ancient names,—probably derived from some tumulus or sepulchral mound which, in some far distant age, stood upon the higher hill. The passages in which Hebrew writers, and especially the poets, apply this name to their sacred city are familiar to every one. We would refer to Psalm xlviii. 12, 13; Isaiah x. 24, xxxiii. 20, and lx. 14, as containing proofs of the clearest kind. No one who will consider them attentively can doubt that “Zion” was used for Jerusalem,—not for a part of the city, but for the city as a whole.

On the other hand, “the City of David” was the name, not of the whole city, but of a particular building in or near “Zion,”—a building which was David’s residence, and ultimately his tomb and that of his posterity. When David captured Zion, or Jerusalem, he first took the “castle of Zion” (1 Chron. xi. 5), or, as it is termed by another writer, “the stronghold of Zion” (2 Sam. v. 7); or, in another place, “the fort” (2 Sam. v. 9). The Hebrew King, having carried this important position, took up his residence in it; and, as if to mark from the first—even before the place was all in his own possession—his intention to occupy the city of the Jebusites permanently, as his capital, he gave this castle, fort, or stronghold of Zion the

new and significant name of "the City of David." The following is the simple record of this transaction, which occurs in one of the passages we have referred to:—"So David dwelt in the fort, and called it the city of David" (2 Sam. v. 9). Now, in the passage we have quoted from Mr. Thrupp he uses "Zion," the name of the whole, for "the stronghold of Zion," the name of a part; and, by this want of precision, has, we fear, mystified both himself and his readers. There are, in our judgment, no passages in "Samuel, Kings, and Chronicles" in which "Zion is expressly identified with the City of David." What those passages identify with the City of David is the stronghold of Zion,—the part, and not the whole.

The second clause of Mr. Thrupp's proposition we think equally untenable. "In the first book of Maccabees," Mr. Thrupp says, "it [that is, Zion] is as clearly distinguished from it," that is, from the City of David. What appears in Maccabees is, that under Antiochus Epiphanes, the City of David was re-converted into a stronghold, whereupon, for the protection of the inhabitants of Jerusalem and the Temple against the attacks of the garrison of the new fortress, "Mount Zion" was surrounded "with high walls and strong towers" (1 Macc. iv. 60). Mr. Thrupp's version of the transaction is, that "there were two opposite forts or strongholds in Jerusalem, one of which stood on what was then called Mount Zion, and the other on the City of David: thus showing," he concludes, "that Mount Zion and the City of David were distinct;" or, as he afterwards states, "situate in different parts of the entire city." But how does that appear? Nay rather, does not the very reverse follow from this construction of fort against fort? The City of David, which since David's time had been used as the place of royal sepulture—Solomon having built another palace on the Temple Hill—was clearly, being a burial-place, some little distance outside the city wall. The new defensive fortifications were on that wall or connected with it. To have answered their purpose, they must have been as near as possible to the tower against which they were intended as a protection. The object was to confine and curb the garrison of that tower. To have built a fortress for that purpose in another part of the city would not have been a way of accomplishing that object.

To strengthen his conclusion, Mr. Thrupp draws ingenious, but to us not by any means satisfactory, inferences from a variety of texts, most of them extremely doubtful and capable of many constructions. He has also recourse to the extraordinary supposition we have already mentioned, that the Jews after the Captivity made a mistake as to the position of "Mount Zion." Except we could take for granted Mr. Thrupp's conclusion as to the relative situations of the two forts mentioned in Maccabees, we see no evidence of anything of the kind.

On the foundation of these mistaken premises, Mr. Thrupp moves on with ease to his final conclusion,—"the identity of Zion with the Temple Hill,"—which he deduces from passages in the poetical books of the Bible, in which Zion is spoken of as "the holy mountain," "the dwelling-place of the Lord," and under other poetical images employed to denote the peculiar sanctity of the place. We have carefully gone through these passages, but remain entirely unconvinced. "The holy mountain," "the mountain of the Lord," and other similar expressions, are mere poetical synonyms for Zion,—the city honoured as the locality of the Temple, the place to which the tribes of Israel repaired for sacrifice.

We desire not to be understood as undervaluing the ingenuity and ability with which

Mr. Thrupp defends his peculiar opinions, or the value of his book on some illustrative points. But with reference to his main point—that out of which his book has evidently grown, and which colours the whole of it—that the Temple stood on Mount Zion, we think he has allowed himself to be blinded and carried away by love for a new theory. His book will do good by calling attention to the various modifications of the word "Zion" in use amongst the sacred writers, and indeed to the whole subject of the illustration of the ancient topography of Jerusalem from Biblical sources; but we have yet to look for the calm, untheoretical, unbiassed mind which will be able to thread its way through the maze of questions with which the subject is surrounded.

MINOR MINSTRELS.

Robin Hood, and other Poems. By J. R. Wise. (Lacy.)—We opened this unpromising volume with distrust at such a hackneyed title, and were surprised to find much knowledge of Nature ruggedly, and not tastefully, expressed, and yet marked by a sweet lyrical spirit, fresh and full of May. For instance, here is a little verse round and coloured as a berry.—

Where the bee is honey churning,
And the gorse with gold is burning,
Where our roof with leaves is thatched,
And the stockdove's eggs are hatched,
O come with me.
When the moon with mist is shrouded,
Like round onyx dimly clouded,
And the stags with horny forks,
Lie sleeping 'mong the ferns and stalks,
O come with me.

And again:—

Come beneath the greenwood tree,
Good sights here ye all shall see,
Maggie with its thorny nest,
Dipper with white spot on breast,
Sparrow with its five eggs grey,
Linnet, goldfinch, and the jay,
Blackbird who so merry is
With that golden flute of his;
Squirrel, too, with sharp fore-teeth,
Rustling in the leaves beneath,
When the trees their plumage shed,
Like its coat all russet red,
Honey-bee that buzzeth loud,
Caught within the fogglow's shroud.

Heart-Coin for Scutari. By S. K. H. (York, Sampson.)—*Alma and Inkermann.* By Robert Haxall. (Hope & Co.)—Only the greatest genius can be heard above the noise of our age, on the principle that it requires stout lungs to overpower the clamour of a crowd. All but a few minds are so over-ridden and crushed by leaders and pamphlets upon the events of their own day, that none but the keenest intellects can see the inherent poetry and life that all know remains in them. Good poems are seldom written on contemporaneous events. Nothing worth reading was written on Waterloo; yet Scott wrote immortally about Flodden, and Byron about Thrasymene. Here is a poetical mind eloquent enough about Cromwell and Corfe Castle, yet about Alma rapid, with "crimson flags" and "bloody fights," and all such poetical upholstery. There is an excellent trumpet spirit in 'The Legend of Corfe Castle,'—as for instance—

High to the vaulted roof arose the soldier's loyal shout,
The echo startling the grim foes who leagued the walls about;
And fast to tower and battlement the brave defenders thronged
To battle for their absent Lord, and for their Monarch wronged.

And so upon the fated hold the wild war-clamour broke,
And all day long the cannon pealed, 'mid roar, and flash, and smoke;
And all day long the arrow-flight darkened the summer sky,
And God's pure name blent fearfully with either party cry.
Till slowly on the Dorset Hills closed desecrated night,
And the holy moon look sadly down upon the pausing fight;
And the dying moaned their lives away, and the wearied soldier slept;
And in the camp, and on the walls, the sullen watch was kept.

—The second poem is an ambitious attempt in the much-used Byronic stanzas, which are always heavy, if not used with power; and is full of "hearts of Freedom," "Oceanus," "Britannia," and other patriotic paraphernalia.

Margaret, and other Poems. By an East Anglian. (Simpkin, Marshall & Co.)—We all know what a book is when it is made up of Sonnets to Violets, Verses on a Water Lily and a Harebell, Lines to a Thrush, and Ode to a Dandelion. We all know the writer may have a real love for Nature, and a great power of expressing such love; but still, as sure as the sun is bright, he can be at present but a mere landscape-painter, presenting us with no indications of his being anything but a voice, and bringing us no proofs of a heart. True, in this instance, we have 'On the Death of A. F. H. G.,' and 'Stanzas, written on a Child's First Birth-day';—but these are not sufficient to show any creative force,—and a new poet must create, or cease to be. True to the didactic impulses of the age, our author writes a poem on the laws of divorce, and impresses the study of that interesting subject upon young ladies in general. With much power of observation, the East Anglian is unconsciously somewhat pedantic in his botanical knowledge, as, for instance, in the following lines, where he paints a scene by three flowers unknown to poetry.—

Where from the chafing sand up-grew
The prickly-leaved Eryngo blue;
The mottled Catchfly quivered in the wind;
And there, its roots amid the salt wave twined,
The horned Poppy grew.

—The first stanza of the longest poem, 'Margaret,' will show the ease of versification the writer possesses.—

Adown the quiet vale a streamlet ran,
Scatt'ring its music 'midst the summer air!
Lovers ne'er questioned where its course began,
But loved it for the love they nurtured there.
Although its source lay 'midst a scene as fair
As many that beguile the wand'rer's feet,
Along its shallow, sinuous course, it ne'er
Sang to a spot more lovely, or more sweet,
Than that retired vale, where shades its murmurs greet.

Balmoral: a Sketch. By Alexander Macalister; with an Introduction and Notes, by A. Hamilton. (Bosworth).—This is an uncalled-for poem, neatly done, and sprinkled with Highland words as dislocating as those names of Flemish cities that even Boileau could not chain up into metre. He would no longer say—

Comment en vers heureux assiéger Doësbourgh,
Zutphen, Wageningen, Hardenwic, Knotsenbourg?

Mr. Macalister is more daring; with enthusiasm he sings:—

To Ben Macdhui's grand yet cheerless height,
Cairn-bowl, Cairn-gorum, Ben a Bound take flight.

Nuptiis Victoriae Reginae Magnae Britanniae et Hiberniae et Alberti Principis Coburgensis et Gothani. Dicavit Henricus Carolus, Abr. Eichstadius. (Gotha, Stolberg).—This is one of those splendid nonentities—a modern Latin poem, on the event of the marriage of Victoria. It is rhetorical and stately, and, as a feat of literary gymnastics, as interesting as an Egyptian charade or a Kamschatka sonnet would be,—and no more. That oligarchy, the reading-class, has merged into a common republic, and we no longer want these esoteric mysteries:—as troublesome for the uninitiated to crack as a bad nut, with much the same result when the labour is over.

THE WAR.

A translation has been produced, by Mr. David Jardine, of Baron Müffling's *Narrative of My Missions to Constantinople and St. Petersburg in the Years 1829 and 1830.* (Longman & Co.)—The book might be entitled "Confessions of a Diplomatist." It is a revelation of trickery, and is important in many respects, but chiefly as it explains the intimate connexion between Russian and Prussian policy, which

existed at the date of the Treaty of Adrianople. That treaty, since described as a magnanimous concession on the part of the Czar, is allowed to have been drawn up exclusively in his favour, and to have been devised in order to spare him the embarrassments to which his previous conduct seemed to lead. His armies, in 1828, had been partially successful; but their losses had encouraged the Turks, who prepared to renew the contest, in 1829, on a more extended scale. Shumla and Silistria had defied the siege-trains of the Emperor Nicholas, and though his troops had defeated the enemy at various points beyond the Caucasus, the belligerent forces appeared so evenly balanced that Europe was divided in its anticipations of the result. In Prussia and France, states Baron Müffling, the opinion was generally held that the Czar, in spite of vast obstacles, must ultimately prevail,—while in Austria and England it was believed that the Sultan would wear out the pertinacity of his foe; but in no quarter was it regarded as probable that peace would so soon be concluded. However, as summer approached, the Czarina arrived at Berlin, and, unexpectedly, the Czar arrived with her,—and, while a marriage pageant filled the royal chapels, a declaration was made to the French Ambassador concerning the Ottoman Porte and its affairs. It was then and there affirmed by the Autocrat that his objects were well known,—that he would attain them at whatever cost,—that he aimed at no conquests, and would religiously adhere to the promises contained in his recent manifesto. All this is reported to us in the language of a Prussian courtier; yet Baron Müffling affects no concealment of the truth, that peace seemed to promise more for Russia than war. His mission to Constantinople, in effect, arose out of interviews between the Prussian King and the Russian Emperor, who had ostensibly met only to arrange some family alliances. The entire preparations were of the nature of a plot. They were secretly planned and secretly carried out,—and the Baron himself left Berlin under the pretence of visiting some mineral baths for the sake of his health; nor was it until within twenty-four hours of his arrival that the announcement of his mission was made to the Government at Constantinople.

From this moment the history becomes one of negotiation, closely resembling intrigue. English, French, and Austrian ministers played at the cross purposes of diplomacy until they all consented to follow their Prussian leader. For, Baron Müffling, though accredited from the Court of Berlin, was virtually an Envoy from St. Petersburg,—and, in the course of his self-magnifying narrative, he affords occasional glimpses of that cordial reciprocity in politics and feeling so long known to exist between the Courts of his two masters. How significant is the following from a Prussian chief of the staff!—

“I had in the year 1827 sketched a plan of operations for the Russian armies in the conquest of Constantinople, with reference to time, space, and means of subsistence. This plan I had submitted to the King, and had corresponded with Field-Marshal Diebitsch respecting it, whose views, except in some unimportant respects, entirely agreed with mine.”

And Marshal Diebitsch was now, profiting by his lessons, half way on the road to Constantinople. He was anxious to enter that city as a conqueror, and marched his forces victoriously from stage to stage until Adrianople opened its gates to them. But his triumphant progress was not altogether convenient to the Czar. It was most important for Russia to seem to hold the Ottoman Empire at its mercy, in order that, as Pozzo di Borgo expressed it, the Cabinets of Europe might redouble their efforts to force the Sultan to make peace. Should her armies, how-

ever, assail Constantinople, Great Britain must come upon the scene, and then, with mightier belligerents engaged, clouds and darkness must descend upon the future. The Sultan, with his Divan, would cross the Bosphorus and secure himself in Asia; the representatives of his allies would follow him; his military forces would also be withdrawn, and the Ottoman capital, abandoned to ravage, and perhaps to famine, would exhaust the strength and disappoint the hopes of its captors. Its provisions are mainly supplied from the Asiatic side, and, says Baron Müffling,—

“If the Russian Field-Marshal should advance to Constantinople, not a single ship with provisions would, of course, be suffered to come across from the Asiatic side, and as it would be impossible to feed the population, they would probably be scattered over the interior of European Turkey. What then would be Diebitsch's position, even if he should find means to provide for the support of his army while on the road from Burgas to Constantinople? The fleet of the Black Sea could not pass the Bosphorus while the Asiatic fortresses were in the hands of the Turks; so that he could not depend upon provisioning his troops from the Black Sea.”

Speculations of this kind from the pen of a military man who stood so high in the Russian service, are, at least, interesting. The reasoning, moreover, had its value at the time. The Czar desired peace—such a peace, of course, as would gain for him all that he had hoped from war; and the German envoy was not unwilling, in his behalf, to try a little diplomatic manipulation on the most plastic statesmen in Turkey. Six points had been indicated in the Russian manifesto, and on these Russia insisted. It was to no purpose that the Sultan was obstinate: a glorious company of ambassadors pressed around him; ministers whose patriotism interfered were threatened with dismissal, and some official sacrifices were actually made. In truth, the descendant of Osman, and head of El Islam, resembled a wretched heretic at the stake, who is implored by his friends to recant and submit, and save his life. Nevertheless, no little difficulty was encountered. The Porte believed in its own vitality, and declined to yield; and its foreign ministers combatted the Ambassador Extraordinary from Berlin, who must have retired had he not found means of transmitting his complaints to the Sultan. That prince, weaker than his advisers, reprimanded him, whereupon the exalted envoy assumed a higher tone. Like other envoys, he had an interpreter,—a sort of creature between an agent and a spy, with the cowardice of Athens and the knavishness of Smyrna. This gentleman fell into colloquies with the foreign minister or his servants, and Baron Müffling played down to his qualifications. Nelson said that no ambassador is so good as an admiral with double-shotted guns between decks; but our Prussian Baron contented himself with a lighter weapon.—

“I did not reject the usual arts of diplomacy at Pera, and took care to give my interpreter confidential as well as official communications, being quite sure that he would report the confidential answers before he reported those which were official. Among the confidential communications, I said that ‘I was not unwilling, before my departure, to hold another meeting with the Reis Effendi, but not in the same manner as on the first occasion. He had then so much abused the privilege of his own house, and had so grossly insulted me, that I would never again enter his Konack; but that I was prepared to meet him at some third place, such as Scutari. I should, in that case, according to the usages of Turkey, take pistols with me, and he would have to answer to me personally for every insulting word he uttered.’”

To a message so peremptory none but a submissive answer could be returned. The treaty of Adrianople, then, owed its origin in part to Baron Müffling's pocket pistols. But the

Foreign Minister, though dealing with Bobadil, endeavoured, at least, to preserve the “beautiful serene” on his countenance.—

“The Reis forced his features into an expression of diplomatic civility, but I saw distinctly that he was internally foaming with rage. My interpreter, who was alarmed, could not utter another word, and trembled from head to foot. The Turkish interpreter was obliged to translate for him.”

Marshal Diebitsch was now impatient to come down, like the wolf on the fold; and under his threats the preliminaries of peace were hurried forward. All the powers had a share, according to Baron Müffling, in aiding him to force a treaty upon the Sultan. Russian intrigue, indeed, was more triumphant than the Russian arms; and the Prussian Ambassador Extraordinary was even honoured with an audience of the Sultan,—“the gilded sun illuminating the firmament of glory.” His Majesty addressed him personally.—

“My dragoman, who stood a foot or two behind me in his Prussian uniform, had never before had the honour of translating the Sultan's words. He was greatly excited by this condescension, and, in his confusion of mind, committed what appeared to me to be an impropriety. The laudatory epithets, interjected by the Sultan in the manner I have described, were addressed by his Highness to the Reis, to be repeated by him to me; but the dragoman always translated them to me at once as they fell from the Sultan's lips, without waiting till the Reis delivered them in becoming form. I thought this indecorous, and therefore, without looking round, put back my left hand and pulled his coat by way of giving him a hint, at which he was terribly alarmed. The Sultan observed all this by-play, and began to laugh so heartily at it, that I could not refrain from laughing also.”

A snuff-box, worth 40,000 piastres, was the material result of this interview; and Baron Müffling, after helping to win the Russian game, returned, to be praised at Berlin and decorated at St. Petersburg. The Emperor Nicholas talked to him precisely as he talked to Sir Hamilton Seymour, and impressed him with a profound reverence of the greatest, most magnanimous and most virtuous sovereign in Europe! And so ended the pleasant Missions of the Baron Müffling. The narrative is deeply interesting, since it supplies a chapter of diplomatic history. The envoy wrote in apparent good faith; and, indeed, there is little temptation to doubt his accuracy, because he describes without reserve, and in perfect innocence, some of the most suspicious and sinister transactions in the annals of this century.

A Latin-English Dictionary, based upon the Works of Forcellini and Freund. By W. Smith, LL.D. Murray.

THERE are two opposite modes of treating the productions of foreign scholarship, both of which are objectionable. The one consists in ignoring or avoiding them, from a narrow prejudice against everything foreign,—an indolent acquiescence in the actual state of our knowledge, or an undefined dislike of innovation in general. It is not long since a University Professor at Cambridge was in the habit of giving vent to feelings of this sort, by remarking in his Lectures, that he had often thought it would have been a good thing for this country if all German works had been sunk in the German Ocean. Of late years, the tendency of our classical scholars—especially of the younger and more aspiring among them—has been altogether in the contrary direction. Illiberal exclusiveness has given place to excessive indulgence, and unreasonable contempt has been succeeded by indiscriminate admiration. With many, it is sufficient to know that a classical work is derived from German sources. Nothing more is needed to convince them of its

solid worth. This is the mistake made by American scholars, who, incompetent or indisposed to sift carefully the vast mass of materials existing in German literature, import them wholesale, and present them to their countrymen in hasty and inaccurate translations. An excessive fondness for the adoption of German works was also the failing of a late manufacturer of school books in this country.

From both the extremes of which we have spoken, Dr. W. Smith is careful to abstain. With an extensive knowledge of what German scholars have written, and a liberal appreciation of their many valuable qualities, he is still no blind idolater. Though thankful for their assistance, he does not suffer himself to be led away by their authority so far as to abandon the exercise of his own judgment. He is not content to transfer their works bodily into our literature without any alteration, but undertakes the more useful as well as more honourable task of correcting, improving and adapting them to English purposes. In short, he is a skilful and careful editor, not a mere translator. No better illustration of the nature of his labours can be imagined than is supplied by the contrast between this Dictionary and that of Dr. Andrews. Both are in a great measure based upon the same authorities; but the one is an indifferent translation, edited in a slovenly style,—the other is as free from imperfections of any kind as a book may be made by superior editorship and careful revision.

The distinctive feature of Dr. Smith's present Dictionary is the excellence of its etymology. In no other Latin Dictionary is the derivation of words so philosophically explained. Even Riddle's—which is the only English work at all to compare with it—is far inferior in this respect. The great attention bestowed upon Comparative Philology gives it pre-eminence in point of etymology. Instead of the antiquated method of seeking for the origin of all Latin words in the Greek language, Dr. Smith endeavours to show the relationship subsisting between corresponding terms in all the principal languages of the Indo-European family; and he often succeeds in establishing the identity of the Latin word and its English equivalent in a manner at once interesting and conclusive. In effecting this object, he has been much assisted by the modern school of philologists,—by such men as Pott, Bopp, and Key,—the results of whose investigations he has turned to good practical account. The articles on the Letters of the Latin Alphabet call for special remark, as embodying the latest philological discoveries. They are in themselves sufficient to give a character to the work. The information they contain regarding the changes which the letters undergo in Latin and the cognate languages throws so much light upon the derivation of words, that with this clue almost any student can trace out for himself the etymology of most words. Scarcely less useful, and certainly quite as interesting, are the derivatives from Latin in the Romance and modern European languages, which are frequently inserted from Diez's Dictionary of the Romance Languages.

Passing from the etymological department, in which Dr. Smith's Dictionary stands quite alone, we find its superiority in other points equally decided, though this may not be so striking to a casual observer. The interpretation of words is conducted with the same editorial ability as the investigation of their etymology, combining accuracy of definition with excellence of arrangement, and completeness in the exhibition and illustration of the various shades of meaning, with a freedom from needless distinction and redundancy of detail. After stating in clear

and precise language the radical notion attached to the word in question, the editor traces out all the derived meanings in the natural order of their development, giving, under each, instances of their occurrence in Latin authors. And it is to be observed, that these instances are passages of sufficient length to convey a correct idea of the use of the word, and are always accompanied by references to the author and work from which they are derived. They serve to illustrate not merely the signification, but also the syntactical construction and phraseological or idiomatic employment of the word, as well as to show the age and style to which these usages belong. Hence Dr. Smith has not thought it necessary to follow Freund's plan of distinguishing the various uses of words, as ante-classical, Ciceronian, post-classical, &c. There is one deficiency in this department which we are inclined to regret: we mean the absence of remarks upon the distinction between words nearly synonymous; but it would have been difficult to do justice to the subject without inconveniently adding to the bulk of the work, and a careful study of what is given under each word will enable the student to see for himself in what respects it differs from others nearly allied to it in signification. We should have been glad, too, if in all cases of verbs wanting the perfect or supine, these parts had been stated to be deficient, instead of being simply omitted. The insertion of archaic and irregular forms is of great value, from the light it throws upon the etymology and history of words.

Dr. Smith's Dictionary is a worthy companion to the works he has edited; and we have no doubt it will be even more extensively used than they, because its bulk and price are such as to render it more accessible. In point of cheapness, as well as more essential qualities, it has the advantage of all other Latin Dictionaries.

OUR LIBRARY TABLE.

The Career of a Rising Man: a Novel. By M. Viener. 3 vols. (Newby.)—This is a clever, ambitious book; but bearing too palpably the traces of its models—Bulwer and Disraeli—to give an idea of originality. M. Viener has, however, unless we are much mistaken, a genius of his own which he would do well to follow: it would lead him aright if he would believe in it and not try to imitate the fine writing of other people. The metaphysics in this novel are far too cloudy and too pompous to leave any impression upon the reader; but it is very probable he will skip them, as well as the disquisitions upon Spinoza, which show some depth of insight. But to make amends, the plot is abundant, complicated, and very well managed. The incidents are not remarkably like real life; but they are romantic and keep up the reader's interest to the end, which is the one thing needful in a novel. It is a story of wrong and revenge and the mortal recoil that never fails to follow upon revenge. The character of Berkley Lascelles, who pays the penalty both of the crime and the vengeance, is well conceived and worked out; it is the best thing in the work. A graceful, amiable, and incomplete victim to the evil deeds of others, it is still only through his own weakness that misfortune has power over him. The manner in which this character is touched gives us faith in what M. Viener could do if he would write more simply and follow his own instincts. At present, both his style of writing and style of sentiment are overloaded with false jewelry.

Love versus Law; or, Marriage with a deceased Wife's Sister: a Novel. By Joseph Middleton, Esq., Barrister-at-Law. 3 vols. (Newby.)—Mr. Middleton may be an excellent lawyer for anything we know to the contrary, but he certainly writes very bad novels. 'Love versus Law' is nothing but a tissue of foolishness from the beginning to the end: it excites no interest in the

reader either for the story or for the principle it is written to advocate.

Israel Potter: his Fifty Years of Exile. By Herman Melville. (Routledge & Co.)—Mr. Melville's books have been from the outset of his career somewhat singular,—and this is not the least so of the company. Whether Israel Potter belongs to the family of *Mrs. Harris*, or was an actual *bona fide* American who took despatches in the heels of his boots to Franklin at Paris, and who sailed with that buccaneer hero, Paul Jones, we confess our inability to decide. Some "Noter" or "Querist," well versed in the minor history of the American War, may perhaps oblige us with the facts, if facts there be. But whether Israel Potter be man or myth, he is here set in a strange framework. Mr. Melville tries for power and commands rhetoric,—but he becomes wilder and wilder, and more and more turgid in each successive book. Take as a specimen, the following passage concerning the Thames, which makes part of his picture of London:—"Hung in long, sepulchral arches of stone, the black, besmoked bridge seemed a huge scarf of crape, festooning the river across. Similar funeral festoons spanned it to the west, while eastward, towards the sea, tiers and tiers of jetty colliers lay moored, side by side, fleets of black swans. The Thames, which far away, among the green fields of Berks, ran clear as a brook, here, polluted by continual vicinity to man, curdled on between rotten wharves, one murky sheet of sewerage. Fretted by the ill-built piers, while it crested and hissed, then shot balefully through the Erebus arches, desperate as the lost souls of the harlots, who, every night, took the same plunge. Meantime, here and there, like awaiting hearses, the coal-scows drifted along, poled broadside, pell-mell to the current."—Benjamin Franklin, it is true, is painted in less peculiar colours than those employed to blacken the "City of Dis." But the philosophical printer, however available for the purposes of such a nice observer and delicate delineator as Mr. Thackeray, retains neither bone, blood, nor muscle when dealt with by such a proficient in the "earthquake" and "alligator" style as Mr. Melville. He is selfish in his prudence, and icy in his calmness,—rather weak and very tiresome. Such, we take it, was not the real Franklin. On the other hand, Paul Jones is a melo-dramatic caricature—an impossible mixture of a Bayard and a bully; and in a book where scene-painting has been tried for, we have encountered few scenes less real than the well-known attempt to burn Whitehaven, and the descent on St. Mary's Isle, as told in 'Israel Potter.' Mr. Melville, to conclude, does not improve as an artist,—yet his book, with all its faults, is not a bad shilling's worth for any railway reader, who does not object to small type and a style the glories of which are nebulous.

The Annals of England: an Epitome of English History, from Contemporary Writers, the Rolls of Parliament, and Public Records. Vol. I. (J. H. & Jas. Parker.)—A chronological history of England in the form of Annals, with many illustrations derived from coins, armorial bearings, and ancient remains. The author has given special attention to documentary antiquities, especially the old statutes. He has also derived great assistance from the published collection of old historians, entitled 'Monumenta Historica Britannica.' A book written principally in the form of brief notes, instead of a continuous narrative, cannot be generally attractive, but the solid information which the author has compressed into his pages ought to gain him a favourable reception.

The Sabbath; or, an Inquiry into the supposed Obligation of the Sabbaths of the Old Testament. By Sir William Domville, Bart. (Chapman & Hall.)—Sir William Domville examines and comments upon all the topics and texts usually adduced by the advocates for a religious observance of the Sabbath. His view is, that Sunday observance is of human origin, and not of divine obligation,—but he is deeply convinced of the expediency and utility of Sunday being observed as a day of assembling for public worship and religious and moral instruction.

A New Geography for Children. By Harriet Beecher Stowe. Revised by an English Lady, by

direction of the Author. With numerous Illustrations and Maps. (Low & Co.)—Mrs. Stowe has made another launch on the Sea of Literature; this time her craft is less pretentious in form than on former occasions. It is chartered for the service of our Household Troops, and carries a freight of Geographical Stores, which are so judiciously arranged and so adapted to meet the requirements of our glorious "Infantry" that we hail its appearance with pleasure, and cannot doubt of its meeting with favourable winds and arriving safely in a good harbour. To drop the figure—now that we have come into port—Mrs. Stowe's 'Geography for Children' is an excellent little book for Christian school-rooms.

Brittany and La Vendée: Tales and Sketches, with a Notice of the Life and Literary Character of Emile Souvestre. (Edinburgh, Constable & Co.)—This translation—forming the seventh volume of "Constable's Miscellany of Foreign Literature"—brings to the firesides of the English reader a pleasant version of eight of Souvestre's Tales descriptive of the manners, customs and scenery of Brittany. These Tales are written in a style so simple and charming—and attain a moral elevation so rare in modern French literature—that we can give the translator our heartiest thanks for the task she has performed. In one of the Tales, 'The Boatman of the Loire,' there is a very powerful account of the breaking up of the ice on the upper reaches of that river, and of the terrible destruction of property on its banks. In the 'Lazzaretto Keeper,' there is an equally vivid description of the fearful desolation caused by the ravages of fever. The visitor to Brittany, anxious to gain from books an animated notion of the lives and manners of its sturdy and picturesque peasantry, can hardly do better than study these in Emile Souvestre's 'Tales and Sketches.'

May Flowers; being Notes and Notions on a few Created Things. By "Acheta." (Reeve.)—This book is almost, if not quite, as fascinating as its predecessor, 'March Winds and April Showers,' [see *ante*, p. 15]. The charm of it is, that the authoress speaks only about what she has seen and found in her own walks, and which anybody else might see and find also, if they were so minded, in the first hedge or garden they visit. No previous knowledge is required; but after reading it, the most ordinary walks will be thronged with objects of interest. To young persons we would especially recommend this book, as inducing and training a habit of minute observation,—a habit that brings its own reward in the "second sight" which can discern wealth and beauty when others can perceive simply nothing. The chapter entitled 'Bird and Man,' has a touching story of the capture of a goldfinch as told by itself, which must bring tears into the eyes of any one, except a *bird-fancier*. 'The Harpy that broods in every corner' is a chapter upon cruelty in different phases. It is evidently the author's own favourite; it has, however, a dash of fantastic sickliness which does not commend itself to us. 'Things and Thoughts in a Thicket' is a graceful chapter; but the one we prefer above all the rest is that upon 'Leaves of Insect Appropriation.' Shelley's

Poor banished insects whose intent,
Altho' they did ill, was innocent,

are lovingly described; even the tiny green millions, the canaille of leaf-destroyers, are tenderly touched, "their plump little bodies, green, living, moving honey-jars." Those wishing to make a present to young persons will find this an admirable gift book.

Wine: its Use and Taxation. By Sir James Emerson Tennent. (Madden.)—The treatment which this subject receives from Sir Emerson Tennent is purely financial. Wine, it is contended, is a luxury, not a necessity. The average consumption by individuals which was, seventy years ago, three bottles per head, is now reduced to one and a half; but this is traceable, the writer argues, to improved social tastes and habits, and not to increased duties. "Six bottle men" no longer exist. The rich drink less, and seldom stock their cellars. Coffee and tea, in fact, contend with wine in the favour of all classes, and the use of tobacco has had the same effect. Nevertheless, the English people, though inclined to be satisfied with smaller

quantities of wine, refuse to have it at any price, unless it be strong. This circumstance is a trait of national character, not a result of climate, for in Australia, where claret may be had at the price of beer, it is a drug in the market. No one in England likes a new wine, for even Marsala is only taken because it resembles sherry. In France, of course, other figures apply—the Parisians drinking at the rate of 216 bottles for every individual annually. Upon the whole, no reduction of the wine duty is advisable:—such is the sum of Sir Emerson Tennent's argument, which, combating that of Mr. Oliveira, is voluminously enforced by statistics and historical quotations. As a fiscal question, it is beyond our province; but we must remark, that many of the inferences appear to us at once inconsistent and gratuitous. The taxes on wine in Paris being equal to those in England, shows, says Sir Emerson, that high taxes are not incompatible with large consumption. But the point with a buyer is not *taxation* but *price*, and wine in Paris, however highly taxed, is by no means so dear as in London. The average value of the wine—"good, bad, and detestable,"—produced in France is sixpence-halfpenny a gallon.

The Army of the Future, at once Military and Industrial. By G. D. Snow. (Smith, Elder & Co.)—"In a military régime we see a type of what is highest. It is a form that the Divine government presented to the fallen creature." Mr. Snow's meaning is distilled in these words. He has been caught by the radiance of Pretorian scarlet and brass, and desires to see society under arms. His ideal of an army consists in a vast corps of Sappers and Miners, to spread over the three kingdoms a network of engineering lines, for public purposes. Merit, of course, is to advance every man in his career, half-military, half-mechanical. These quaint notions Mr. Snow upholds with considerable enthusiasm, but his portrait of a "just commander" marshalling all persons in their proper places, is so confused that we are unable to tell whether a human or a supernatural personage be intended.

The Southern Cross and Southern Crown; or, the Gospel in New Zealand. By Miss Tucker. (Nisbet.)—Miss Tucker's volume is addressed to Missionary Societies. It contains no particular information on New Zealand; but treats of personal and other matters connected with the various religious teachers and their disciples in that group. Of course a little amiable exaggeration is mixed up with the authoress's statement of labours and conversions; but her style, though trite, is unaffected, and her narrative sufficiently pleasing. It details the story of the New Zealand Mission, which has been attended with incidents very similar to those which accompany the progress of all Christian arguments with the heathen mind. If, therefore, we cannot say that Miss Tucker's book adds to our knowledge of the British Antipodes, we may introduce it to the notice of those whom it concerns as a simple missionary relation, aiming at good objects, and fervently written.

Parisian Etiquette: a Guide to the Manners of French Society in Paris. Translated from the French. (Shaw.)—It might have been hoped that with M. de Meilheurat's 'Manual' [*Athen.* No. 1395] we had done with good manners for awhile; but it seems not, since here is one more code of behaviour, imported, says its translator's preface, to instruct the English who are going over to see the *Exposition* how they may produce a good impression in Paris. "Knowledge," says this new professor, "is sometimes wearisome": politeness never tires. We suspect, however, that, like the writers of fiction,—who, as Mr. Dunlop and Mr. Keightley show us, have only some half-dozen eastern fables to vary *ad infinitum*, as primal material,—these manner-masters all draw on some one original handbook, which each successive professor patches and darns (should we not say embroiders?) with his own flourishes and arabesques. The pamphlet of *Αγωγος*, which ran through its score of editions during the last twenty years, and to which Lady Blessington lent an editorial hand (probably the *réchauffé* of some book still older),—a few passages in 'Pelham,' where a slender gold chain on a white waistcoat, over a

dainty shirt-front, was pronounced "the only wear" (passages, we think, which have been since suppressed),—and one or two other documents of the kind,—have been altered, annotated, served up in separate shreds and disguises, in England, in France,—also in America by Mrs. Mowatt, and by the Lady who knows how to deck the "masculine jocular," *Fanny Fern*. Here is some of the old trash (or treasure) set anew, in a sort of *toilette de boulevard*; but so suspicious in its airs and graces, that it will be safest not to accost it further, lest we prove to have been merely keeping company with an ancient acquaintance in novel habiliments.

America and the Americans. By W. E. Baxter, M.P. (Routledge.)—Mr. Baxter's object is to present a fair view of American politics and manners. Throughout his volume nothing is apparent but a thoroughly candid endeavour to appreciate the customs and institutions of the United States. These, with their marked novelties and peculiarities, exposed to the chill light of insular English feeling, are of course reflected through a somewhat distorting medium; but Mr. Baxter's failings as a social writer are not such as will be ridiculed or resented, even by the susceptible people of the Union. In common with all writers who judge from partial experience, he depicts in general terms, from special observations, which sometimes involves injustice to himself, as well as to the nation to which his strictures apply. Among errors of statement thus originating, it will be enough to cite one:—"In America," says Mr. Baxter, "thought is as free as the air on the prairies;—an educated public themselves hold the reins of power;—one may say what he pleases, and go where he pleases, 'none daring to make him afraid.'" But is not this boundless liberty of thought and speech incompatible with the despotism over opinion, described in another page as more vindictive and fierce than that of Radetzky or the late Russian Czar? Elsewhere Mr. Baxter characterizes the Americans as an expectorating race, and exaggerates stupendously for the sake of effect. With all these discrepancies between its spirit and its plan, the book is liberal, high-toned, and interesting. It is sketchy in style, as befits a series of lectures; but contains a certain total of information, well selected and condensed. We might add, that works on the United States are multiplying so rapidly, that the reader must soon be tired of skimming the surface of a subject bearing so strongly on the future interest of the Old World; but this discussion is not likely to be neglected for want of opportunity.

Sharpe's Road Book for the Rail. (Bogue.)—The plan of this Road Book, imitated from another, which has the advantage of illustrations, is to trace the lines of railway in a central column, with references to all the principal localities and objects of interest to the right and left. It seems to have been carefully executed, though its information is of the briefest. Brevity, however, is preferable to monotony in a railway companion.

Latin Word-Building; with an Etymological Vocabulary. Designed for the Third Latin Book, by the late Rev. T. K. Arnold, M.A. To which are added, Outlines of Form-Building, and an Appendix of Questions. (Rivingtons.)—We are sorry to observe a disposition still to make a scarcely fair use of the late Mr. Arnold's name. There are few who would not infer from the above title that he was the author of this work; whereas the truth is, it was merely "designed for the Third Latin Book" by him,—in other words, he intended to avail himself of the labours of the real author, who is nameless, by introducing the book into his series under that title. The part which Mr. Arnold took in the matter consisted in "adapting and arranging" the Vocabulary from a German work, and this happens to be the least valuable part of the whole. The Word-Building, which comprises the derivation and composition of words, and the Form-Building, which treats of inflectional forms and changes, constitute the really useful portion of the volume. They are based upon sound philological principles, and exhibit an acquaintance with the researches of the most scientific of modern inquirers. They may be studied with

great advantage by those who are already familiar with the ordinary facts and principles of the grammar.

The utility of pictorial illustration in educational works is well exemplified by M. L. C. Ragonot, in his *Vocabulaire Symbolique Anglo-Français*, or *Symbolic French and English Vocabulary*, which contains the French and English names of familiar objects, with drawings of many, and idiomatic phrases relating to them. There cannot be a better method of teaching young people the *matériel* of the French language.—A Third Edition of Mr. J. B. Spencer's *French Pronunciation made Easy* has appeared.—*Hammond's Practical Stenographer, and Expedite Long Hand Writer*, is a modification of Taylor's system of short-hand, with suggestions for abbreviating ordinary writing.—We have received specimen-sheets of a new German philological work, entitled *Etymologische Untersuchungen auf dem Gebiete der Romanischen Sprache*, von C. A. F. Man, or *Etymological Investigations on the Subject of the Romance Language*. It is a dictionary upon a large scale, and of a high order, containing a full account of the origin, history, and usage of each word, illustrated by numerous references to works of authority in various languages.—*Murphy's Historical and Statistical School Atlas* consists of ten small maps, with statistical information round the borders and in the body of each.

Three additions have been made to Mr. Parker's excellent series of "Oxford Pocket Classics." They are the *Hippolytus* of Euripides, and the *Catiline* and *Jugurtha* of Sallust. Both texts and notes have been carefully prepared by competent scholars. The convenience of size and reasonableness of price render these editions very suitable for school or pocket use.—Those who cannot construct questions and exercises on Greek grammar may advantageously employ *Præcis Græca: a Series of Elementary, Progressive, and Miscellaneous Questions and Examination Papers on Greek Grammar*, by the Rev. J. D. Collis, M.A. It is especially adapted to Wordsworth's Grammar, but may be used with any other.—Mr. Tilleard's *Lecture on the Method of teaching Grammar* presents no striking feature.—Another hopeless attempt has been made to teach French pronunciation by means of printed directions. It is called *New Method of Reading French without Spelling*, by M. Maximilien Lardeur.—We have before us two copious collections of arithmetical examples for practice—*Exercises in Arithmetic*, by R. Rawson; and *Exercises in Arithmetic systematically arranged*, by the Rev. W. F. Greenfield, M.A.; both specially adapted for class use. Mr. Greenfield is the author of a superior work on the 'Practice and Theory of Arithmetic,' to which the present volume is intended to serve as a companion.—We are happy to witness a fresh effort to present the subject of Logic in a shape suitable for study in schools. Mr. J. D. Morell—whose larger productions on mental science, and whose official position as Her Majesty's Inspector of Schools, sufficiently attest his competency for the task—has successfully executed it in his *Handbook of Logic, adapted specially for the use of Schools and Teachers*. While adhering to the old Aristotelian method, he prepares the reader for appreciating modern improvements, and is careful to explain the principles upon which the rules depend. Within a brief compass are comprised all the essentials of the science, and exercises for practice are appended.

LIST OF NEW BOOKS.

- Bell's English Poets, Vol. 18, 'Shakespeare,' 4s. 8vo. 2s. 6d. cl.
 Biddulph's (Capt.) Topographical Sketches of Ground before Sevastopol, Part 2, folio, 4s. swd.
 Bohn's Cheap Series, 'Life of Washington,' by Irving, Vol. 1, 2s. 6d.
 Bohn's Classical Library, 'Natural History of Pliny,' Vol. 2, 5s. cl.
 Bohn's Stand. Lib., 'History of Russia,' by Kelly, Vol. 2, 5s. cl.
 Book of Common Prayer, as now in Use, and as Revised 1689, 3s. 6d.
 Burke's Genealogical Dictionary of Ianded Gentlemen, Vol. 1, 10s. 6d.
 Cooper's (J. F.) Eve Edinham, new edit. 4s. 8vo. 1s. 6d. bds.
 Croly's (Dr.) Salathiel, new edit. post 8vo. 10s. 6d. cl.
 Curran's (W. H.) Sketches of the Irish Bar, 2 vols. post 8vo. 21s. cl.
 Doctrine of the Real Presence, Part 2, 8vo. 4s. cl.
 Frank Milnamy, by Capt. Marryat, new edit. 4s. 8vo. 2s. bds.
 Garrard's (Dr. A. B.) Essentials of Materia Medica, 6s. 6d. cl.
 Gill's (Dr.) Cause, God, and Truth, new edit. royal 8vo. 6s. cl.
 Glen's Small Tenements Rating and Vestry Acts, 1850, new ed. 2s.
 Hooper's (Dr. Geo.) Works, new edit. 2 vols. 8vo. 10s. cl.
 Jowett's (W.) Land, Labour, and Gold, 2 vols. post 8vo. 21s. cl.
 Jerram's (Rev. C.) Memoirs, edited by Rev. J. Jerram, 10s. 6d. cl.
 Letter upon Quakerism, 4s. 8vo. 1s. 6d. cl.
 Macall's (W.) National Missions, post 8vo. 10s. 6d. cl.
 Brother's Keeper, by Miss Wetherell, 4s. 8vo. 1s. bds.

National Miscellany, Vol. 4, 8vo. 7s. cl.
 Next-Door Neighbours, by Author of 'Temptation,' 3 vols. 31s. 6d.
 Old Week's Preparation, edit. by W. Fraser, 18mo. 2s. cl.
 Percival's Hippopathology, 6 vols. new edit. 85s. 6d. bds.
 Prichard's Natural History of Man, 4th edit. 2 vols. royal 8vo. 38s.
 Reynolds (Dr. J. R.) On Diseases of the Brain, 8vo. 5s. cl.
 Riadore On Treatment of Mucous Membrane for Cough, 4s. 8vo. 3s.
 Select Library of Fiction, 'Cranford,' 4s. 8vo. 2s. bds.
 Smith's (Rev. Sydney) Memoir, by Lady Holland, 2 vols. 8vo. 28s.
 St. John (Bayle), The Louvre, post 8vo. 10s. 6d. cl.
 Stories and Lessons on the Catechism, edit. by Jackson, Vol. 1, 5s.
 Stories from a Screen, by Dudley Costello, post 8vo. 4s. 6d. cl.
 Thirlwall's History of Greece, new edit. Vols. 5 to 8, 7s. 6d. each, cl.
 Traveller's Lib., 'Life with the Zulus of Natal,' by G. H. Mason, 2 Parts, 1s. each, swd., and 1 vol. 2s. 6d. cl.
 Truths Illustrated by Great Authors, 4th edit. 4s. 8vo. 6s. cl.
 Vandenhoff's (G.) Art of Elocution, 4s. 8vo. 5s. cl.

NEW EXPEDITION INTO CENTRAL AFRICA.

THE limits of the great unexplored region of Africa may be roughly indicated by the parallels of 10° north and south from the equator, and extending from Adamaua in the west to the Somanli country in the east. This extensive region is just touched by the routes of South-African explorers, Livingston and Lacerda,—and by the Abyssinian travellers, by Barth, Overweg, Vogel, and the Chadda Expedition in the north. The greatest inroad into this unknown region has been made by travelling up the Bahr el Abiad, or White River, on which and along which there has been a continuous tide of explorers ever since 1835, when the Egyptian Government despatched an Expedition up this river,—which was followed by several others of the same kind, as well as by Austrian Catholic missionaries, by many traders and adventurers. The extreme points reached on this river by any of the travellers lay between 4° and 5° north latitude.

At the westernmost bend of the Bahr el Abiad, in about 9° 10' north lat. and 29° 15' east long., this river opens out into a rather ill-defined lake or marsh, by some called No, or Nu,—by others, Birket el Ghazal,—by others still, Lake Kura. Its circumference seems to vary at different times; and M. Brun Rollet in 1851 found it of very small dimensions. Into it, from the west, according to a variety of sources, is said to run an immense river, formed by two large branches, of which the one has a westerly or W.N.W. direction; the other one from the south-west. The name of the latter is mostly given as Bahr il Ada,—that of the former as Bahr el Ghazal, Bahr Kulla, or Misselad,—the latter names being also applied to the united main stream. The headwaters of these rivers are supposed to extend to the borders of Waday, Bagirmi, and even Adamaua. But so little is known of the region thus described as the basin of the river received by Lake No, that nothing can be stated with any degree of certainty, except that certain rivers exist there, and that these rivers belong to the basin of the Nile. Thus, Dr. Barth, from information he received while in Bagirmi, from persons on whom he had reasons to place reliance, lays down a river called Bahr il Ada in about 7° north lat. and 22° east long. Greenwich, running eastward. In a report from Cairo, dated the 22nd of October, 1843 (see *Augsburg Zeitung*, Nov. 18, 1843), it was stated that a German traveller had been in Darfur, thence travelled for seven days due south, and came upon a river, on which he embarked, and on it ultimately reached the White River. This may or may not be true:—our present information relating to that region is altogether vague and uncertain. The extreme point reached by Europeans on the north side is Kobeih, the capital of Darfur, in 14° 11' north lat. and 26° 55' east long. Greenwich,—first visited by Browne in 1793. The furthest point reached by Barth (or any other European) from the west is Maseña, the capital of Bagirmi, the position of which may be taken at 11° 40' north lat. and about 16° east long. Greenwich. When in Bagirmi, Dr. Barth collected an immense amount of information respecting the countries between it and the Nile, which information he connected and laid down on the map. It relates, however, more particularly to the region east and north-east from Maseña, in the direction of Khartúm, along the various caravan and pilgrim roads, which, unfortunately, do not extend in the direction of Lake No or south of it. The distance between Maseña and Lake No nearly amounts to 800 geographical miles, being about equal to that between Kuka and Timbuktu.

The feeders of Lake Tsad Dr. Barth traced to about 13° east long.; there a broad mountainous region extends from north to south, which, it is little doubtful forms the line of waterparting between the basin of Lake Tsad and that of the Nile, and gives birth to the rivers running into the Bahr el Abiad at Lake No.

It is from Lake No that the new Expedition is going to penetrate to the westward, up the Bahr el Ghazal. This Expedition is fitted out by, and under the direction of, M. Brun Rollet, a Sardinian, who for the last twenty-three years has been residing in Khartúm, chiefly engaged in mercantile pursuits. This gentleman has already ascended the Bahr el Abiad several times from Khartúm as far as 5° north lat.,—of which explorations a full account will shortly be published. As may be supposed, M. Brun Rollet is intimately acquainted with the countries of the White River, its inhabitants and natural resources. He has been very successful in his mercantile transactions, particularly in ivory and gum, so abundant in those countries,—the yearly export of the former amounting at present to about 800 cwt. But he has reasons to know that the country he now proposes to explore is much richer in that and other articles of commerce. This Expedition will consist of six boats, manned by about sixty men, all well armed. M. Brun Rollet is strongly built and inured to the climate, of scientific attainments, and has been aided in his scientific outfit and preparations by the *savans* of Paris and Turin. The Expedition is entirely a private one, and undertaken by his own means, the French and Sardinian Governments having given him special letters of recommendation to the Pasha of Egypt.

M. Brun Rollet is at present in Cairo, and will shortly start for Khartúm, where his final preparations will be made for the ascent of the Bahr el Abiad and Bahr el Ghazal, in the direction of Waday. It may be noticed that the latter river has mostly been called Keilak in late years; but I am informed by M. Brun Rollet that the Arabs and the black natives of those countries do not know it under that name, but principally by that of Bahr el Ghazal, sometimes Misselad.

AUGUSTUS PETERMANN.

FOREIGN CORRESPONDENCE.

Naples, May 22.

Prof. Palmieri, of the Observatory here, has made a valuable Report on the Eruption. It appears that the needles of the apparatus of Lamont, which had been slightly affected on the 29th of April, were greatly agitated on the 30th; and on the following day the eruption broke out. No fewer than ten craters opened in the course of a few hours, followed by many smaller ones, all throwing out lava and heated stones, accompanied by subterranean thunders and ruddy masses of smoke. These streams, descending into the plain, called the "Atrio del Cavallo," formed there a sea of fire, whose shores were on either side the mountain of Somma and the lava of 1850. The materials which formed this sea, swelling from moment to moment, at length poured into the "Fosso della Vetrana," forming that wonderful cascade of which I have spoken. The enormous quantity of lava, ever increasing, filled up the valley at the back of the Hermitage; and pouring into the "Fosso del Favaone," formed another cascade, and rolled down in the direction of several townships in the valley. Early in the progress of the eruption, the lava was 100 palms in depth; and it was considered that if another such an accumulation took place, which certainly has now happened, the Hermitage and the Observatory would be in danger. In fact, they have been vacated, and the instruments removed. The precise number of craters it will be impossible to determine till all is tranquil. The same may be said of the materials ejected; though we have observed chloride of iron, gaseous matter destructive to life, and muriatic acid gas.

The magnetic apparatus of Lamont was used by Prof. Palmieri on the occasion of the earthquake of Melfi; and the results were such as to induce him to think that it would not be mute, as the event has proved, on the occasion of an eruption

of a volcano. Anticipating, as it has done, such a catastrophe by several days, it is one of the most beautiful and convincing proofs of the practical applicability of science to the service of human beings that modern days has furnished us with. How many lives might have been saved,—how many may yet be saved by the needles of Lamont!

Passing from magnetism to electricity, Prof. Palmieri says, that on the first day of the eruption observations were impossible; but on the clouds clearing off, he ascertained that there was a great tension of positive electricity, which increased considerably on the fall of some ashes on the evening of the 2nd inst. In general, the electricity was always stronger when the wind blew towards the Observatory. It manifested itself very vigorously to the moveable conductor, not always to the fixed conductor; "and during the fall of the ashes," he says, "I verified a curious fact, which I have observed during the fall of rain, also, that whilst with the moveable conductor we had positive electricity, with the fixed conductor a faint, negative electricity was observed." During the course of the greater quantity of lava in the "Fosso della Vetrana," on the north of the Observatory, the thermometer stood 8° higher than on the opposite side of the building. The humidity has been various during the eruption—sometimes there being a difference of 6° or 7° between the thermometers of the Psicometer of August. The barometer during the first days was very low, at 701; it then began to ascend, and on the 5th was 710. The wind has been changeable from east to west, by the direction of the south,—often being excessively vehement for a few hours, followed by an unusual calm. The smoke has emitted the usual odour.

The lava, after falling into the Fosso del Favone, progressed from that point as from the apex of an angle, in two directions,—one bearing down on the townships Cercola, St. Sebastiano, and Massa di Somma; the other, at a later period, in the direction of St. Giorgio a Cremano, and St. Jovio, close to Portici. The first branch being the earliest in order of time, I speak now of that. On the 10th inst. the lava had arrived within 3,850 palms of Cercola; on the next day it advanced 500 palms more, and there it has remained almost stationary; whilst during the last ten days the mountain has been pouring down its greatest fury by the other branch towards St. Jovio. As I had already been to the summit of Vesuvius, and watched the lava running rapidly down the sides, then flowing through a plain, and then hurling itself over a precipice until it was lost to the eye—I conceived a strong desire of intercepting the fiery monster in its course, coming face to face with him, and watching his every movement. To do so it was necessary to diverge from the road by Portici, and make the *détour* of the mountain on the north; and instead of performing any extraordinary feat, I found that I was but one of tens of thousands who were all bent in the same direction. The first evening of my visit was on a Sunday, when the peasantry of all the country round for many miles had assembled to look at the river of fire, and perhaps as much at the living stream of human beings flowing in from Naples. The bridge of Cercola was then passable, the villages in the neighbourhood were still open, and emerging from the last a few yards brought us face to face with the lava. It was pent within the deep banks of a wide bed, and was flowing down, not like a fluid, which is the ordinary motion of it, but like a mountain of coke, or at times like highly gaseous coal. It split, and crackled, and sparkled, and smoked and flamed up, and ever moved on in one vast compact body. Pieces detaching themselves rolled down, leaving behind a glare so fierce that I could have imagined myself at the mouth of an iron furnace; and as every mass fell down with the noise of thunder, or rolled sideways from the upper surface into the gardens and vineyards, the trees flamed up, and the crowds uttered shouts of admiration and regret.

Nor was it the lava only which seemed bent on the work of destruction; for in every direction resounded the axe of the wood-cutter, and masters and men were cutting down trees and pulling up vines in those grounds which the fire was approach-

ing. In some places they were too late, as a general conflagration told us. It often happened, too, that careless fellows broke off the ends of their torches, which, falling on the dried-up grass, quickly burnt up all the undergrowth. Following the course of the stream, or rather tracing it back to its source, we walked by the side of that huge leviathan, through highly-cultivated grounds, now trodden under the feet of multitudes, until we arrived at the edge of a precipice, whence we looked into the boiling flood, fed by the cascade of lava, which was pouring down from above. The sublimity of that spectacle is indescribable; and were I to live the life of Methusalem, the impression it made upon me would never be obliterated. I can think of nothing else; and when I close my eyes, still that stream of fire dazzles my sight. Full 1,000 feet fell that glowing, flaming Niagara, in one unbroken sheet, over the precipice at the back of the Hermitage and the Observatory. Forming, at first, two cascades, the interval between had been filled up by the immense masses of scoriae, which the mountain had thrown out; and now it majestically rolled down one continued stream into a lake of boiling fire, and then descended into the plains which it had left. There were times when projections in the face of the lava seemed to impede its course, or when the adhesive character of it appeared to bind it up in a temporary rigidity; then, behind those projections, accumulated tons upon tons of material. It was a moment of breathless expectation:—all eyes were fixed upon that one blackened spot. There was a slight movement:—one heard a click; a few ashes and stones fell down like *avant-courriers*, and down went a mountain of solid fire into the boiling, smoking abyss, with the noise of thunder. The heat and the glare of light were at such times almost insufferable; and, partly to avoid it, and partly as if the mighty fall had communicated its movement to us, we all waved back as by one impulse. The branch on the right, which has since flowed down to St. Jovio, in the direction of Portici, was there only an infant rivulet, stealing on its insidious course through a wood of chestnut-trees and wrapping them all in flame. Alas! how much injury has it since occasioned,—how many trees teeming with the promise of fruit and the grape has it laid low,—how much land has it covered with tons and tons of scoriae, whereon nothing more will grow for a century but the hardy cactus. In some places a hundred, in others two or three hundred, and in one place a thousand feet in width, it rises to the height of one or two hundred feet, and even more. We walked by what was a week ago a deep, though dry, watercourse, and looked like pigmies up to the top of the mountain of lava by our side; and this mountain was not one single excrescence on the face of the earth, it was a portion only of that marvellous river which, issuing from the side of the cone, ran through the valley by the Hermitage, broke over that precipice of one thousand feet in depth, and then dividing itself into two branches terminated a course of eight or nine miles in face of five or six flourishing and populous villages in the plain. From St. Jovio the summer residents have fled, and taken their furniture with them. At Cercola and Massa, at the termination of the other branch, a bridge has been cut away so as not to impede the free course of the lava; several houses have been removed for the same reason, and several have been either swept entirely away or half surrounded. In this state things remained till Sunday last; a kind of armistice had been established between the mountain, on the one hand,—and the Saints, Ferdinand the Second, the bones of St. Rocco, and the Cardinal, on the other. On Sunday last, however, above all other days, the mountain broke the armistice, and the lava has been galloping, not flowing, down ever since. As it flows, however, over the hardened lava of last week, the danger is not imminent; but if it continues, woe to Cercola and Massa. In the St. Jovio direction it does not flow. Again the interest is reviving; Vesuvius presents a more magnificent spectacle than ever, and crowds still throng the best points of view at night, or run down to the mountain.

H. W.

OUR WEEKLY GOSSIP.

Prof. Graham—in consequence of his nomination to the Mastership of the Mint—has resigned the Chair of Chemistry at University College. Mr. William Adam has declined the Chair of Bengalee.

Lord Londesborough received the members of the Numismatic Society on Monday evening. The company was not very large—literary and scientific celebrities being generally in the country in Whit-week,—but the collection of antiquities was unusually large and excellent.—Mr. Weld holds a reception, on Wednesday next, at the rooms of the Royal Society.

A paragraph, which originated in the 'Table Talk' of a cotemporary, and is now going the round of the newspapers, respecting the Monument of Mr. Lockhart, is, to a great extent, erroneous. Although many of the friends of the deceased wished to pay a tribute to his memory, the proposal to do so by erecting a monument in Dryburgh Abbey originated with the Right Hon. Sir H. Ellis; and was intended in the first instance to be confined to a few of the most intimate associates of the biographer and son-in-law of Sir Walter Scott, including Dean Milman, Sir Roderick Murchison, Lord Mahon, Dr. Fergusson, Mr. Christie, Mr. John Murray, and Mr. Cheney. But as soon as the project became known, several noblemen and gentlemen, less intimately connected with the late Editor of the *Quarterly Review*, desired to be included in the list of subscribers. Among these are, the Dukes of Northumberland and Buccleuch,—Lords Ellesmere, Shaftesbury, Ashburton, Wyndford, and Polworth,—Sir Edwin Landseer, and others. The paragraph alluded to is also erroneous in stating that there are any *chief* subscribers:—all the friends of Mr. Lockhart will contribute exactly the same sum towards this Dryburgh Monument.

Plans for a Museum of Natural History, in connexion with the Royal Dublin Society, have been approved by the Treasury,—and the buildings will be forthwith erected.

Mr. Wyld has opened a new room in Leicester Square—within the "Great Globe"—with a large model of Cronstadt, the island on which it stands, the fortifications by which it is defended, and the shores from which it may be seen. A lesser model—in the same room—shows, on a smaller scale, the natural features of the entire Baltic, and enables the spectator to follow all the movements of the British fleet. At present, these models are incomplete; but it is evident already that, when they are finished, they will vie in interest with the model of Sevastopol in the adjoining room.

Mr. Fitzpatrick has addressed to us a long letter, "protesting" against our strictures [*ante*, pp. 577-8] on his references to scandals in the family of Lord Cloncurry.—1. He says that the Peerage books mention the facts. Of course they do; but the question is, whether a biographer is justified in assigning a whole chapter to such matters?—2. He contends that "calumnious breathings" pursued the late Lord Cloncurry in these scandals. But his Lordship wrote his own life, and it does not appear that Mr. Fitzpatrick has any warrant from the relatives or friends of the deceased peer to enter on these delicate affairs.—3. He contends that he had a right to assail the first Lord, as he was "unquestionably a worthless, time-serving man." This right we do not dispute. But his taste in vilifying at length an obscure peer, the father of his hero, is open to opinion.—The fourth objection asserts a fact against our notice:—"I cannot conclude without assuring the public that the only inaccuracy which you thought fit to notice formed the first of seven corrections in the *errata* slip attached to the volume."—It is true we did not see the slip; nor was it of much consequence. The error was cited only as a sample. As, however, Mr. Fitzpatrick plumes himself on his minute accuracy, we recommend the following for an additional "slip." He says (p. 416), "It is not, we believe, generally known that Lord Anglesey kept a backstairs cabinet composed of," &c. &c. The fact stated by Mr. Fitzpatrick as "not generally known," is told in

Lord Cloncurry's 'Autobiography' (edition of 1849, p. 332). At p. 485 he writes, that in the O'Connell case the "House of Lords contemptuously set aside the decision of a Dublin jury." There are two inaccuracies in this short sentence. The law Lords divided, three against two; there was nothing "contemptuous" in their proceedings, and the technical legality of the conviction, and not the "verdict" of a "jury," was the point at issue.—He states at p. 153 that Father O'Coigley collected "materials to form a History of the Rebellion of 1741." What Rebellion of 1741? Mr. Fitzpatrick is a century after date. So, at p. 435, he tells us that the famous statue of "William Prince of Orange," at College Green, had "for two hundred years braved the battle and the breeze."—In alluding to persons, Mr. Fitzpatrick is equally inaccurate, even when their official celebrity ought to have kept him right. At p. 403 he promotes a puisne Judge to be *Chief* Baron Smith,—at p. 480, he talks of "Viscount Eliot" in place of "Lord Eliot." He writes, p. 416, "Villars" for "Villiers," the surname of Lord Clarendon. At p. 44, we have "Lord Buckley" for "Lord Bulkeley"; and, p. 485, "Coleman" for "Colman, the dramatist." At p. 162 and p. 266, we have "Lord Vassall Halland." Through the volume, (pp. 141, 147, and 584), Mr. Daunt has "M.P." to his name, because he was in Parliament for a few months twenty-three years ago. At p. 113 he tells how a nobleman returning to town from Croydon found it necessary (half a century ago) to cross Blackheath. He says at p. 222, that by the "stipulations" at the time of the Union, the Catholics were entitled to "a total, unqualified, and immediate Emancipation." He evidently does not know of the "Veto" propositions of the period, which were far from being "unqualified."—There are, besides, many assertions in the book which are wholly beyond our cognizance; as, for instance, p. 436, "The popular party in Ireland Lord Mulgrave tranquillized with a vengeance,"—and the volume, *passim*, may be consulted for similar inaccuracies. Even in his slip of *errata* Mr. Fitzpatrick prints "Denys" for "Denis," and "Philipps" for "Phillips."

We understand that Mr. Anderson, who returned last September from a four years' exploration in South-western Africa, having reached, by a hitherto untrudged route, the Lake Nyami, is about to publish a Narrative, including the overland journey from Walvisch Bay, with notices of previously unvisited regions within the tropics, and descriptions of the tribes and countries as far south as the newly-discovered copper localities about the Orange River.

A ponderous bluebook, entitled 'Further Papers relative to the recent Arctic Expeditions in Search of Sir John Franklin,' extending to 953 pages, and containing a great number of maps, has recently issued from the Admiralty. It brings down the official history of the search for the lost Expedition to the termination of Sir Edward Belcher's proceedings. The narratives of the sledge Expeditions are extremely interesting, and show that the officers who conducted these arduous explorations left no means untried to find traces of their unfortunate countrymen.

The Annual General Meeting of the members of the London Library was held on Saturday last, at their house in St. James's Square. The Bishop of Oxford presided. By the Report of the Committee, it appears that the Library has lost 43 members during the past year; the additions amounting to 26, and the temporary or permanent losses to 69. The income during the same period, including a balance of 143*l.* 16*s.* 1*d.*, amounted to 2,058*l.* 10*s.* 7*d.*, and the expenditure to 1,939*l.* 11*s.* 4*d.* With the view of recruiting the Society's finances and members, a motion was brought forward by the Committee, to the effect that it shall be competent for every member to nominate one person, who, on being approved by the Committee, shall, by the annual payment of 3*l.*, instead of the former payments of 6*l.* entrance fee and 2*l.* yearly subscription, be entitled to all the privileges of the library. After some discussion this measure was carried.

A Correspondent asks, "whether the British

Museum is entitled to receive a copy of new works published in the Colonies"? Assuredly:—the deposit of a copy in the National Library of every work published within the limits of the Empire, and entitled to a protection of its copyright, is necessary.

M. Cabany, the "proprietor" of a romance which he very preposterously ascribes to Sir Walter Scott, has addressed to us a note of "correction":—

"You cannot refuse insertion to the present communication, on account either of its 'length' or its 'inconsequence' to me personally, and to yourself judicially. In your notice of 'Moreduin,' in the last number of the *Athenæum*, you connect my name with the *Administration des Archives Historiques*. The *Société des Archivistes de France*, of which I have the honour to be *Directeur Général*, has no connexion whatever, and never had, with the individual who obtained the unenviable notoriety to which you refer. To this correction of a mis-statement, personally injurious, which I have a right to demand, I shall merely add, that the new edition of the Introduction of 'Moreduin,' now preparing for the press, will carry the inquiry into the hypercriticism of the friends of the great Scottish novelist, from its effect upon himself to the consequences of it to themselves, when extended to his memory and to his posthumous works. I am, &c., E. DE SAINT-MAURICE CABANY."

"Paris, May 28."
—We take the liberty to inform M. Cabany that we made no "mis-statement." We did not—as he infers—assert a connexion between the "*Société des Archivistes*" and the "*Administration des Archives Historiques*." We were—and are—profoundly ignorant of both institutions. We are unacquainted with their antecedents, their relations, and their productions. M. Cabany told us formerly that he is "the head of a learned society":—and we assume that he is so. But we do not know the fact of our own knowledge. On the same authority, we learn that M. Cabany "professes" biography,—the materials for which are sent to him from all parts of Europe." More than this we did not say. If M. Cabany had applied to the interpretation of our words that delicate knowledge of the English language which enables him to pronounce on the style of Sir Walter Scott, he would have seen that the other "professor" of biography was brought in as an illustration—not as an accusation. The threat of a new edition of M. Cabany's 'Introduction' need not alarm the reader. The squib is fired, and what remains is only a stick and some spoiled paper.

Mr. Bladon sends us the following correction:—
"In the *Athenæum* of May 19, p. 584, col. 1, line 12, you say 'this new work by Mr. Westwood,'—the word new is a slip; it is merely a re-issue of a work published in 1840–1, and as such it was alluded to by the President of the Entomological Society at the last annual meeting. I believe there is no Entomologist in the empire but would be glad to hear that Mr. Westwood had written any new work either upon Butterflies or any other order of Lepidoptera; he has written lately a Supplement to Wood's 'Lepidoptera of Great Britain.' I have not received it yet; but I understand it contains 5 plates, with 180 figures of Moths and Butterflies not included in the 'Index Entomologicus.' It is singular, but both *Tail's Magazine* and the *Westminster Review* allude to the re-issue as a new work."

"I am, &c. JAMES BLADON."

The six days' sale of the Baker Collection closed last week. In the interest of the sale and the prices obtained, the dispersion of this very choice library almost recalled the days of Roxburghe enthusiasm. Mr. Baker's books—in very excellent binding—realized 1,100*l.* The chief lot was a first edition of Shakspeare, described as the only copy known with the two leaves which were cancelled in *As You Like It*. This lot produced 163*l.* 16*s.*, at which price it was secured—like so many other of our best things—for America. Among lots of minor interest were Butler's *Hudibras*, 2 vols. large paper, 21*l.*—Common Prayer-book, engraved throughout by Sturt, 8*l.* 12*s.* 6*d.*—Dibdin's *Tour in France and Germany*, 3 vols., with several of the original drawings by Lewis, 168*l.*—*Galerie du Palais Royal*, 3 vols. 40*l.* 10*s.*—*Galerie of Old Masters*, by Tresham, Otley, and Tomkins, coloured plates, 43*l.* 6*s.*—Stubbs's *Anatomic of Abuses*, a work containing an account of odd or disused customs, 9*l.* 10*s.* Among the curious and costly Autographs were *Officium Liber*, a beautiful manuscript on vellum, with 17 miniature paintings, 157*l.* 10*s.*—Charles the First to the Marquis of Ormond, a most interesting letter, in which he declares war preferable to a dishonourable peace, and prefers "the chance of war then to give my consent to any such allowance of popery as must evidently bring destruction": this

sold for 71*l.*—Prince Rupert to Charles the First, 13*l.* 13*s.*—Earl of Strafford to his wife, while a prisoner in the Tower, expressing his belief that there was nothing capital in the charge against him, or that, "at the worst, His Majesty will pardon all": this interesting relic produced 40*l.* 10*s.*—

Cardinal Wolsey's autograph signature to a letter addressed, "To my loving frende Thomas Hennege," 8*l.* 2*s.* 6*d.*—Charles the First to Prince Rupert, 5*l.*—Sir Walter Scott to the Rev. Dr. Dibdin, in acknowledgment of the honour conferred on the Author of *Waverley* by his election as a member of the Roxburghe Club, and consenting to be his *locum tenens* until the anonymous author came forward to claim the appointment in *propria persona*, 8*l.*—General Washington, a letter of acknowledgment for his commission as lieutenant-colonel, 6*l.* 2*s.* 6*d.* The Prints also brought good prices. Among these the more interesting were:—Christ crowned with Thorns, by Bolswert, after Van Dyck, 9*l.* 15*s.*—La Vierge aux Rochers, by Desnoyers, after Leonardo da Vinci, 19*l.* 5*s.*—Houbraken's Heads of Illustrious Persons, proofs, and supposed to be unique, 201*l.* 1*s.* 6*d.*—The Reading Magdalen, after Correggio, by Longhi, a splendid proof, and considered the perfection of pictorial and chalcographic art, 25*l.*—St. John, after Domenichino, by Müller, unlettered proof, 25*l.*—Venus and Danae, by Sir R. Strange, after Titian, 27*l.* 10*s.*—The Musicians, by Wille, after Dietrich, 27*l.*—Paternal Instruction, better known as "the Satin Gown," from a picture now in Lord Ellesmere's collection, and considered the *chef-d'œuvre* of Wille's graver, 35*l.* 10*s.*—Phaeton, by Woollett, 17*l.* 10*s.*—The Fishery, by Woollett, (his *chef-d'œuvre*), 35*l.* 10*s.*

Among the manuscripts of the late Mr. Hope, just sold in Paris, were a few which are not unworthy of a passing word. A missal in folio of the sixteenth century, with 26 beautiful miniatures, and richly bound, brought 5,500 francs.—a Prayer-Book, 8vo., on vellum, 144 leaves, and 13 miniatures, 950 francs.—another, written for Madame de Chamillart, 8vo., on vellum, of 401 pages, a miniature and ornamental initials, with the name of the calligraphist, Le Couteux, upon it, 555 francs.—and another, said to have belonged to Charles the Seventh, and sold for 98 francs in 1776, 325 francs. Among the books were the '*Galerie des Peintres Flamands, Hollandais et Allemands*,' Paris, 1792, 3 vols., folio, proof engravings, 685 francs.—full-length portraits of the personages of the Court of Louis the Fourteenth, under the title of '*Messieurs et Mesdames à la Mode*,' folio, 390 francs.—'*Roland Furieux*,' translated by D'Ussieux, Paris, 1775, 4 vols., 4to., bound in morocco, with proof engravings, 630 francs.—and '*Lettres de Madame de Sévigné*,' Paris, 12 vols., on India paper, bound in green morocco, with Mr. Hope's arms on the cover, with a thirteenth volume, containing 1,500 portraits and views, 1,890 francs. The sale realized an aggregate sum of 33,800 francs.

ROYAL ACADEMY OF ARTS, Trafalgar Square.—THE EXHIBITION OF THE ROYAL ACADEMY IS NOW OPEN.—Admission (from Eight to Seven o'clock), 1*s.*; Catalogue, 1*s.* JOHN PRESCOTT KNIGHT, R.A. Secretary.

SOCIETY OF PAINTERS IN WATER-COLOURS.—THE FIFTY-FIRST ANNUAL EXHIBITION IS NOW OPEN, at their Gallery, 5, Pall Mall East, close to Trafalgar Square.—Admittance, 1*s.*; Catalogue, 6*d.* JOSEPH J. JENKINS, Secretary.

THE SECOND ANNUAL EXHIBITION OF THE FRENCH SCHOOL OF THE FINE ARTS IS NOW OPEN daily, from 10 to 6 o'clock, at the Gallery, 121, Pall Mall, opposite the Opera Colonnade.—Admission, 1*s.*; Catalogue, 6*d.*

GALLERY OF GERMAN ARTISTS.—THE THIRD ANNUAL EXHIBITION OF THE WORKS OF MODERN GERMAN ARTISTS, IS NOW OPEN daily, from 10 till 6.—Admission, 1*s.*; Catalogues, 6*d.*—Gallery, 168, New Bond Street, next door to the Clarendon.

PATRIOTIC ART-EXHIBITION for the RELIEF OF WIDOWS AND ORPHANS OF BRITISH OFFICERS engaged in the WAR with RUSSIA, BURLINGTON HOUSE, Piccadilly, by Special Permission of Her Majesty's Government, NOW OPEN.—Admittance, 1*s.*—Communications and contributions to be addressed to the Committee, at Burlington House.

ADAM AND EVE.—This great original Work, by JOSEPH VAN LERUUS, IS NOW ON VIEW at 67, Pall Mall, opposite Marlborough House, from 11 to 6 daily.—Admission, 1*s.*

THE BATTLE OF THE ALMA.—NOW OPEN, from 10 until 6, at the Egyptian Hall, Piccadilly, the GREAT PICTURE of this important Military Event, Painted by Mr. COOMANS, from studies made during four months spent in the Crimea during the present war. Admittance, 1*s.*

SIEGE OF SEVASTOPOL—GREAT GLOBE.—All the New Approaches and Siege Works are placed on the MODEL of SEVASTOPOL, including Inkermann, Balaclava, and the Bays, at the GREAT GLOBE, Leicester Square. **BALTIC:** also a large Model of the Baltic Sea and Cronstadt. Open from 10 A.M. to 10 P.M. Admission, 1s. to the whole building; Children and Schools, Half-price. A large Collection of Russian Trophies from Bomarsund, &c.

THE CHALON EXHIBITION, SOCIETY OF ARTS.—This Collection of the Paintings, Drawings, and Sketches of the late JOHN CHALON, Esq., R.A., with a selection from the Works of ALFRED E. CHALON, Esq., R.A., WILL BE OPENED, at the Society's House, Adelphi, on THURSDAY, June 7. Admission, 1s.

LOVE'S POLYPHONIC ENTERTAINMENTS.—UPPER HALL, REGENT GALLERY, 69, Quadrant, Regent Street.—Every Evening at 8, except Saturday; Saturday, at 6.—Monday and Tuesday, Mr. LOVE, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, with appropriate mutative costumes and appointments throughout, called THE LONDON SEASON, and other Entertainments. On Wednesday, Thursday, and Friday, Mr. Love will present the Entertainment called LOVE IN ALL SHAPES, to be followed by a ZOOLOGICAL CONCERT, and LOVE'S LABOUR'S LOST. On Saturday, at 3, LOVE IN ALL SHAPES, with other entertainments.—Tickets at Mitchell's Royal Library, 33, Old Bond Street; and at the Rooms.

ROYAL POLYTECHNIC INSTITUTION.—The LECTURES and EXHIBITIONS, as delivered before HER MOST GRACIOUS MAJESTY and HIS ROYAL HIGHNESS PRINCE ALBERT, the PATRON of the INSTITUTION, will be CONTINUED, consisting of the TELEPHONIC CONCERT, DISSOLVING VIEWS of SINDH and the SAHAR, DIOSCURI ILLUMINATED CASCADE, the DIORAMA illustrating the VOYAGE across the ATLANTIC, and the CITIES in the UNITED STATES.—LECTURES on MUSIC, by GEORGE BECKLAND, Esq., with VOCAL ILLUSTRATIONS.—DISSOLVING VIEWS of the WAR, &c.—On Monday, the 4th inst., and THURSDAY, the 7th inst., at Eight o'clock, LECTURES by Mrs. CLARA LUCAS BALFOUR on "THE POETS of the PEOPLE, their Lives and Writings," with ILLUSTRATIVE READINGS.

SCIENTIFIC

SOCIETIES.

ROYAL.—May 24.—The Lord Wrottesley, President, in the chair.—The following papers were read:—'On a Decimal Compass Card,' by Capt. Shane.—'On Quantics,' by Mr. A. Cayley.—'On the Theory of the Electric Telegraph,' by Prof. Thomson.—'Observations on the Human Voice,' by Manuel Garcia.

ROYAL SOCIETY OF LITERATURE.—May 23.—Sir J. Dorant, V.P., in the chair.—Mr. Vaux read a letter, addressed by C. T. Newton, Esq., H.M. Vice-Consul at Mitylene, to W. R. Hamilton, Esq., 'On Discoveries in the Island of Calymnos.'—Mr. Newton stated that he had been living during many months of last autumn and winter in this island, and had made many excavations there on the site of what was known to have been once a Temple of Apollo. Out of the ruins of this temple no less than three monasteries had in later times been built. Mr. Newton was very successful in the discovery of a large number of unedited Greek inscriptions, together with numerous fragments of statues, and some bronze work, not inferior even to the bronzes of Siris in the British Museum.

BRITISH ARCHEOLOGICAL ASSOCIATION.—May 23.—Dr. John Lee, V.P., in the chair.—Two new Associates were announced, and various presents, from the Royal Society, Archaeological Institute, City Library, &c., laid upon the table.—Mr. Gibbs exhibited a fine penny of Canute (1017-35), discovered in Cornwall:—legend + CN VT REX AN; reverse LEOFFINE ON LEIC (Leicester).—Mr. Gunston exhibited a decorative tile, of the close of the fourteenth century, found in Shropshire, the device of which was a quatrefoil. He also exhibited early gold coins, from the discovery at Whaddonchase, and silver pennies of Burgred, Athelstan, Eadred, Eadgar, Ethelred the Second, Canute, Edward the Confessor, and Harold, all in fine preservation.—Dr. Lee exhibited some fine specimens of dark-green glass, found, at different times, at Hartwell.—Mr. Pettigrew exhibited impressions from two seals, sent to him by the Very Rev. Dr. Husenbeth. One, found at Lincoln, was of the fourteenth century, and represented a priest saying mass:—the legend CREDE MICHI ET EST SATIS. The other was found at Somerleyton, in Suffolk. It was a monastic seal; but the legend was not distinctly legible.—Mr. Meyrick and Mr. Syer Cuming exhibited specimens of early-English arrow-heads of rare occurrence.—Mr. Cuming read a paper 'On Spectacles.'

ROYAL INSTITUTION.—April 20.—W. R. Grove, Esq., V.P., in the chair.—'On certain Zoological Arguments commonly adduced in favour of the Hypothesis of the Progressive Development of Animal Life in Time,' by Mr. T. H. Huxley.

A series of specimens of Aluminium, prepared by M. St.-Claire Deville, in Paris, were laid upon the library table by Dr. Hofmann. These specimens consisted of a medal, with the head of the Emperor Napoleon III., two bars, a watch wheel, and a piece of copper plated with Aluminium. A large piece of Tellurium, prepared by Dr. Löwe, of Vienna, was likewise exhibited by Dr. Hofmann.

May 4.—Sir C. Fellows, V.P., in the chair.—'On Gunpowder, and its Substitutes,' by Dr. J. H. Gladstone.

MEETINGS FOR THE ENSUING WEEK.

- MON. Entomological, 8.
- ROYAL INSTITUTION.—General Monthly.
- TUES. Horticultural, 8.
- ROYAL INSTITUTION, 3.—'On Voltaic Electricity,' by Dr. Tyndall.
- WED. Society of Arts.—Chalon Exhibition.
- ETHNOLOGICAL, 8.—'On Mr. Hodgson's Philological Researches in the Tartar Languages,' by General Briggs.
- ETHNOLOGICAL NOTICES of the Philippine Islands taken from the Spanish, with some Observations on Races,' by Mr. Kennedy.
- THURS. Royal Institution, 3.—'On Christian Art,' by Mr. Scharf, jun.
- ZOOLOGICAL, 3.—General.
- ROYAL, 4.—Election of Fellows.
- SOCIETY OF ANTIQUARIES, 8.
- FRI. Royal Institution, 8.—'On Ruhmkorff's Induction Apparatus,' by Prof. Faraday.
- ASTRONOMICAL, 8.
- PHILOSOPHICAL, 8.

FINE ARTS

ROYAL ACADEMY.

AMONG the miscellaneous pictures we have still to notice are, Mr. Gale's *Griselda expelled from the House of the Marquis* (No. 640). It is not equal to some of his previous works, and seems overlaboured and enfeebled by unhealthy and restrained thought. Many of the faces are well painted, but the general effect is weak.—Mr. Faed's best work is the *Milnerless Bairn* (141). It has a quiet pathos that shows Mr. Faed to be likely to stand high as a domestic painter.—Miss Howitt's *Castaway* (1151)—though really cast away by the Hanging Committee—is an improvement on her previous works. There is a sense of great desolation in the face, though it is scarcely so admirable as that of her 'Gretchen.' The detail is often wonderful. We hope Miss Howitt will not confine herself to these heart-broken, tear-stained subjects, but get out into the sunshine, and show us of what healthy joy the earth is capable. Why will she stand sounding the depths of this salt sea of human tears? Surely there is "Morning somewhere in the world."—Mr. Rankley progresses. His *Old School-fellows* (1141) is well painted, and tells its touching story well. There is something rather too prim in the wealthier friend's face.—Mr. Cope's *Consolation* (69) is a pretty allegorical thing; but was scarcely worth dubbing with so fine a name or putting under a Saxon arch.—Mr. D'Almaine shows much good painting and very fair colour in his *Jesus Christ recommending his Mother to the care of St. John* (597); but the figures are all painted from the same model, with a mouth stretching from ear to ear. Mr. D'Almaine has given a quiet, religious feeling where there was need of a swoon of passion, and the very moment of a grief that seemed a heart-break.—Mr. Le Jeune's *Seesaw* (63) is a clever picture; but the actors are all too smooth and pretty. Their fashionable air destroys the rustic freshness which rendered Wilkie so honest, natural, and unaffected.—There is much perception of character visible in Mr. Nicol's *Recruit* (206). The sullen, dogged novice,—the sly, impudent sergeant,—the weeping wife,—are well contrasted; but the colour is heavy, and the touch wants vigour and determination.—Mr. Lance has lately shown rather a blameable affectation of making his fruit—which no one can or perhaps ever did equal—subservient to some other figure, bird or man, which gives the name to his pictures. His present work he calls *Harold* (432), and attaches to it a quotation from 'Hamlet,' 'We all know Scott pretended to pride himself more upon finding a hare in its form than on writing his novels. Let Mr. Lance take the lesson. His painting this year is lower in tone, browner, and paler. The foreground fruit is massy as ever.—Miss A. J. Mutrie's *Orchids* (306) are not mere transcripts of Nature, but fine truthful idealizations. She uses a silvery grey background with

great skill to heighten the delicacy of her greens. Her fault is the character of China which she gives to some of her blossoms. Equally good are Miss Mutrie's 35, 304, 1331.—Mr. Burcham's *Snugg Retreat* (721) almost approaches Hunt in delicacy of finish, perception of detail, and clear poetical manipulation.

It is difficult to say anything new about the Miniatures. It is a limited sphere of Art, and its excellence consists in finish and surface. Mr. Thorburn and Sir W. C. Ross are still by far the first. Mr. Wells and Sir W. J. Newton stand well; and the herd is distinguished by bunglers so incompetent, that the greater part are scarcely worth hanging anywhere.

Mr. Thorburn has this year appeared in a somewhat broader and simpler style, almost approaching Mr. Haag:—quiet, wide surface of middle tint, and deep, well-defined shadow. His drawing is, however, sometimes faulty, as in *Mrs. Poljambe* (747), yet so perfect is the execution that most amateurs would at once set it down to the malconstruction of the artist's model. Sometimes, in attempting to convey a sense of extreme clearness and sharpness, Mr. Thorburn is hard, as in the group of *The Earl Brownlow and his Brother* (799). In *Mrs. G. Grenfell Glynn* (892), there is an attempt to give an almost historical character to the miniature;—in others, we have ladies, leaning on terraces, contemplating the moon, fairies in ball-room dresses, and wood nymphs in flounces. *Lady Mary Labouchere* (874), by Mr. Thorburn, though beautifully executed, is rather pale in colour, and somewhat spectral. One of his best—very aristocratic and graceful—is *The Marchioness of Stafford* (936).—Mr. Bone's enamel of *Inigo Jones, after Vandyke* (699), is hot and wine-coloured in the shadows, though otherwise excellent.—It is a pity Mr. Wyon has modelled *Richard Sainthill, of Topsham, Devon* (725), in lip-salve.—A very excellent piece of life and nature is Mr. Wells's *Captain Cumming* (788), almost the best work in the room, and not much inferior, though in a heavier style.—Mr. Moira's portrait of *The King of Portugal* (853), is that of a sullen, heavy-looking youth,—not very like the original.

The Engravings are not very numerous. Mr. T. Landseer's *Night and Morning* (975 and 1006), after Sir E. Landseer's great picture, possess singular strength, but are inclined to sootiness in parts. The texture is admirable, and the execution powerful and free.—Mr. Maguire's *Le Bourgeois Gentilhomme* (997) is full of carefully rendered character,—and Mr. Carter's rendering of Mr. Ward's picture of *Benjamin West's First Effort in Art* (983) promises well, though the subject is unfinished.—Mr. A. Cooper's picture (970) was scarcely worth engraving, but Mr. Giller has done what he could.—Among the sketches the most clever are, Mr. J. Gilbert's *Children of Mrs. Donkin* (1057), and Mr. Moore's *Ernest* (1047).—In *Mrs. C. Baston* (1066) Mr. G. Richmond has fallen into the fault of his oil pictures of exaggerating his greys, which, instead of being lost in one common flesh tint, stand out here as tints of pure violet.

Sculpture.

Mr. Baily, the patriarch of English sculpture, has a beautiful subject in *A dam consoling Eve* (1412)—which he has treated as only a man of genius can treat a story of human emotion in the cold vehicle of marble. We need scarcely say that the figures are classical and graceful, and animated by a calm dignity that is the characteristic of this sculptor. 'Adam consoling Eve' proves—if proof were needed—that the hand which "witched the world" with gracious innocence in 'Eve at the Fountain' has lost none of its elasticity by age. It is a noble group and worthy of the happiest mood of our prince of poetical sculptors. Mr. Baily's second statue is the *Model of one of Lord Mansfield* (1414), erected in St. Stephen's Hall, Westminster. It is full of dignity and repose.

Mr. Marshall's best statue is that of *Ajax praying for Light* (1423). It is classical, vigorous, and manly; but still wants that certain nameless dash which drives genius always just a neck's length nearer the winning-post than talent can reach.

Ajax should be more Titanic and brutal; his face should be shadowed with a certain stolid ferocity, for the Ajax of Homer is a creature of brute strength and much phlegm, and more remarkable for toughness of skull than clearness of head. *Ariel* (1422) is buoyant, but is not quite Ariel, for Ariel is too evanescent to be fastened down in stone. One might as well try to chisel out a flock of rising bubbles!

Mr. Munro's *Child Play* (*Marble Group*), the *Children of Herbert Ingram, Esq.* (1410) is a pretty group. The scene is as truthful as it is poetical, and is vivified by the peculiar grace and almost feminine tenderness which this sculptor throws over all his works. One child is lying down, another bends over it, and a third kisses its cheek,—while a twine of convolvuli links them into unity. There is no trickery of chiselling, no materializing imitation. The marble seems to have been pressed and softened into form, and there is no painful evidence of too much or too little labour. His *Lovers' Walk* (1452) is chiefly excellent for the beauty and gentleness of the faces; but it is better as a statuette than it would be enlarged. The costume is monotonous, and requires more study. Mr. Munro's medallions are less interesting than usual this year, from the subjects being less fitted for his art.

Mr. Durham has given us a bland, winged figure with its hands bound, and a classical smile on its lips, and called it *Genius* (1419). The idea is an old Greek one, and may be found in a dozen cameos, and was called by them 'Bound Genius.' There is too much of the mere study in this. His *Sleeping Child* (1424) is more poetical in its touch of nature than the other is natural in its poetry.

Mr. Earl's *Hyacinthus* (1415) is a pretty subject, though without sentiment, for the youth might be a young midshipman using a quadrant if the sculptor changed the discus for the triangle. Mr. Geefs has a rather pompous but sufficiently unmeaning statue of which he gives the following miraculous explanation: *The Queen of the Waters tuning her Harp to celebrate the Alliance of the Western Powers* (1413). We are afraid this Lady was once the goddess Hygea, and destined for a Bath pump-room Duessa in the Bower of Pleasure. Statuary is not a thing to be handled in this irreverent manner.

Mr. Bell's *Armed Science* (1420) is a fine statue of an allegory that no human sculptor could ever hope to convey by mere marble, without labels, catalogue or showmen. The face is worthy of Hyppolita, and is a beautiful classical embodiment of a Maid of Saragossa, a Joan of Arc, or any other incarnation of female heroism. But really for what it is intended it is as false as anything can be. Science Armed should have a breastplate of Bath post, like the Jacobite schoolmaster at Culloden, who wrote his own epitaph on it, ready for all emergencies. It is difficult enough for Modern Art to convey her every-day truths, and when she attempts such subjects as this to please ignorant patrons, she runs fairly "daft."

Mr. Thomas is bold, but rather coarse in his groups of animals. He is perhaps wrong in selecting moments and juxtapositions that he could never have drawn from Nature. *The Dam and her Pets* (1439) is, for this reason, superior to *The Sire and his Enemy* (1427), which was probably executed on that principle of ornamental parallelism that led the Scotch gardener to put an innocent man in the left-hand stocks to match the innocent man on the right. The one, we should mention, is a wild beast and her cubs, and the other a wild beast striking at a serpent. Rather petty in style, but natural and thoughtful, are Mr. Gonon's two groups: *A Tom-tit's Nest—terrified by a Rat and Viper* (1502) and *Nightingales and Grapes* (1496). In the former, the rat is very badly given, and the relative proportion of the three animals is lost. As for the nightingales, we doubt their touching grapes, seeing that their English food is worms and grubs. They might as well have been given the exact size of nature.

Though the thought is taken literally from Raphael, in Mr. Davis's *alto-rilievo* of *The Virgin and Saviour* (1431) there is a sweetness about the faces, a serene happiness in the expression, and

an ethereal buoyancy in the drapery that raise the figures far beyond the average. This is one of the most ambitious attempts in this year's Exhibition.

Mr. H. Bandel's *Dying Amazon* (1448), though suggested by the Austrian's work, has got a poetry of its own, and the moment chosen shows originality of thinking. The hands scarcely relax sufficiently to express the artist's feeling;—a moment later would have been more dramatic.

Mr. Westmacott's *Sketch for an enriched Salver* (1433) is rather meagre, and there is a want of purpose; the groups of children forming letters are too thin and scattered, and there is too little of the goldsmith's rich bossiness about the whole.

Architectural Drawings.

The Architectural Room is scantily furnished, and would not be full but for certain pseudo-water-colour sketches and unclassable drawings, that can be called neither truth nor fiction, being untrue to fiction and mere fiction when compared to truth. The Exhibition should have no room for such works, however clever and sketchy, as Mr. Strutt's *Grotto of Egeria* (1177), Mr. Dobbin's *Funeral Procession of Henry VII. in Westminster Abbey* (1190), with the dummy figures and gaudy bits of polychrome.—The chief interest of this room is Mr. Barry's *Design for the Oxford University Museum* (1236). There is a grand spirit in this, and much propriety for the object. We could have wished for more detail, but can hardly complain of the deficiency, as it is rather a public than a professional sketch.—Of much interest, too, is the *Interior of a Library at the Reform Club* (1173). The ceiling is rich and simple,—the fittings are chaste and well-managed.—Messrs. Wrightman, Hatfield and Goldie's *Design for a House at Boreatton, Shropshire* (1243), is a good example of Elizabethan architecture, and shows the capabilities of mere brick.—Mr. Goodchild's *View of the Interior of St. George's Hall, Liverpool* (1284), is peculiarly interesting just now, when a growing feeling is spreading amongst architects that this building is almost the only modern erection that will confer lasting fame on the art of the century. Every part of the Hall shows traces of the creation of a capacious mind.

FINE-ART GOSSIP.—The Photographic Society has appointed a scientific committee to investigate the permanency of photographs, the causes of fading, and the phenomena of the art; and it is the intention of this committee to publish the result of their experiments from time to time. The funds of the Society are made applicable to the investigation, and Prince Albert has contributed 50*l.* to this special purpose. The committee consist of Dr. Diamond, Mr. DelaMotte, Mr. Hardwich, Dr. Percy, Mr. Pollock, and Mr. Shadbolt.

That something is to be said in explanation of the inaccuracies of the Royal Academy Catalogue we are well aware; and we cannot hesitate to allow those who have a special knowledge of the difficulties to be encountered and overcome by compilers and printers, to state "the other side" of the question. A Correspondent says:—"I am rather surprised that a journal of the high character of the *Athenæum* should so readily join in the 'hue and cry' raised by every disappointed and grumbling artist against the Royal Academy. That institution is, of course, amenable to criticism, whether in respect to its original fundamental laws, or their present practical application; and I do not mean to infer that your journal has ever—except through ignorance of facts—commented upon it either unjustly or ungenerously. I believe that there does not exist an institution which can render so good an account of its stewardship, and which has so unselfishly discharged its duties, as the much-maligned Royal Academy; but it has been the policy of the body to maintain at all times a reserve, and to allow charges to be multiplied and to pass current, rather than disabuse the public mind by an explanation and justification. This policy may well be questioned. My present object in writing refers to the condemnation passed by you in your last number upon the Exhibition

Catalogue. If you had considered for a moment the difficulties to contend with in the production of that work, your remarks would have been tempered with less asperity, and you would have been more willing to do justice to the wish of the Academy to render their Catalogue more perfect. Having been formerly engaged in preparing the Exhibition Catalogue of the Royal Academy, I would direct your attention to the following causes, which must ever preclude the possibility of perfection:—1. The errors made by artists themselves in their letters. 2. The foolish titles which are often given by artists to their pictures, and the absurdities of which are credited to the Royal Academy. 3. Unintelligible writing. There was always, and ever will be, a file of letters which it has puzzled compositors and readers to decipher. The attempts made to translate these hieroglyphs are generally unfortunate, and are productive of errors. 4. Letters giving the description of works, but omitting the signature of the artist. 5. Letters written in a hurry, at the last moment, folded without being blotted, and not legible with certainty when opened. 6. The very short time which the impatience of artists, and perhaps the public, will allow for the compilation. 7. The accidents which so frequently happen just before going to press, in the dropping of letters and words, and the substitution of incorrect ones when changing the forms from the large to the small paper. If the above specified causes of error were removed, a nearer approximation to correctness could be obtained; but as such elements of confusion always exist, there must always exist mistakes in the early editions. As it is, the practical experience of Messrs. Clowes & Son may be considered good authority for asserting, that the wonder is, not that there are errors, but that there should be so few—fewer in proportion than is to be found in any publication of a similar character, produced under similar circumstances,—such, for instance, as the Catalogue of the Great Exhibition.—I am, &c. T. V."—This explains—does not excuse—the blunders. A Royal Academy ought to contain men capable of correcting—and incapable of making—such mistakes as frequently appear in its Catalogue.

The Society of Antiquaries has accepted Mr. Ruskin's offer of an annual subscription of 25*l.*; and are raising a fund for the proper preservation of Mediaeval buildings, intending to try and put a stop to amateur restoration, which means destruction.

Signor Monti, the well-known Italian sculptor, whose name is now naturalized among us by his association with the Crystal Palace, delivered the first of a series of lectures on his art on Wednesday evening, at his studio in Great Marlborough Street, to a small but picked audience. The lecture was illustrated by large diagrams. The lecturer commenced by tracing the love of Art in the minds of even savage people, to the observation of roots or branches which approached the human form, and by a slight change were easily converted into idols. He then passed on to Egypt; and showed the strong power and sense of unchangeableness and durability which characterized their purely symbolic Art. He observed on their care as to outline, and their great attention to express all that their own self-imposed canons would allow them. The Assyrian, equally conventional, displayed also a majestic sense of will with great vigour and force; which, in the Persian work at Persepolis, was still more fettered by a desire of impressing a sense of calmness and divinity, and avoiding strong action. The lecturer then exhibited drawings of figures of Xerxes and Darius Hystaspes, in which many of the Assyrian types were repeated.—M. Monti's next lecture is on Indian Art.

Dr. Griesler has discovered a thing useful to all artists. A few drops of spirits of ether will, he has found, when mixed with rancid oil, restore its freshness.

The old Barefooted Monks' Convent at Nuremberg is about to disappear before the hand of modern improvement.

The past dies slowly and imperceptibly out. Almost the last house in Preston of the Eliza-

bethan era is now being pulled down. It was covered with caving; and was often compared, with its tiers of windows, to the stern of a line-of-battle ship.

The Church of La Basée at Lille has been burnt down; and its beautiful spire exists now only in the memory.

MUSIC AND THE DRAMA

M^DLLE. HERRMANN begs to announce her SOIRÉE MUSICALE, at the RÉUNION DES ARTS, 76, Harley Street, on MONDAY EVENING, June 4, at half-past 8.—Tickets, 10s. 6d.; Family Tickets, to admit three, 21s.; at Cramer & Co.'s and Adnover & Hollier's, Regent Street; and of M^dlle. Hermann, 1, Hanover Place, Regent's Park.

MISS MESSENT and MR. BRINLEY RICHARDS'S CONCERT will take place at the HANOVER SQUARE ROOMS, on FRIDAY EVENING, June 3, when they will be assisted by Madame Clara Novello, the Misses M^dAlpine, and Miss Dolby; Herr Reichart, Mr. Bodda, Mr. John Thomas (Harp), Herr Deichman, and Signor Bottesini.—Tickets, 7s.; Reserved Seats, 10s. 6d.; to be had at the Music Publishers; of Miss Mescent, 6, Hindle Street, Manchester Square; and of Mr. Brinley Richards, 4, Torrington Street, Russell Square.

Mr. AGUILAR respectfully announces that he will give a MATINÉE MUSICALE, at WILLIS'S ROOMS, on THURSDAY, June 14, under the distinguished patronage of the Most Noble the Marchioness of Hastings, the Right Hon. the Countess of Uxbridge, the Right Hon. the Lady Caroline Ricketts, the Right Hon. the Viscountess Combermere, the Viscountess Maidstone, the Right Hon. the Lady Harriet Ellerton, the Baroness Mayer de Rothschild, Lady Montefiore, &c. &c.; and assisted by Madame Beckholtz-Falconi, Madame Ferrari, Mr. Miranda, Signor Ferrari, Signor Ciabatti, Herr Ernst, Signor Piatini, Mr. R. S. Pratten, and Mr. F. Mori.—Reserved Seats, 15s.; Tickets, 10s. 6d.; to be had at the principal Music Publishers, and of Mr. Aguilar, 68, Upper Norton Street, Portland Place.

MR. BENEDICT'S GRAND CONCERT.—ROYAL ITALIAN OPERA, Covent Garden.—Under the immediate Patronage of Her Most Gracious Majesty THE QUEEN, His Royal Highness Prince Albert, Her Royal Highness the Duchess of Kent, Her Royal Highness the Duchess of Gloucester, Her Royal Highness the Duchess of Cambridge.—Mr. Benedict begs respectfully to announce that his ANNUAL GRAND MORNING CONCERT will take place on FRIDAY, June 15, 1855, at the Royal Italian Opera, Covent Garden, to begin at half-past one o'clock precisely, and to terminate at Five o'clock. Mr. Benedict has the greatest satisfaction in being able to announce that Madame Grisi has most kindly offered her invaluable services. The Concert will be supported by the Band and Chorus of the Royal Italian Opera.—Conductor, Mr. Benedict. Principal Vocal Performers: Madame Grisi, M^dlle. Didée, M^dlle. Marai, Madame Viardot, M^dlle. Jenny Ney, Madame Rudersdorff, M^dlle. Bosio; Signor Tamburini, Signor Gardoni, Signor Lucchesi, M. Zeller, Signor Polonini, Signor Tagliafico, Signor Tamburini, Herr Fornes, Signor Graziani, Signor Lablache, and Signor Mario; also, Madame Clara Novello, Miss Dolby, and Signor Belletti. Principal Instrumental Performers: Pianoforte, M. Asher (Pianist to the Empress of the French), Mr. Lindsay Sloper, Mr. Benedict, and Herr Fauer; Violin, Herr Ernst; Contra-Basso, Signor Bottesini; Clarinet, Signor Belletti.—Prices of Admission: Stalls, 4s. 1s.; Boxes, Grand Tier, 5s. 5s.; Pit Tier, 3s. 3s.; First Tier, 4s. 4s.; Second Tier, 2s. 2s.; Third Tier, 1s. 1s.; Pit, 5s.; Amphitheatre Stalls, 5s.; Amphitheatre, 2s. 6d.—Applications for Boxes, Stalls, and Places, to be made at the Box-office of the Theatre, the principal Libraries, and Music-publishers; or of Mr. Benedict, 2, Manchester Square.

CONCERTS OF THE WEEK.—The past is usually London's busiest week in the matter of concert giving. Nor has London been less busy than usual this Whitsuntide. But a recapitulation of the six days' programme will almost suffice; so largely has the week's business been done in well-accustomed and well-approved wares. The *English Glee and Madrigal Union* began their yearly meetings on Whit-Monday, with the well-known party of members, strengthened by Mr. Thomas, among other valuable accessions, and Mr. Hatton for accompanist.—Mr. C. Potter's Symphony, at the *Philharmonic Concert*, was the only item which could be said to impart any variety to the performances of the evening.—In like manner, Mr. Ella's *Musical Union*, on Tuesday, can be only said to have been "marked" by the re-appearance in his Quartet party of M. Sainton; while the *Harmonic Union* could find nothing fresher for its Wednesday's gathering than 'Elijah.' On the same evening *St. Martin's Hall* opened its doors for Mr. Leslie's 'Immanuel,' with a cast of solo singers, including Madame Novello, Miss Dolby, Messrs. Reeves and Weiss.—Of M. Halle's *Pianoforte Recitals*, the first of which was given on Thursday, we must speak on a future day.

HAYMARKET.—Miss Helen Faucit made her first appearance on Monday, in fulfilment of an engagement for a limited period, in her favourite part of *Pauline*. Notwithstanding the moral faults of this play and its intrinsic levity, by the force of skilful stage structure and a certain air of romance in the situations, it still continues popular. Of its heroine, Miss Faucit was the original representative, and from the first, by the peculiarity of her style of acting, almost made it her own. She has as yet had no eminently successful rival in the

character. Repeated practice in the part has much improved the actress, both in relation to the idea and the embodiment, which have become more definite and less abrupt every season. We recollect that, on the first production of the piece, Miss Faucit displayed great force, even violence, in the later scenes;—but now she is careful to show that she appreciates the power of gentleness, and plays throughout with a chastity and a polish that may be commended as exemplary. In some respects the cast was new. A Mr. Walters made his *début* successfully in the part of *Glavis*; and Mrs. Poynter, as the *Widow Melnotte*, was natural and characteristic. *Madame Deschappelles* was well personated by Mrs. Griffiths. *Claude Melnotte* is not one of the best of Mr. Sullivan's performances. He does too much, particularly in the declamatory passages; he has also to learn to stand erect and still on the stage, and to rid his pronunciation of provincial peculiarities. There is, moreover, an air of conceit about him, which will certainly be in the way of his ultimate success, unless he very soon begin to think more of his art and less of himself. He is, nevertheless, well fitted for the line of juvenile tragedy, and the stage is in want of actors of this class;—conditions these, which will tell in Mr. Sullivan's favour, if he be content to study the graces of deportment and aim at further finish, instead of remaining in the too evident self-delusion that he is already perfect.

On Wednesday, a new farce, entitled 'Only a Halfpenny,' was produced. It is derived from a little piece, by MM. Clairville and Lambert-Thiboust, called '*Histoire d'un Sou*,'—but has been much elaborated for the English stage, and Mr. Buckstone's special impersonation of the eccentric hero, *Mr. Stanley Jones*, a creditor to the extent of the coin named in the title. This small sum he has lent to a young lady in an omnibus, who had only threepence-halfpenny to pay a fourpenny fare with, and on whom he makes a morning call for repayment. A deeper feeling, however, inspires this apparently ungallant conduct;—his wish is, in fact, to improve the acquaintance. *Henrietta* is beautiful, but on the point of being sacrificed to a man who holds an acceptance which her father cannot honour; and of this circumstance the importunate creditor, with the connivance of the *soubrette*, adroitly takes advantage. Neither maid nor mistress has the needed halfpenny, and an unchangeable five-shilling piece looks so usurious as not to be acceptable to the fine feelings of Stanley Jones. At length, an uncle of the lady offers what "seems a halfpenny, but halfpenny is none"; and which Jones rejects, as a French *sou*. Naturally indignant, the uncle threatens to kick the persevering intruder out; when the discovery is made, that the strange behaviour of the young gentleman is referable to the tender interest he has taken in the affections of the young lady. In fine, he has benefited by one of his *exits* to get possession of the fatal bill by purchase, and thus frees both father and daughter of a mercenary suitor. This situation, it will be seen, is very like that of the final situation in the five-act drama that preceded the farce;—but it is treated in so burlesque a manner by Mr. Buckstone, that the resemblance is more of contrast than comparison. The piece proved successful from its very absurdity.

CITY OF LONDON.—Mr. Charles Pitt is engaged as the star of the Whitsuntide season, and will occupy the stage until the appearance of Mr. Charles Mathews. On Monday, Schiller's 'Robbers,' judiciously compressed, was performed; and the part of *Charles Moor* was strikingly portrayed by Mr. Pitt. The style of this actor has been apparently formed on that of Edmund Kean, whose abrupt transitions and sudden flashes he sometimes effectively imitates. The house was overflowing with a holiday audience, much excited with the situations of this terrible drama.

WHITSUNTIDE MUSIC ON THE RHINE.

THE thirty-third annual music-meeting held during Whit-week at one or other of the towns on the Lower Rhine—one of the most important gatherings of its class in Germany—took place this year, as the readers of the *Athenæum* have been

duly apprised, at Düsseldorf, under conditions of more than ordinary interest. It is universally owned to be the most brilliant Festival which has taken place since that great musical summer of 1846, which included the *Musik-Fest* at Aix-la-Chapelle,—the Jesuit Festival at Liège, for which Mendelssohn's 'Lauda Sion' was written,—the assemblage of upwards of three thousand part-singers at Cologne,—and the production of 'Elijah' at Birmingham. It seems only yesterday since we were partaking of these excitements and pleasures: yet what a whirlwind of change and destruction has passed over Art in Germany during that interval of thrice three years! This Düsseldorf Festival would have been well worth a visit, whether it be regarded as illustrating the amount of what has been lost, and of what is retained, in the Lower Rhine-land; or considered merely as testing the present state of that strange thing, German opinion. Apart from all philosophies and comparisons, however, it has been a noticeable meeting.

Our English privilege of beginning every matter in debate with a prelude concerning the weather does not come in amiss this Whitsuntide—since the sudden outburst of summer in all its glory, after so long-drawn and dark a winter, has given the whole district the festive aspect of a garden freshly decked and garlanded for some joyous purpose. Never were seen herbage of such an intense and tender green—such floods of golden flowers on the fields—never such piles and coronals of blossom on every fruit-tree (making a delicious harmony with the red-tiled roofs of the homesteads, and the quaint towers of the old churches)—as those we swept past while taking the line from Aix-la-Chapelle to Ober-Cassel. This holiday clothing, too, was at its brightest in and about Düsseldorf. Every one knows the charming gardens which belong to that town, and it was fortunate that the lilacs and the chestnut bloom should have "kept back" till Whitsuntide. The hall where the musical performances are held—one of those picturesque temporary wooden rooms the secret of erecting and decorating which belongs to Germany—was pitched in a garden, and betwixt fit and fit of the long and laborious rehearsals, and part and part of the concerts, it was pretty to see the cheerful and cordial audience streaming out under the covering of those lovely fresh leaves; and pleasant to know that one could loiter without among objects so refreshing to weary spirits, yet still hardly lose a note of Madame Goldschmidt's ringing voice, and hardly a *piano* of the most elaborate chorus. There is much, after all, in scenery,—as the respective impressions produced by sacred music, when it is heard in a cathedral and in a town hall, will prove to the least imaginative; and it must be allowed that a garden in the Lower Rhine-land (due festival weather granted) puts heart and mind into better tune for music than the streets of our provincial towns, streaming with their factory population.

Then the material for such a meeting—orchestra and chorus numbering eight hundred, and twenty-six executants—has been, on the whole, excellent. The voices, particularly the female ones, have been more tuneable than those which are sometimes to be heard in Germany on like occasions. The stringed Quartett in the orchestra has been admirable, animated to no ordinary point by that king of orchestral violinists, Herr David. The wind instruments were less satisfactory. All were tested to the utmost in some of the works selected for performance. All stood the test capitally. The first evening's concert was made up of a Symphony by Herr Hiller, the conductor of the Festival, with the motto, "*Es muss doch Frühling werden*,"—on the whole, perhaps, the best work of its composer, and the best German Symphony of a later date than Mendelssohn's. The ideas in three of the movements are good and well contrasted, the structure is excellent (some lengthiness forgiven), and there are many charming details, which fill up the outline without obtrusiveness. It was noticeable that the *Andante*, which is the most vague and tormented of the four movements, seemed to be most relished, especially among the young professors and practitioners who thronged

In two points, moreover, it will be our endeavour to avoid errors which have been much and justly complained of in the conduct of

other Quarterly Organs. We purpose to study brevity on all topics which will not justify length—and to give to the lighter departments of Literature that share to which they are fairly entitled in a periodical which aspires to please and aid the general reader, as well as to interest the studious one.

Like most other Quarterly Journals, the NATIONAL REVIEW will not be able to find room for more than a selection from the works which from time to time appear. We must endeavour to excel by making that selection judicious. We shall, however, endeavour to give a systematic summary of the new publications on topics insufficiently noticed by the daily and weekly journals—especially Theology and Mental and Political Philosophy. We shall likewise give a list of the books appearing in each quarter which seem suitable for reading Societies, and are most likely to interest the general reader.

PRICE FIVE SHILLINGS.

A DESCRIPTIVE ATLAS of ASTRONOMY, and of PHY-

SICAL and POLITICAL GEOGRAPHY: comprised in 74 Maps, exhibiting a comprehensive System of Astronomy, and of Physical and Political Geography, carefully constructed by DOWERS and PETERMANN; and the whole recently revised by the latter. With descriptive letter-press by the Rev. T. MILNER, M.A. Illustrated by several Hundred Vignettes. One thick volume, demy 4to. cloth lettered, 31s. 6d.; half-bound russia, 35s.

Dedicated, by Permission, to H.R.H. the PRINCE ALBERT,

THE ATLAS of PHYSICAL GEOGRAPHY; consisting of 16

Maps, illustrative of the Geology, Hydrography, Meteorology, Zoology, Botany, and Ethnography of the Globe. Constructed by AUGUSTUS PETERMANN, F.R.G.S. The letter-press, descriptive of the Physical Phenomena of the Globe, by the Rev. T. MILNER, M.A. F.R.G.S., illustrated by upwards of 130 Vignettes, Sections, and Views.

In the 'Atlas of Physical Geography' it has been the design of the Publishers to produce a work adapted and corresponding to the present state of knowledge—comprehensive in its plan, clear and simple in its delineations, and, at the same time, moderate in price.

The Constructor of the Maps, who is favourably known to the scientific and general public by his Geographical Publications, has made it his chief aim to represent the Phenomena of Physical Objects in their general and complete connexion over the Globe; and while availing himself of the previous labours of Humboldt and Berghaus, he has not failed to consult all recent researches and observations. In 1 vol. imperial 4to. price 15s. cloth, and 21s. half-russia.

DOWERS' GENERAL AND SCHOOL ATLASES.

The attention of Teachers is especially called to the following Atlases, which will be found, in *fulness of detail, correctness, and neatness of execution*, to surpass, while in prices they are much below, any similar publications. The whole of the Maps have been carefully revised and corrected to the present time, by A. PETERMANN, Esq. F.R.G.S. For general convenience, the Maps have been divided into Books suitable for the different Classes in Schools and Colleges, each of which are furnished with copious Consulting Indexes.

DOWERS' GENERAL ATLAS of MODERN GEOGRA-

PHY: compiled from the latest and best Authorities. With a copious Consulting Index, with the Latitude and Longitude. Price One Guinea, half-bound and coloured. A Library Edition, coloured and interleaved, price 25s. half-bound russia.

N.B. The stock (60 reams) has now been kept two years. This paper may also be had ready lodized.

XYLO-IODIDE OF SILVER.

This important photographic preparation is exclusively used at all the Photographic Establishments. Its superiority is universally acknowledged. Testimonials from the best photographers and principal scientific men of the day warrant the assertion, that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action.

In all cases where a quantity is required, the two solutions may be had at wholesale price in separate bottles; in which state it may be kept for years, and exported to any climate. Full instructions for use.

CAUTION.—Each bottle is stamped with a red label, bearing my name and address.

RICHARD W. THOMAS, CHEMIST,

10, PALL MALL,

to counterfeit which is felony.

NITRATE OF SILVER BATH for the above preparation may be always obtained of R. W. THOMAS, ready made, at a cost little more than the price of ingredients used.

CRYSTAL VARNISH.

PREPARED FROM THE FINEST AMBER.

This valuable Varnish, for protecting Negative Pictures, does not require the application of any heat to the plate. The coating will be found free from stickiness, hard, and transparent. It dries immediately.

HYPO-COLOURING BATH.

FOR RENDERING THE POSITIVES ON PAPER DARK AND RICH IN COLOUR.

CYANOGEN SOAP.

FOR REMOVING ALL KINDS OF PHOTOGRAPHIC STAINS.

The zennine is made only by the inventor, and is secured with a red label, bearing this signature and address.

RICHARD W. THOMAS, CHEMIST,

No. 10, PALL MALL.

Manufacturer of Pure Photographic Chemicals and Apparatus.

And may be procured of all respectable Chemists, in pots, at 1s. 2s., and 3s. 6d. each, through Messrs. EDWARDS, 67, St. Paul's Churchyard; and Messrs. BARCLAY & Co., 95, Farringdon-street, Wholesale Agents.

GRAND TRUNK RAILWAY COMPANY

of CANADA.—NOTICE IS HEREBY GIVEN that a Call of 25 10s. per Share on each and every Share of the A Series of the Shares of this Company has been made, and will be due and payable on Monday, the 11th day of June, 1855.

A Call of 10d. will also be due and payable on each of the Certificate exchangeable for Company's Debentures; and 10d. on each of the Certificates exchangeable for Debentures of the Province of Canada.

Six per Cent Interest will be charged on the Calls so long as they remain in arrear.

A Call Letter will be sent to each Shareholder for the payment of the Call on his Shares. The Debenture Certificates must be presented at the Bankers, in order that the payment of the Call may be marked upon them.

Holders have the option of paying up in full on their Shares and Debentures.

Interest at the rate of six per cent. per annum is paid on all sums received in advance of Calls either on Shares or Debentures.

All payments to be made at the Banking House of Messrs. GILBY, MOLES & Co., 67, Lombard-street.

Offices of the Company,
21, Old Broad-street,
London, May 15, 1855.

The advantages offered by this Society are—Economy combined with SECURITY, and LOWER RATES OF Premiums than those of any other Office, which entitle the Assured to participate in the Profits, and considerably more than those of any other Mutual Assurance Society.

THE WHOLE OF THE PROFITS are divided every fifth year among the Assured, and a Bonus is added, after the Payment of the Fifth Annual Premium, to every Policy effected on the Participating scale, if a claim accrue thereon prior to the next division of Profits.

The sum of 367,000l. was added to Policies at the last Division, which produced an average Bonus of 67. per Cent. on the Premiums paid.

Number of Policies in force, nearly 7,000.

The Assurance Fund exceeds 1,400,000l. Income upwards of 230,000l. per Annum.

No charge for Policy Stamps, nor for Service in the Yeomanry or Militia Corps.

Prospectuses and full particulars may be obtained on application to
ALEXANDER MACDONALD, Secretary.

GREAT WESTERN RAILWAY.—COALS.
Orders for the best RUABON HOUSE COALS, equal to the finest Durham, may be executed at 25s. per Ton (cash price), delivered within 4 miles of the Paddington Station.
These Coals are bright and durable in burning, and contain only one-half per cent. of dust.
They are now for the first time introduced into the London Market by the recent opening of the Great Western Railway into North Wales.
Address the Superintendent of the Company, Paddington Station.

THE TEN-GUINEA HARMONIUM,
with the Improvements. Manufactured solely by Messrs. WHEATSTONE & CO., who obtained the only Prize Medal for this Instrument; has the full compass of five octaves, with one stop, a rich sustained quality of tone, which can be produced either loud or soft at pleasure; is an excellent substitute for an organ, and does not require tuning.—Warren's Tutor for the above, 4s.
WHEATSTONE & CO., Inventors and Patentees of the Concertina, 20, Conduit-street, Regent-street, London.

The whole warranted of the soundest and best manufacture.—HEAL & SON'S ILLUSTRATED CATALOGUE OF BEDSTEADS, and PRICED LIST OF BEDDING, sent free by post.—HEAL & SON, 196, Tottenham Court-road.

DURABILITY OF GUTTA PERCHA TUBING.—Many inquiries having been made as to the Durability of Gutta Percha Tubing, the following letter is published in answer to them:—
"I have the pleasure to inform you that the Gutta Percha Tubing, which I have the honor to supply to the following letter:—FROM SIR RAYMOND JARVIS, Bart., VENTNOR, ISLE OF WIGHT.
—Second Testimonial.—"March 10th, 1852. In reply to your letter, received this morning, respecting the Gutta Percha Tubing for Pump Service, I can state, with much satisfaction, it answers perfectly. Many Builders and other persons have lately examined it, and there is not the least apparent difference since the first laying down, now several years, and I am informed that it is to be adopted generally in the houses that are being erected here."
N.B. From this Testimonial it will be seen that the CORROSIVE WATER of the ISLE of WIGHT has no effect on Gutta Percha Tubing.
THE GUTTA PERCHA COMPANY, PATENTEES,
16, WHARF-ROAD, CITY-ROAD, LONDON.

FENDERS, STOVES, and FIRE IRONS.—
Buyers of the above are requested before finally deciding, to visit WILLIAM S. BURTON'S SHOW-ROOMS, 39, Oxford-street (corner of Newman-street), Nos. 1, 2, and 3, and Newman-street, and 4 and 5, Perry's-place. They are the largest in the world, and contain such an assortment of FENDERS, STOVES, RANGES, FIRE IRONS, and GENERAL IRONMONGERY as cannot be approached elsewhere, either for variety, novelty, beauty of design, or excellence of workmanship. Bright stoves, with bronzed ornaments and two sets of bars, 2l. 14s. to 52l. 10s.; ditto with ornolou ornaments and two sets of bars, 5l. 10s. to 12l. 12s.; Bronzed Fenders complete, with standards, from 7s. to 3l.; Steel Fenders from 2l. 15s. to 6l.; ditto, with high ornolou ornaments, from 2l. 15s. to 7l. 7s.; Fire-irons, from 1s. 9d. to 4s. 4d.; and Cast-iron and other stoves, with radiating hearth plates. All which he is enabled to sell at these very reduced charges.
—Firstly—from the frequency and extent of his purchases; and
—Secondly—from those purchases being made exclusively for cash.

BATHS & TOILETTE WARE.—WILLIAM S. BURTON has ONE LARGE SHOW-ROOM devoted exclusively to the DISPLAY of BATHS and TOILETTE WARE. The stock of each is at once the largest, newest, and most varied ever submitted to the public, and marked at prices proportionate to those that have tended to make his Establishment the most distinguished in this country. Portable Showers, 7s. 6d.; Pillar Showers, 3l. to 5l.; Nursery, 15s. to 32s.; Sponging, 15s. to 32s.; Hip, 14s. to 31s. 6d. A large assortment of Gas, Furnace, Hot and Cold Plunge, Vapour, and Camp Shower Baths.—Toilette Ware in great variety, from 15s. 6d. to 45s. The Set of Three.

THE BEST SHOW OF IRON BEDSTEADS in the KINGDOM is WILLIAM S. BURTON'S. He has TWO VERY LARGE ROOMS, which are devoted to the EXCLUSIVE SHOW of IRON and BRASS BEDSTEADS and CHILDREN'S COTS, with appropriate Bedding and Mattresses. Common Iron Bedsteads, 18s.; Portable Folding Bedsteads, from 12s. 6d.; Patent Iron Bedsteads, fitted with dovetail joints and patent latching, from 17s. 6d.; and Cots from 20s. each. Handsome Ornamental Iron and Brass Bedsteads, in great variety, from 2l. 13s. 6d. to 15l. 15s.

PAPIER MACHÉ and IRON TEA-TRAYS.
An assortment of Tea-Trays and Waiters wholly unprecedented in richness to extent, variety, or novelty.
New Oval Papier Maché Trays, per set of three from 20s. 0d. to 10 guineas.
Ditto, Iron ditto from 13s. 0d. to 4 guineas.
Convex shape, ditto from 7s. 6d.
Round and Gothic waiters, cake and bread baskets, equally low.

WILLIAM S. BURTON has SIXTEEN LARGE SHOW-ROOMS devoted to the show of GENERAL FURNISHING IRONMONGERY, Iron and Brass Bedsteads and Bedding (including Outlets, Nickel Silver, Plated and Japanese Ware), so arranged and classified that purchasers may easily and at once make their selections.
Catalogues, with Engravings, sent (per post) free. The money returned for every article not approved of.
39, OXFORD-STREET, corner of Newman-street; 1, 2, and 3, NEWMAN-STREET; and 4 and 5, PERRY'S-PLACE.

LOOKING-GLASSES, Console Tables, Window Cornices, Grindaloes, and Gilt Decorations of every description.—C. NOSOTTI, Manufacturer (established 1822), 394 and 399, Oxford-street, has the most extensive assortment of Looking-glasses in every variety of style. The taste and superiority of workmanship combined with the pure color of the glass, merit insure patronage. C. Nosotti being the largest consumer of Plate Glass, has made arrangements with the principal British and foreign Plate-Glass Companies, by which he is enabled to offer advantages in prices as cannot be excelled by any other house. Books of Designs free on receipt of six stamps for postage.

SCHWEPPE'S SODA, POTASS, and MAGNESIA WATERS, and Aerated Lemonade, continue to be manufactured upon the largest scale at their several establishments in London, Liverpool, Bristol, and Derby. The celebrity of these well-known waters, and the preference they universally command, are evidences that their original superior quality over all others is well sustained. Every bottle is protected by a label, with the name of their firm, without which none is genuine, and it may be had of nearly all respectable Chemists throughout the Kingdom. Importers of the German Seltzer Waters, direct from the springs, as for the last thirty years.—51, Berners-street, London.

DINNEFORD'S FAMILY MEDICINE DIRECTORY, containing a variety of Practical Information especially adapted for the Clergy, Ladies, Schools, and Heads of Families, in the absence of Professional Assistance, New Edition, price 2s. 6d., by post 3s.
MEDICINE CHESTS in great variety; a large Assortment of Patterns, at prices from 10s. to 10l.
172, New Bond-street, London.

DINNEFORD'S PURE FLUID MAGNESIA has been for many years sanctioned by the most eminent of the Medical Profession as an excellent remedy for Acidities, Heartburn, Headache, Gout, and Indigestion. As a Mild Aperient it is admirably adapted for delicate Females, particularly during Pregnancy; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an Effervescent Aperient Draught, which is highly agreeable and efficacious.—Prepared by DINNEFORD & CO., Dispensing Chemists, (and General Agents for the improved Horse Hair Gloves and Belts), 172, New Bond-street, London; and sold by all respectable Chemists throughout the Empire.

VERBENA.—BREIDENBACH'S Distillation of VERBENA is a refreshing, sharp, and sweet PERFUME used on the handkerchief it prevents fainting in a crowd, revives the spirits, and cools the surrounding air. Do not "pass on," but stop at Breidenbach's Laboratory of Flowers, 157 B, New Bond-st.

ROWLANDS' MACASSAR OIL, for the GROWTH, RESTORATION, and for IMPROVING and BEAUTIFYING the HUMAN HAIR. It prevents Hair from falling off or turning grey, strengthens weak Hair, cleanses it from Scurf and Dandruff, and makes it BEAUTIFULLY SOFT, CURLY, and GLOSSY. In the Growth of the BEARD, WHISKERS, and MUSTACHIOS, it is unfailing in its stimulative operation. For CHILDREN it is especially recommended as forming the basis of a BEAUTIFUL and HEALTHY HAIR.
Price, 6d.; 7s. Family Bottles, equal to four small, 10s. 6d.; and double that size, 21s.

CAUTION.—On the Wrapper of each Bottle are the words, ROWLANDS' MACASSAR OIL, in two lines.
Sold by A. ROWLAND & SONS, 20, Hatton-garden, London; and by Chemists and Perfumers.

THE TOILET OF BEAUTY furnishes innumerable proofs of the high estimation in which GOWLAND'S LOTION is held by the most distinguished possessors of brilliant complexions. This elegant preparation comprehends the preservation of the complexion, both from the effects of cutaneous malady and the operation of variable temperature, by restoring its delicacy and preserving the brightest tints with which beauty is adorned. "Robert Shaw, London," is in white letters on the government stamp, without which none are genuine.—Prices 2s. 9d. and 5s. 6d.; quarts, 8s. 6d. Sold by Perfumers and Chemists.

METCALFE & CO'S NEW PATTERN TOOTH BRUSH & PENETRATING HAIR BRUSHES.—The Tooth Brush has now acquired the general confidence of searching thoroughly into the divisions of the Teeth, and is famous for the hairs not coming loose, 1s. An improved Clothes Brush, incapable of injuring the finest nap. Penetrating Hair Brushes, with the durable unbleached Russian bristles. Flesh Brushes of improved graduated and powerful friction. Velvet Brushes, which act in the most successful manner. Smyrna Sponges.—By means of direct importations, Metcalfe & Co. are enabled to secure to their customers the luxury of a Genuine Smyrna Sponge. Only at METCALFE, BINGLEY & CO'S Sole Establishment, 130 B, Oxford-street, one door from Holles-street.

Caution.—Beware of the words "From Metcalfe's," adopted by some houses.
METCALFE'S ALKALINE TOOTH POWDER, 2s. per box.

DR. DE JONGH'S
LIGHT-BROWN COD LIVER OIL.

THIS pure and genuine transparent Light-Brown Cod Liver Oil, long known and justly appreciated on the Continent, has now acquired the general confidence of the Medical Profession in this country, by whom it has been extensively and successfully prescribed, and with almost immediate and remarkably beneficial results—in many instances where ordinary Cod Liver Oil has been copiously, though ineffectually, administered.
Being invariably and carefully submitted to chemical analysis—and supplied in sealed bottles, so as to preclude any subsequent admixture or adulteration—the physician and the patient may alike rely upon a genuine medicine, and so far as is possible, anticipate a uniform, regular, and certain result.
Sold in bottles, capsules and labelled, with Dr. de Jongh's Stamp and Signature, WITHOUT WHICH NONE ARE GENUINE, by ANSAR, HARFORD & CO., 77, STRAND, LONDON, Dr. de Jongh's sole accredited Consignees and Agents; and in the country by respectable Chemists.
Half-pints (10 ounces), 2s. 6d.; Pints (20 ounces), 4s. 9d.; Quarts (40 ounces), 9s. IMPERIAL MEASURE.

RUPTURES EFFECTUALLY CURED WITHOUT A TRUSS!—All sufferers from this alarming complaint are earnestly invited to consult or write to Dr. LESLIE, as he guarantees them relief in every case. His remedy has been successful in curing thousands of persons during the last five years, and is applicable to every kind of single or double Rupture, however long or long-standing, in male or female of any age, causing no confinement or inconvenience in use whatever. Sent post free to any part of the world, with full instructions for use, on receipt of 7s. 6d. in postage stamps, or post-office order, payable at the General Post-office, to Dr. Herbert Leslie, 37, Abchurch-lane, London.—At home daily, except Sunday, from 11 to 4 o'clock. Pamphlet of Testimonials, cases, &c. sent post free on receipt of one postage stamp.

INTERESTING NEW PUBLICATIONS.

HISTORY OF THE LANDED GENTRY.

A GENEALOGICAL DICTIONARY OF THE WHOLE OF THE UNTITLED ARISTOCRACY OF ENGLAND, SCOTLAND, AND IRELAND.

By SIR BERNARD BURKE, ULSTER KING OF ARMS.

A NEW AND THOROUGHLY REVISED EDITION, to be completed in a single volume, uniform with the Peerage and Baronetage (divided into FOUR PARTS, the FIRST of which is now ready, price 10s. 6d.)

The Landed Gentry of England are so closely connected with the stirring records of its eventful history, that some acquaintance with them is a matter of necessity with the legislator, the lawyer, the historical student, the speculator in politics, and the curious in topographical and antiquarian lore; and even the very spirit of ordinary curiosity will prompt to a desire to trace the origin and progress of those families whose influence pervades the towns and villages of our land. This work furnishes such a mass of authentic information, in regard to all the principal families in the kingdom, as has never before been attempted to be brought together. It relates to the untitled families of rank, as the 'Peerage and Baronetage' does to the titled, and forms, in fact, a peerage of the untitled aristocracy. It embraces the whole of the landed interest, and is indispensable to the library of every gentleman.

THE ROMANCE OF THE ARISTOCRACY;

OR, ANECDOTES AND RECORDS OF DISTINGUISHED FAMILIES. BY SIR BERNARD BURKE.

A New and greatly Improved Edition, in 3 vols. post 8vo.

"In these volumes the indefatigable genealogist of the ancient families of the kingdom has collected a variety of incidents from their history, which will go far to establish the proposition that there is full as much romance in real life as in works of fiction. Some of the facts here recorded have furnished materials for the use of poets and novel-writers; while others are altogether new to the general reader, being drawn forth from the more recondite stores of biography. The former will be perused with interest on account of the historical fidelity of the narrative: to the latter their very novelty imparts an additional charm."—*John Bull*.

SALATHIEL, THE IMMORTAL.

By the Rev. G. CROLY, LL.D. A New, Revised, and Cheaper Edition, in 1 vol. post 8vo.

From the Athenæum.—"A magnificent fiction. One of the most splendid productions among works of fiction that the age has brought forth."

From the Literary Gazette.—"This extraordinary story, the production of a man of

great genius, cannot be classed with any of the works of imagination which have been put forth in these times, so fertile in romance. It is perfectly original in the general conception, as well as in its splendid and powerful eloquence."

LIVES OF THE PRINCESSES OF ENGLAND.

By MRS. EVERETT GREEN.

Complete in Six Volumes post 8vo., either of which may be had separately to complete sets.

"This work is a worthy companion to Miss Strickland's admirable 'Queens of England.' That celebrated work, although its heroines were, for the most part, foreign Princesses, related almost entirely to the history of this country. The Princesses of England, on the contrary, are themselves English, but their lives are nearly all connected with foreign nations. Their biographies, consequently, afford us a glimpse of the manners and customs of the chief European kingdoms, a circumstance which not only gives to the work the charm of variety, but is likely to render it peculiarly useful to the general reader, as it links together by association the contemporaneous history of various nations. We cordially commend Mrs. Everett Green's production to general attention; it is (necessarily) as useful as history, and fully as entertaining as romance."—*Sun*.

SKETCHES OF THE IRISH BAR.

WITH OTHER LITERARY AND POLITICAL ESSAYS.

By WILLIAM HENRY CURRAN, Esq. 2 vols. post 8vo.

MEMOIRS OF THE RIGHT HON. RICHARD LALOR SHEIL.

By TORRENS M'CULLAGH, Esq. 2 vols. with Portrait.

"An able and elaborate biography of Mr. Sheil by his intimate friend Mr. Torrens M'Cullagh. Mr. Sheil played so distinguished and useful a part in the political commotions of his time, and his oratorical powers were of such surpassing excellence, that his biography cannot fail of proving deeply interesting, not only in Ireland, to whose service his brilliant talents and untiring exertions were mainly devoted, but in England also, where his excellent dramas and eloquent speeches had secured him many warm admirers. Mr. M'Cullagh has, therefore, performed a task which will gain him the gratitude of many of the present generation, and, we doubt not, the approbation of several succeeding ones."

Dublin Evening Post.

MR. SHEIL'S LEGAL AND POLITICAL SKETCHES.

"Of the great power and brilliancy of these papers there can be no second opinion. In the British senate, as in his own native land, the name of Richard Lalor Sheil will be long remembered in connexion with eloquence and learning and with genius. In these volumes he has left a memorial of all the gems of his rich and varied intellect—every phase and line of his versatile and prolific mind."—*Dublin University Magazine*.

THE CRESCENT AND THE CROSS. BY ELIOT WarBURTON.

Twelfth and Cheaper Edition. In 1 vol. with Fifteen Illustrations, 6s. bound.

"The new interest given to all that relates to Turkey and the East will doubtless create a new demand for so clever a description of it as Mr. Warburton's 'Crescent and the Cross.' The new edition doubtless will be the most extensively bought of any of them, for it is brought within the means of all classes by a great reduction in price."—*Critic*.

"A book calculated to prove more practically useful was never penned than 'The

Crescent and the Cross'—a work which surpasses all others in its homage for the sublime and its love for the beautiful in those famous regions consecrated to everlasting immortality in the annals of the Prophets, and which no other modern writer has ever depicted with a pencil at once so reverent and so picturesque."—*Sun*.

INGS.—To Literary Institutions, Schools, and Families.—LECTURES (in English), combined with Dramatic and Literary Readings, are delivered by DR. ALTSCHUL, M. Ph. Soc., Examiner Royal Coll. Preceptors, Professor of the German, Italian, and French Languages and Literature.—Chandos-st., Cavendish-square.

EDUCATION.—A LADY residing in a

healthy locality, near London, RECEIVES a select and limited number of YOUNG LADIES, she has had many years' experience, and can offer the advantages of a superior education, combined with the comforts of home. Professors of reputed talent attend.—Address H. Y., at Roland's Library, 30, Berners-street.

FOREST HOUSE SCHOOL, WOODFORD WELLS.

Conducted by MR. G. F. H. SYKES, B.A., late First Assistant Master of Mill Hill School.
The object of this Establishment is to furnish an Education based on Christian principles, and comprehending instruction in the Arts of Commerce, in the Languages, and in Science.
Omnibuses from the City pass the door several times in the day.—Prospectuses will be forwarded on application.

THE REV. NATHANIEL JENNINGS, M.A.

RECEIVES into his House in AVENUE-ROAD, ST. JOHN'S WOOD, LONDON, a small number of PUPILS.
The Educational Course comprises instruction in the Holy Scriptures, and the Principles of Christianity; in Writing, Arithmetic, Geography, and History; in the English, French, German, Latin, and Greek Languages; in the Elements of Algebra, Geometry, Trigonometry, and Conic Sections; and in Chemistry and Natural Philosophy.
TERMS:—For Pupils under twelve years of age, Fifty-five Guineas; and above that age, Sixty-five Guineas per annum.
Hampton House, Avenue-road, St. John's Wood.

EDUCATION.—40*l.* PER ANNUM.—A

Professor at a First-Class Establishment at St. John's Wood, has the privilege (in return for his services) of introducing a YOUNG LADY, who will receive the same advantages as the other Pupils, and be instructed by the Masters at the above (which are little more than half the usual) terms.—Address, immediately, L. T., Post-office, 15, Charing-cross.

EDUCATION.—A Gentlewoman, of much

experience, assisted by an accomplished Lady who has received a Continental education, will be happy to undertake the partial or entire CARE and INSTRUCTION OF ONE or TWO PUPILS, and would not object to those of early age. A German Lady is resident for the advantage of conversation. The highest references offered.—Z., Spalding's Library, Notting-hill.

EDUCATION PREPARATORY to SCHOOL.

—TWO or THREE LITTLE BOYS, from the age of Six to Nine, are received by three Sisters, residing in a healthy neighbourhood eight miles from London, and thoroughly prepared to enter with advantage into good Schools. Terms moderate. Reference may be made to Rev. L. J. Bernays, Elstree-hill, Edgware.—Address A. B., Post-office, Edgware.

ST. JOHN'S-WOOD PROPRIETARY COL-

LEGIATE SCHOOL, 25, St. John's-Wood Park.

Second Master—H. DEIGHTON, Esq. B.A., late Scholar of Queen's College, Cambridge.

An Exhibition of 30*l.*, open to Students intended for the University, or for the Legal and Medical Professions, and tenable for three years, will be annually adjudged. Students entering before Christmas next will be admissible to contend.
Each Proprietor has the right of nominating one Pupil at a time to the School at reduced fees. R. HUDSON, Hon. Sec.
*The Second Master RECEIVES BOARDERS at 24, Boundary-road.

CALNE SCHOOL, WILTS.

THE REV. W. B. JACOB, M.A.,
Of Emmanuel College, Cambridge;
Assistant Classical Master, Mr. T. CLAYTON, B.A., of Trinity College, Oxford, Hertford Scholar;
RECEIVES Pupils between the Ages of Eight

and Fifteen, undertaking to give them either a strictly Classical or a more general Education, to prepare them for the Schools, for the Military Colleges, for the India Appointments, or for any of the Professions.
TERMS—FORTY-SIX GUINEAS PER ANNUM.
No extras, except Books.

References may be made to the following Gentlemen:—
The Ven. Archdeacon Macdonald, Bishop's Canning, Wilts.
Rev. John Guthrie, The Vicarage, Calne.
Rev. W. Dalby, Compton Bassett Rectory, near Calne.
Rev. H. Drury, Bremhill Rectory, near Calne.
Rev. G. W. Daubeny, Seend, near Devizes.
Rev. W. Wraye (Fellow of King's Coll. Cambridge), Eton College.
Mr. G. Awdry, Esq., Notton Lodge, Chippenham.
J. Theobald, Esq., Wyde Abbey, Winchester.
E. Absolom, Esq., Woodlands Lodge, Blackheath, Kent.
R. C. Gale, Esq., Winchester.
E. Lomer, Esq., Moorlands, Bitterne, near Southampton.

GERMAN LANGUAGE and LITERA-

TURE.—Dr. A. BUCHHEIM, Graduate of the University of Vienna, Editor of the 'German Athenæum,' GIVES LESSONS in the German Language and Literature through the medium of the English, French, or Italian.—Address to 2, Burton-crescent.

PROTESTANT EDUCATION at DIEPPE,

Established Eleven Years, by the Mdlles. CIEUTAT, born and educated at Paris.—Only Protestant Young Ladies are admitted. Number limited to Twenty. Healthy situation facing the Sea, with large Garden. Complete education, entirely in French. All the necessary classes for passing the examinations at Paris. Terms, 40*l.* per annum, *everything included*, excepting the Arts. Mdlle. Aulaguer, Professor of Singing, Piano and Harmony, resides in the Establishment; terms, 1*l.* and with Singing, 12*l.* The year commences October 1st, and finishes August 15th. Recommended by M. le Pasteur de Dieppe, at Dieppe; M. le Pasteur Coquerel, at Paris; Mr. Chapman, French Master at Christ's Hospital; the Clergy Orphan School; and the Rev. A. Wintzer, King's College School; and by all the Parents of Pupils, whose addresses can be had on application.—Address, pre-paid, to Mdlles. CIEUTAT, sur la Plage, Dieppe.

A LADY, experienced in general Tuition, viz.,

Music, French, Drawing, &c., is ready to make AN ENGAGEMENT for the present recess, about twelve weeks, as COMPANION to Two or Three Young Ladies, either in England or on the Continent. Terms moderate. References given and required.—Letters addressed, post free, to Mons. C. L. Lasque, Professor of Languages, 42, Bloomsbury-street, New Oxford-street.

LITERATURE.—By A LADY.—Manuscripts

arranged. Translations executed from the French, German, and Italian, with idiomatic accuracy. A re-engagement as Reader or amanuensis is desired.—Address Mrs. MAY, care of Mr. Franz Thimm, Foreign Bookseller, 3, Brook-street, Grosvenor-square.

COMMERCIAL INSTITUTION in

DIEPPE.—This celebrated institution, founded in the year 1833 by Mr. A. B. Rey, offers a thorough INSTRUCTION in all branches of Mercantile Knowledge and Foreign Languages to Young Gentlemen who wish to prepare themselves for commercial business, or to complete their education.—The Plan of Instruction and Terms may be had on application to Mr. WILLIAM REY, Dieppe, Germany.

MR. B. H. SMART, formerly of Connaught-

terrace, now of 37, WYNDHAM-STREET, Bryanston-square, acquaints his Friends that he continues to INSTRUCT CLERICAL and other PUPILS in EDUCATION, to meet Classes in Families and Schools for English generally, and to engage for Public Readings and Lectures.

MEDICAL PRACTICE in LONDON for

IMMEDIATE DISPOSAL, in consequence of the sudden severe illness of the Gentleman, who has been in successful practice for upwards of 35 years in the same neighbourhood. The Lease of the House, which is pleasantly situated, would also be disposed of, with the Fixtures: the whole on very moderate terms.—Address, A. Z., Messrs. Moores & Sills, Solicitors, 18, Old Broad-street, City.

MISS POLE, having made arrangements for

the reception of EIGHT YOUNG LADIES as RESIDENT PUPILS, in addition to her Morning Pupils, has the honour of announcing that the Studies commenced April 4th, at her residence, 23, Circus, Bath, where the Plan of Study and Prospectuses may be obtained.

STAMMERING.—Monsieur DUVAL success-

fully CURES STAMMERING, on natural and scientific principles, without drawl, or any of the artificial means generally used. His Orthophonic Exercises enable Gentlemen speaking in public to be clearly and distinctly heard at a great distance. He can give the best references.—181, Watstone-lane, Birmingham.

AN OXFORD GRADUATE in HONOURS

(Second Class, 1854), desires to meet with an ENGAGEMENT AS TUTOR to a Gentleman's Son who is going to study Abroad. Testimonials given.—Address (stating particulars) to P. D. S., care of Mr. Shrimpton, Bookseller, Broad-street, Oxford.

AN OXFORD MAN, a Scholar of his College,

desires to employ, in TITUTION, part of his time during the approaching Vacation, either in London or at the Sea-side.—H. C. 1, Brunswick Villas, Abbey-road, St. John's Wood.

EDITOR.—A Gentlemen, who has up to this

time been editing a newspaper of large circulation in the West of England, seeks a NEW ENGAGEMENT.—Address B. C., care of John Corderoy, Esq., 3, Kennington-green, Lambeth, London.

TO NEWSPAPER PROPRIETORS.—A

Gentleman, of considerable experience, both as Editor and Contributor, is desirous of conducting a weekly, or furnishing the Leaders, Literary and Artistic Articles, to a Daily or Provincial Paper, which may require the infusion of new life and energy to meet the expected movement in journalism. Having the command of Capital, and large connections, he would prefer an Engagement which would eventually lead to a Proprietorship, but would object to take any pecuniary risk in a new undertaking.—Address, pre-paid, Y. Y., care of Mr. Mitchell, General Advertising and Newspaper Press Directory Office, Red Lion-court, Fleet-st.

TO SCIENTIFIC INSTITUTIONS, &c.—

WANTED, by the Advertiser, late the Curator of the Royal Polytechnic Institution, an ENGAGEMENT of a similar Description, or otherwise as an Assistant to a Scientific Gentleman. He is well acquainted with the Manipulation of many branches of Science, and possesses a good knowledge of Botany and Entomology. Also, the Management of the Hydro-Oxygen Microscope, Dissolving Views, Lanterns, &c. Testimonials undeniable.—Address J. H. M., 275, Regent-street, Portland-place.

DAUERRETYPE Plates, plain or tinted.
STEREOSCOPIC Portraits, singly or in groups.
COPIES on Plate or Paper.

TAKEN DAILY.

"Mr. Mayall's portraits represent the high art of the daguerreotype; they are superior to the generality of such pictures as a delineating and a fine work."—*Art Journal*, Jan. 1853.
"More pleasing, and far more accurate than the generality of such pictures."—*Times*, July 17, 1854.

THE SEAT OF WAR.—The Undersigned has established himself at CONSTANTINOPLE, as Agent for Steamers and Sailing Ships engaged in the TRANSPORT SERVICE. He will be prepared to make a FAVORABLE ARRANGEMENT for the TRANSPORT of Passengers, and to take Charge of Parcels or Letters, and be glad to make his services generally useful.
Constantinople, March 15, 1855. WILLIAM HADFIELD.

TESTIMONIAL PORTRAIT of Mr. DAVID COX, the eminent LANDSCAPE PAINTER.—At a MEETING of Gentlemen, held in the Rooms of the Society of Artists, Birmingham, on the 31st of May, 1855, CHARLES BIRCH, Esq., in the Chair; it was

Resolved.—That this Meeting, entertaining a high admiration of the genius and character of Mr. David Cox, resolves that a Subscription be entered into for the purpose of having a Portrait of Mr. Cox painted by some eminent Artist; the Portrait to be presented to Mr. Cox and retained by him during his life-time, and then placed in some public building in Birmingham, his native town; that in the event of sufficient funds being raised the Portrait to be engraved for distribution amongst the members of a Committee of sixty gentlemen was appointed to carry out the foregoing resolution. Mr. William Roberts, of Harborne Hall, was appointed Treasurer, and Messrs. J. B. Hebbert and John Jeffray, Honorary Secretaries.

Subscriptions will be received by the Treasurer and Secretaries at Messrs. Taylor & Lyon Bank, at Mr. Everett's, New-street; Mr. Holmes, Cherry-street; and the Journal Office, Birmingham. J. B. HEBBERT, JOHN JEFFRAY, Hon. Secs.

Birmingham, June 1st, 1855.

THE LIFE and WRITINGS of DEAN SWIFT.—MR. MURRAY would feel greatly obliged by permission to communicate with any Gentleman who possesses, or has access to, any Manuscripts, Original Letters, or other Documents illustrative of Swift's Life and Works, whether printed hitherto or not.
30, Abchurch-lane, London.
May 31, 1855.

CAUTION TO BOOKSELLERS, PRINTSELLERS, STATIONERS, &c.

MESSRS. LLOYD BROTHERS & Co. having recently recovered a verdict in the Court of Exchequer against Whitt and others, for selling pirated copies of their Bird's-Eye View of "Cronstadt and its Fortifications," BEG to CAUTION the TRADE that after this notice they intend TAKING LEGAL PROCEEDINGS against all parties printing, publishing, or selling pirated copies of the above, or of any other of their works illustrative of the War. At the same time, they beg, also, to caution the Trade against selling the French editions of a Bird's-Eye View of Cronstadt, as several of them are piracies of their work.
22, Ludgate-hill, London.

A BIRD'S-EYE VIEW of the PENINSULA of KERTCH and the SEA of AZOF.

A BIRD'S-EYE VIEW of the CITY and FORTIFICATIONS of REVEL.

A BIRD'S-EYE VIEW of the CITY and HARBOUR of RIGA.

Messrs. LLOYD BROTHERS & Co. beg to announce that the above Views, lithographed in two tints, by Messrs. Day & Son, from Drawings by N. Whitlock, will be published in a few days, price 2s. 6d. each, uniform in size with their Bird's-Eye Views previously published, of Cronstadt, Sebastopol, Odessa, Varna, and the Crimea, the whole of which are now republishing at 2s. 6d. each.
22, Ludgate-hill.

TO DRAMATIC AUTHORS, Managers, Collectors, the Patrons and Lovers of the Drama, and the Public in General.—TO BE SOLD, a matchless and unique Collection of considerably more than 2,000 different FRENCH DRAMAS (great part of them entirely new), which have appeared at the various Parisian Theatres from the commencement of this century to the present time; collected with much trouble and at a great expense by a gentleman well known in the dramatic world, who, for pecuniary reasons, will now part with them at a great sacrifice. The whole collection will be sold for a little more than three farthings each, that is for 84, not one-tenth of their original price.—Specimens may be seen at Mr. Lacy's, Theatrical Bookseller and Publisher, 17, Wellington-street, Strand, by whom the Collection will be disposed of.

FOR DISPOSAL, AT COST PRICE.—The HALF of a New PHOTOGRAPHIC BUSINESS. Receipts, first year, 1,000l.; profits, 40 per cent. 250l. required for Stock and Fixtures. Apply to Mr. NEVETT, 1, Johnson's-court, Fleet-street.

TO BE DISPOSED OF, a COLLECTION of ANCIENT SEAL IMPRESSIONS, including some of the Great Seal of England (originals) during the Reigns of Edward IV. and VI., Elizabeth, Charles, and James; and upwards of 100 of Historical interest, Papal Seal Impressions, and others relating to Ecclesiastical History.—Apply to W. BOLTON, 146, Holborn Bars.

THE ENCYCLOPEDIA BRITANNICA.—The Edition (Eighth) now publishing.—The Advertiser being unable to continue taking the Work, is willing to dispose of the first Seven Volumes for 5l.; original cost, 5l. 8s.—Apply to H. M., 14, Bedford-place, Commercial-road East.

THE LONDON GAZETTE.—TO BE DISPOSED OF, a Series of the LONDON GAZETTE, from the First Number in 1665 to the end of 1848. The Index being complete renders them of great value for ready reference. Apply to Mr. DEACON, Advertising Agent, B-and-court, Walbrook, where they may be seen.

FOR SALE.—The PATENT RIGHTS of THREE VALUABLE and USEFUL INVENTIONS, requiring but little outlay to introduce them.—Apply to X. Y., Mr. W. NEWMAN, 7, St. Giles-street, Norwich.

NOTICE.

GRESHAM LIFE ASSURANCE SOCIETY.—Head Office, 37, Old Jewry, London.—The Board of Directors return their thanks to the many eminent gentlemen who have offered their services to the Society, in reply to the Company's advertisement for a principal officer.

After mature investigation of the several applications, the choice has fallen on Mr. Edwin James Farren, from his great eminence as an author on Insurance subjects, and from the written and personal testimony of the very highest character received in his favour.

The testimonials of other gentlemen have been sealed up, and will be forwarded in due course. (Signed) June 5, 1855. W. TABOR, Chairman.

GREAT WESTERN RAILWAY.—CHEAP EXCURSION TO CIRENCESTER.—STROUD, GLOUCESTER and CHELTENHAM.—A Train will leave the Paddington Station on Sunday, the 17th of June, at 7.45 a.m., returning the same evening at 11 o'clock, and at 6.30, Gloucester at 11.0 a.m., Stroud at 7.30, and Cirencester at 7.30. Fares.—Cirencester or Stroud, 10s. and 5s.; Gloucester or Cheltenham, 10s. and 5s. No Luggage allowed.

CONCERTINAS by CASE.—The only Instruments that remain in tune and do not require to be constantly repaired. Every Concertina by Case has 8 keys (full compass) and double action. Prices: No. 1, in mahogany, with hand-case, 4 guineas; No. 2, in rosewood, 6 guineas; No. 3, in rosewood, 8 guineas; No. 4, in rosewood, or ambony, 10 guineas; No. 5, splendidly finished in ebony, with plated stands, 12 guineas.—Cases & Instructions for the Concertina, price 10s. 6d.—Cases & Concertinas. Miscellaneous, published every month, price 2s. 6d.—Sole Dealers and Publishers, Boosey & Sons, 25, Holles-street.

ADVERTISEMENTS for the JULY NUMBER of the EDINBURGH PHILOSOPHICAL JOURNAL must be sent to the Publishers by the end of this month. Edinburgh: Adam & Charles Black.

MUDIE'S SELECT LIBRARY.—All the best New Works may be had in succession from this extensive Library by every Subscriber of One Guinea per Annum. The preference is given to Works of History, Biography, Religion, Philosophy, and Travel. The best Works of Fiction are also freely added.

* Prospectuses may be obtained on application.

MONASTIC INSTITUTIONS: Their Origin,
 Progress, Nature, and Tendency. By S. UEL PHILLIPS.
 LONDON: Longman, Brown, Green, and Longmans.

TO BOOK CLUBS, READING SOCIETIES, AND READERS
 IN GENERAL.

The First Number of
NOTES ON BOOKS; being an Analysis of the
 Works published during each Quarter by Messrs. LONGMAN
 & Co.

The object of this publication is to enable Book-buyers readily to obtain such general information regarding New Books and New Editions published by Messrs. Longman & Co. as they would derive from the perusal of well-arranged tables of contents or explanatory prefaces.

With this object each notice is confined to an Analysis of the Contents of the work referred to: Critical opinions and laudatory notices are excluded.

Copies will be sent free by post to all Secretaries, Members of Book Clubs and Reading Societies, Heads of Colleges and Schools, and Private Persons, who may send their addresses to Messrs. Longman & Co. 39, Paternoster-row, for this purpose.

The new Treasury Minute regulating Book Postage does not come into force till Monday, June 11, on which day copies will be forwarded by post to those persons who have sent their names.

London: Longman, Brown, Green, and Longmans.

MR. WELD'S TOUR IN AMERICA.

In post 8vo. with Route Map, 10s. 6d. cloth.

A VACATION TOUR in the UNITED STATES and CANADA.

By C. R. WELD, Barrister-at-Law.

"His narrative abounds throughout with amusing incident, interspersed with shrewd inquiries on things economical and social, and cannot fail to interest deeply all classes of readers."

"Mr. Weld lived in the singular hotel circles of the United States, entered into the varieties of social intercourse,—took notes of the industrial, commercial, and political aspects of the Union,—wandered through the great mazes of lake and forest in the Canadian interior,—went up the mountains and along the plains,—and saw as much during his rapid tour as some travellers see in the course of many revolving seasons. His narrative is equally free from pretence and levity. It is a carefully-coloured picture of men and movements, enlivened by anecdotes, and giving evidence of candid and impartial inquiry."—*Athenæum*.

London: Longman, Brown, Green, and Longmans.

Just published, price 5s.

A FEW MONTHS in AMERICA; contain-
 ing Remarks on some of the Industrial and Commercial Interests. By JAMES ROBERTSON.

OPINIONS OF THE PRESS.

"Derives novelty from the nature of the Author's pursuits, and from the practical nature of his mind."—*Spectator*.
 "Contains a great deal of information, including an elaborate view of cotton cultivation, and will be generally acceptable."

Economist.

"Mr. Robertson's is a work of enduring worth."—*Critic*.
 "The results are judiciously combined; by deductions are obviously just, and clearly expressed."—*United States Economist*.

"The information is arranged with so much more mastery and clearness than is common in the books we have on America, that his volume may be strongly recommended."—*Nonconformist*.

"Every page gives proof of close and healthy observation."

"It deserves to be very generally perused and purchased."

"There is much very readable matter in the book."

London: Longman & Co. Manchester: Gale & Co. Duane-place; and all Booksellers.

MR. BADEN POWELL'S NEW WORK.

In crown 8vo. with Diagrams, price 12s. 6d. cloth.

ESSAYS on the SPIRIT of the INDUCTIVE PHILOSOPHY, the UNITY of WORLDS, and the PHILOSOPHY of CREATION. By the Rev. BADEN POWELL, M.A. F.R.S. F.R.A.S. F.G.S. Savilian Professor of Geometry in the University of Oxford.

"At the present time, when so many works of a high character are appearing on the subject of the philosophy of science, Professor Powell's volume must be regarded as one of extreme interest. When so many conflicting opinions are being promulgated, a work confined strictly to inductive reasoning must be hailed with satisfaction by all lovers of truth. We do not profess in this place to give anything like an analytical review of the arguments which have been adduced by the learned author of this treatise in support of his views, but strongly recommend Mr. Powell's 'Unity of Worlds' as well calculated to clear up many difficulties and objections connected with the so-called doctrine of final causes, and the evidence of natural history generally. It may be mentioned that this work appears to us to be a model of controversial writing, being altogether free from that unhappy spirit of dogmatism and asperity which has characterized many of the lately-published essays on the points discussed."—*Lancet*.

London: Longman, Brown, Green, and Longmans.

In 1 vol. 8vo. with above 12,000 Woodcuts, 3l. 13s. 6d. cloth.
LONDON'S ENCYCLOPÆDIA of PLANTS.
 New Edition, corrected to the Present Time, by Mrs. LOUDON; assisted by GEORGE DON, F.L.S., and DAVID WOOSTER, late Curator of the Ipswich Museum.

* This Edition contains nearly 20 additional pages, and above 2,000 new Illustrations, without addition to the price.

Included in the above, and to be had separately, price 21s.

SUPPLEMENT: Comprising all Plants originated in or introduced into Britain between March 1840 and March 1855; with a new General Index to the whole Work, and above 2,000 new Woodcuts.

"The first edition of this celebrated work, which is incontestably of the greatest utility to gardeners, and, indeed, to all who have not access to great libraries, consisted of 1,159 pages; the latest in our possession filled 1,329 pages; that now brought before the public occupies no fewer than 1,574, forming a solid, massive volume of small print, comparable to nothing so well as to a dictionary. The great recommendation of the work has always been its woodcuts; which, although only miniatures, were nevertheless drawn by Mr. Sowerby with such happy art, and so skillfully engraved by Branstetter, that the plants could always be recognized, even by those little acquainted with the vegetable kingdom. The continuation in the form of Supplements is executed in a manner more than worthy of the original, and brings down the subject to the latest possible moment. How many hours the work contains we are unable to ascertain, but we estimate the number of plants actually represented by good woodcuts as amounting to something more than nine thousand."—*Gardeners' Chronicle*.

London: Longman, Brown, Green, and Longmans.

This day is published,
THE RAMBLER, for JUNE. Price 1s. 6d.

CHEAP EDITION of 'HISTORY of WOMAN.'

With Portrait of Miss NIGHTINGALE, in 1 vol. 5s. bound, dedicated, by permission, to the Queen of Hanover,

THIRD and CHEAP EDITION OF

THE HISTORY of WOMAN,

AND HER CONNEXION WITH RELIGION, CIVILIZATION, AND DOMESTIC MANNERS, FROM THE EARLIEST PERIOD.

By S. W. FULLON,

Author of 'The Marvels of Science,' 'The Great Highway.'

"With much eloquence, Mr. Fullon has here placed before our eyes the history of the better half of mankind. The pages of his admirable work display considerable learning and research."—*Morning Chronicle*.

"No writer of our own day possesses in a greater degree than Mr. Fullon the faculty of appropriating the popular elements of his subject: hence the peculiar fascination of the present narrative."—*Morning Post*.

"The subject is treated in a very fluent and agreeable manner by the accomplished author, whose able production cannot fail to command a very extensive circulation."—*Morning Advertiser*.

"The work is not to be considered a bare recital of facts, but a spirited summary of incidents, in which the author shows discrimination of character and knowledge of human nature."—*Morning Herald*.

"As we read these records of woman, it seems that a ray of more than earthly glory had illumined even the darkest pages of history."—*Lady's Newspaper*.

GEORGE ROUTLEDGE & Co. 2, Farringdon-street.

WORKS

Published by Cradock & Co.

No. 48, PATERNOSTER-ROW, LONDON.

THE NEW LIBRARY of USEFUL
KNOWLEDGE

Will be found to conform strictly to its title. The whole Series
will consist of Works of practical utility and of every-day interest;
and the manner of treating them will, it is hoped, prove to be both
clear and familiar. Each subject will be complete in ONE NUMBER.
Upon a comparison of this Series of Works with others of a
similar nature, it will be seen that, as regards composition, print-
ing, and quantity of matter, it has no rival.

The following are already published:

Each contains 64 Pages, price 6d.

1. Flower Gardener's Manual, for Shrubs and Flowers.
2. English Cookery; or, Practical Directions for Family Dinners.
3. The Horse: its Habits, Diseases, and Mode of Treatment.
4. Kitchen Gardener's Manual; with a Monthly Diary.
5. The Mother's Medical Adviser, on the Diseases and Manage-
ment of Children, with Recipes.
6. Australia: its Four Colonies. (Just published.)
7. Domestic Brewing, and British Wine Making.
8. The Steam-Engine familiarly described. With Cuts.
9. Preserving, Pickling, Confectionery, and Bread Making.
10. Every Sect of the Christian Religion described.
11. Fruit Gardener's Manual, and Companion for the Hothouse,
Greenhouse, and Conservatory.
12. Care of Domestic Animals: including Cows, Pigs, Poultry,
Rabbits, Ducks, Turkeys, Pigeons, Bees, &c.
13. Physiology of Health, a Popular Treatise.
14. Geology: a Concise Introduction to its Knowledge.
15. Farm and Garden: an Account of all Vegetables used at Table.
16. Vegetable Physiology: a Familiar and Concise Treatise.
17. Young Man's Mentor; with Rules for his Conduct on Leaving
School and Entrance into Life.
18. Week in London; or, all its Sights Viewed in Seven Days.
19. Cotton from the Pod to the Factory: a History of the Cotton
Factory to its present state of perfection.
20. China: its Early History and Present State.
21. The Study of Botany for Young People: a Popular Treatise.
22. British Forest Trees: a Guide to our Woods and Parks.
23. Canada, New Brunswick, Nova Scotia, Newfoundland.
24. Domestic Medicine; or, Family Medical Adviser.
25. The Art of Letter Writing Simplified by Precept and Example;
with much useful Postal Information, &c.
26. Excursions in the Vicinity of London, within a Circle of Fifty
Miles: a useful Guide to the Traveller.
27. Mineralogy: a Familiar Introduction to the Science.
28. History and Progress of Music on the Continent.
29. History of Music in England, Ireland, Scotland, and Wales.
30. The Watering and Sea-bathing Places of Kent, Sussex, Hamp-
shire, and the Isle of Wight.
31. The Musical Guide for Singers and Pianoforte.
32. Young Clerk's Manual; or, Counting-house Assistant, embrac-
ing every information necessary for a Man of Business.
33. The Wonders of Astronomy displayed in a popular Exposition
of the Modern Discoveries in that most interesting Science.
34. Migratory Birds: their Places of Resort, Songs, &c.
35. Sports, Pastimes, and Customs of London, Ancient and Modern.
36. Biographical Memoirs of Louis-Philippe, his Early History to
his Death at Claremont.
37. Historical Sketch of the French Revolution of 1848.
38. The Visitor's Handbook to Richmond, Key Gardens, and
Hampton Court; with a Map of the surrounding Country.
39. Palestine: a History of the Holy Land from the Call of
Abraham to the Present Time.
40. Windsor, Eton, and Virginia Water: the Visitor's Hand-
book; with a Catalogue of all the Pictures, Statues, Show Houses
of the Aristocracy, Picture Galleries, Museums, Scientific Insti-
tutions, Bazaars, &c. In Three Parts, with a Map of London,
constructed expressly for the use of Strangers of all Nations.
Price 2s. 6d. bound.
41. India: its History, Ancient and Modern, Civil and Military;
its Geography, Geology, Climate, Soil, &c.
42. London Life as it is: a Handbook to all its Attractions.
43. Soldiers of the Cross; or, Scenes and Events from the Time of
the Crusades.
44. The British Museum, in Five Sections, all to be seen in one
Visit.
45. New Zealand, and its Six Colonies described.
46. The Crystal Palace: a perfect Guide to Visitors. With a Ground
Plan of the Palace.

Guides for London Visitors.

editions, by YOUATT, SPOONER, and MAYHEW. 12mo. price
6s. each, cloth lettered.

IMPORTANT TO AUTHORS.

NEW PUBLISHING ARRANGEMENTS.

HOPE & CO. PUBLISHERS,

15, Great Marlborough-street, London.

CHARGE NO COMMISSION FOR PUBLISHING WORKS
PRINTED BY THEM until the Author has been refunded his
original outlay. They also print in the first style, *exactly under*
the usual charges; while their Publishing Arrangements enable
them to promote the interest of all Works entrusted to their
charge. Estimates and every particular furnished gratuitously
in course of post.

HOPE & CO.'S NEW WORKS.

Just published, price 12s. 6d.

SWITZERLAND IN 1854-5.

A Book of Travel, Men, and Things. By the Rev. W. G.
HEATHMAN, B.A., Rector of St. Lawrence, Exeter, late
British Chaplain at Interlaken.

London: Hope & Co. Courier and Church Reform Gazette Office,
15, Great Marlborough-street.

AMUSING AND INTERESTING NEW WORK.

Now ready at all the Libraries.

THE PRIVATE LIFE OF AN

EASTERN KING. By a MEMBER of the HOUSEHOLD of
His late Majesty NUSSIR U DEEN, King of Oude.

London: Hope & Co. Courier and Church Reform Gazette Office,
15, Great Marlborough-street.

CARLETON'S NEW WORK.

In 3 vols. now ready at all the Libraries.

WILLY REILLEY and his Dear

COLEEN BAWN: a Tale founded on Fact. By WILLIAM
CARLETON, Author of 'The Black Prophet,' 'The Miser,'
'Traits and Stories of the Irish Peasantry,' 'Valentine
McClutchy,' &c.

"This is a charming story—a kind of Irish chivalry poem. The
appearance of the 'Coleen Bawn,' when she raises her veil at the
trial of Willy Reilley, has the effect of a burst of sunshine. Willy
Reilley himself is a darling, and there is an atmosphere of romance
and nobleness about him which can scarcely fail to win all hearts.
The picture of the country under the pressure of the terrible 'penal
laws' against Catholics is done well and vigorously, but without
needless bitterness."—*Athenæum*.

London: Hope & Co. 15, Great Marlborough-street.

Now ready at the Libraries.

EDITH VERNON; or, Contrast

of CHARACTER. In 2 vols. price 21s.

London: Hope & Co. 15, Great Marlborough-street.

MARY ELLIS; or, Life and its

MISTAKES. In 3 vols. post 8vo. 31s. 6d.

"Excellent both in its moral tone and in its literary style. We
commend 'Mary Ellis' as a safe and instructive novel."

Literary Gazette.
" 'Mary Ellis' is a better novel, critically speaking, and a more
interesting one for the uncritical reader, than the majority of
those which claim the patronage of the circulating libraries; and
we can commend it to their shelves, where, if once admitted and
read by a few, it will rarely be found resting afterwards."—*Critic*.

London: Hope & Co. 15, Great Marlborough-street.

Just published, price 5s.

ROMANISM in CEYLON,

INDIA and CHINA. By the Rev. E. ROBINSON.

London: Hope & Co. 15, Great Marlborough-street.

Just published, price 7s. 6d. Illustrated.

LAYS of LOVE and HEROISM,

LEGENDS, LYRICS, and other POEMS. By ELEANOR
DARBY, Author of 'The Sweet South.'

"The authoress is already well and favourably known to the
British public by her previous publication, under the title of 'The
Sweet South.' The appearance of the present volume will but call
forth a repetition of those high encomiums which were so plen-
tifully bestowed upon her former effort. The 'Lily o' Dundee' is
of itself sufficient to show the distinguished abilities of the
authoress, displaying as it does, in a very high degree, her power,
pathos, and poetic skill. The volume, as a whole, cannot fail to
contribute very materially to the popularity of the accomplished
authoress; and it deserves a very extensive circulation."

Morning Advertiser.
London: Hope & Co. Courier and Church Reform Gazette Office,
15, Great Marlborough-street.

BY THE AUTHORESS OF 'LAYS OF LOVE AND
HEROISM.'

THE SWEET SOUTH; or, a

MONTH at ALGIERS. By ELEANOR DARBY. Price 4s.

For the excellent Reviews of this Work see *Athenæum*, *Observer*,
Literary Gazette, *Critic*, *Courier*, &c.

London: Hope & Co. Courier and Church Reform Gazette Office,
15, Great Marlborough-street.

Just published, price 2s. 6d.

NUMBER NINETY of TRACTS

for the TIMES. Reprinted, with Introduction and Notes, by
the Rev. JAMES FREW, Rural Dean and Prebendary of
Ballysounon, Diocese of Kildare.

London: Hope & Co. Courier and Church Reform Gazette Office,
15, Great Marlborough-street.

Just published, the Fifth Edition, 8vo. cloth, 26s.

HUMAN PHYSIOLOGY.

ILLUSTRATED WITH NUMEROUS ENGRAVINGS ON STEEL AND WOOD.

By W. B. CARPENTER, M.D. F.R.S.

By the same Author, Fourth Edition, 8vo. cloth, 24s.

COMPARATIVE PHYSIOLOGY.

ILLUSTRATED WITH THREE HUNDRED ENGRAVINGS ON WOOD.

London: JOHN CHURCHILL, New Burlington-street.

Just published, Fifth Edition, fcap. 8vo. cloth, 12s. 6d.

A MANUAL OF MEDICAL JURISPRUDENCE.

By ALFRED S. TAYLOR, M.D. F.R.S.

"Any review of this work would fail to convey an accurate opinion of its extraordinary merits. It is a production which exhibits the results of immense labour. In a word, it may be said that this single book contains all that is known on the subject to which it relates. A due appreciation of this interesting, valuable, and useful volume requires that its pages should be carefully and deliberately consulted."—*The Lancet*.

By the same Author, fcap. 8vo. cloth, 12s. 6d.

ON POISONS; IN RELATION TO MEDICAL JURISPRUDENCE AND MEDICINE.

London: JOHN CHURCHILL, New Burlington-street.

WORKS ON CHEMISTRY.

A MANUAL of PHOTOGRAPHIC CHEMISTRY, including the PRACTICE of the COLLODION PROCESS. By T. FREDERICK HARDWICH, late Demonstrator of Chemistry, King's College, London. Fcap. 8vo. cloth, 6s. 6d.

FOWNES'S MANUAL of CHEMISTRY. Edited by H. Bence JONES, M.D. F.R.S. and A. W. HOFMANN, Ph.D. F.R.S. Fifth Edition. Fcap. 8vo. cloth, 12s. 6d.

The USE of the BLOWPIPE. By Professors PLATTNER and MUSPRATT. Third Edition. 8vo. cloth, 10s. 6d.

CHEMICAL DIAGRAMS. By ROBERT GALLOWAY. On Four large Sheets, for SCHOOL and LECTURE ROOMS. Price 5s. 6d. the Set.

By the same Author,

A MANUAL of QUALITATIVE ANALYSIS. Post 8vo. cl. 4s. CHEMISTRY, as EXEMPLIFYING the WISDOM and BENEFICENCE of GOD. By GEORGE FOWNES, F.R.S. Second Edition. Fcap. 8vo. cloth, 4s. 6d.

PRACTICAL CHEMISTRY, including ANALYSIS. With numerous Illustrations on Wood. By JOHN E. BOWMAN, Professor of Practical Chemistry in King's College, London. Second Edition. Fcap. 8vo. cloth, 6s. 6d.

By the same Author,

MEDICAL CHEMISTRY. With Illustrations on Wood. Third Edition. Fcap. 8vo. cloth, 6s. 6d.

HANDBOOK of CHEMISTRY, Theoretical, Practical, and Technical. By F. A. ABEL, F.C.S. Chemist to the Board of Ordnance; and C. L. BLOXAM, Demonstrator of Practical Chemistry in King's College. 8vo. cloth, 15s.

INSTRUCTION in CHEMICAL ANALYSIS. By C. REMIGIUS FRESSENIUS. Edited by LLOYD BULLOCK.

QUALITATIVE. Fourth Edition. 8vo. cloth, 9s.

QUANTITATIVE. Second Edition. 8vo. cloth, 15s.

CHEMISTRY of the FOUR SEASONS: SPRING, SUMMER, AUTUMN, WINTER. Illustrated with Engravings on Wood. By THOMAS GRIFFITHS. Second Edition. Fcap. 8vo. cloth, 7s. 6d.

LONDON: JOHN CHURCHILL, NEW BURLINGTON-STREET.

MR. CHURCHILL'S PUBLICATIONS.

Psychological Medicine; an Introduction to the PRACTICAL STUDY of INSANITY. By DANIEL NOBLE, M.D. Visiting Physician to the Clifton Hall Retreat, Manchester. Second Edition, revised and enlarged, 8vo. cloth, 10s.

On the Influence of Education and TRAINING in PREVENTING DISEASES of the NERVOUS SYSTEM. By ROBERT B. CARTER, M.R.C.S. Fcap. 8vo. cloth, 6s.

A Guide to the Practical Study of DISEASES of the EYE. By JAMES DIXON, Surgeon to the Royal London Ophthalmic Hospital. Post 8vo. cloth, 8s. 6d.

"All who have attended Mr. Dixon's *clinique* at the Moorfields Ophthalmic Hospital will be prepared for the remarkable excellence of this work. . . . We must content ourselves with expressing our strong conviction that this is a work of sterling and permanent value carrying all the weight that belongs to years of skilful experience, and deserving, even as a hand-book, to rank with the best practical monographs in our language."—*Lancet*.

The Diagnosis of Diseases of the BRAIN, SPINAL CORD, and their APPENDAGES. By J. RUSSELL REYNOLDS, M.D. 8vo. cloth, 8s.

The Pathology and Treatment of LEUCORRHEA. By W. TYLER SMITH, M.D. Physician-Accoucheur to St. Mary's Hospital. With Engravings, 8vo. cloth, 7s.

"The volume is of very great value; it contains matter of importance which is really original. It is a book which ought to be in the hands of all interested in obstetrical studies. The whole profession must be gratified to see the true spirit of science carried into the troubled questions in regard to leucorrhœa, and to observe the great progress made in the investigation." *Monthly Journal of Medicine*.

On Pulmonary Consumption. By THEOPHILUS THOMPSON, M.D. F.R.S. Physician to the Brompton Hospital for Consumption and Diseases of the Chest. With Plates, 8vo. cloth, 7s. 6d.

"We know of no modern treatise in which, while the physical signs are not neglected, the various manifestations of the disease are so fully discussed."—*Philadelphia Medical Examiner*.
"We cannot close the volume without warmly recommending its careful perusal to the attention of students and practitioners." *Monthly Journal of Medical Science*.

Lectures on Insanity. By FORBES WINSLOW, M.D., D.C.L., Oxon. 8vo. cloth, 5s.

"Never before have the chief points connected with psychological medicine and law been stated in a manner so clear and vigorous, and so argumentative, as in these admirable lectures. The medical practitioner will find in this work more of guiding principles, more exact and rational rules for the formation of his judgment, and the determination of his conduct, than in any other work on mental diseases. Dr. Winslow has by his writings given a great impetus to an enlarged and liberal study of the philosophy of insanity, cerebral pathology, and medical psychology, and has contributed more than any other man of his day to the dissemination of an improved, enlightened, humane and curative treatment of the insane."—*Lancet*.

On Diseases of the Rectum. By T. B. CURLING, F.R.S. Surgeon to the London Hospital. Second Edition, with Additions, 8vo. cloth, 5s.

Lateral Curvature of the Spine: its Causes, Nature, and Treatment. By R. W. TAMPLIN, F.R.C.S., Surgeon to the Royal Orthopedic Hospital. With Plates. 8vo. cloth, 4s.

On Gout: its History, its Causes, and its Cure. By W. GAIRDNER, M.D. Third Edition, post 8vo. cloth, 8s. 6d.

"Essentially a practical work, and may be consulted with equal service by the student and old practitioner. We are much mistaken if this volume does not assume a permanent and honourable position in British medical literature." *Medical Chirurgical Review*.

On Local Treatment of the Mucous MEMBRANE of the THROAT for COUGH and BRONCHITIS. By J. E. RIADORE, M.D., F.R.C.S. Fcap. 8vo. cloth, 3s.

A Compendium of Domestic MEDICINE, and Companion to the Medicine Chest; comprising Plain Directions for the Employment of Medicines, their Properties and Doses—Brief Descriptions of the Symptoms and Treatment of Diseases—Disorders incidental to Infants and Children—Directions for Restoring Suspended Animation—Counteracting the Effects of Poison—A Selection of the most efficacious Prescriptions, and various Mechanical Auxiliaries to Medicine: the whole intended as a source of easy reference for Clergymen, Master Mariners, and Travellers, and for Families residing at a distance from professional assistance. By JOHN SAVORY, Member of the Society of Apothecaries. Fourth Edition, 12mo. cloth, 5s.

The Principles and Practice of the WATER CURE, and HOUSEHOLD MEDICAL SCIENCE: in Conversations on Physiology, on Pathology, on the Nature of Diseases, and on Digestion, Nutrition, Regimen, and Diet. By JAMES WILSON, M.D. Second Edition, 8vo. cloth, 7s.

THE NATIONAL REVIEW.

ON the 30th JUNE, 1855, it is intended to publish the FIRST NUMBER of 'THE NATIONAL REVIEW,' a new QUARTERLY JOURNAL of GENERAL LITERATURE, POLITICS, and SOCIAL and RELIGIOUS PHILOSOPHY.

In originating such a Periodical the Conductors believe that they will supply a want long recognized, and every day more urgently felt by thousands of their thoughtful countrymen, who are unable to identify themselves with any one of the acknowledged parties in Church or State. It appears to us that there is no party, ecclesiastical or political, that is not manifestly embarrassed rather than sustained by its own watchwords and traditions. The established and conventional formulas of thought are confessedly inadequate to express the actual convictions of the time; and, though often liberally interpreted or questionably stretched to embrace the new conditions, this very accommodation virtually surrenders their essential life, and confesses the presence of younger energies and aspirations, which claim independent and original expression.

The effects of this have naturally been unfavourable to periodical literature. We are far from denying the excellent tone, taste, and temper, the great information, the high and available literary talent which characterize many of our leading periodicals; but we believe they suffer from the state of the parties of which they are the organs—they are marked by a want of steady adherence to an ascertained principle, of coherent and strict deductions, of defined and searching discussion.

On religious subjects especially we think it painfully evident, that there is not at present in this country any adequate organ for the expression and instruction of the many minds which are trying to combine, with a habit of free inquiry, the faithful adherence to realized and definite truth. The very aim at comprehensive principles is not recognized in most quarters; and in others the feeling of reverence, and the real existence of objects for reverence, seem to be altogether disregarded.

The selection of our name is no accident. Having a rooted faith in all indigenous products of thought and feeling, we conceive that too foreign a cast has been imparted to the character of our Christianity by the historical accidents of its introduction into this country. Neither Catholicism nor Protestantism is the growth of English soil; and probably not till Christian truth has shaped itself afresh under the home conditions of affection and character, will the religious *malaise* of our society cease. The NATIONAL REVIEW will interpret, it is believed, the deliberate faith of most cultivated English laymen, however now scattered among different churches,—a faith that fears no reality, and will permanently endure no fiction. No one who recognizes in Historic Christianity God's highest witness and revelation, can suppose that the world and the human mind are, or ever were, abandoned by their Divine and living guide; and we believe that to ignore or to disown the traces of His agency in the excellence and truth of every age, is not piety, but treason to His spirit. To preserve, in our treatment of philosophical or historical theology, the tone of reverence which is due to the earnest convictions of others, will be to us no artificial self-restraint, but the expression of natural disposition. With two things only, in this relation, we profess to keep no terms—the concealed Indifferentism, which, as its humour changes, pets or persecutes all faiths alike; and the insolent Dogmatism, which treats eternal truth as a private and exclusive property. Believing that in this country, amid all the clamour of sects, the Religion of widest range and deepest seat is as yet without a voice or name, we aspire, in this department of our work, to help it into adequate expression.

As Englishmen, we place unbounded confidence in the bases of English character,—its moderation and veracity; its firm hold on reality; its reverence for right and right; its historic tenacity; its aversion to *a priori* politics, and to revolutions generated out of speculative data.

We think, however, that even here there is room for a more constant reference to general principle than is now usual in this country. Many of our most influential organs seem to us to wander into discussions of business and detail, which may be useful in the narrow circles of official and merely political society, but are scarcely suited to the pursuit of thoughtful and able men in the country at large, whose occupations prevent their following the minutiae of transitory discussion, but who wish to be guided to general conclusions on important topics, and whose incalculable influence on public opinion makes it most important to give them the means of arriving at just conclusions.

We conceive the office of theory in such matters not to be, as was once thought, the elaborate construction of paper constitutions for all ages and all countries; but rather to ascertain and clearly define the conditions under which the various national characters and institutions have developed themselves; and to deduce, if possible, with fullness and sequence the rationale of the suitability of each polity to its appropriate nation. We would neither confine our political sympathies at home, nor carry our political doctrines ruthlessly and indiscriminately abroad; we feel no vocation for any sort of cosmopolitan propagandism, which would merge the distinctions of Race in the common features of Humanity; and would assume that what is good for us must be good for all, without regard to intrinsic character or historic antecedents. But we do acknowledge and will enforce those mutual claims of sympathy and duty between nations which no division of the great human family can guiltlessly evade, believing that the virtue and well-being of States is forfeited, not fostered, by selfish exclusiveness, as surely as the egoist, most studious of his own happiness, finds it soonest waste away. The present exciting crisis may not be the most favourable for the prosecution of internal reforms; but the prospect of European danger, and the appeal to all classes for noble sacrifices, which have done so much to sweep away the dissensions of sect and party, and to make the whole Empire conscious once more of the pulsation of a common heart, have, we think, created a more prominently favourable atmosphere for the ripening of national sentiment, and the abatement of artificial divisions; and a survey of our institutions and relations, while the dominant temper is thus genial and generous, may prepare a body of opinion uncorrupted by narrow prejudices or selfish claims.

For the working classes we confidently anticipate a social condition far in advance of their present state; we have earnestly at heart the people's happiness and the people's elevation; but we shall not allow our warm sympathies and earnest wishes in this direction to betray us into any faithless compromise of the principles of economic science.

Our object in literature will be analogous to our aim in politics. We wish as before to secure a more constant reference to ascertained principle than we think is now common: but, at the same time, we shall not try to apply arbitrary canons to all writers and all ages, but rather to examine and describe the real features of great literary nations, and to explain the manner in which the genius and circumstances of each have influenced the works they have bequeathed to us.

In two points, moreover, it will be our endeavour to avoid errors which have been much and justly complained of in the conduct of

other Quarterly Organs. We purpose to study brevity on all topics which will not justify length—and to give to the lighter departments of Literature that share to which they are fairly entitled in a periodical which aspires to please and aid the general reader, as well as to interest the studious one.

Like most other Quarterly Journals, the NATIONAL REVIEW will not be able to find room for more than a selection from the works which from time to time appear. We must endeavour to excel by making that selection judicious. We shall, however, endeavour to give a systematic summary of the new publications on topics insufficiently noticed by the daily and weekly journals—especially Theology and Mental and Political Philosophy. We shall likewise give a list of the books appearing in each quarter which seem suitable for Reading Societies, and are most likely to interest the general reader.

PRICE FIVE SHILLINGS.

London: ROBERT THEOBALD, 26, Paternoster-row.

ANNOUNCEMENTS.

Just ready, in 2 vols. cloth, 21s.

THE CITY of the CRESCENT;

WITH

PICTURES of HAREM LIFE, and of the DOMESTIC MANNERS OF THE TURKS, IN 1854.

With Illustrations.

By GORDON TREENERY, Esq.

Author of 'The Morning Land,' &c. &c.

"In describing the Domestic Manners of the Turks, Harem Life necessarily forms a most important feature. The author having enjoyed unusual facilities of access to, and of mixing in, the best Osmanli society, has been enabled to obtain the most authentic information in addition to his own personal experience, as well as that of his sister, who accompanied him. From all he has seen and heard, he feels convinced that very erroneous impressions regarding the Life of Woman in Turkey (hitherto vigilantly guarded and kept in seclusion) have long been current in this country,—promulgated by various writers, from the period of the first publication of the 'Letters of Lady Mary Wortley Montagu' to the present day. Under these circumstances, and the more especially as our existing relations with Turkey will doubtless attract numerous visitors, the writer has felt it to be his duty to endeavour to remove such false impressions, and to portray Domestic Life in Turkey as it really is."

2.

THE RIVAL ROSES.

A ROMANCE OF ENGLISH HISTORY.

By the Author of 'Royalists and Roundheads.' 3 vols.

Charles J. Skeet, Publisher, 10, King William-street, Charing-cross.

* * * Orders received by all Booksellers.

THE NEW NOVEL.

NOW READY AT ALL THE LIBRARIES,

In 3 vols.

LIGHTS AND SHADOWS

OF

ENGLISH LIFE.

By the AUTHOR of 'CLARA CAMERON.'

Charles J. Skeet, Publisher, 10, King William-street, Charing-cross.

SECOND EDITION, in 3 vols.

MAY AND DECEMBER:

A STORY OF WEDDED LIFE.

By MRS. HUBBACK (Niece of Miss Austen).

Author of 'The Wife's Sister,' &c.

"An exposition of modern society, in which reality of passion is depicted with life-like force. The observation of men, women, and manners in Mrs. Hubback's experience must be exceedingly acute, and thus has enabled her to do full justice to as clever a tale as she ever published."—*Messenger*.

Charles J. Skeet, Publisher, 10, King William-street, Charing-cross.

NEW WORKS.

1. MEMOIR of the Rev. SYDNEY SMITH. By his Daughter, LADY HOLLAND. With a Selection from his Letters, edited by Mrs. AUSTIN. 2 vols. 8vo. 28s.

OUR CAMP in TURKEY AND THE WAY to IT. By Mrs. YOUNG, Author of 'Catch,' 'Western India,' &c. Second Edition. Post 8vo. 7s. 6d.

13, GREAT MARLBOROUGH-STREET.

HURST & BLACKETT, Successors to Mr. Colburn, HAVE JUST PUBLISHED THE FOLLOWING NEW WORKS.

VOLS. III. and IV. of THE
DUKE of BUCKINGHAM'S MEMOIRS of the COURT and CABINETS of GEORGE III., from Original Family Documents. Completing the Work. In 8vo. with Portraits.

From the *Times*, May 30.—"The present collection is more valuable than the last. Whoever would desire to read the running comments of so eminent and well informed a man as Lord Grenville upon a decade so interesting as that of 1800-10, would do well to consult these volumes. There is a portion of their contents which possesses nearly as high a claim upon our instant and careful consideration as the minutes of the Sebastopol committee."

THE MONARCHS of the MAIN;
Or, ADVENTURES of the BUCCANEERS. By GEORGE W. THORNBURY, Esq. 3 vols.

"An unwritten page of the world's history is not to be met with every day. The author of these volumes has discovered one, and has supplied the deficiency. The deeds of alternate violence and heroism of those wild adventurers the Buccaneers—now sweeping the main with their piratical vessels—now surprising and sacking some rich and flourishing town—now fortifying themselves in some strong island hold, where they could bid defiance to a world in arms against them—form the subject of a narrative, rich in variety of incident, and replete with striking exhibitions of life and character. To the lover of maritime adventure these pages offer a fund of infinite amusement, doubly attractive from the novelty of the theme."—*John Bull*.

THE OLD COURT SUBURB.
By LEIGH HUNT, Esq. *[Just ready.]*

THE WABASH; or, ADVENTURES of an ENGLISH GENTLEMAN'S FAMILY in the INTERIOR of AMERICA. By J. R. BESTE, Esq. 2 vols.

FOREST LIFE in CEYLON. By W. KNIGHTON, M.A. 2 vols.

"A very clever and amusing book, filled with interesting accounts of the sports, resources, productions, scenery, and traditions of the island. The sporting adventures are told in a very spirited manner."—*Standard*.

THE NEW NOVELS.

THE NEXT-DOOR NEIGHBOURS. By MRS. GASCOIGNE, Author of 'Temptation; or, a Wife's Perils,' &c. 3 vols.

THE JEALOUS WIFE. By Miss PARDOE. 3 vols. *[Just ready.]*

EUSTACE CONYERS. By JAMES HANNAY, Esq. Author of 'Singleton Fontenoy,' 'Satire and Satirists,' &c. 3 vols.

"'Eustace Conyers' is a fresh, genuine, healthy book—beyond comparison Mr. Hannay's ablest, wisest, and maturest work. There is something in it better than story—there is abundance of character. Character is Mr. Hannay's strength. Much of 'Eustace Conyers' will delight the reader beyond the portraits: glimpses of natural scenery—pleasant satire on political and social vices—eloquent reprimands for the old chivalry—brief brilliant epigrammatic sayings, thrown off with an affluence and a carelessness testifying to no ordinary wealth of imagination; but the present fascination and lasting charm of the book will be found in its gallery of living, vigorous, and subtle portraits."—*Athenæum*.

The HEIRESS of HAUGHTON.
By the AUTHOR of 'EMILIA WYNDHAM,' 'TWO OLD MEN'S TALES,' &c. 3 vols.

"We may congratulate the author on having added another to the list of her literary successes."—*Sun*.
"We were not inclined to believe that the author would surpass her 'Emilia Wyndham,' the power of which made her reputation at once. Nevertheless, we can only do justice to the matter before us by saying that we consider this tale to be the best which the authoress has yet written."—*Messenger*.
"A story of surpassing interest. The heroine is one of the sweetest portraits of female loveliness which even the talented pen of the Author of 'Emilia Wyndham' has produced." *John Bull*.

CONSTANCE HERBERT. By MISS JEWSBURY. 3 vols.
"A powerful, highly interesting narrative."—*Times*.

THE SECRET MARRIAGE; or, Contrasts in Life. By Miss FANNY WILLIAMS.
"The Secret Marriage' is one of the best novels of the season." *Literary Gazette*.

HURST & BLACKETT, Publishers, Successors to HENRY COLBURN, 13, Great Marlborough-street.

MR. NEWBY'S NEW PUBLICATIONS.

Now ready, in 3 vols. 42s.

THE LIFE AND CORRESPONDENCE OF THE

COUNTESS OF BLESSINGTON.

* * * In this Second Edition nearly a hundred new letters and other documents, together with an engraving from Chalon's celebrated Portrait of Lady Blessington, have been added, and the work has undergone complete revision.

By R. MADDEN, Esq.
Author of 'Travels in the East,' 'Life of Savonarola,' &c.

"Dr. Madden has not only produced a work of intense interest, but the very best contribution to literary history which has been given to the world during the present century. Letters from all the celebrated men of the era may be found in it, forming a collection of wit and wisdom unrivalled in any modern published literary correspondence, for variety, extent, and interest. It will take permanent rank in the world of letters, not merely as the life of one individual, but as a miniature biographical encyclopædia of all the modern celebrities of England."—*Dublin University Review*.
"Almost every man of mark in the world of intellect and fashion appears with more or less of prominence, and with the effect of a gallery of celebrated portraits. The book contains a variety of matter bearing upon the social history of the century, which it is well to have preserved."—*Spectator*.
"It will provide abundance of food for the curious in search of information and amusement."—*Morning Chronicle*.

"The friends of Lady Blessington were well advised in committing the laborious task to the genius and judgment of Dr. Madden. It is one of the most interesting epistolary collections in the English language, and illustrates in a remarkable manner the history of our times. It will have an historical value apart altogether from the light it sheds on the career of Lady Blessington." *Freeman's Journal*.

"It has more than a merely speculative interest. It is in the highest degree instructive, forcibly illustrating the folly of human wishes and human ambition. It is not only the most interesting work of the day, but also the most interesting work of the class to which it belongs."—*Evening Packet*.

"We may, with perfect truth, affirm, that during the last fifty years there has been no book so full of popular interest to the literary and political world. It contains contributions from every person of literary reputation—Byron, Sir E. Bulwer (who contributes an Original Poem), James, D'Israeli, Marryat, Savage Landor, Campbell, L. E. L., the Smiths, Shelley, Jenkyn, Sir W. Gell, Jekyll, &c., &c.; as well as letters from the most eminent Statesmen and Foreigners of distinction, the Duke of Wellington, Marquis Wellesley, Marquis Douro, Lords Lyndhurst, Brougham, Durham, Abinger, &c."—*Morning Post*.

"The book is rich in matter which must interest, and will furnish its quota of anecdote to the literary records of the first half of the century."—*Athenæum*.
"Since the 'Life of Haydon' this is the most interesting biography which has been published. Dr. Madden knows how to make a book readable."—*Dundee Advertiser*.

"This book will be found to answer expectation. It contains something about every one who has been anybody for the last quarter of a century, of either sex and all countries, from the Duke of Wellington to Lola Montes—from Brougham to Bonaparte—from 'Box' to Rachel—from Charles Mathews to the Queen of England."—*Liverpool Albion*.

"A most interesting work."—*Birmingham Journal*.
"It is without exception the most valuable book of the last half-century."—*Tribune*.

"The volume is full of biographical anecdotes and traits which will secure them a general reading."—*Manchester Advertiser*.
"Comprises letters from every illustrious name who has taken a permanent or temporary seat in the Temple of fame."—*Leader*.
"These volumes are highly amusing, containing much of the 'gossip' of fashionable and literary life which is so agreeable to read."—*Naval and Military Gazette*.

NINE YEARS IN RUSSIA.

In 2 vols. price 10s. with Plates.

By ROBERT HARRISON.

"Mr. Harrison's volume is an acceptable contribution to our knowledge of Russia. It appears trustworthy, and is full of information."—*Athenæum*.

"This is a much more reliable book than the 'Englishwoman in Russia,' and gives a far better insight into Russian life and Russian character than any book hitherto published."—*Evening Post*.
"The opportunities enjoyed by the author have been turned to good account; and some really genuine and novel observations on the Russian manners and customs are the result."—*Daily News*.

"Since the day that De Custine published the remarkable narrative of his visit to Russia, there have been few books that have conveyed more accurate information and a closer insight into the social, moral, and political condition of that remarkable people." *Liverpool Albion*.

THE POPULAR NEW NOVELS.

In 3 vols. 31s. 6d.

GATHERINE IRVING.

"The Author of 'Jane Eyre' is again before us in this most original novel. It has the same sharp and well-defined characters—the same touching pathos—the same smart and racy dialogues—the same curt yet graceful style; and, like 'Jane Eyre,' will secure an amount of popularity that few fictions have attained." *Evening Post*.

In 3 vols. 31s. 6d.

THE CAREER of a RISING MAN.
"M. Viener shows great skill and capacity for novel writing. His conception is distinct, his delineation forcible, his narrative easy."—*Spectator*.

"It is a clever and ambitious book."—*Athenæum*.
"The author has a deep perception of what is holy and beautiful in thought and feeling. Judicious readers will estimate the depth of information, the knowledge of the human heart, the healthful tone of mind, and the grace, delicacy, and purity of sentiment to be found in every page."—*Morning Herald*.
"This is emphatically a most excellent novel."—*Dispatch*.

Just ready, in 3 vols.

EVELYN LASCELLES.

By the AUTHOR of 'THE RUMBLER,' 'CURATE of WILDMERE,' &c.

Just ready, in 3 vols.

ARISTOBULUS:

A TALE of JERUSALEM.

By M. KAVANAGH.

LONDON, SATURDAY, JUNE 9, 1855.

REVIEWS

A Memoir of the Reverend Sydney Smith. By his Daughter, Lady Holland. With a Selection from his Letters. Edited by Mrs. Austin. 2 vols. Longman & Co.

ENGLISH literature contains few treasures of thought so rich and various as exist in Sydney Smith's works. English wit has rarely been adorned by one whose name was a word of fear to the shallow, the corrupt, the fanatical, yet whose mirth made all on whom it beamed so healthy and so gay, as Sydney Smith. He was energetic, but not restless—he was brilliant, but not superficial—he was good, without pretence of perfection—he was honourable beyond the possibility of trick or compromise—he was courageous even when there were few to stand by him. He combined the wisdom of ripe age with the warm, hopeful heart of youth. Society could not spoil him—flattery failed to make him vain—conscious power took, with him, no arbitrary and severe shape. It was the fashion of the sour or the stupid to assert that he should not have belonged to the Church, because he recognized no sanctity in lawn sleeves,—because he dared to joke at pride, even though it took the form of prelacy—and denounced sycophancy, even when it was excused by the poverty of the ill-paid curate. Yet who has lifted up a nobler voice in the pulpit, to reprove, to encourage, to reason, than he?—who more utterly than Sydney Smith despised misconstruction and sarcasm, when he conceived that the duty of the time called him to deal with heresy or to uphold discipline? He was liberal to the heart's core, without licentious toleration. He was an indulgent friend, a devoted husband, a tender and just father. Of such a true English man of letters, man of wit, and man of character, we had a right to expect a good biography, which should enable survivors when talking to the younger generation of a past king and ruler to prove, by his own words and by his own recorded works, how good he was, as well as how gifted. Yet there was too little chance that any memoir which could be executed would satisfy those who had known, whether distantly or intimately, the Canon of St. Paul's.

When, therefore, we say that this joint work, by two Ladies, though good, is not so good as it should have been, the remark is a tribute to the precious nature of the subject, rather than a note of dissatisfaction at the manner in which that subject has been treated. Still less does it imply any Salique disdain of the editors, as unfitted by their sex to pourtray one so strong and racy in his manliness. Sydney Smith loved female society—he appreciated female intellect and genius. He talked his best to women; he would listen willingly to suggestions from them; he treated them like companions and helpmates. Never was humour so buoyant, so chaste, as his—never was there a life which required so few screens, suppressions, and allowances, from its recorder. He stood in no need of a coarser touch, or a firmer hand, than is to be found here; but possibly of a memorial brighter in its style and less solemn in its deductions. Too much reverence may have bred too many scruples; too fond a love may have brought out the home-life in disproportion to the life of public service, and the life of intellectual revelry, which never failed, whether the country parson was toiling on his glebe, or the sharp pamphleteer was calling bigotry, dishonesty, and folly by their plain names.

Sydney Smith, the second of four brothers (with one sister) was born at Woodford, in Essex,

in the year 1771. His father was a man possessing some property, a quaint and singular being, who cultivated his singularities,—knew everybody's business and everybody's history,—bought, altered, spoiled, and then sold, "about nineteen different places in England,"—and dressed pretty much as Quakers dress. His mother was of French extraction, the daughter of an emigrant from Languedoc, a graceful spirited woman, whose health failed her while she was "still young and beautiful," and who died too early. The sons seem to have inherited the best qualities of both parents:—Sydney, his father's individuality of humour without its accompanying disregard of responsibilities, and his mother's sweetness and vivacity. When a boy, he made himself noisily heard by discussing all manner of subjects, gay and grave, with his eldest brother Robert (or Bobus), as the two lay on the floor among their books. On being placed at Winchester School, he presently rose to its captainship, and to such a reputation for success that his schoolfellows refused to compete for prizes when he and a younger brother, Courtenay, were known to be in the lists. He distinguished himself in making Latin verses; but he had time, also, for mischief,—since, among the records of Sydney's school-days, there is mention of a "catapult" invented by lamp-light, the purpose of which was the capture of a neighbouring turkey. From Winchester he was removed to New College, Oxford, of which he became a Fellow; and his education, so far as learning of books and languages goes, may be described as completed by six months spent at Mont Villiers in Normandy, where he acquired a thorough knowledge of the French language. But from the earliest time of Sydney's life a marking trait presents itself, as explicit in its promise of a fair future as his being found reading Virgil under a tree when all his schoolfellows were at play, or pinching himself to help a friend in need with five guineas. It speaks volumes for one so brimful with life and spirits, so rich in the power of giving and of taking enjoyment, that he never yielded to the habits of convivial excess which then distinguished college life,—that he never fell into debt. He could control, too, his inclinations; for being induced (as the usage then was) by his father to adopt the Church as a profession, in place of going to the Bar, which had been his desire, he seems thenceforward to have bent himself, with all his cheerfulness of heart and vigour of will, to his duty as a pastor and a churchman.—The scene of his entrance on life was enough to try his resolution. A small village in the midst of Salisbury Plain, where the folk were poor, and intercourse with the outer world was scanty, could hardly be less congenial to any priest, willing or unwilling, than it must have been to Sydney Smith; for his delight in towns and in the society of men was as lively as Johnson's had been in its day; and his mind wanted perhaps that poetical and contemplative element, which has made other men when thrown on retirement become

familiar with the bird, the brook,

and get companionship, if not teaching, out of Nature. Thus, it must have been a relief to him—a positive opening of his prison-gate—when the squire of Netherhaven, Mr. Beach, proposed to the young curate to resign his Salisbury-Plain curacy in favour of a tutorship. How Sydney Smith and his pupil set out for Weimar in 1797, and "in stress of politics put into Edinburgh, where he remained five years,"—his own Preface to his collected criticisms has already pleasantly told the world.

We should like to have some idea of the impression which the laughter-loving Southron

produced among the argumentative, shrewd, and touchy Scotchmen into whose circle he was thrown,—to know how far he was comprehended by them,—to what extent the thistle bore his playful grasp without stinging in self-defence. He made warm, life-long friendships in the "Modern Athens," it is true; but if the strong men of Edinburgh were not fretted by his mirth, the fact convincingly testifies to the sweetness of heart which tinged it.—

"Though truly loving them, his quick sense of the ludicrous made him derive great amusement from the little foibles and peculiarities of the Scotch; and often has he made them laugh by his descriptions of things which struck his English eye. 'It requires,' he used to say, 'a surgical operation to get a joke well into the Scotch understanding. Their only idea of wit, or rather, that inferior variety of this electric talent which prevails occasionally in the North, and which under the name of *wur*, is so infinitely distressing to people of good taste, is laughing immoderately at stated intervals. They are so imbued with metaphysics that they even make love metaphysically; I overheard a young lady of my acquaintance, at a dance in Edinburgh, exclaim, in a sudden pause or the music, 'What you say, my Lord, is very true of love in the *abstract*, but—' here the fiddlers began fiddling furiously, and the rest was lost.'"

After two years of residence in the North, Sydney Smith returned to England for the purpose of marrying a young Lady, Miss Pybus, to whom he had been long engaged.—

"It was lucky [continues Lady Holland] that Miss Pybus had some fortune, for my father's only contribution towards their future *ménage* (save his own talents and character) were six small silver teaspoons, which, from much wear, had become the ghosts of their former selves. One day, in the madness of his joy, he came running into the room and flung these into her lap, saying 'There, Kate, you lucky girl, I give you all my fortune.'"

Yet the pages which follow the one that records this whimsical marriage settlement, tell how Sydney Smith, when required by Mr. Beach with an *honorarium* of 1,000*l.* for the care of his pupil, pressed the loan of 100*l.* on a lady whose pecuniary difficulties had come to his knowledge,—and contributed 40*l.* of his store to the outfit of Leyden, the Scotch poet, for India. These deeds were lightly done and little thought of by their doer, for never was Christian man or gentleman less of a trumpeter of himself than Sydney Smith;—but as traits in the life of a young wit, who never balanced his charities by running into debt, they must have a rare worth with those who know what the lives of wits, old and young, have been—what such lives have been encouraged to become by false friendship!

The part which Sydney Smith took in establishing the *Edinburgh Review*, the questions he treated there, the new opinions he handled, and the manner in which this was done, may be passed quickly, as being already written in some of the best pages of England's modern literary annals. We have not as yet forgotten how, at the period when the Churchman became politician and critic, to be a Whig was to be branded as the worst of heretics—to be Liberal was to be low—and to speak evil of ruling powers and old institutions was to shut the golden gates of preferment on the man mad enough to open his mouth so viciously. Who could have wondered if one, possessing such weapons as Sydney Smith, and devoted to the advocacy of causes and questions where hope of redress seemed so small, had run wild into professional agitation, or had lost himself in personal acrimony? But here, again, his excellent common sense, his charming temper, and his feeling of responsibility stood him in the stead of bridle and amulet. They reined him in when he was most triumphant on the field,—they kept his spear-point out of poison.

Never did man cant so little about reciprocal consideration, brotherly love, and the like, as Sydney,—never did antagonist do such mischief to the mischievous; but as critic he never degraded himself. His jest was always the jest of a gentleman. Considering what controversy has always been—considering especially what has been the tone of Tory controversy (intoxicating enough to drag into its coarse and scandalous whirlpool one with so poetical a brain and so loving a heart as Walter Scott),—it is neither superfine nor stilted to assert, that the perfect measure and temper which from first to last distinguished Sydney Smith as a writer, did “honour to his cloth” far more than

many a weary sigh and many a groan—

than any abstinence from the arena of struggle—or than any wholesale renunciation of sarcasm and humour, as engines of terror and persuasion fit enough for laymen to wield, but not “clerical”!

But this lively man, whose laugh made Bigotry quake within the stronghold of its Jericho, and Fanaticism lash itself into extra frenzies of rage, could do more than laugh,—as those who sat under his lectures and who heard his sermons will attest. His Preface of 1801 to the collection of his pulpit discourses then printed, is according to its form and order as remarkable for its high argument, its clear view of the wants and perils of the Church, as the best of the Edinburgh essays. That the delivery of the discourses themselves was aided by presence and delivery is true; but we cannot return to the fragments from his sermons, extracted by his biographer, without feeling afresh their vitality and earnestness,—how great the speaker knew the dignity of his position to be,—yet how devoid he was of the priest's arrogance.

Another record of his Edinburgh days is worth mentioning. It was in the Scottish metropolis that Sydney Smith acquired that knowledge of medicine which he afterwards turned to such helpful account among his parishioners at Foston and Combe Florey. But, in 1804, having completed the education of the sons of Mr. Beach, at the instance of his wife “he broke up his camp in Edinburgh,” and removed to London. Here, though aided by some family assistance, he had to struggle through several years of genteel pauperism. Those were years of temptation, too. The young Whig wit had no sooner arrived in our capital than he was sought for and cherished by the Whig leaders,—was made one of the magical circle of Holland House, and was greeted by as liberal an issue of “soup-tickets” (to use a phrase of his own) as ever before or since acknowledged the claims of a first-class diner-out. He managed to give as well as to take:—though poor, he established suppers, at which such men as Mackintosh, Whishaw, Luttrell, and Horner were glad to sit. *Apropos* of these suppers, we cannot resist an anecdote, which is noticeable as about the only instance of *Hookism* to be found in these volumes:—

“It was on occasion of one of these suppers that Sir James Mackintosh happened to bring with him a raw Scotch cousin, an ensign in a Highland regiment. On hearing the name of his host he suddenly turned round, and, nudging Sir James, said in an audible whisper, ‘Is that the great Sir Sydney?’ ‘Yes, yes,’ said Sir James, much amused; and giving my father the hint, on the instant he assumed the military character, performed the part of the hero of Acre to perfection, fought all his battles over again, and showed how he had charged the Turks, to the infinite delight of the young Scotchman, who was quite enchanted by the kindness and condescension of ‘the great Sir Sydney,’ as he called him, and to the absolute torture of the other guests, who were bursting with suppressed laughter at the scene before them. At

last, after an evening of the most inimitable acting on the part both of my father and Sir James, nothing would serve the young Highlander but setting off, at twelve o'clock at night, to fetch the piper of his regiment to pipe to ‘the great Sir Sydney,’ who said he had never heard the bagpipes; upon which the whole party broke up and dispersed instantly, for Sir James said his Scotch cousin would infallibly cut his throat if he discovered his mistake. A few days afterwards, when Sir James Mackintosh and his Scotch cousin were walking in the streets, they met my father with my mother on his arm. He introduced her as his wife, upon which the Scotch cousin said in a low voice to Sir James, and looking at my mother, ‘I did na ken the great Sir Sydney was married.’ ‘Why, no,’ said Sir James, a little embarrassed and winking at him, ‘not ex-actly married,—only an Egyptian slave he brought over with him; Fatima—you know—you understand.’ My mother was long known in the little circle as Fatima.”

Sydney Smith was not, however, by dinners abroad and suppers at home to be cajoled into the self-disrespect of extravagance,—into the forgetfulness of life's duties, when duty presented itself to him. Lord Holland obtained for him the living of Foston-le-Clay, in Yorkshire, in the year 1809; and pleasant, though prosy, are the chapters which detail the energy, the mirthfulness, the clear sense, and the affectionate benevolence with which this brilliant man, already the pet of poets, peers, and politicians, betook himself to the homelier life of a parish priest. We can only string together a few traits and tales, such as assist in setting the Yorkshire clergyman before us:—

“He used to dig vigorously an hour or two each day in his garden, as he said, ‘to avoid sudden death,’ for he was even then inclined to *embonpoint*, and perhaps, as a young man, may have been considered somewhat clumsy in figure. * * He spent much time in reading and composition; his activity was unceasing; I hardly remember seeing him unoccupied, but when engaged in conversation. * * He began too on a small scale to exercise his skill in medicine, doing much good amongst his poor neighbours, though there were often ludicrous circumstances connected with his early medical career. * * Another time he found all his pigs intoxicated, and, as he declared, ‘grunting God save the King about the sty,’ from having eaten some fermented grains which he had ordered for them. Once he administered castor-oil to the red cow, in quantities sufficient to have killed a regiment of Christians; but the red cow laughed alike at his skill and his oil, and went on her way rejoicing. * * Immediately on coming to Foston, as early as the year 1809, he set on foot gardens for the poor; and subsequently, Dutch gardens for spade cultivation. * * Then the cheapest diet for the poor, and cooking for the poor, formed the subjects of his inquiry: and many a hungry labourer was brought in and stuffed with rice, or broth, or porridge, to test their relative effects on the appetite.”

Further, Sydney Smith had to build a house, furnish and fill it. From some of his own retrospects of these operations, we must detach a few paragraphs.—

“I then took to horse to provide bricks and timber; was advised to make my own bricks, of my own clay; of course, when the kiln was open, all bad; mounted my horse again, and in twenty-four hours had bought thousands of bricks and tons of timber. Was advised by neighbouring gentlemen to employ oxen: bought four—Tug and Lug, Hawland and Crawl; but Tug and Lug took to fainting, and required buckets of sal-volatile, and Hawland and Crawl to lie down in the mud. * * A man-servant was too expensive; so I caught up a little garden-girl, made like a mile-stone, christened her Bunch, put a napkin in her hand, and made her my butler. The girls taught her to read, Mrs. Sydney to wait, and I undertook her morals: Bunch became the best butler in the county. * * At last it was suggested that a carriage was much wanted in the establishment; after diligent search, I discovered in the back settlements of a York coachmaker an ancient green chariot, supposed to have been the earliest invention of the kind. I

brought it home in triumph to my admiring family. Being somewhat dilapidated, the village tailor lined it, the village blacksmith repaired it; nay (but for Mrs. Sydney's earnest entreaties), I believe the village painter would have exercised his genius upon the exterior; it escaped this danger however, and the result was wonderful. Each year added to its charms: it grew younger and younger; a new wheel, a new spring: I christened it the *Immortal*; it was known all over the neighbourhood; the village boys cheered it, and the village dogs barked at it; but ‘Faber meæ fortunæ’ was my motto, and we had no false shame. Added to all these domestic cares, I was village parson, village doctor, village comforter, village magistrate, and Edinburgh Reviewer; so you see I had not much time left on my hands to regret London.”

We must still find room for a passage or two.—

“One day, when we were on a visit at Bishopthorpe, soon after he had preached a visitation sermon, in which, amongst other things, he had recommended the clergy not to devote too much time to shooting and hunting, the Archbishop, who rode beautifully in his youth, and knew full well my father's deficiencies in this respect, said, smiling, and evidently much amused, ‘I hear, Mr. Smith, you do not approve of much riding for the clergy.’—‘Why, my Lord,’ said my father, bowing with assumed gravity, ‘perhaps there is not much objection, provided they do not ride too well, and stick out their toes professionally.’ Mr. M., a Catholic gentleman present, looked out of the window of the room in which they were sitting. ‘Ah, I see, you think you will get out,’ said my father laughing, ‘but you are quite mistaken: this is the wing where the Archbishop shuts up the Catholics; the other wing is full of Dissenters.’ Coming down one morning at Foston, I found Bunch pacing up and down the passage before her master's door, in a state of great perturbation. What is the matter, Bunch?’—‘Oh, Ma'am, I can't get no peace of mind till I've got master shaved, and he's so late this morning: he's not come down yet.’ This getting master shaved, consisted in making ready for him, with a large painter's brush, a thick lather in a huge wooden bowl, as big as Mambrino's helmet, which she always considered as the most important avocation of the morning.”

The following, too, from reminiscences of this period, contributed by Mrs. Marcet, is precious.

“Mr. Smith was talking after breakfast with Dr. Marcet, in a very impressive and serious tone, on scientific subjects, and I was admiring the enlarged and philosophic manner in which he discoursed on them, when suddenly starting up, he stretched out his arms, and said, ‘Come, now let us talk a little nonsense.’ And then came such a flow of wit, and joke, and anecdote, such a burst of spirits, such a charm and freshness of manner, such an irresistible laugh, that Solomon himself would have yielded to the infection, and called out, Nonsense for ever!’

* * “I was coming downstairs the next morning (she continues), when Mr. Smith suddenly said to Bunch, who was passing, ‘Bunch, do you like roast duck or boiled chicken?’ Bunch had probably never tasted either the one or the other in her life, but answered, without a moment's hesitation, ‘Roast duck, please, Sir,’ and disappeared. I laughed. ‘You may laugh,’ said he, ‘but you have no idea of the labour it has cost me to give her that decision of character. The Yorkshire peasantry are the quickest and shrewdest in the world, but you can never get a direct answer from them; if you ask them even their own names, they always scratch their heads, and say, ‘A's sur ai don't know, Sir’; but I have brought Bunch to such perfection, that she never hesitates now on any subject, however difficult. I am very strict with her. Would you like to hear her repeat her crimes?’ She has them by heart, and repeats them every day.” ‘Come here, Bunch (calling out to her)! come and repeat your crimes to Mrs. Marcet’; and Bunch, a clean, fair, squat, tidy little girl, about ten or twelve years of age, quite as a matter of course, as grave as a judge, without the least hesitation, and with a loud voice, began to repeat—“Plate-snatching, gravy-spilling, door-slamming, blue-bottle fly-catching, and curtsy-bobbing.”—“Explain to Mrs. Marcet what blue-bottle fly-catching is.”—“Standing with my mouth open and not attending, Sir.”—“And what

is curtsy-bobbing?"—"Curtsying to the centre of the earth, please, Sir."—"Good girl! now you may go. She makes a capital waiter, I assure you; on state occasions Jack Robinson, my carpenter, takes off his apron and waits too, and does pretty well, but he sometimes naturally makes a mistake, and sticks a gimlet into the bread instead of a fork." "

No wonder is it that such a master as one who catechized "Bunch" for the benefit of the author of 'Conversations on Chemistry,' was well served, and rarely changed his servants. The dismal, dry, mechanical intercourse of "question and command," which makes of so many an English household a genteel sort of work-house—a composition of two separate worlds not bound together by the compact of formality and cupidity,—could not but be intolerable to a man so true in heart and so rich in humour as Sydney Smith. Should the lives of our great literary Protestant Clergymen ever be written by any one capable of doing justice to the subject, the humours above journalized will figure there as individually as the humours of Crabbe, when the Poet descended in knee-breeches and silk stockings to his breakfast in Scotland (where Crabbe happened to be, on the occasion of George the Fourth's visit), and addressed sundry hairy Highlanders, wearing phibbings, in Latin, supposing that to be the only probable mutual language which the two parties possessed! They will pair off, too, with the hermit, the bells, and the fountain of another *clericus*, Bowles the sonneteer—so artlessly and graphically commemorated by Moore, in the poet's Diary. The entries belonging to a more prosperous and later period of Sydney Smith's life in the country, after he had exchanged Foston for Combe Florey, and surrounded "Bunch" with "a company" (as dramatic phrase is) of efficient fellow domestics—are capital and characteristic.—

"My father 'was sitting at breakfast one morning in the library at Combe Florey,' said Mrs. Marcet, who was staying with us, 'when a poor woman came, begging him to christen a new-born infant, without loss of time, as she thought it was dying. Mr. Smith instantly quitted the breakfast-table for this purpose, and went off to her cottage. On his return, we inquired in what state he had left the poor babe. "Why," said he, "I first gave it a dose of castor-oil, and then I christened it; so now the poor child is ready for either world." I long to give some sketch of these breakfasts, and the mode of life at Combe Florey, where there were often assembled guests that would have made any table agreeable anywhere; but it would be difficult to convey an adequate idea of the beauty, gaiety, and happiness of the scene in which they took place, or the charm that he infused into the society assembled round his breakfast-table. The room, an oblong, was, as I have already described, surrounded on three sides by books, and ended in a bay-window opening into the garden: not brown, dark, dull-looking volumes, but all in the brightest bindings; for he carried his system of furnishing for gaiety even to the dress of his books. He would come down into this long, low room in the morning like a 'giant refreshed to run his course,' bright and happy as the scene around him. 'Thank God for Combe Florey!' he would exclaim, throwing himself into his red arm-chair, and looking round; 'I feel like a bridegroom in the honeymoon.' And in truth I doubt if ever bridegroom felt so joyous, or at least made others feel so joyous, as he did on these occasions. 'Ring the bell, Saba;' the usual refrain, by the bye, in every pause, for he contrived to keep everybody actively employed around him, and nobody ever objected to be so employed. 'Ring the bell, Saba.' Enter the servant, D—. 'D—, glorify the room.' This meant that the three Venetian windows of the bay were to be flung open, displaying the garden on every side, and letting in a blaze of sunshine and flowers. D— glorifies the room with the utmost gravity, and departs. 'You would not believe it,' he said, 'to look at him now, but D— is a reformed Quaker. Yes, he quaked, or did quake; his brother quakes still: but D—

is now thoroughly orthodox. I should not like to be a Dissenter in his way; he is to be one of my vergers at St. Paul's some day. Lady B— calls them my virgins. She asked me the other day, 'Pray, Mr. Smith, is it true that you walk down St. Paul's with three virgins holding silver pokers before you?' I shook my head, and looked very grave, and bid her come and see. Some enemy of the Church, some Dissenter, had clearly been misleading her.—'There now,' sitting down at the breakfast-table, 'take a lesson of economy. You never breakfasted in a parsonage before, did you? There, you see, my china is all white, so if broken can always be renewed; the same with my plates at dinner: did you observe my plates? every one a different pattern, some of them *sweet articles*; it was a pleasure to dine upon such a plate as I had last night. It is true, Mrs. Sydney, who is a great herald, is shocked because some of them have the arms of a royal duke or a knight of the garter on them, but that does not signify to me. My plan is to go into a china-shop and bid them show me every plate they have which does not cost more than half-a-crown: you see the result. I think breakfasts so pleasant because no one is conceited before one o'clock.' Mrs. Marcet admired his ham. 'Oh,' said he, 'our hams are the only true hams; yours are Shems and Japhets.' Some one, speaking of the character and writings of Mr. —: 'Yes, I have the greatest possible respect for him; but, from his feeble voice, he always reminds me of a liberal blue-bottle fly. He gets his head down and his hand on your button, and pours into you an uninterrupted stream of Whiggism in a low buzz. I have known him intimately, and conversed constantly with him for the last thirty years, and give him credit for the most enlightened mind, and a genuine love of public virtue; but I can safely say that during that period I have never heard one single syllable he has uttered.' Mrs. Marcet complaining she could not sleep: 'I can furnish you,' he said, 'with a perfect soporific. I have published two volumes of sermons; take them to bed with you. I recommended them once to Blanco White, and before the third page he was fast.'—This is the only sensible spring I remember (1840): it is a real March of intellect."

These joyous sights and cheerful sayings belonged to a late period of Sydney Smith's life. To be orderly, let us here remind the reader that this was a life of slow-growing prosperity—of preferment in no respect egregious—and of few vicissitudes, save such as a holiday on the Continent, or a change from town to country furnish. This done, we may take leave of his personal history. But having sketched some of the characteristics which set Sydney Smith on so high a pedestal among men of politics, men of wit, and men of letters,—and having expatiated on his humours as shown in his country life,—we must return to this book to illustrate the wit, the censor, the protector of the modest and the shamer of the impudent; from Sydney Smith's conversation and correspondence.

On Human Longevity and the Amount of Life upon the Globe. By P. Flourens. Translated from the French, by Charles Martel. Bailière.

Prof. Flourens has written, or rather compiled, a book which is devoted to the consideration, if not of one of the most popular, certainly one of the most important of subjects. His recipe for length of days is soon written out. It enjoins constant sobriety, moderation and watchfulness in diet, unvarying good temper, and especial care that misfortune shall never come,—or if it come that it shall be pleasantly disregarded! This is an agreeable recipe to a world, three-fourths of the men in which may be said to be fighting for existence,—and who are not only in daily acquaintance with woe, but who would be less than men if they did not feel it.

The author cites various persons who have attained to extreme length of days by such ex-

treme care, that, to our thinking, half the real duties of life would have to be sacrificed in order to attain what is, after all, so very little worth having. No doubt, with diet and patience, a man may improve his condition,—but we are inclined to think, with Montesquieu, that the health which is only to be sustained by ceaseless watching and care is, of itself, a tedious disease. A man in this world has duties to perform. He has a right to secure all the health he can to enable him the better to perform them, but he has no right to submit to any epicure who teaches him that he may be well by living idly and dismissing care. What soldier would purchase safety by allowing himself to fall into the hands of an enemy, rather than as free man risk his life for his country? The man who fetters his useful action by surrendering himself to so-called sanitary discipline might, no doubt, live long,—but in nine cases out of ten he would require his friends or relatives to work for him. The cares and fatigues of life would derange that health for which alone he is anxious. He would have it recorded that he had lived long among his fellow-creatures rather than that he had lived beneficially for them. And then, what is long life? Quintus Curtius knew what it was when he said, "Ea stirpe sum genitus ut multam priusquam longam vitam debeam optare,"—in other words, *much life rather than long life*. And what he meant by "much life" is explained when he says, "Ego me metior non ætatis spatio sed gloriâ,"—it is not extent of years, but of good name for great things done in them. As Tieck finely says, "Der ist nicht todt der rühmlich schliesst." Raffaele, dead at thirty-seven, has lived longer than Cornaro, who vegetated till he had reached something like a century, and of whom it was boastfully said, that he made the yolk of a single egg serve for two meals.

Still, let us do the old all justice. Cornaro was merry at ninety-five; Cato studied Greek at eighty; Charles Kemble did the same, or rather "brushed up" his *old* Greek, when he was nearly as old as Cato; Cibber, when still older, merrily replied to one who declared that he looked well, that, "at eighty-four, it was well that he looked at all"; and there was the Countess of Desmond, who was, perhaps, the merriest of all,—for she

Lived to the age of a hundred and ten,

And died of a fall from a cherry-tree then.

—Beauty, too, it has been said, is of all ages; and there is a line in one of Victor Hugo's plays which would seem to imply that age is infectious, for he protests that the young become old by dint of looking at the aged—"On devient vieux à force de regarder les vieux":—but alas! there is little hope for the old; they may gaze at the young for ever, and never become juvenile.

We are taught in the book before us that man was intended to accomplish a century of years. We have heard of another authority which speaks of "threescore years and ten" as the ordinary limit;—but this, by the way. Some may take it as a comfort to be assured that they may live to a hundred, if they choose. Men who die before that time do not *die*, says M. Flourens,—they kill themselves. The assertion, that a century is the common human limit, is based upon a singular circumstance. Children and other young animals continue to grow until the epiphysis permanently unites with the bone. After that period growth ceases. Calculate the number of years that have elapsed between the birth and this union, multiply it by 5, and the product gives the number of years the animal—human or brute—is intended to live, unless chance or carelessness or deliberately-made assault against

the tenement of life obviate the intention. The union alluded to occurs in the human being at the age of 20; and $20 \times 5 = 100$, *quod erat demonstrandum!*

The author proceeds to show that the union of the bones and the epiphysis takes place in the camel at eight years old, and the camel lives (commonly) to forty. In the horse, it takes place at five, and the horse rarely survives twenty-five. In the lion and the ox at four, and from fifteen to twenty are their naturally allotted years,—cut short by the hunter and human appetites. In the dog, the union of epiphysis and bone takes place when it is two years old; in the cat at a year-and-a-half; in the rabbit at twelve months, and in the guinea-pig at seven. "Now," says the author, "the dog lives ten to twelve years, the cat nine to ten, the rabbit eight, the guinea-pig from six to seven years."

This computation is not quite the same as Buffon's, but the result is almost identical,—for Buffon lowers the number of the years of growth, and multiplying them by seven, arrives at nearly the same conclusions. But philosophers, like physicians, can agree to differ; and we may cite a passage from this book, as a proof of such fact, and a sample of the volume from which it is taken.—

"I return to Cornaro. A question his book naturally gives rise to, is that of the duration of human life; and first, if there be any way of prolonging life? of *prolonging* it, so as to make it go as far as the constitution of man permits. Yes! doubtless, there is, and a very sure one—that which Cornaro has just given us, *sobriety*. By *sobriety*, I mean a well-regulated life; a rational mode of living is the means, the *sure* means of prolonging life. But to *extend* it, that is to say, to make it last beyond the term ordained by the constitution of man; no, doubtless, that cannot be done. Cardan gravely tells us, that trees only live longer than animals, because they do not take any exercise. Exercise increases transpiration, transpiration shortens life; to live long then, we need only to remain still. We may excuse Cardan for this. We can less easily excuse Bacon, the father of 'Experimental Philosophy,' for the same notion, and for the *oily unctions* which he prescribes to prevent transpiration. Maupertuis wished to cover the body with *pitch*, and Voltaire laughed at Maupertuis."

Cardan and his disciples did not know that the *transpiration*, which is caused by exercise, is healthy,—while that which is caused by heat, the body being at rest, is alone hurtful. Finally, the "health-maxims" in this book concern rather the aged than the active young. Of the latter, who give up action to think only of health, may be said what the warm-blooded Hotspur said of his sire, when he pleaded indifferent health as an excuse for not appearing in the tented field:—

Zounds! how has he the leisure to be sick
In such a justling time?

Gems.—[*Gemmen*]. By W. Constant. Ham-
burgh, Hoffman & Campe; London, Trübner
& Co.

A truly pleasant little volume of narrative poems, which, though it comes from an opposite direction, might be placed on the shelf as a companion to the 'Hermen' of Paul Heyse. As the courtly poet derived the title of his collection from a resemblance—not very clearly made out—to the Hermæ of Greek sculpture, so does Herr Constant name his work in an antique sense. He reminds us in a short elegiac Introduction, that the Latin word "gemma" denoted both a gem and a bud, and that in adopting it he has an eye to both significations,—thus gracefully hinting that his poems are intended to combine the polish and neat execution of the carved stone with the bursting life proper to the nascent flower.

Like Paul Heyse, Herr Constant endeavours to attain for his poems the greatest possible variety of tone. He does not perpetually harp on one string, like many poets of the Hamburg camp, but makes one tale differ from the other as much in theme and treatment as in metre. His first poem illustrates, in a tone of proletarian despondency, the miseries attendant on poverty; the second embodies the Slavonian legend of King Trojan, a mythical personage, who melted away in the sun, and was thus the origin of dew; the third is a nest of short descriptive pieces, illustrating lazzaroni life; the fourth is a merry jest from the Charlemagne cycle; the fifth is a somewhat obscure ballad on the theme of maternal affection; the sixth and last, which rises to a more solemn strain than the rest, relates to—what does the reader think?—to the defeat of the Persian army at Marathon!

Of all these poems, the most striking, from its animation and its descriptive power, is the first, entitled 'Der Preis einer Arznei' (the price of a drug). An old man is lying desperately sick in a miserable hovel, and there is no money to purchase the drug in which the medical attendant places the sole hope of recovery. However, he has three good sons, who resolve to obtain the necessary cash by capturing and selling a brood of eaglets. Each chooses for himself the most perilous part of the adventure, until the dispute is settled by drawing lots. Taking advantage of the absence of the parent eagles, the bird-catcher, chosen by destiny, descends a chasm by means of a rope, managed by his two brothers above, and succeeds in securing the nest; but before he can be drawn up a scene of complicated horror ensues, which we describe (as literally as we can) in Herr Constant's own words.—

There's something darkles in the sky,—
Dim clouds, perhaps, that o'er him fly;—
He feels as 'twere a wintry blast;—
Perhaps they draw the rope too fast:
A shrieking sound—what can it be?
The eaglets, too, cry piteously.
A shake!—a rustle!—danger's near.
Yes, now the parent birds appear,
Who to their nestlings were repairing,
An ample store of nurture bearing.
First poised on high, they downwards dash,
As rapid as the lightning's flash;
For with their glances ever keen,
Their nestlings' perils they have seen;
Their mighty wings they widely spread,
And cast below a shadow dread,
Merging the rocks in blackest night,
Through which their eyes alone are bright.
And now a holy war is waged,
When each is for his all engaged.
The man a father's life would gain,
And snap the hero's bonds in twain;
While to the eagles their young brood
Is all the world contains of good.
Alas! if those sharp claws should clasp
Those slender limbs within their grasp,
And unresisted should enmesh
Their points within that tender flesh!
The spoiler shudders, and, in haste,
Covers the spoil he holds so fast:
In vain—their scent's a certain guide;
So, casting ev'ry fear aside,
Upon the foe their rage they wreak,
Attacking him with claw and beak;
Upon his face the beaks press hard,—
His sabre serves him for a guard,
And many a well-directed blow
Sends blood-stain'd feathers down below.
The wings are flapping on his head,
Till sense, through pain, has almost fled.
And now the birds, grown bolder, try
To plant their claws in arm or thigh,
And as they hiss and shriek and smite,
Express their terrible delight.

The brothers above see the peril of the adventurer, but dare not rescue him by a strong pull, as the friction of the rock would destroy the rope. They can only shudder and draw slowly.—

The spoiler has the eaglets press'd
Convulsively against his breast.
They shriek with pain; their voice is heard,
And stirs anew each parent bird.
But they may rend and they may hack,
With beak and claw the foe attack,

The gallant boy the treasure holds,
And in his jacket safe enfolds.
That nest his father's life contains;
And after all his toils and pains,
He rather with his own would part
Than yield the prize with failing heart.
They seem the battle to give o'er,
Then pounce upon the foe once more.
New mischief to prevent, he'll try
To hit the eagles as they fly.
Right doughtily a blow he gives,
And firm resistance plainly feels;
New hope within his bosom lives,
His hand reviving courage steals.
But what's the matter with the rope?
It seems as 'twere inclined to stop;—
It creaks—it slackens—twists about:—
Are those two brothers so worn out,
That now—just now—they must repose?
Upwards he looks—his heart is froze.
A sight of horror meets his view—
His sword has cut the rope half through.

The gallant youth having strangled one foe and disabled the other, at last joins his brothers—well scratched, as may be imagined—with his prize; but the tale nevertheless has a provokingly dismal conclusion. The drug is purchased, but before it is brought home the old man is—dead.

Land, Labour, and Gold; or, Two Years in Victoria. With Visits to Sydney and Van Diemen's Land. By William Howitt. 2 vols. Longman & Co.

Mr. Howitt left Australia, as he tells us himself, "with the fullest conviction that it is destined to become one of the greatest and most flourishing countries in the world." In these few words he records a summary of his experience, his reading, and his thought. We do not share Mr. Howitt's "conviction." Australia may be destined to grow into a prosperous land; but Nature has forbidden it ever to become a great empire, such as England has planted in North America. Australia is a vast Sahara with an emerald fringe. The interior is apparently a plain of burning sand. A few miles—a hundred or so, more or less, according to circumstances—of vegetation alone gladden the settler's eyes; so that there are few parts of that mighty continent where a railway train would not reach the desert in three hours from the sea-side. Some few cities will rise on the sea-shore to buy and sell the produce of the country; cattle will multiply in the green valleys; and men will lead an active and prosperous life on the narrow strip of pasturage, even should the gold fever pass away. But the *depth* of area necessary to a "great" empire is wanting in Australia. There are no valleys, no river bottoms, no verdant plains, "beyond the Alleghanies" in our southern empire. Australia has no valley of the Mississippi, capable of feeding its hundred millions of men.

We notice this point first, not because it is of chief importance as regards Mr. Howitt's book, but because it is an example of the chief fault of Mr. Howitt as a philosophic observer. When our author is content with description, we follow his lead with pleasure:—when he generalizes, we lose our confidence,—if not our patience. His strength lies in a fresh and hearty appreciation of Nature, of costume, and of character. What he sees clearly he can present clearly to the eye. His book consists of a series of excellent sun-pictures, in which we see the very form and pressure of Australian life.

The approach to the land, after the fatigues of a long voyage, had an exquisite charm,—such, too, as would not be lost on the most prosaic passenger.—

"This morning, at ninety miles from land, on opening the scuttle in my cabin, I perceived an aromatic odour, as of spicy flowers, blown from the land; and going out to announce the fact, I met a gentleman coming into the cuddy, who said, 'Come on deck, and smell the land!' People could not at first believe it; but there it was, strong and

delicious, as Milton describes it from the coasts of Mozambique and of Araby the Blest."

A question which had agitated the passengers was now settled:—

"The taciturn Palinurus proceeds to lay down on the deck a basket of flowers that he has brought with him to take to the town. In those flowers there is an answer to one question; they were magnificent stocks and geraniums, at once beautiful and fragrant as if they had grown in Paradise. There was an end to the assertion that flowers in Australia have no scent."

Slight touches of poetry and sentiment like these are not unknown to the sternest of gold-seekers. But the spirit which drives the adventurer from the calm of home to the excitements of the Land of Gold dwells with him on the voyage and accompanies him to the "diggings." The vice of the emigrant is—improvidence. Mr. Howitt tells us of the ruin already reached by the unfortunate, even at the landing-place of the unknown country.—

"Now was felt, in all its horrible force, the mischief of making floating groghops of passenger ships, in defiance of a dozen stringent Acts of Parliament. Where was the money of scores and hundreds of intermediate passengers, which would have carried them with ease through this costly Melbourne, and up to the Diggings? All vanished in rum, beer, and tobacco-smoke! Where were those valuable orders on Melbourne banks which careful parents had entrusted to uncared-for sons, so that they might not be able to spend their all on board? Cashed by the captain, and all evaporated in smoke and alcohol too! Anon there shall be seen troops of those jolly young fellows who have been on the voyage so jocund and so jovial; who have sung, and danced, and gambled on the sunny deck, and drunk in the lamp-light below; who, in the merry blood of youth, elated with the merry fire of rum, have put the pigs down between decks night after night, and tied tin-kettles to the tails of unoffending dogs, and chased them amongst the berths of the sober and the sleeping,—of those who had more years, more cares, and more little children, and far less riotous spirits, of all kinds, than themselves,—and who have dashed pails of sea-water into the beds of others. Anon shall these prodigal sons be seen opening their boxes and exposing to sale, on the knee-deep mud-banks of Melbourne, their shirts and their best clothing, for cash to carry them on their needful journey."

Such sales—which often strip the emigrant of his last shirt—are the consequences of unexpectedly finding how high are the charges of transport. Mr. Howitt says,—

"The freight from London hither is 3*l.* per ton; from the ship to the wharf, eight miles, it is just half that sum, 30*s.*, and thus, with the system prevailing at the wharves, and the enormous charge for cartage thence into the town, the whole cost of transferring your effects from the vessel to your lodgings is actually more than of bringing them the previous 13,000 miles, including the cost of conveying them from your house to the London docks."

These rates, however astonishing, are only in proportion—even if they reach proportion—to the price of land. Land in England is generally supposed to be pretty dear; in London especially it does no discredit to our reputation for wealth. But the capital of the world must veil its face before the capital of Victoria. Hear our latest chronicler of prices.—

"We think 1,000*l.* or 2,000*l.* per acre near London high, but here it fetches from 4,000*l.* to 6,000*l.*! Houses are frequently pointed out to me in the outskirts, as having recently been sold, with a garden, for 10,000*l.* or 12,000*l.*, which in the finest suburbs of London would not fetch above 2,000*l.* Little houses in the town, which in London, in good streets, would let for 40*l.* a year, here let for 400*l.* My brother has built two good houses near his own, which would not let in London for more than 70*l.* a year each, or 150*l.* together; he lets the two for 1,200*l.* And there is a single house near, worth in London or its environs perhaps 120*l.* a year, for

which the modest sum of 2,000*l.* a year is asked!—a sum that would purchase it at home."

Mr. Howitt attributes this unnatural rise in price to the "peddling and wicked system" of Wakefield—a system which he has scarcely given himself the trouble to understand. A mere reference to dates would have shown him that the Wakefield system cannot be the sole cause of the advance in the value of land; as the system was in vogue for years without producing an unnatural rise. The market price of an article is—what anybody will give for it. Now, men who make money like the more fortunate diggers will give *any* price within their means for the thing they want,—be it a shawl, a bottle of champagne, a house, a pair of Colt's revolvers, a pony, or an estate. No law can prevent madmen from acting like madmen. The colony is ruined—if it be ruined—not by Mr. Wakefield—whose system, whether right or wrong, is based on broad general views, capable of large and philosophic interpretation—but by men of quite another class; men of whom Mr. Howitt gives us more than one specimen like the following:—

"A gentleman from Bendigo describes that Digging as like a country fair five miles long; men, women, and children all mixed amongst tents and huts of all sorts, with horses, and bullocks, and drays, and butchers' shambles, and the earth turned upside down everywhere, and vast quantities of gold got. The great nugget of 28 lb. was dug there. Mr. Gilbert did all he could to persuade the man who found it, to entrust it to the care of the Gold Office till it was disposed of, and then to let him get the money invested for him—but in vain. He soon began to drink; got a horse, and rode all about, generally at full gallop, and when he met people, called out to inquire if they knew who he was, and then kindly informed them that he was 'the bloody wretch'—that was his phrase—that had found the nugget." At last he rode full speed against a tree, and nearly knocked his brains out. He is a hopelessly ruined man."

—Until this unhappy wretch had wasted his last guinea, *he* was one of the causes of the monstrous high prices.

Mr. Howitt gives us some very pleasant sketches of Australian domestic life. Here is a capital touch of manners.—

"To-morrow morning we mean to black our own boots, as to-day we put the horse into the cart, and rode down to the wharf in it for the rest of our goods. Well, the sons of the Chief Justice have had to do the same for him and themselves,—black boots, and harness horses to the carriage,—and why not we? Alfred and his cousin will sleep in the harness-room to-night, with a revolver, and Prince for a watch-dog, as horse-stealing is a very favourite amusement here. But I must do the last groom justice. He was a real gentleman, a gentleman by birth and education. His father is a clergyman of high standing. He himself was educated at Oxford, and used to ride with the Melton hounds. One of the many real gentlemen who came out at the first successful account of the diggings, he had been up and found no luck at the El-Dorado; so, being very knowing in horseflesh, and liking horses, he engaged with my brother; and never was there such a groom. Steady, orderly, attentive at all hours and all points, invulnerable in his good humour, he was the perfect groom, and yet the perfect gentleman, and in nothing more so than in that he never presumed upon it. He sunk all *pretensions* to an equality of rank; he set himself to be the groom and nothing more, while he occupied that situation; but he was never more a gentleman in spirit and in manners than when grooming his horses or driving out his master. When importuned by his old mates, as the term is,—his old comrades,—to make another trial of the diggings, he told the Doctor that he should be obliged to go, but that he *would not* go till he was suited. This was the only instance of such true politeness which our relatives have met with since diggerdom commenced, for the general announcement is 'I am going to-morrow!'—and they go. Richard, how-

ever, kept his word, and did not go till his master *thought* he was suited."

—We are not quite sure that "true politeness" is altogether balanced in this instance. If Mr. "Richard" be now in England, as is not unlikely, "riding with the Melton hounds," and living in the rank to which he was born, we think he may fairly object to some few words in the above paragraph.

Men of education—even men of education so humble as befits a merchant's clerk—are a "drug" at Melbourne. Mechanics, labourers, and domestic servants, are in demand. To female domestics, however, Mr. Howitt does not paint the prospect in very brilliant colours. He writes to some correspondent at home.—

"As to the two maid-servants who, you say, wish to come out, I am not the person to advise them to it. They have lived in comfortable places at home; and after the comforts of a good English home, and the pleasant and vigorous climate of England, the change to a colony would strike them dumb. At all events, let them reflect well on the unpaved streets, and the dust blowing every few days in Melbourne till you cannot see your own hand; on the heat, the flies, the mud, and slush, the moment there is rain, before they quit the smooth pavements and the comforts that abound in England. Let them reflect well, too, on the rude, chaotic, and blackguard state of the lower society in this suddenly-thrown-together colony. It would strike them with astonishment. As to girls marrying here—the great temptation—that is soon accomplished; for I hear that lots of diggers get married almost every time they go down to Melbourne to spend their gold. A lot of the vilest scoundrels are assembled here from all the four winds of heaven. Nobody knows them; much less whether they have left wives behind them in their own countries; and they marry, and go off, and are never heard of again."

—We must follow these unfaithful husbands to the diggings, of which Mr. Howitt gives us many a curious picture.—

"Since writing the above, we have wandered about amongst the diggings. No language can describe the scene of chaos where they principally are. The creek, that is, a considerable brook, is diverted from its course; and all the bed of the old course is dug up. Then each side of the creek is dug up, and holes sunk, as close to each other as they can possibly be, so as to leave room for the earth that is thrown out. These holes are some round, some square, and some no shape at all, the sides having fallen in as fast as they have been dug out. They are, in fact, pits and wells, and shapeless, yawning gulfs, not three or four feet, as in the tempting accounts from Mount Alexander, but from ten to thirty feet deep. Out of these the earth has to be drawn up in buckets; and some wind them up with windlasses, rudely-constructed out of the wood that grows about; and others haul it up with blocks and pulleys; others, and the greater number, merely with their hands. The diggers themselves generally ascend and descend by a rope fastened to a post above, and by holes for their feet in the side of the pit. Many of these holes are filled, or nearly so, with water, filtering from the creek. It is black as ink, and has a stench as of a tan-yard, partly from the bark with which they line the sides of their holes. In the midst of all these holes, these heaps of clay and gravel, and this stench, the diggers are working away, thick as ants in an ant-hill. You may imagine the labour of all this, and especially of keeping down these subterranean deluges of Stygian water. The course of the creek is lined with other diggers washing out their gold. There are whole rows, almost miles, of puddling-tubs and cradles at work. The earth containing the gold is thrown into the puddling-tubs—half-hogsheds—and stirred about with water, to dissolve the hard lumps, when it is put through the cradle, and the gold deposited in the slide of the cradle, then washed out in tin dishes. It is a scene of great bustle and animation. We saw some parties who had washed out in the course of the day 1 lb. weight of gold, others 5 or 6 oz.; and so most of them had some golden result."

There are tricks in all trades—digging in-

cluded. The trick of the gold-seekers is nugget-finding:—

"There was a great hurrahing at one hole, and a man who knew me came running to desire me to go and see a nugget nearly as big as his finger. As no nuggets had yet been found here, but only small gold, it appeared the more surprising. I hastened on; but before I could reach the spot, I heard a man say, 'Well, I have sold the nugget and my hole for 5*l.* 15*s.*' 'Where is the nugget?' I asked. 'Oh!' said he, 'the man who bought it has gone off with it.' Now there was a nugget, but it had been first put in by this fellow, an old Bendigo digger, in order to sell his hole. The nugget was probably worth half the money. The diggers dug on with renewed ardour, but soon came down to the rock, and scarcely a particle of gold was found. I have no doubt that many of the Münchhausen holes out of which the 5,000*l.* and 7,000*l.* were so readily shovelled up at Mount Alexander in a few days, were got up the same way, and for the same purposes. The people everywhere do not hesitate to assert that the wonderful finds that the Governor reported to the Home Government were prepared by interested parties."

"Prospecting" for gold is one of the specialities of Australian life; and an experienced hand at the work is often watched and tracked for days by those who would share in his golden harvest, with a pertinacity worthy of the Mohican or the Cherokee. Against such followers the gold-finder has to guard his secret; and the incidents of the "watch" remind us of scenes in Cooper's novels.—

"Our scouts had not penetrated far into the Bush before they encountered another emissary on the same errand. This was a person belonging to the party of Mutch, a substantial miller who had abandoned his grist and his toll in quest of the native gold. Having seen this party on the road hither, our pioneers now learnt that they were watching a certain dray, which, well loaded with tools and provisions, was as quietly as possible stealing across the Bush. The man said that they knew the head of this party well,—Braidy of Albury—and that it was one of great experience, and would not move across the trackless Bush without being in possession of some rich and real object. They had been off prospecting, and were now, doubtless, on the way to some newly-discovered digging-ground. Our scouts joined this man, and they together pursued this interesting dray. They went on till they reached the heads of Spring Creek, in fact, till it was lost in bogs, instead of descending from the mountains as was supposed. They followed on till the land dipped down the other way into a great valley filled with scrub and rank grass up to their horses' necks, and they saw ranges of hills before them. At length they came up with a loaded cart, also on the track of the bullock-dray. Very soon after they overtook two Yankees on foot with their swags on their backs, and also on the same chase. Two bearded fellows they were, who had more the look of Poles or Hungarians, but whose intonation left no doubt of their nationality. They declared that they would dog the dray to the world's end if necessary, saying that they had heard that the proprietors of this party had brought twenty pounds' weight of gold with them. The country was covered with hop-scrub up to their very heads, so that these Yankees could follow very near to the pioneer dray, unseen. As there appeared no likelihood of the dray moving on with those spies after it, our scouts rode on to some distance to explore the country, and on returning found the original dray, the cart, another bullock-dray which had come up also, and the two Yankees, all camping for the night near each other. The original dray people declared that they had provisions for three months, and would not move a step further while the others remained. There they lay watching each other, and endeavouring to tire each other out; the followers declaring their determination to follow, and the leading party protesting that it would not lead, and that even were it to go on, the rest would find the road over rocks, precipices, and streams, such as they had little idea of. The others responded that, where they could live, they could too—where they could pass, they could. Thus our party left them, like chess-players watching for the next move, and returned home. * * Yesterday we went

to the tent of Mutch the miller, and learnt that the parties we have described had continued to lie in the Bush for two days, obstinately watching each other. On the third morning before daylight, the original bullock-dray party had put in practice a clever dodge. While it was dark they had sent off two pack-horses, and the most able of their party towards their destination. They knew that the ground being dry and hard, it would be more difficult to track the horses than the loaded dray. The dray remaining just where it was, and all having been conducted with wonderful quietness, the departure of a portion of the party was not discovered for some hours; and then, indeed, there was a running, and a hunting, and an excitement! The remainder of the other party had secretly sent in the night to the diggings for other horses, which they had ridden to and fro in the scrub, so as to confound the traces of those which had gone forward. And now, as the other parties eagerly began to pore over the ground on all sides, to make out the foot-prints of the pack-horses, it was found that they had set off in quite a different direction to that which the dray had been pursuing, and had made such a zigzag route till they got upon the hard stony ranges, that all were thrown out by it. Meantime, the people of the dray themselves, quietly collected their bullocks and drove back to the diggings, followed by all their pursuers, except the two Yankees. They coolly declared that they would never quit the search after the pack-horses till they found them; and like two Indians of their own forests, they continued to pore after their traces, sometimes on their hands and knees; sometimes, making long cross tracks through the bush, eyeing the grass and the shrubs to discover where they had been broken by any passing animal, and thus they disappeared at length in the woods, and they succeeded! After numerous hardships they came upon the original dray party on the lower Yackandanda, and on the spot which on this discovery speedily grew into the present Yackandanda Diggings."

Such passages are fair samples of the better sort of matter contained in Mr. Howitt's volumes. In spite of the fault at which we have already hinted, and also in spite of many repetitions and some few contradictions, 'Land, Labour, and Gold' is a good, fresh, and reliable book,—full of original pictures and sound advice.

The Roman Empire of the West: Four Lectures, delivered at the Philosophical Institution, Edinburgh. By Richard Congreve, M.A. Parker & Son.

THE central proposition of Mr. Congreve's theory is, that Imperialism is a general necessity of the times in which we live. Weary of parliaments, discouraged by responsible executives, solicitous only for social uniformity to be ordered and modified by one irresistible will, he asks for a military absolutism, as that condition under which the human race can alone advance to its highest destinies. A dictator, with an army and a church—*carnifex et pontifex*—such is the institution which must supersede the cabals of senates, the vacillations of cabinets, the caprices of popular opinion. That we do not exaggerate Mr. Congreve's meaning will be obvious from one quotation:—

"Not merely the Roman Empire, but that very large political society—every society in which we find aggregated many smaller ones, of sufficient size themselves to be independent societies—to make my meaning clear, all such states as the larger kingdoms of modern Europe, with no exception as to our own country, are not fit subjects for the constitutional system. That system, with its fictions and its indirect action, may offer advantages at certain times—as, historically, it has done with us—but, on the whole, I think it alien to good government. It has ever failed,—and I appeal to the history of England in support of my assertion, and not merely to the present disgraceful state of our Government, though that is so much in accordance with past history as to exonerate, in a measure, the men at the expense of the system;—it is failing you now, in the presence of real dangers and war."

Here the word "constitutional" is used as the antithesis to "absolute," for the writer adds:—

"For myself, I heartily wish that the time were come when we were clear of the government of boards, call them a cabinet or vestry, with all their complication of personal and local interests, and under the government of one—a protector or dictator, if you like to call him so—the name is unimportant."

So far as Mr. Congreve's theory is simply political, it is beyond the reach of our criticism. But it involves several points of history, for it rests on the example of the Roman Empire. That Empire is vindicated in these Lectures against the historians and scholars who hold that when civil war ceased at Actium the grandeur of Rome was gone, its manhood past, its decay begun. Perhaps the contrast usually drawn between the era which preceded and the era which followed the reign of Augustus has been intensified, beyond philosophical accuracy, by some too zealous writers; but Mr. Congreve carries exaggeration to its limits when he reverses the picture, and talks of the Republic as the infancy, of the Empire as the maturity, of Rome. In his view, the one was anterior to the other, as the forced march to the victory,—as the race to the laurel,—as the long war to the peace which atones for it. This historical doctrine is peculiar,—but still more peculiar is the attempt to display the Imperial epoch in such colours as may tempt Europe, England included, to seek for the cure of its civil troubles in a dictatorship and a prætorian army. It is forgotten that the modern world is not composed of one cultured State, supreme over all others, as Rome was, until, in spite of its much-praised unity, it was first divided, and then rent to pieces.

But its duration gives it importance. If duration be the point in dispute, the fourteen centuries of the Eastern constitute a greater claim to notice than the five centuries of the Western Empire,—than the two centuries, in fact, which are allowed to have included the fortunate period of the history. And this fortunate period was marked by the reigns of Tiberius, Caligula, Nero, and Domitian,—by the spectacle of a madman, an idiot, and a glutton alternately at the head of the Roman world; and the repose they gave is valued at more than the peace which flourished after the Samnite, and the glory which arose after the Punic wars.

The dissonant factions of the Republic, says Mr. Congreve, being incapable of uniting for a common purpose, justified the Imperialism which brought rest and relief to that mass of conquered provinces. By some means, however, those parties, or factions, created a vast civilization, which ceased to grow when Cæsar crossed the Rubicon, and a superb dominion which fell to ruins under their single-handed successors. If they necessitated the Empire, it was as the age which ended with Aurelius necessitated that which began with Commodus, and as the despotism of the dull and brutal Claudius, of the lunatic Caligula, of the hungry demon Heliogabalus, necessitated the Gothic inroads and the final abasement of Rome. What was the peace of a capital overpowered by a debauched soldiery, perpetually streaming with blood, exposed at every interval of a few years to a brief but cruel civic war? What was the happiness of provinces taxed and spoiled to flatter the impure and improvident crowds of that capital, condemned to supply its circus with gladiators, its idle mobs with bread, and its tyrants with the materials of an impious luxury? What were the laws which sanctioned these crimes against justice and nature, and what the armies that, when the people had lost their

virtues with their freedom, were sold into the hands of every adventurer who could rob the treasury? Disease is the successor of disorder—death the consequence of incurable disease; and in this sense the Empire inherited the Republic, and barbarism inherited the Empire. But there was a check on the ferocity, even of Caracalla; and that was the assassin. There was a moral influence, also; and that was the prospect offered by example to the Emperors, that a public curse would be registered upon their tombs.

Mr. Congreve separates the Imperial history into epochs,—of which the first represents progress, the second decline, the third and fourth dissolution. But his moral, if it be sound, must apply to the entire period of dictators, of unity, and of organization. It must reconcile us to the picture drawn by Suetonius and by Juvenal, whom Mr. Congreve has not quoted, and by Tacitus, on whom he partially relies. It must apologize for the exigencies which submitted Rome to the will of any depraved senator or brutal soldier who could pay an Imperial guard, or who could bribe, with the corn of Egypt and Libya, the meanest classes of the people. Messalina was its moral type; Domitian its political representative; the indolent pauperism of Rome its social result. And how much of positive amelioration was effected that history should condone the vices of the Empire? Slavery was not abolished, but increased,—class distinctions were exasperated, in spite of the murder of nobles,—religious uniformity was sought by means of persecution, and was never attained,—the soldiers butchered the aristocracy and quelled the people,—and the people sank in hope and spirit until they cared nothing whether Rome existed or was effaced from the earth.

The principle of unity established, and to a certain extent developed, by the Roman Emperors, the Code of great laws, derived chiefly from the Republic, and the municipal organizations of the Empire, are well described and not overvalued by Mr. Congreve. But his historical view seems to us to be false and partial, and strained to suit a foregone conclusion.

That conclusion, as we have said, is the necessity of a dictator in this country, as elsewhere,—one who shall rule, with a spiritual ally, while Mr. Congreve's social theory is carried into effect. The transitional state will then be passed, the Emperor will abdicate, and society, "on an industrial basis," will have reached its true destinies. From Actium to the Russian War seems a lengthy probation, especially as we do not know how long the Empire would continue. Mr. Congreve merely says that this state of things—

"is requisite for a time only, and solely to ensure the peaceful and due discussion of the organization to which it must give way, the new organization of society on the basis of industry,—

The nobler modes of life,
The sweeter manners, purer laws.

It must, in short, be a dictatorship, not in the interests of the old society, but in those of the new; a dictatorship of progress, not of mere torpid conservatism, one of our worst enemies; or it must be wrested from those who so administer it, and placed in other hands. Such a power, if placed in the hands of a man competent to wield it, will be found to create no difficulty, for whilst he recognises the high responsibility of his functions, he will recognise at the same time their inherently provisional character."

Whatever be the value of Mr. Congreve's Imperial theory, he has not chosen the best method of enforcing it. Five hundred years of absolutism in the Western Roman Empire ended in ruin. Although, therefore, his Lectures are broad in their scope, polished in style, and ingeniously argued, they must be regarded as failures in reference to their object,—which is

to exalt the Roman Empire above the Roman Republic, and thence to draw inferences favourable to the abolition of all our institutions, and to the substitution of a military dictatorship.

Poems. By Matthew Arnold. Second Series. Longman & Co.

In the second series of Mr. Arnold's 'Poems' the skill of the artist is more obvious than the genius of the poet. In some respects the poet merits praise. He is thoroughly in earnest; his idea of the poet's vocation is lofty, and his poetic culture has been severe and continuous. His poems are the result of labour and thought, and of that hearty devotedness to his object which is assuredly as needful in the highest of all arts as in the lower. Hitherto, however, the result has scarcely been commensurate with the effort.

We took up the second series of Mr. Arnold's 'Poems' with some curiosity. We cannot say that we meet with many traces of improvement. The subjects which he has chosen lie beyond the pale of our sympathies. Moreover, he is still fond of trying his strength on metres devoid of music to an English ear.

'Balder Dead' is the title of the principal poem in the volume. Here, for awhile, Mr. Arnold escapes from Grecian nomenclature, though not from Grecian influence, and introduces us to the Scandinavian gods and heroes in the halls of the Valhalla. The epic simplicity of this poem is charming; and some of the descriptions are written in Mr. Arnold's happiest style. Take, for instance, the description of Balder's funeral:—

But when the Gods and Heroes heard, they brought
The wood to Balder's ship, and built a pile,
Full the deck's breadth, and lofty; then the corpse
Of Balder on the highest top they laid,
With Nanna on his right, and on his left
Hoder, his brother, whom his own hand slew.
And they set jars of wine and oil to lean
Against the bodies, and stuck torches near,
Splinters of pine-wood, soaked with turpentine;
And brought his arms and gold, and all his stuff,
And slew the dogs which at his table fed,
And his horse, Balder's horse, whom most he lov'd,
And threw them on the pyre, and Odin threw
A last choice gift thereon, his golden ring.
They fixt the mast, and hoisted up the sails,
Then they put fire to the wood; and Thor
Set his stout shoulder hard against the stern
To push the ship through the thick sand: sparks flew
From the deep trench she plough'd—so strong a God
Furrow'd it—and the water gurgled in.
And the ship floated on the waves, and rock'd;
But in the hills a strong east-wind arose,
And came down moaning to the sea; first squalls
Ran black o'er the sea's face, then steady rush'd
The breeze, and fill'd the sails, and blew the fire;
And wreath'd in smoke, the ship stood out to sea.
Soon with a roaring rose the mighty fire,
And the pile crackled; and between the logs
Sharp quivering tongues of flame shot out, and leapt,
Curling and darting, higher, until they lick'd
The summit of the pile, the dead, the mast,
And ate the shrivelling sails; but still the ship
Drove on, ablaze, above her hull, with fire.
And the Gods stood upon the beach, and gaz'd:
And, while they gaz'd, the sun went lurid down
Into the smoke-wrapt sea, and night came on;
Then the wind fell, with night, and there was calm.
But through the dark they watch'd the burning ship
Still carried o'er the distant waters on
Farther and farther, like an eye of fire.
And as in the dark night a travelling man
Who bivouacs in a forest 'mid the hills,
Sees suddenly a spire of flame shoot up
Out of the black waste forest, far below,
Which woodcutters have lighted near their lodge
Against the wolves; and all night long it flares:—
So far'd, in the far darkness, Balder's pyre.
But fainter, as the stars rose high, it burn'd;
The bodies were consum'd, ash chok'd the pile:
And as in a decaying winter fire
A char'd log, falling, makes a shower of sparks—
So, with a shower of sparks, the pile fell in,
Reddening the sea around; and all was dark.

The want of human interest in 'Balder Dead,' and in the greater number of Mr. Arnold's poems, is, to our thinking, a fault so palpable, as to outweigh in a considerable measure the praise which he may justly claim for execution.

Remarks upon Alchymists, and the supposed object of their Pursuit; showing that the Philosopher's Stone is a mere Symbol, signifying something which could not be expressed openly without incurring the danger of an Auto de Fe. By an Officer of the United States Army. Carlisle, Penn. (U.S.)

Mr. Hitchcock, in his rooms in Carlisle Barracks, exhibits to us the pleasing picture of a warrior in the robe-de-chambre of a philosopher. He does not, like melancholy English ensigns, take to blowing his brains out through a flute; nor, like more mirthful fellows wearing the same royal livery, to breaking the Queen's peace and his own constitution. Our good cousin beyond the Atlantic has, in short, devoted himself not to the pursuit of Alchemy, but to that of discovering what Alchemists were so ardently pursuing. He has not cared to trouble himself about the transmutation of metals and the making of gold, nor has he discovered the philosopher's stone. He has, however, done better: he has discovered of what the stone itself was made, and what its signification is. The Alchemists' "Gold" was "Wisdom," and the "Stone" for which they so cared was nothing more nor less than the "soul of man." In this view of the case, the Alchemists—not the sooty and lamp-blacked dupes who worked over furnaces, and slumbered with retorts for a pillow—but the literary Alchemists, the men who read and wrote upon the subject, were in fact the primitive dissenters who divided themselves from the Established Church of their times and nation. The Church taught a species of Polytheism, by demanding divine honours for a multitude of deified men; but the Alchemists, in spite of priestly teaching, maintained that the only saving power was in the Philosopher's Stone,—whereby they meant, so our gallant author tells us, the Wisdom, Mercy, and Love of God.

Mr. Hitchcock is well read in the lore of Hermetic adepts, and he interprets their mystic writings more readily than the explorers of Nineveh decipher the cuneiform writing of older days. But among the Hermetic adepts he reckons not only the Alchemists proper, but various profane writers,—or writers whom the ignorant world styles profane. Fancy Boccaccio being enrolled among those symbolic authors, and described as writing of *Love*, "without at all meaning what commonly passes under that name." We cannot bring ourselves to think that there is much awful mystery buried beneath the ardent details of the sprightly 'Decameron.' We think that Walpole was as wise thereon as the gallant Hitchcock, when the lively Horace, writing to Lady Ossory, said:—"I know the plague is not so horrid a thing as some people imagine,—at least Boccaccio chose such a period as a delicious one for telling stories. He makes a select company of young ladies and gentlemen shut themselves up in a country house, and relate novels to pass away the time, while all their relatives and friends were swept away by cart-loads in the city."

Mr. Hitchcock has said almost as much upon the "stone" of philosophy as extensive reading, good memory, and some thought, could enable him to do. From it is struck the spark of wisdom. We are surprised that so careful a reader has overlooked what Victor of Marseilles, in his poetical Commentary on Genesis, has said as to the discovery of fire through stone. According to that commentator, Adam and Eve, ere they were beguiled by the serpent, flung a stone at the reptile. The stone struck a spark from the rock, into a crevice of which the wily serpent escaped, while the spark, falling upon and kindling the dry vegetables around, set

fire to half Paradise, and caused, literally, "a world of mischief." There is as much of the Hermetic tune in this as in anything sung or said by the mystery-loving Mr. Hitchcock, as a specimen of whose philosophical conclusions the following will suffice.—

"I have been turning over the leaves of Salmon's translation of the works of Hermes, Kalid, Geber, Arterphius, Flammel, Bacon and Ripley, hoping to find something by which to indicate their object, but it is much like seeking the commencement of a circle. There is no reason for selecting one thing rather than another, for all things are so bound to all that a preference can hardly be fastened upon any one thing. But here, at page 265, is something from the translator in praise of the 'Stone.' 'Possessing this Stone,' says he, 'thus perfected, you possess all the wealth and treasures of the world; so that you may live free from care and fears; from every sickness and disease: It is a remedy for all diseases both of body and mind: It strikes at the root of infirmities; and destroys that which would destroy or undermine the health and prosperity of the human body. This Stone, this wealth, this treasure, though it be but like a grain of mustard-seed, yet it grows to be the greatest of all trees, in whose branches the birds of the air make their nests, and under whose shadow the beasts of the field dwell.' In reading such a description of the Philosopher's Stone, let the student hold himself in silent contemplation awhile, under the self-question: Is there anything in the universe of which this can be said? or, what is that, in the universe, endowed with, or possessed of such extraordinary properties?—and if he can find out what it is, he has found the Philosopher's Stone, for this is but a mere name of something, the thing being indicated not by the name, but by the properties attributed to it. No sensible man need be told that God may be called indifferently, 'Jehovah, Jove, or Lord.' But I am in no danger of disclosing a forbidden secret, for a reason already given, yet at intervals I feel disposed to reiterate, that 'the Stone is not a Stone;' except that, figuratively, the heart of man is sometimes said to be hard and stony, and before it can be made accessible to the elixir or spirit, it must be softened and become even as that of 'a little child,' and thence be purified, passing through three states (the Alchemists say), the Black, the White, and the Red state, (repentance, sincerity, and the fruits of righteousness)."

Mr. Hitchcock makes some extracts from English writers, but these we will not criticize;—lest we, like the farmer in the fable, who, as Sanderson says in the Preface to his Fourteen Sermons, "did not well to beat his maid for serving him with thin milk when it was his own cow that gave it."

The Book compiled by the Knight of La Tour Landry for the Instruction of his Daughters—[Le Livre du Chevalier de La Tour Landry, &c.]. Published from Manuscripts in Paris and London, by M. Anatole de Montaiglon. Paris, Jauret; London, J. R. Smith.

THE good Knight, to whom we are indebted for this curious work, was a contemporary of Edward the Black Prince. He probably fought at Poitiers;—one of his name was taken prisoner there. He lived in the days of Petrarch, Boccaccio, Chaucer, and Froissart, and his work partakes of the manners and general character of those times. He assigns to its compilation the date of 1371; and more than a hundred years afterwards Caxton was recommended by "a noble lady, which hath brought forth many noble and fair daughters," to "translate and reduce the said book out of French into our vulgar English," which, "at contemplation of her good grace," the excellent printer accomplished "after the little cunning that God had sent him," and emprinted his translation "at Westminster, the last day of January, the first year of the reign of Richard the Third,"—that is, in 1484. Nine years afterwards 'The Knight of the Tower,' which is the general title by

which the book is known, was translated into German, and printed at Bâle. Subsequent editions were sent forth at Augsburg, Strasburg, and elsewhere; and in 1849 Wolff included it in his collection of popular romances. In France the book seems to have been less popular than elsewhere. No edition appeared in that country before 1514, and there was no re-impression from 1517 until the present time.

Mons. de Montaiglon details the genealogy of the Chevalier de La Tour Landry with fond minuteness. He strenuously contends also for the harmless character of his author's compilation, in spite of some things which he admits to be a little too plainly written, and others which he conceives to be badly expressed. His judgment on this subject is founded upon knowledge, whilst the contrary opinion of Dibdin was written with his accustomed speculative carelessness. Still M. de Montaiglon's decision will not find favour in England. Such a book cannot in the present day be anything more than an antiquarian and historical curiosity, therefore its occasional freedom is of the less moment; but no one can doubt that it contains passages which, in the judgment of English people, must be esteemed highly indecent and offensive. Remembering that it was written, not merely for the instruction of young ladies, but by a father for his daughters, these passages contain singular evidence of the extreme indelicacy which must have pervaded what was esteemed "good society" in the palmy days of chivalry. Mr. Wright will, no doubt, look to this in his announced reprint of Caxton's translation of this book for the Warton Club. The coarseness of some of the publications of the Percy Society was the first cause of its downfall.

The character of the Knight's teaching may be guessed from his mode of composition. Having conceived the idea of writing such a volume, he engaged the services of "two priests and two clerks," to extract from the books in his library—such as the Bible, the Gestes of Kings, the Chronicles of France, with those of Greece and England, and several other foreign countries—all such passages as were to his purpose. To these he added some few stories within his own experience, and finished off his extracts and narratives with comments and applications intended to be highly moral. The evidence which the book contains of the general nature of the motives which operated upon men and women in those days, is perhaps the most curious part of the volume. Upon close inquiry, it would be found to yield excellent materials for an examination into the then existing state of morals as well as manners. Nothing is urged for adoption upon any sensible grounds of right or wrong, or as being in accordance with any admitted moral standard, but because it has been sanctified by long usage, been confirmed by pretended miracle, or been approved by some superstition which outrages common sense.

For example: fasting twice a week is enforced, because a Christian head having been dis severed by a Saracen scimitar screamed out as it rolled along the ground for "A priest! a priest!" to come and hear its confession. Being interrogated how it happened to be endued with such miraculous energy, the head replied that it was all owing to its having strictly observed the Wednesday and Friday fasts. The worthy Knight in like manner urges upon his young ladies, by personal considerations, the addition of every Saturday to their days of mortification in honour of Our Lady and holy virginity. Gluttony is to be shunned, upon the example of a lady who, in her lord's absence, having eaten up a magnificent eel which he was keeping in store in expectation of a possible visit from a great lord, was "by a magot-pie brought forth"

upon her lord's return. The observant and communicative bird greeted his master with "My lord, my lord, my lady has eaten up the eel!" So again, charity is enforced by a story of a lady who, having a couple of little pet dogs, bestowed upon them the broken victuals which ought to have been put aside for the poor. A mendicant friar warned her of the result, but she was obstinate. When she came to die, two little black dogs visibly appeared upon her bed, and on her departure they licked her mouth, which instantly became black as a coal. This superstitious distortion of what was probably an affecting example of animal fidelity was vouched to the Knight of the Tower by "a young lady, who said she saw the dogs, and told the Knight the name of the lady." Other examples inculcate the virtue of a Griselda-like submission to the commands of even a brutal husband; and ladies who reply upon their lords, loving the last word, and taking no heed of warnings to be quiet, are admonished by the example of a burgher's wife, who, having irritated her rough lord and master, was felled to the earth and her nose broken by his stalwart fist. The rascal is defended by the Knight of the Tower as having merely exercised his legitimate privilege. It is, indeed, broadly contended that "it is reason and right that the husband should have the word of command, and it is an honour to the good wife to hear him, and hold her peace, and leave all high talking to her lord; and so, on the contrary, it is a great shame to hear a woman strive with her husband, whether right or wrong, and especially before other people."

In such examples of old-fashioned teaching, there is occasional amusement as well as instruction. To all who desire to seek for it, and especially to all who can turn it to its legitimate use, as materials for our information on the state of society in the days of our ancestors, we commend the work of M. de Montaiglon.

OUR LIBRARY TABLE.

Cleve Hall. By the Author of 'Amy Herbert,' &c. 2 vols. (Longman & Co.)—There is a limit to all human faculties—even to the seemingly inexhaustible one of giving good advice,—and in her present story the Author of 'Amy Herbert' gives signs that her well of wisdom is somewhat low. There are scattered up and down sentences and observations from which the reader may gather a word of counsel or sympathy, but they are weaker and more diffuse than in former works by Miss Sewell. It can scarcely be otherwise,—no man or woman either can go on writing a rapid succession of works intended to meet the varying phases of trial and difficulty in the details of daily life with a serene wisdom always superior to the situation; it may be done once or twice, and draw together a circle of grateful and admiring readers, but the end of the tether must be felt at last. Miss Sewell has given herself too little pause between her works, and 'Cleve Hall' bears the marks of haste and fatigue. The story is melo-dramatic in its incidents, and it might have been made interesting; but the long speeches and interminable dialogues, always upon some special subject, retard the action in the most critical emergencies. The materials of the story are left crude and are ill worked out,—the winding-up especially is slovenly and unsatisfactory beyond any other story we can at this moment call to mind. There is a stately, implacable father, who believes himself justly exasperated,—there is a weak, erring, but highly repentant, son, who is disinherited for a crime he has never committed, but who has entailed upon himself the appearance of guilt by a line of conduct never witnessed except in a madman or—the hero of a novel. There are smugglers, and a shipwreck, and an arch-villain of the pattern ladies delight to draw, extremely black, going on in his wickedness like clockwork after being once wound up, persisting in it for eighteen years without relenting for a moment, until at the last hour he breaks his

snares, sets his victim free, and obligingly flies the country. The management of the smuggling scenes, and the discovery and destruction of the forged bill,—indeed, the whole story, after Edward Vivian's return,—are perplexed and feeble. The characters, after talking elaborately, are allowed to depart from the scene like so many ends of knotless thread. The only character in the book who inspires interest—Ronald, the son of the man who plays the villain—is despatched in the dusk of a Christmas evening “to a distant land,” the geography of which is not told,—there to labour at his father's reformation, and to suffer for his sins; but we cannot see that either justice or common sense required that a man who had shown himself a hero should spend all his life “in the drudgery of a merchant's office,” nor why “the happiness of a loving home” should “never be his.” We are given to understand that his delicacy about his tarnished name was the cause, but as his father had escaped public exposure at home and become a reformed character abroad, there was no rational cause why the son should have debarred himself from “a loving home.” It did not involve either duty or heroism. The serenity with which the various characters pursue abstract disquisitions, in moments of the most cruel emergency and anxiety, is wonderful. They none of them seem to realize their own position, which of course destroys the reader's belief in it also. We have a real respect for Miss Sewell's talents, but we are constrained to pronounce her present work a failure. She is, however, quite strong enough to bear the truth.

The Art of Elocution, as an Essential Part of Rhetoric: with Instructions in Gesture; and an Appendix of Oratorical, Poetical and Dramatic Extracts. By George Vandenhoff. (Low & Son).—Archbishop Whately having in his Rhetoric disparaged the study of Elocution as an art, Mr. Vandenhoff endeavours to refute him out of his own mouth, by employing the arguments which he puts forward in defence of the study of Logic; and it must be confessed that the professor of elocution has conducted his case with skill, and success to a certain extent. He has shown that the reasons urged in favour of logic and rhetoric are, for the most part, applicable to elocution, and he may, therefore, be considered to have established the utility of this art; but he has not shown, nor do we think it in his power to show, that the study of printed directions for pronunciation, intonation, emphasis, &c. is the most effectual method of acquiring it. We hold, that elocution cannot be successfully taught without *viva voce* instruction. Still, we feel bound to admit that Mr. Vandenhoff's principles and rules appear to us correct in themselves, clearly stated and abundantly exemplified. The Appendix of extracts for practice makes up nearly half the book, and consists of better materials than are usually found in such quarters.

Bradshaw's Illustrated Guide through Paris. (Adams).—The indefatigable Mr. “Bradshaw” has condensed into a thick and portable volume a goodly stock of miscellaneous counsel on the subject of a visit to Paris—showing the reader how he may see that gigantic capital in one day or in seven; and even in his programme for a single day he finds it necessary to send the tourist after dinner to the theatre or Mabilles, “to drive away the ennui of the next three or four hours!” Mr. Bradshaw is a terrible traveller. If his tourist is condemned to spend two days in Paris—poor fellow!—Mr. Bradshaw knows nothing better to do with him than pack him away to Versailles, which will conveniently “occupy him all day.” Generally, the advice given, though old, is useful; and a man in search of a cheap Guide to Paris may do worse than take up Bradshaw's.

A Few Months in America; containing Remarks on some of its Industrial and Commercial Interests. By James Robertson. (Longman & Co.).—The remarks in this volume apply, for the most part, to the productive resources and commercial enterprise of the North American Union. Mr. Robertson is more inquisitive than sociable, and has many more notes on agriculture and manufactures than on election scenes, Broadway fashions, or domestic interiors. In his view, the opulence of America

has been over-estimated; but such was not his original impression. During the first few weeks of his sojourn, the massive public edifices,—the immense quantities of produce brought from the interior to the teeming ports,—the ceaseless energy of the population,—and the lavish expenditure observable on all sides,—seemed to indicate superfluous public wealth. Further experience modified this view, though it showed that riches in the United States are well diffused; so that, practically, the nation is more flourishing than any of its rivals in the Old World. Of the economy of the American administrative system, with all its modesty and simplicity, Mr. Robertson also entertains an idea opposed to that of many former writers; but it must be remembered that “a few months” only were spent by him among the Transatlantic cities and fields. Nevertheless, his work affords a practical view, of considerable interest, of American material progress; its facts and figures are carefully methodized, and generally authenticated. The lighter portions contain remarks on habits and social styles,—on the externals of American life,—and on the press. *Apocryph* criticism in the United States, some fragments are quoted from an “article” on a popular composer, who was equal to “Demosthenes joined with Raphael, and Shakspeare with Henry Clay!” This may be one of those fantastic tricks at which the angels weep.

Meditations and Moral Sketches. By M. Guizot. Translated from the French by John, Marquis of Ormonde. (Dublin, Hodges & Smith).—The late Marquis of Ormonde undertook to translate these essays, from sympathy with the feelings avowed by the author. His version is elegant and pure; but the Meditations do not strike us as being so characteristic or so amiable as the late Marquis appears to have considered them. They are prefaced by a series of virulent platitudes, in favour of one social sect and against another. One set of opinions is stigmatized as foolish and brutal; another political creed is personified as a “human Satan”; until we learn that “order and authority” are in danger, and that M. Guizot has been reflecting on the means of saving them. Golden eagles, at present, seem to fly high above the philosopher's meditations; his invectives also are like bees embroidered on the purple. We understand all this on the part of M. Guizot, who writes an introduction that has no connexion with the essays which follow it, except in so far as both are burdened with a rebuke to this aspiring, expanding, questioning generation—“peace, be still.” A certain fire of eloquence, as well as an electrical application of “strong words,” that give a shock to the fancy, may stimulate the readers of the volume; but M. Guizot's liberality is too illiberal, and his notion of progress too much like Castlereagh's “advancing backwards” to represent the sentiment of the present age.

A Short History of the Waldensian Church in the Valleys of Piedmont, from the Earliest Period to the Present Time. By Jane Louisa Wiliams. With a Preface by the Rev. W. S. Gilly, D.D. (Nisbet & Co.).—It used to be said in the time of our Commonwealth, when Cromwell interfered on behalf of the Vaudois, that they were the most important enemies of Rome, on three accounts:—their antiquity, their knowledge of Scripture, and the blamelessness of their lives. Such they remain up to the present time, and for the same reasons. All who dissent from Rome are interested in their history, and to young people especially the present book may be safely recommended. It contains a description of their romantic country, a sketch of their history, and an account of their present position under the civil rights recently bestowed upon them by the King of Sardinia. The Introduction by Dr. Gilly gives authority and adds value to the work.

The Twenty Years' Conflict in the Church, and its Remedy. (John Chapman).—The author is of opinion that “the reason why peace and unity have forsaken the Church is, that while Science has been reformed, Religion remains unreformed; and the reason why one party does not prevail over the other party is, that there are faults on both sides.” The author proposes his suggested

reforms under the arithmetical terms of addition and subtraction. “The additions are: the Right of Private Judgment, or the Authority of Reason and Conscience—Free Will—Responsibility—and Man's power to perform good as well as evil. The subtractions are: Apostolical Succession—the supernatural Efficacy of the Sacraments—Justification by Faith—Original Sin and Predestination.”

Elements of Chemistry, Theoretical and Practical. Part I. *Chemical Physics.* By W. A. Miller, M.D. (Parker & Son.).—This is the first Part of a work on the science of Chemistry, and, if we may judge from the present instalment, Dr. Miller's book will be found equal to any works which have preceded it as a guide to the principles of this important branch of knowledge. This Part treats entirely of those portions of physical science which bear on chemistry proper, and contains a fuller exposition of this department than is usual in our chemical manuals. It seems to us, however, that the present state of chemical science demands careful comparisons. Recent researches clearly indicate a closer dependence of the great forces of nature one on another than was at one time supposed; and it is only by studying matter under the influence of attraction, heat, light and electricity, that the laws of chemical affinity can be fully comprehended. Dr. Miller writes clearly and as one accustomed to treat familiarly the subjects of his volume. This work is, in fact, a good popular exposition of the branches of physical science to which it is devoted.

On the Solution of the Great Scientific Problem, What is Heat, Light, Electricity and Chemical Affinity? By W. T. Estor. (Kendrick).—The identity of the great forces in nature is becoming a favourite theme of inquiry amongst natural philosophers who follow in the footsteps of Bacon. It is also a favourite subject with those who know nothing of experiment and are incapable of observation. Our author belongs to the latter class of philosophers,—and no one should consult his book who wishes to get any sound information on the subject.

A Discourse on Medical Botany. By Earl Stanhope. (Churchill).—This pamphlet contains the substance of several unpublished Addresses delivered by the late Lord Stanhope as President of the Medico-Botanical Society. It contains an account of several vegetable remedies in disease, some of which have been tried and are now generally neglected, whilst others referred to deserve perhaps more attention than they have received.

Prodromus Floræ Zeylanicæ. Part I. Vol. II. By G. T. Kelaart, M.D. (Van Voorst).—This is another instalment of Dr. Kelaart's useful labours on the zoology of Ceylon.

Small Farms, and how they ought to be Managed. By Martin Doyle. (Routledge & Co.).—Small farms in general have been the failures of agriculture, at least in England. Mr. Doyle shows that they ought to be cultivated with facility and advantage. He even undertakes to initiate the retired tradesman or practitioner into the art and mystery of forcing profit from the few acres which delight, with their rural look and landlord importance his latter days. His instructions are clear and practical.

Light Infantry Manual, for the Use of the Mewar Bheel Corps. By Lieut.-Col. W. Hunter. (Madden).—The compiler of these instructions recently commanded the Mewar Bheel Corps. For that corps his slight but comprehensive manual is intended. It may be profitably perused, nevertheless, by every soldier. Even civilians may not be disinclined to acquire, from its plain and interesting formulae, some knowledge of the methods by which the lighter arms of our native Indian service have been organized to their present magnificent state of efficiency.

Among other miscellanies devoted to departments and officials, is Dr. Cuthbert Conyngnam's *Doctors' Commons Unveiled: its Secrets and Abuses Disclosed*. This is a spirited and readable analysis of the structure and functions of those dim Courts, in which 130 proctors live, and move, and take their overwhelming fees. We commend the pamphlet to all explorers of old institutions.—Another “ephemeral” of similar purport is entitled *Charterhouse: Plausible Reasons for its Dis-*

solution and Reconstruction. It is full of evidence. —The Chevalier Chatelet, in a *Letter to Lord Brougham on Trusteeship in Ireland*, merely sets forth personal matters,—as does Mrs. C. Winter, who gives three versions of her story,—two in *Letters to Lord Aberdeen on the Malpractices and Frauds of the Encumbered Estates Court*; and one in *The Adventures of a New Silk Gown; or, a Barrister in Petticoats*. This last is one of the wildest, boldest, most incessant outpouring of fury and nonsense we have ever met with. It is an eccentric mixture of statements and phantasies, utterly unintelligible. However, the Law has confessed its sins; so that none of its accusers can be altogether unjust.—We have now an account of the objects of *The Juridical Society*, established chiefly to promote legal reforms and ameliorations in the jurisprudence of the United Kingdom.

Two volumes on the Liturgy have appeared:—one *A Liturgical Class-Book: a Series of Lessons on the Book of Common Prayer*, by John Jones; the other, an argument "for Churchmen" under the title *Our Liturgy and its History*, which exhibits one side of the question.—Mr. J. J. Frew has reprinted No. XC. of *Tracts for the Times*, with *Introduction and Notes*,—and the Bishop of Oxford has published his sermon on *Rome: her New Dogma and our Duties*.—*Christian Thoughts on Life*, by Mr. H. Giles, are scarcely thoughts, but fancies, or elaborate sentimentalities.—Mr. J. P. Eliot, in *Whose is this Image and Superscription?* also indulges in sentimentality; but his religious notions are so absurdly expressed as to approach unintentional profanity. The title-page of the next theological treatise on our table is singular in that it promises a *Reply to the Rev. Dr. Cumming's Lectures on the End of the World*, by H. Bland, Comedian, Theatre Royal, Glasgow, Edinburgh, and Dublin. The writer denies that "Armageddon" means "Sebastopol," and seeks, though in moderation, to confute Dr. Cumming's narrative of events that are to happen at the end of time.—But it is in *The Voices of the Seven Thunders* that time, eternity, heaven, earth, the whole circle of planets, history, fable, truth, falsehood, human beings, beasts, and words are most violently and furiously confused. The author weaves his meaning in and out, round and through a labyrinth of phrases, until the eye aches with tracing the connexion between his Alpha and Omega. There is no sentence short enough to quote; but the reader will be satisfied to know that "triune medial relations" are here enlarged upon in a style unrivalled, except in 'Proverbial Philosophy.'

LIST OF NEW BOOKS.

Adams's Favourite Song-Birds, 2nd edit. 8vo. 3s. 6d. cl.
 Arthur's (T. S.) True Riches, 32mo. 8d. swd. 1s. cl.
 Aspen Court, by Shirley Brooks, 3 vols. post 8vo. 31s. 6d. bds.

Churchyard had apparently received no repair since it was first erected, and was in such a dilapidated condition that a complete restoration could alone preserve it. Under these circumstances, Mr. Airy procured the necessary funds from the Admiralty; and, like a zealous and devout antiquary, was careful that his restoration of this interesting and classical tomb should in all respects resemble the original structure.

THE LITERARY FUND.

THE Report of the Special Committee—the Literary Committee—has been issued, and a very interesting document it is; broad in outline, liberal in principle, able in exposition, moderate in tone. In every respect, it is a statement worthy of the cause in which it is written and the name which it bears. We hasten to lay this important document before our readers.

The Special Committee, appointed by the Annual General Meeting of Wednesday, the 14th of March, 1855, to consider and report on the question of a new Charter, beg to submit the result of their deliberations to a Special General Meeting of the Members of the Corporation of the Literary Fund.

Your Committee have requested the Honorary Solicitor to have the goodness to take Counsel's opinion on the question whether that extension of the usefulness of the Institution which they are about to propose to you, would, if you should be pleased to adopt their views, necessitate the obtaining of a new Charter or an Act of Parliament; or whether it could be effected under the existing Charter, with new bye-laws. Your Committee hope that the Honorary Solicitor will be prepared to communicate such opinion to you, on the conclusion of the reading of this Report.

Your Committee are agreed in offering to you the following recommendations:—

That henceforth the administrative body of the Society should have the power of granting revocable annuities to distressed men of letters and scientific writers, to the extent of a certain limited proportion of the income derivable from the Society's real property or vested funds.

That henceforth the administrative body of the Society should have the power of granting relief by way of loan.

By the former of these recommendations, your Committee would place the Society in the position of sometimes anticipating the claims of a meritorious writer, and of sometimes being able to afford him continuous assistance, without imposing upon him the degrading necessity of an annual renewal of a formally certified application and statement of distress. By the latter of these recommendations, your Committee would address the Society's usefulness to the unquestionably deserving case of a literary man who may have insured his life; who, without being in absolute want, or reduced to a state of pauperism, may be unable, through any one or more of a variety of causes, to pay the particular premium for this or that year, on its becoming due; who would be essentially benefited by a loan, without interest, for that purpose; and who might be heartily glad to be assisted by a loan, when he could not reconcile it to his feelings to apply for a grant of money.

That henceforth the following should be the constitution and duties of the Council:—

1. The Council to direct the Treasurer as to the investment of the funds of the Society, the sale of stock, &c. It will, therefore, naturally have the inspection of the accounts of expenditure by the General Committee, including the several grants made; and on passing them, can, in writing, recommend to the Committee any suggestions (always prospective, and never retrospective) that relate to the economy of the Society's proceedings and the distribution of its funds. Such suggestions to be taken into consideration by the General Committee at their next meeting. If twice rejected by the General Committee, the Council to have then the power of appealing to the decision of a Special General Meeting.

2. All grants of revocable annuities made by the General Committee to require ratification by the Council. If twice rejected by the Council, the General Committee to have then the power of appealing to the decision of a Special General Meeting.

3. Members of the Council, as under the original constitution of the Society, to have the privilege of attending the meetings of the General Committee, but without the power of voting there.

4. The regular meetings of the Council to be quarterly; but, any five members of the General Committee to have the power of calling a special meeting of the Council at any time. The members of the Council, also, to have the power of summoning a special meeting of their own body, by presenting a requisition to the registrars of the Society, to convene them at a week's notice. Such requisition to be signed by not fewer than five members of the Council.

5. The members of the Council to be elected by a General Meeting. One half of the Council to consist of members of the Corporation, who shall have served on the General Committee for at least one year (if so many can be found willing to serve); the remainder to be chosen out of the general body of members of the Corporation. The Council to consist of twenty members in all. One-fifth to retire every four years. Five to constitute a quorum.

Your Committee, having settled the terms of the foregoing recommendations, proceeded to consider the feasibility of making the Literary Fund Society an institution serviceable and creditable to the followers of literature as a liberal profession, and not solely restricted to the temporary relief of writers in distress, though still continuing to discharge that trust. Several important propositions towards this object being submitted to your Committee by Sir Edward Bulwer Lytton, one of their number, your Committee appointed a Sub-Committee of five of their members to investigate them and report upon them. The Sub-Committee unanimously presented the Report to which we now invite your attention, and this Report your Committee unanimously confirmed.†

Report of the Sub-Committee.

"We recommend, That in order to carry out the intentions of the originators of the Society, towards making the rules of the Society subserve to a central re-union of its members, certain rooms shall be set apart for the convenience of any members who may wish to use them for purposes of study, writing, or consultation with one another, from 11 o'clock in the forenoon to 3 o'clock in the afternoon of every day.

"We recommend, That the members of the Society be invited to assist towards forming a collection of works, especially of reference, to which all who use the Society's rooms shall have free access. That all literary members of the Society who have published or may publish books, be invited to present those books to the Society. And that application be made to the editors or proprietors of all the leading periodicals, inviting them to present the same to the Society as they are published, for the use of the members.

"We recommend, That certain evening meetings or *conversazioni* be held every season in these same rooms, to which every member of the Society shall have the privilege of introducing a friend. Also, that all members attending these meetings be charged a certain small sum—say, at the most, two shillings—to defray the cost of lighting the rooms, and of such slight refreshment as so small a payment may include.

"We recommend a new class of members of the Society (which we hope would soon comprehend the most distinguished literary men of all countries), to be called Associates; who shall be elected by the General Committee, on proof of their being literary men or scientific writers, and who, as Associates, shall be required to pay no subscription.

† That is, such members of the Committee as attended on that particular occasion. They were, Sir Edward Bulwer Lytton, Mr. Dilke, Mr. Tooke, Mr. Forster, the Rev. G. R. Gleig (on whose motion the Report was adopted), Sir John Forbes, Mr. Bell, Mr. Procter, Mr. Aldjo, and the Chairman.

"We recommend the following to be among the privileges of the Associates; such privileges to be always conceded and regulated by the General Committee, and to be always within their power of withdrawal:—

"Their enrolment as Associates, in a register to be kept by the Society, accompanied by a description of their literary qualification. Freedom of access, between the hours of 11 and 3 every day, to the rooms and to the books in the library. Admittance to the evening meetings or *conversazioni* on equal terms with the members; that is to say, on payment of the same small sum. The privilege of having their letters addressed to them at the Society's rooms.

"With a view to the ultimate attainment of these objects on a comprehensive scale, we most earnestly recommend that the Society henceforth bear in mind the intention of its originators, remembered in the existing Charter; namely, that the Society should establish a hall or college, for the honour of literature and the service of literary men. And although we do not doubt that these objects may at first be effected in the Society's present rooms, and with the Society's existing means of accommodation, we nevertheless desire specifically to state that we look to the ultimate establishment of such hall or college, and that we strongly recommend it.

"As to the cost of carrying these recommendations into effect, we conceive (after fully considering the question), that it will not in the first instance extend beyond the purchase of a very little additional furniture, and possibly to the maintenance of an additional servant, and of an additional fire during four or five hours of every winter day. We hold the Society to be at full liberty to defray such charges from its existing funds, and we recommend its doing so.

"As to the cost of the erection of the hall or college, we believe that a portion of the Society's realized property might at any time be devoted to this purpose. But we are also of opinion, that large additional subscriptions can be obtained from the public towards such a work, if the Literary Fund Society be presented to the public in the new aspect of usefulness and dignity we desire it to take, as the Literary Institution of Great Britain.

"We submit to you that the truest economy the Society can observe, is that judicious management of its ample means, which, by rendering it nationally creditable to Literature (as well as helpful to distressed writers), shall attract the widest possible range of sympathy and confidence. In all these recommendations, therefore, we have had a careful and anxious reference to the growth of the Society, the extension of its usefulness, the increase of the number of its subscribing Members, the enlargement of its funds, and the strength of its claims upon the public respect and support. We make them with a profound conviction that they are calculated to advance all these ends."

Your Committee have little to add, in further explanation or support of the views thus set forth. They have adopted them as essential features of their present Report, because they consider it reasonable that the Literary Fund Society, possessed of realized property to the amount of (in round numbers) 30,000*l.*; possessed of landed estate yielding 200*l.* per annum; and further supported by royal patronage, and by annual donations and subscriptions from the public; should endeavour to conform itself to the spirit and requirements of the time. They consider it reasonable that literature in general (and consequently the public, whose interests are inseparable from it), should derive some greater service and better representation from a Society so endowed, than the bestowal, year after year, of the interest or a part of the interest of its property, on supplicants for its bounty, and the accumulation to no other purpose of a large capital. They consider it reasonable that the Literary Fund Society, incorporated thirty-seven years ago, should remember in 1855 the astonishing diffusion of literature among the English people since 1818, and should, in the greatly altered circumstances, aspire to something

beyond a mere eleemosynary association with literature, and presentation of it to the community. And your Committee hold that this becomes a positive duty on the part of the Society, when a wider range of action than that to which it has restricted itself for thirty-seven years, was manifestly contemplated by its originators, and is apparent on the face of the existing charter itself.

Your Committee beg leave to represent to you that they have not a doubt that the general sympathy and support would be freely given to your Society, established on the broader basis which they recommend; and that they consider it very questionable whether it could long hold a high place, even among the charities of the country, by remaining stationary as to the amount of good it does, and as to the amount of revenue it annually expends in doing it.

Lastly, your Committee desire to assure you, that while their body has been composed of gentlemen, some of whom are wholly unconnected, and some of whom are intimately connected, with the administration of the Society's affairs, they have found no difficulty in acting harmoniously, and in arriving, in the main, at common conclusions. Reserving one or two differences of opinion on points of detail hereafter to be adjusted if you should see fit to adopt their recommendations, there has been, from the first, no division among them. They are agreed in nothing more completely, than in attaching no reproach or blame to any of your officers. They would enlarge the system which your officers administer, but solely for the welfare of your Society, and the credit of literature. United, themselves, in this object, they seek to unite the administrative body and the whole body of the general corporation, in furtherance of the same worthy ends. They have discharged, in this spirit, the functions you entrusted to them; and they hope it may be apparent to you, both in the substance and in the tone of this Report.

CHARLES DICKENS, Chairman.

On the receipt of this Report the General Committee resolved to convene a meeting of the whole body of Members of the Literary Fund to take the matter into consideration. This meeting will be held on Saturday next—June 16th—at two o'clock, in Willis's Rooms.

We do not know in what kind of spirit the officers of the Society have received this Report—whether they mean to accept it cordially in the interests of the literary public or to oppose it in their own,—but of this we feel assured: the former system of secrecy, humdrum, and mismanagement cannot be restored. The Institution must be enlarged, so as to become useful to Literature, or the expenses must be reduced to reasonable proportions. It is for the Members at the General Meeting to decide which course shall be followed.

OUR WEEKLY GOSSIP.

Sir Roderick Murchison, Director-General of the Geological Survey, has issued cards for a reception of literary and scientific celebrities this evening at his house in Belgrave Square.—On Wednesday last Mr. Weld held a *Conversazione* of the Fellows of the Royal Society and their friends at Somerset House,—and on the same evening the rooms of the College of Physicians were also thrown open to a professional and scientific circle.

M. Cabany is hard to please. We have given up time and space to the exposure of 'Moreduin.' We have read the book, and—far greater trial—we have read M. Cabany's 'Introduction.' We have proved by a citation from the book itself that M. Cabany's theory as to the time and season of its composition is untenable. Yet M. Cabany is not content. He appeals against our judgment—and, let us say, against that of all our literary brethren, with one ridiculous exception. Inaccessible—as a foreigner—to the argument of style—the best argument of all—he will submit to nothing short of the stern despotism of facts. Well, we must try to humour him. It will be remembered that we proved, by the passage describing "the fantastic rocks of the Simplon," that the novel must have been written *after the Peace*; and,

therefore, could *not* be the "romance of more ancient manners" referred to by Ballantyne in 1814. This fact upset the whole of M. Cabany's argument. We may go further. The tale contains evidence that it could not possibly have been written until some years after Scott died. Here is the proof. Chapter IV. of Vol. I. begins: "In one of the narrow streets which wound up tortuously from the Sandhill to the Castle of Newcastle-upon-Tyne—some traces of which still resist the improving hands of time, money, and Granger—a man, &c." This passage offers us a date. The story must have been written after Mr. Granger had commenced rebuilding Newcastle, and probably was written after he had finished his task. Now, Scott died in 1832. Mr. Granger made the purchase which ultimately led to the vast alterations in Newcastle in August, 1834. It is therefore absolutely impossible that 'Moreduin' could have been written until some years after the death of Scott.

Mr. G. H. Gordon sends us the following answer to M. Cabany's coarse invective and gross misrepresentation of a very simple transaction:—"M. Cabany makes a *cheval de bataille* out of a misrepresentation of the circumstances attending the publication of two Sermons by Sir Walter Scott. He also accuses me of having forgotten that I had myself received 250*l.* for this work when I asserted the impossibility of Sir Walter diverting the proceeds of any of his writings from the payment of his great debt. My answer is very brief. M. Cabany has not, of course, seen the Sermons of which he writes so fluently, else he would not have had the impudence to bring forward this charge. At the period in question the MS. of the Sermons was not Scott's property, but mine, and in my possession,—having been given to me two years before Messrs. Constable's failure, as a remuneration for much laborious work for which I was very inadequately rewarded at the time. It was because I was not 'oblivious of my obligations' to Sir Walter (as M. Cabany says I was) that I asked his permission to dispose of the copyright during his life-time. The letter in the Preface, addressed to me, begins:—'The Religious Discourses which you call to my mind were written entirely for your use, AND ARE THEREFORE YOUR PROPERTY. They were never intended for publication, as nobody knows better than yourself; nor do I willingly consent that they should now be given to the press, as it may be thought that I have intermeddled with matters for which I have no commission,' &c. The words here quoted in italics amply elucidate the expression ('a sacrifice of my own scruples') in Scott's letter quoted by M. Cabany from Lockhart's 'Life,' and on which he chiefly founds his accusation against me; proving that it had no reference whatever to his own and Constable's debts, but simply to his extreme reluctance to appear in the character of a poacher on clerical manors:—and I have yet to learn on what principle of law, usage, or equity property that came into my possession by the best of all titles—a free, unconditional gift—two years before Messrs. Constable, Ballantyne & Co.'s embarrassments were made public, can be considered as applicable to the liquidation of the creditors' claims on their estate. M. Cabany, as he has abundantly proved in whatsoever relates to 'Moreduin,' has audacity enough and to spare for most things; but even *he*, I imagine, will not have the face to assert that Sir Walter's gift to myself was made in contemplation of an event that happened two years after I received it,—or was meant to be merely a deposit in my hands in favour of the creditors of Messrs. Constable & Co.

"GEORGE HUNTLY GORDON."

A collection of National Antiquities, discovered chiefly in London during the last fifteen years, and gathered by Mr. Chaffers, is announced for sale next week.

A meeting of the Newton Statue Committee was held a few days ago, in the rooms of the Royal Society. The Earl of Harrowby presided. It appears that if Government will give the quantity of metal necessary for the statue, the subscriptions amount to within 200*l.* of the required sum for the execution of the work. It has been determined

that the memorial shall be a bronze statue, to be erected in Grantham, upon the site given for that purpose by the Town Council,—and that any sum of money beyond what the joint Committees consider sufficient for the completion of the monument shall be appropriated to the furtherance of science, in such manner as may be deemed advisable.

Mr. Westwood asserts the originality of his 'Butterflies'; and maintains the accuracy of our description of his book:—

"I am much obliged to Mr. Bladen for his good opinion of my merits as an entomological author [*ante*, p. 647], but I regret that he did not take the trouble to compare my 'British Butterflies and their Transformations' with my recently published 'Butterflies of Great Britain,' instead of giving a second-hand mis-statement that the latter is 'merely a re-issue' of the former work. The former work, of which several editions have appeared, was first published in 1841. It is in quarto, and contains forty-two plates, drawn by Mr. Humphries, representing all the reputed as well as ascertained indigenous species; the latter work is in octavo, and contains twenty plates of original figures drawn by myself, representing only the well-ascertained species. The descriptive text is confined to the latter, but has been revised throughout and brought up to the present state of the science,—which has undergone great modifications during the past fifteen years. The latter work, moreover, contains an Elementary Introduction of thirty-six pages, not in the quarto work, with two plates of original dissections and details.

"I am, &c.

J. O. WESTWOOD."

"Hammersmith, June 6."

A few paragraphs of German literary gossip may be strung together.—The first volume of the 'Geschichte des neunzehnten Jahrhunderts seit den Wiener Verträgen,' by Prof. Gervinus, (the Introduction to which appeared two years ago, and involved its author at the time in a political lawsuit of some celebrity) has just been published. Regarding one of the first consequences of this publication, the *Cologne Gazette* gives a whimsical anecdote, on the authority of a Berlin Correspondent. It seems that Prof. Gervinus has stated that the Princess de Dino had been seen, once on a time, like the Lady of *Lochinvar*, on horseback with a Cossack. On this the Duchess has moved H.M. of Prussia to prohibit the wicked history which recorded a scandal so calumnious. But Prussia, though peremptory enough sometimes in the article of literary censorship, this time will not interfere; and the Princess is now about to bring the charge of "defamation" into the courts of justice, whether wisely or not let wiser ones decide.—On the 24th of May Dr. Kelle of Regensburg delivered, in the Berlin Society for German language and literature, a lecture on the old German poet Otfried, a new edition of whose 'Evangelienbuch,' founded on the manuscripts, (one of them, we believe, in the Bodleian Library) he has been preparing for some years. The lecturer connected the very scanty reports of Otfried's life; and, supporting his views by indications in the poem itself and by the three dedications to the same, he went on to denote the years 867–868, as the time of its origin.—A curious monument was erected last winter to the Swedish poet Tegnér. The students of Lund moulded a gigantic figure out of snow, which they were pleased to call an effigy of their beloved bard, and which, according to the latest reports, is still standing most majestically in the Square before the University, in spite of the sunshine.

A new journal—printed in Russian—with a title, ПОЛЯРНАЯ ЗВѢЗДА ('The Polar Star')—which is itself a tradition and a power—is about to appear in London. Official Russia, say the re-founders of this organ, has alone the right of speech in the vast regions lying between the Caspian and the White Seas: the administration alone explains, counsels and commands. It is necessary that the People have a voice. Releiff and Bestoujeff—names ever dear to the enlightened Muscovite—were the editors and writers of a periodical called 'The Polar Star'; a work variously and eloquently written, and addressed to whatever then existed of free thought and generous aspiration in that huge empire. Nicholas blotted out the light; but Nicholas has passed away, and the 'Star' is now to re-appear under the care of M. Alexander Herzen, and other Muscovites less known, perhaps, to the English reader. The first volume is announced to appear this summer.

The love of literature which distinguished the

youth of Lord Strangford—whose death, at the age of seventy-four, has been announced in the daily papers—was a solace and delight to him at the close of his active life. After a long diplomatic career, passed in distant and widely-separated lands, the evening of his days found occupation in critical and historical inquiries. For the last few years he was well known to every one familiar with London as a constant visitor to the Reading-Room of the British Museum and the State Paper Office. The readers of *Notes and Queries* have recognized his frequent communications to its pages, generally signed with his initials; and until very lately he was always seen at the Thursday Evening Meetings of the Society of Antiquaries. During the recent changes in that Society he held for a short period the office of Director, and was more recently appointed a Vice-President, but his rapidly failing health prevented his taking his seat. He was always present, also, at the meetings of the Council of the Camden Society. His latest subject of inquiry has been the biography of his ancestor Endymion Porter,—for which he made large and very curious collections, with the intention to write his life. It is a loss to our literature that Lord Strangford did not live to carry out his design. The mass of letters and documents which he had transcribed would of themselves form a valuable publication for such a society as the Camden, to which, before he contemplated writing a biography, he intended to offer them. Some of the pieces in his volume from Camoens enjoyed in their day a great popularity,—‘Just like Love is yonder rose’ was, we believe, one of them. In the presence of the yet unburied body of the gentle, courtly, pleasant nobleman, with a smile and a kind word and a heartily-offered hand for every one,—such as he has been seen and known amongst us up even to within a few days—the harsh notice of him in ‘English Bards and Scotch Reviewers’ can only inspire regret.

The name of Camoens having thus come up accidentally, this may be the place for stating that Time’s revenges have reached the Portuguese poet, among other of the sons of song, who have Lived forgotten and died forlorn.

—The dust of the minstrel of the ‘Lusiad,’ who, in 1595, perished in a hospital, as every child familiar with ‘Anecdotes of the Poets’ knows, has lately been sought for in the church of the ancient Convent of St. Anne, of Lisbon, beneath the high altar of which it was reputed to be deposited sixteen years after his decease, in a brick cenotaph, by Don Gonçalo Continho; and on its being found, a solemn service was performed, on the 15th of May, in the presence of many high and noble persons. The remains were placed in a rich coffin, and confided anew to the keeping of the nuns of St. Anne till the monument, which will be prepared for their reception, can be completed.

The death of Thomas Gaisford, one of the best Grecians of the English school, is announced. Gaisford was a Doctor of Divinity, Dean of Christchurch, and Regius Professor of Greek. Mr. Percival, when Prime Minister, incurred much censure for his appointment to the chair of Greek,—there being at that time no cry for “the right man in the right place.” His services to literature have been considerable; and his reputation, as is too often the case, was far greater on the Continent than it was in England. The recondite nature of his labours prevented his merits being appreciated by the public at large. His edition of ‘Herodotus,’ published in 1840, and his ‘Lectiones Platonice,’ his earliest work, published in 1820, are almost his only contributions to popular classical literature. The great labours of his life—his ‘Suidas,’ published in 1834; his ‘Etymologicum Magnum,’ published in 1848; and his ‘Theodoret,’ published in 1854—are of an order which even scholars do not always to the full appreciate. Dr. Gaisford was educated at Westminster, and afterwards at Christ Church. He was in the seventy-fifth year of his life when he died.

The following note of appeal, with a printed enclosure, has reached our hands:—

“The publishers of Dr. Edersheim’s translation of Chalybæus’s Philosophy beg respectfully to enclose a criticism of

Dr. Chalybæus on the translation, which bears upon its faithfulness,—which was questioned in the review of the work some time ago in the *Athenæum*. They would suggest that some notice of this should be taken, as Dr. Chalybæus is surely best fitted to judge of the sense which his words convey.—Edinburgh, June 4.”

—The notes by Dr. Chalybæus which accompany this appeal—though brief, friendly, and courteous—impeach the translation even more than we did ourselves; though the Lecturer also asserts that Dr. Edersheim’s translation of his work appears to him better than another which he names.

ROYAL ACADEMY OF ARTS, Trafalgar Square.—The EXHIBITION OF THE ROYAL ACADEMY IS NOW OPEN.—Admission (from Eight to Seven o’clock), 1s.; Catalogue, 1s. JOHN PRESCOTT KNIGHT, R.A. Secretary.

SOCIETY OF PAINTERS IN WATER-COLOURS.—The FIFTY-FIRST ANNUAL EXHIBITION IS NOW OPEN, at their Gallery, 5, Pall Mall East, close to Trafalgar Square.—Admittance, 1s.; Catalogue, 6d. JOSEPH J. JENKINS, Secretary.

THE NEW SOCIETY OF PAINTERS IN WATER COLOURS.—The TWENTY-FIRST ANNUAL EXHIBITION of this Society IS NOW OPEN, at their Gallery, 53, Pall Mall, near St. James’s Palace, daily, from 9 till dusk.—Admission, 1s.; Season Ticket, 5s. JAMES FAHEY, Secretary.

BRITISH INSTITUTION, Mall Pall.—The Gallery, with a COLLECTION OF PICTURES BY ANCIENT MASTERS and deceased BRITISH ARTISTS, IS OPEN DAILY, from Ten to Six.—Admission, 1s.; Catalogue, 6d. GEORGE NICOL, Secretary.

THE SECOND ANNUAL EXHIBITION OF THE FRENCH SCHOOL OF THE FINE ARTS IS NOW OPEN daily, from 10 to 6 o’clock, at the Gallery, 121, Pall Mall, opposite the Opera Colonnade.—Admission, 1s.; Catalogue, 6d.

WIDOWS AND ORPHANS OF BRITISH OFFICERS who fell in the WAR with RUSSIA.—The EXHIBITION OF THE ROYAL DRAWINGS and upwards of 1,200 Works of Art, by Amateurs and others, in aid of the Fund for the relief of these most interesting objects of their country’s sympathy, IS NOW OPEN at BURLINGTON HOUSE, Piccadilly.—Admittance, 1s.—All the Works are for Sale.

THE CHALON EXHIBITION, SOCIETY OF ARTS.—This Collection of the Paintings, Drawings, and Sketches of the late JOHN CHALON, Esq., R.A., with a selection from the Works of ALFRED E. CHALON, Esq., R.A., IS NOW OPEN, at the Society’s House, Adelphi.—Admission, 1s.

PHOTOGRAPHIC EXHIBITION.—An Exhibition of the finest English, French and Italian Photographs IS NOW OPEN at the PHOTOGRAPHIC INSTITUTION, 165, New Bond Street.—Open from 10 to 5.—Admission, with Catalogue, 1s.

THE BATTLE OF THE ALMA—NOW OPEN, from 10 until 6, at the Egyptian Hall, Piccadilly, the GREAT PICTURE of this important Military Event, Painted by Mr. COOMANS, from studies made during four months spent in the Crimea during the present war. Admission, 1s.

MARTIN’S PICTURES.—Again on View.—In consequence of many thousand persons having been unable to view the three sublime Pictures—‘THE LAST JUDGMENT,’ ‘THE GREAT DAY OF HIS WRATH,’ and ‘THE PLAINS OF HEAVEN’—during the late Exhibition, Leggatt, Hayward & Leggatt have RE-OPENED it for a few days.—Hall of Commerce, 52, Threadneedle Street.—Admission 6d. each person.

ROYAL GALLERY OF ILLUSTRATION, 14, Regent Street.—Additional Pictures.—English Mortar Battery, the Redan and Rifle Pits, General Pelissier’s Night Attack, and Mr. Fergusson’s New System of Fortification are now added to the Diorama, ‘The Events of the War.’ The Lecture by Mr. Stoeckel. Daily at 3 and 8.—Admission, 1s., 2s., and 3s.

SIEGE OF SEVASTOPOL.—GREAT GLOBE.—All the New Approaches and Siege Works are placed on the MODEL of SEVASTOPOL, including Inkermann, Balaklava, and the Tchernaya, at the GREAT GLOBE, Leicester Square. B.A.D.I.C. also a large Model of the Baltic Sea and Cronstadt. Open from 10 A.M. to 10 P.M. Admission, 1s. to the whole building, Children and Schools, Half-price. A large Collection of Russian Trophies from Bomarsund, &c.

Dr. KAHN’S MUSEUM, 4, Coventry Street, Leicester Square.—Open (for gentlemen only) daily, from half past 11 till 5, and from 7 till 10. A new Series of Lectures by Dr. Sexton, F.R.G.S. &c., at 12, 2, 4, and half-past 7 in the evening. Admission 1s. A new Catalogue, containing Lectures on the most interesting branches of Physiology, by Dr. Kahn, illustrated. Price 6d.

LONDON SEASON by DAY.—On Saturday next, at 3 o’clock, Mr. LOVE will present, for the first time, his NEW ENTERTAINMENT, called ‘THE LONDON SEASON by DAY.’—LOVE’S ENTERTAINMENTS.—VENTRILOQUISM EXTRAORDINARY.—REGENT GALLERY, 69, Quadrant, Regent Street.—Mr. Love will appear every Evening at 8, except Saturday; Saturday at 3.—Monday and Tuesday Evenings at 8, and on Saturday Morning at 3. Mr. Love, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, called ‘THE LONDON SEASON by DAY,’ on Wednesday, Thursday, and Friday, the Entertainment, LOVE IN ALL SHAPES, to be followed by a ZOOLOGICAL CONCERT, and LOVE’S LABOUR’S LOST.—Pianoforte, Miss Julia Warman.—Stalls, 3s.; Area, 2s.; Gallery, 1s.

SCIENTIFIC

SOCIETIES.

ARCHÆOLOGICAL INSTITUTE.—April 13.—The Hon. R. C. Neville in the chair.—Mr. Hylton Longstaffe read a ‘Memoir on the Church of Norton-shire, an Early Possession of the Church of Durham.’—A communication was read from Mr. Shurlock, of Chertsey, concerning the large discovery of pavement tiles not long since made on the site of the Abbey Church.—A paper read by Mr. Blaauw described a Roman building and bath dis-

covered not far from Petersfield.—The Hon. R. Neville contributed particulars concerning other Roman remains and relics discovered at Fakeley, in Essex.—Mr. Hawkins called attention to the “treasure trove,” at Lewes, of fifty gold coins, of Charles the Second and James the Second, the other day brought to light by an axe which split a chopping-block.—Drawings, relics and antiquities were exhibited by the Revs. J. Maughan and S. Banks,—by Messrs. Yates, Westwood, Neville, Franks and Bernhard Smith.—The annual meeting is fixed for Shrewsbury, to take place in the week commencing the 6th of August.

NUMISMATIC.—May 24.—Dr. Lee, LL.D., in the chair.—Mr. Evans read a paper ‘On some rare and unpublished British Coins.’ Among these were specimens of those which have the legends of COMMOS, TIN, TINC, &c. on their reverses. Mr. Evans conjectures that these represent the Latinized form of the name of the British Prince who struck them. Other coins of the same class exist which read on the obverse COM. F., and on the reverse TIN. This would seem to refer to a son of the former ruler.—Mr. Vaux read a paper ‘On some curious Coins lately acquired by the British Museum.’ Among these were some rare and unpublished specimens of Apodacus and Kamnascires, kings, it is believed, of Characene, and of Molon, satrap of Media; for the former, the national collection is indebted to Mr. Olguin; for the latter, to Col. Rawlinson. Mr. Vaux observed, that the coin of Kamnascires had been originally read by Col. Leake Kapnascires; but a careful examination of the two specimens clearly showed that the third letter was an M, and not a P. Mr. Vaux also noticed some new types of the class now called Sub-Parthian.—Mr. Pfister exhibited a fine medal of Erasmus, made by the celebrated artist Quintin Matsys; and stated a fact, not generally known, that the same artist made the tomb of Edward the Fourth, now in St. George’s Chapel, Windsor.

SOCIETY OF ARTS.—May 30.—The Rev. Dr. Booth in the chair.—The paper read was, ‘On Earth-boring Machinery,’ by Mr. Colin Mather.

INSTITUTE OF ACTUARIES.—May 28.—E. J. Farren, Esq., V.P., in the chair.—‘On the Analogy existing between the Aggregate Effects of the Operations of the Human Will, and the Results commonly attributed to Chance,’ by Dr. Guy. The author commenced his essay by quoting the well-known sentiment of M. Quetelet:—“It must be confessed that, distressing as the truth at first appears, if we submit to a well-followed-out series of observations the physical world and the social system, it would be difficult to decide in respect to which of the two the acting causes produce their effects with most regularity.” Though he (Dr. Guy) admitted the justice of the sentiment, he did not participate in the feeling of distress which M. Quetelet expresses. He was quite prepared to find that the reproduction, year by year, of nearly the same figures, or the ultimate expressions of the working of the will in a number of persons, bore considerable analogy to the figures which embody the proportionate annual number of births and deaths in the same country, or the annual success of some gambling speculation. He thought that the numbers which express the aggregate or ultimate results of the conjoint operation of a number of causes of variable and inappreciable intensity might be expected to present many analogies and coincidences, though the causes were ever so different in their nature, and though the events or actions in which they issue were termed physical in one case and moral in another. The author went on to observe that writers on the Doctrine of Probabilities had taken the analogy between the results ordinarily attributed to chance, and results brought about by physical or moral causes, too much for granted, and that it was time that the assumption should be put to the test of experiment. The author then proceeded to describe the experiments which he had performed. He abstracted from the books of King’s College Hospital the attendances of men and women, by groups of five-and-twenty, up to one thousand facts, and also the

proportion of cases of pulmonary consumption to cases of all other diseases up to five thousand facts. Then, assuming that the proportions for the thousand and five thousand facts respectively were the true proportions, he proceeded to substitute balls of different colours for the men and women, and for the cases of consumption and of other diseases. These balls he drew out, blindfold, from a bag by five-and-twenty at a time, until all of them were drawn out, and noted down the results. These results, embodied in several tables, were placed side by side with the figures obtained from the Hospital books; and showed a degree of resemblance which, in the opinion of the author, fully justified the theory which had given rise to his experiments.

MEETINGS FOR THE ENSUING WEEK.

- MON. Geographical, 8½.—'Journey to Hurmur and the Somali Coast, Eastern Africa,' by Lieut. Burton.—'On the Meteoric Iron of Atacama, and the Coal Formation of Concepcion, in Chili,' by Mr. Bollart.—'Exploration of the Desert of Atacama,' by Dr. Philippi.—'Observations on the Province of Tarapacá, South Peru,' by Don Fuente.—'Observations on the Geography of Peru,' by Don Lelansna.
- TUES. Syro-Egyptian, 7½.—'On the Origin of the Cuneiform Character,' by Mr. Abington.—'Critical Examination of the Original Hebrew Text referring to the Exodus,' by Dr. Reisch.—'The Natron Monasteries in Egypt,' by Mr. Wrasall.
- Zoological, 9.—Scientific.
- WED. Royal Society of Literature, 4½.
- Society of Arts, 8.—General Meeting.
- Geological, 8.—'On Remains of Dryonodon from South Africa,' and 'On a Fossil Sirenomia Mammal from Jamaica,' by Prof. Owen.—'On the Brown Clay Formation of Germany,' by Prof. Beyricke.—'On the Section of the Metamorphic and Devonian Rocks at the Eastern End of the Grampians,' by Prof. Nicol.—'On the Occurrence of Fossil and Driftwood in the Arctic Regions,' by Sir R. I. Murchison.—'On the Raised Beaches of Loch Gilthead,' by Commander E. J. Bedford.—'On Sandw Granite,' by Mr. Fox.—'On the Red Soil of India,' by Dr. Gilchrist.—'On the Omret and other Coal-fields of Central India,' by the Rev. Messrs. Hislop and Hunter.—'Notes on the Earthquakes at Brussa,' by M. Consul Sanderson.
- British Archaeological, 8½.—'On Canterbury in the Olden Time,' by Mr. Brent.—'On Egyptian Glass,' by Mr. Petrie.—'On Holy Trinity Church, Aylesford,' by Mr. Pretty.
- THURS. Society of Antiquaries, 8.
- Royal, 8½.
- FRI. Royal Institution, 8½.—'On the Results of the Excavations in Assyria and Babylonia,' by Col. Rawlinson.
- SAT. Asiatic, 2.

FINE ARTS

EXHIBITION OF GERMAN ART.

THE third annual Exhibition of the Works of Modern German Artists is now open in Bond Street. It is a small collection of one hundred paintings, chiefly domestic scenes or landscapes, with the exception of an historical work of great merit and one battle-scene, with the usual amount of scarlet and smoke. The genre pictures are clever and thoughtful, and the still life, in its own limited way, is truthful.

The Departure of Christopher Columbus from Spain (No. 94), by Herr Leutze, is one of the best pictures in this Exhibition; it is broad and pure in colour, neither lurid nor foggy, well composed, and full of unostentatious calm earnestness. The vessel's anchor is lifting,—the boat of friends is about to turn to the shore,—a fair-haired woman and a yellow-cheeked crone are weeping for one with whom they have parted,—a priest in a rich gold-netted cope is pronouncing his benediction; fear, terror, and anxiety are in every face. The very sailors pull unwillingly at the ropes. A page sheds tears, and casts himself down to kiss the voyager's hand; but Columbus, intent on the one aim of his life, turns towards the west, seeing already, with the eye of faith, the promised land. His figure towers above all, and stands out dark against a calm evening sky,—while a light still rests on the distant height of Rabida, with its convent. The face of Columbus is well retained, and the costume is thoroughly correct, with the square cape and loose draperies. The detail is admirably conceived. The priests have been administering the sacrament—the pilot is putting up the charters. The faces are not Spanish; but the sea is blue and fresh, and the colour throughout is bright and well contrasted. This is a fine scene for a painter, and Herr Leutze has not been slow in using his opportunity.

Mr. Camphausen has a clever picture—*Cavaliers and Roundheads, a Scene from the Civil War* (80). The scene is a quiet English country church, now turned into the barrack of some plunderers in buff and bandoleer. Two troopers' horses feed out of

the font. The camp-fire blazes on the altar-steps, and a church coffer and other plunder lie scattered about. At the foot of a pillar sits a Cavalier gentleman, bare headed, as if his morion had been struck off in a struggle. His hands are tied behind him. His daughter sits beside him on one hand, and his son on the other. Both are scowling with mingled rage and despair. A handsome Puritan officer, with plain dress and plain steeple hat, stays to guard them; and his companion in the distance points sneering to the prisoners.

Mr. R. Jordan's *Wedding Scene in Marken Island, Zuider Zee* (89), is a clever scene of rustic life—with no humour, but much truth. A handsome young Dutch boor, a sturdy lad in full dark Flemish hose, is presenting his buxom long-haired bride to his father and mother. The latter looks on approvingly; the former, with wrinkled eye and laughing mouth, is joking him about the responsibilities of the married state. In the distance is a dance, and the very children are joining in the mirth. The details of the cottage are well selected, and the expressions on the faces carefully discriminated. The scene reminds us of some of Irving's Dutch interiors, or of Longfellow's marriage of Evangeline. Wilkie would have dwelt more on the faces—Orstand on the tone—Teniers on the touch—Rembrandt on the light and shade—our modern Pre-Raphaelites on the detail; but without any of these excellencies, this is a nice picture:—manly without being coarse, and true without being vulgar.

Mr. Siegert is as fond of picturesque cavalier scenes as Wouvermans. All he does has a soldierly frankness about it; but wants a dash of handling to equal the hurry and vigour of the thought. His subjects are the *Trumpeter's Family* (84), *Soldiers selling their Booty* (86), and *Soldiers gambling for their Booty* (92). His dresses are generally those of the thirty years' war. The Germans like stories of wild student and soldier life, because they are a quiet people and want strong stimulants. For the same reason our English tragedies indulge more in bloodshed than those of other nations, and are fuller of horrid situations. In one scene a long-haired desperado, gay with scarf and buff belt, is watching an eager-eyed, keen, grey-haired usurer, who, by the help of glasses, is examining an ivory cup which the soldier is offering for sale. Behind are women handling some jewels and making them glisten and twinkle in the light:—a boy on the floor and a huge open book complete the scene. In another picture some soldiers are seated at the table of a château, dicing for a chestful of plunder that lies at their feet. One of the men has just thrown short, and looks vexed and surprised at his ill fortune. His companion, a merry fellow, with ruddy cheek, and a full row of white teeth, is flinging himself back and laughing at his fellow's fate. A page in the background is filling up wine from a cask which stands on two chairs.

Herr Vautier excels in touches of character; but his painting wants life and firmness, and a little more air and colour. His *Fair at Hessa* (39) is full of quiet fun. We have seldom seen anything better than the spectacled, mystical quack holding forth his nostrums,—while a fat, overdressed woman in a cap, but no bonnet, toils away at a drum, and the rustic laughs with stupid cunning at his fair speeches. Not inferior is the *Prédicament* (44)—*Viel Verachtet und Nichts in der Tasche*.—The dinner has been eaten, and the reckoning has come; but the young Gil-Blas guest has no effects. There is excellent humour in the quaint, vivacious landlord, who is summing up the items silently on his fingers. The inn is picturesque and full of odd nooks. The face of the perplexed guest is not equal to that of the landlord.

There is great merit in Herr Erdmann's *Holiday-making in Westphalia* (28). It is brimfull of rustic poetry; and the peasants, though idealized, are not theatrical. On the loaded wain ride the damsels, with the flowing trophies, and emblems of harvest. Before them stride the old reapers, and by the side run the younger villagers, ogling and dancing. The composition is good and varied; and there is much life and animation in the whole.

Herr Zwecker's *Battle of Antioch* (74), though it has no particular purpose in it, is bright and pleas-

ing in colour, and displays much taste and novelty in the use of costume. The plain is alive with a scud of horsemen, blown about like a flock of crows in a windy day,—yet connected by a feeling of unity.

With the same merit of picturesque motion, though dull and heavy in colour, is Herr Hünter's *Prussian Baggage-wagon attacked by a Band of Robbers* (79). This is a spirited sweep of horsemen (sabres flashing through dust) upon a wagon, the drivers of which are either resisting or being cut down almost before they are aware of the attack.

Herr Norten's *Battle of Waterloo—Charge of the Old Guard* (14), though an ambitious picture, is not much to our taste. He has taken the moment when the second column of the red-feathered Imperial Guard are attacked by the Guards and Adams's brigade, who have already driven back the first column. The stern, sunburnt men are staggering on through fire and hail, while an artilleryman is firing a cannon full on their front, though a Frenchman is aiming at him a moment too late. We have plenty of smoke and much invention, but no steadiness of working out.

Herr Schlesinger's cottage figures are always pleasing, as in *Grandpapa's Pet* (7), where the child's expression is quite original.

Herr Printze's *Still Life* (93) is wonderful; and the silvery jet of bubbles froth up in his champagne-glass just as well as they did last year.—Herr Freyer shows much clever painting in his *Fruit* (20), though it has not the luscious glow of that from Mr. Lance's garden.

The landscapes are still inferior;—at least, the foam is wool,—the water horn,—the atmosphere an unfavourable November,—the trees not made out, and very opaque,—the soil a confused mass of dirt and scratches. Nothing can be worse than the waves in Herr Hünter's *Shipwreck off the Coast of Madeira* (1).—The Norwegian scenes of Herr Leu, Herr Jacobson, and Herr Bodom are interesting, from the novelty of the scenery, so wild and grand, and yet formed of such simple materials, cliff, lake and torrent.

The subjects are many, all taken from places seldom visited by our artists, and for that alone deserve a notice. The effects are often poetical,—the execution timid and insincere.

Among others, we would notice Herr Flamm's *Evening on the Coast of Sicily* (11),—and *Coast of Capri* (15),—*Thunderstorm on the Campagna* (18), by Herr Achenbach.—Herr Burnier's *Landscape after a Shower* (29) is still so muddy and dark that what it was before the shower we may not imagine. Herr Steinecke's *Scene in the Black Forest* (35) and Herr Adloff's *Sunset at Düsseldorf* (40) have commendable points; but both artists seem to paint in a receiver, with exhausted air.—Herr Achenbach, besides the scenes we have mentioned, has *Sunset in Ostend Harbour* (54),—*Altar at Bodendorf* (58),—and *Moonlight in a Dutch Canal* (60). These landscapes certainly make us turn with delight to the fresh, pure nature of our own modern painters, who depict May and not November, and are neither smoky, muddy, nor dreamily lurid. In figure pieces, our domestic painters may learn much from Schlesinger's subtlety and truth.

FINE-ART GOSSIP.—Mr. Ruskin has issued a sixpenny pamphlet of remarks on the principal pictures in the Royal Academy, and is bitter enough in his criticisms on Sir C. Eastlake, and Messrs. Herbert and Maclise. He styles Mr. Creswick careless, Mr. Stanfield wanting in atmosphere, and Mr. Witherington and Mr. Redgrave full of industrious but erroneous detail. We extract his remarks on Mr. Millais's picture, as valuable from such an observer.—

"Various small cavils have been made at it, chiefly by conventionalists, who never ask how the thing is, but fancy for themselves how it ought to be. I have heard it said, for instance, that the fireman's arm should not have looked so black in the red light. If people would only try the experiment, they would find that near black, compared with other colours, is always black. Coals do not look red in a fire, but where they are red hot. In fact, the contrast between any dark colour and a light one, is always nearly the same, however high we raise the light that falls on both. Paul Veronese often paints local colour darker in the lights

than in the shadow, generally equal in both. The glow that is mixed with the blackness is here intensely strong; but, justly, does not destroy the nature of the blackness."

—Mr. Roberts's work this pungent critic calls a great architectural diagram, worked out in brick-red and green-grey. His farewell to Mr. Roberts is very bitter, and reminds us of Piron's epitaph, written for his own tomb after being rejected by the French Academy:—

Ci git rien—
Pas même un Académicien.—

"Mr. Roberts was once in the habit of painting carefully-finished cabinet pictures, which were well composed (in the common sense), and fairly executed in the details. Had he continued these, painting more and more, instead of less and less from Nature, he might by this time have been a serviceable painter. Is it altogether too late to warn him that he is fast becoming nothing more than an Academician?"

—Mr. Maclise's picture Mr. Ruskin praises for keen truth, fine touch and anatomical knowledge, but denies it every other merit. The Duke, he thinks vulgar,—Charles, a monster,—Rosalind, impudent, and Orlando operatic and sentimental. He ends by accusing Mr. Maclise of being unable to draw certain gold ornaments in a foreshortened position. As an illustration of the passively bad in opposition to the actively bad, the critic adduces Mr. Herbert's 'Lear and Cordelia.' The latter head he calls "a profile of firewood painted buff with a white spot in the corner of the eye." The following is his conclusive valediction.—

"It is, nevertheless, a fact that, although from some peculiar idiosyncrasy not comprehending the passage in 'King Lear,' Mr. Herbert has feeling; and if he would limit his work to subjects of the more symbolic and quietly religious class, which truly move him, and would consider himself by no means a great master, but a very incipient student, and paint everything from the fact and life faithfully, he would be able to produce works of some value."

—His remaining praise and blame is thus distributed:—Miss Mutrie's texture, Mr. Phillips's decision of touch, Mr. Hook's feeling, Mr. Lewis's detail and truth, Mr. Jutsum's drawing, Mr. Faed's sentiment, Mr. Knight's care, Mr. Inchbold's finish, are eulogized; not to forget Mr. Frith's realization, the beauty of Mr. Solomon's faces, Mr. Collins's care and Mr. Barwell's sentiment. Then comes a black list, of Mr. Boxall's vapourishness, Mr. Richmond's fogginess, Sir C. Eastlake's insipidity, Mr. Faed's spottiness, Mr. Stanfield's conventionalism, Mr. Dyce's false colour, Mr. Cope's negativness, Mr. Huggins's incompleteness, Mr. Leighton's want of care, and Mr. Dearle's mossiness. Mr. Egg, Mr. Ruskin praises, as giving a story worth telling; with vigorous painting; but objects that vice is here made unnecessarily repulsive, and that such companions could not have entertained a man of Buckingham's wit or breeding. To this the answer is easy. Buckingham did associate with such people.

Signor Monti delivered his second Lecture on Art, at his Studio in Great Marlborough Street, on Wednesday. Having last week discussed the symbolism of the reason, as displayed in the sculpture of Egypt, Assyria and Persia, he proceeded on this occasion to discuss the symbolism of the imagination, as shown in the works of India, Mexico and Greece,—in the rude images of Peru, and the more refined, but less feeling, sculpture of the Mexican race. The lecturer apologized for the warmth of his enthusiasm on these rude works, but confessed that he looked on them from a sculptor's point of view, and was deeply impressed with their inherent vitality. He then proceeded to describe the Sculpture of Early Greece, beginning with those hieratic types, which were evidently copies of wooden idols, whose gilded wings, constrained attitudes and starched smiles were tediously repeated from statue to statue. By various drawings of existing relics Signor Monti explained the gradual relaxing of the convention and the introduction of anatomical detail, till in the Temple of Egina they found wonderful power and truth, fettered by a few remains of the old symbolism, though the attitudes were free and natural.

An artist writes on the vexed subject of the Academy Catalogue:—

"As you have published a letter in defence of the careless and capricious editorship of the Royal Academy Catalogue, a subject I was very glad to see noticed in your columns the other day, perhaps you will allow me to reply to it. Your Correspondent, who, from his initials, 'T. V.,' is,

I suppose, the clerk of the Academy, states, first, his conviction that no existing institution in the world could 'render so good an account of its stewardship' as the one to which he belongs. Though this has nothing to do with the question, it certainly may be very true; and nobody, perhaps, has better opportunities of knowing than Mr. 'T. V.:' but at the same time he must remember that, as the Academy have constantly refused to render any account of their stewardship at all, the country is not in an equally good position as himself for judging their conduct in this respect. He then announces that it has hitherto 'been the policy of the body to maintain at all times a reserve, and to allow charges to be multiplied and to pass current, rather than disabuse the public mind by an explanation and justification.' It appears that the Academy now thinks 'this policy may well be questioned,' and, therefore, deposes its clerk to attempt 'an explanation and justification.' They will be disappointed, I fear, with Mr. 'T. V.'s' championship; and, at all events, the public, or that portion of it that takes any interest in the matter, will not fail to perceive that he has not pointed his guns very accurately against his opponents' works, or words. The same policy which dictated an affectation of contempt towards the public has, no doubt, induced the Academy, in the present instance, to substitute for the pen of their secretary that of their clerk. It would have been carrying out the said policy in a more masterly manner, to have had the letter signed P. R. A.—Porter to the Academy,—or O. H.—One of the Housemaids. But, perhaps, the great reason for choosing Mr. 'T. V.' was, that as it was he—as he tells us—who prepared the Catalogue, it was thought his letter itself would prove, in a convincing manner, his qualifications for this duty. When he pathetically says that his 'present object in writing' is to beg you 'to consider for a moment the difficulties to contend with in the production of the Catalogue,' he seems to forget that however ignorant you may be—as he declares you are—of facts connected with the administration of the Academy,—ignorance which, perhaps, he may see their 'habitual reserve' in some degree accounts for,—he seems to forget, I say, that it is not very likely you are equally unacquainted with the existence of such things as illegible manuscript and careless compositors. For, with the exception of his reason No. 1, that the artists themselves make mistakes in their letters, all he has got to say in his defence is, that some of the painters write very badly, omit to sign their names, and, like little schoolboys, blot their copies. He seems quite to forget that the charge was not so much against the reader for Messrs. Clowes & Sons' printing-office, as against himself in his editorial capacity. What was asserted by your former Correspondents was, that the artists were the proper people to describe their own paintings; that though we are much obliged to the Royal Academy when they condescend to let us take part in their show, we like to be our own showmen. We have the presumption to think that we know as well as any one else what we mean our pictures to represent, and actually feel indignant when we have written under one of them 'this is a lion,' that Mr. 'T. V.' should change it into 'this is an ass.' We were complaining not so much about misprints—though some of us are of so 'grumbling and discontented' a nature as to feel these annoying—but we were entreating the Academy—not to be 'more perfect' themselves, which we admit is impossible—but merely that they would not, without consulting us, cut and carve our humble productions in pen and ink to suit their own more perfect conceptions. Mr. 'T. V.' is, no doubt, a man of excellent taste; but I am sure we should have been better pleased, and have thought it a more becoming speech, if, instead of saying that 'there must always be mistakes,' and wishing, as he funnily expresses himself, 'that your remarks had been tempered with less asperity,' he had finished his letter by saying, that he was sorry for his past blunders, and, taking your hints in good part, would be more careful in future. I am, &c. W. X."

Mr. Sutcliffe, a Leeds artist, has written to us a very long letter, repudiating, on behalf of himself and his fellow artists of that town, all share in the responsibility of the recent Exhibition failure,—and the consequent breach of an understood agreement with those artists at a distance who were induced to send their pictures. The letter of our Correspondent is too long for insertion; and probably his purpose will be served by our record of his protest.

MUSIC AND THE DRAMA

MUSICAL UNION.—H.R.H. PRINCE ALBERT, Patron.—TUESDAY, June 12, half-past Three.—WILLIS'S ROOMS.—Quartet, in C. Mozart; Grand Trio, B flat, Op. 97, Beethoven; Andante and Scherzo (Posth. Quartet), in E, Op. 81, Mendelssohn; Moreaux, Violin et Piano; Solos, Pianoforte. Artists: Ernst, Cooper, Hall, and Firth. Pianist, Hall.—Visitors' Tickets, to be had of Cramer & Co.; Chappell & Olliver, Bond Street.

N.B.—The Sixth and Seventh Matinees take place on June 19th and 26th.

SACRED HARMONIC SOCIETY, Exeter Hall.—Conductor, Mr. COSTA.—ON FRIDAY NEXT, June 15, final performance of Mendelssohn's 'ELIJAH.' Vocalists: Madame Clara Novello, Miss Dolby, Mrs. Lockey, Mr. Lockey, Mr. J. A. Novello, and Herr Formes. The orchestra, the most extensive available in Exeter Hall, will consist of nearly 700 Performers.—Tickets, 3s., 5s., and 10s. 6d. each, may be secured by immediate application at the Society's sole Office, 6 Room, within Exeter Hall.

MIDDLE JENNY NEY, Mdlle. Rudersdorff, Miss Amy Dolby, Mr. Sims Reeves, Signor Belletti, M. Saluton, Mr. Alfred Mellon, and Mr. Benedict, will appear at MRS. DOBBS'S and Mr. LINDSAY SLOPER'S ANNUAL GRAND ORCHESTRAL CONCERT, at St. Martin's Hall, on WEDNESDAY EVENING, June 13.—Tickets, 15s., 10s. 6d., 5s., and 2s. 6d.

MADAME BASSANO and HERR WILHELM KUIHE'S ANNUAL GRAND MORNING CONCERT, will take place at the HANOVER SQUARE ROOMS, on MONDAY, June 11, to commence at Two o'clock, when they will be assisted by Mesdames Clara Novello, Gassier, Weiss, Stalbach, Teresa Bassano, Krall, and Madame Bassano; Messrs. Reichardt, Formes, Weiss, Gasser, Ernst, Laque, John Thomas, Wilhelm Kuhn; Conductors: Messrs. Galmick, Lehmeier, Beryer, and Kuhn; Tickets, 10s. 6d., Stalls, 15s., to be had of all principal Music-sellers; at Madame Bassano's, 24, Clifton Road, St. John's Wood; and Wilhelm Kuhn, 70, Margaret Street, Cavendish Square.

Mr. AGUILAR respectfully announces that he will give a MATINEE MUSICALE, at WILLIS'S ROOMS, on THURSDAY, June 14, under the distinguished patronage of the Most Noble the Marchioness of Hastings, the Right Hon. the Countess of Uxbridge, the Right Hon. the Lady Caroline Ricketts, the Right Hon. the Viscountess Combermere, the Viscountess Maidstone, the Right Hon. the Lady Harriet Ellerton, the Baroness Mayer de Rothschild, Lady Montefiore, &c. &c.; and assisted by Madame Boeckholtz-Falconi, Madame Ferrari, Mr. Miranda, Signor Ferrari, Signor Ciabatti, Herr Ernst, Signor Piatti, Mr. R. S. Pratten, and Mr. F. Mori.—Reserved Seats, 15s.; Tickets, 10s. 6d.; to be had at the principal Music Publishers, and of Mr. Aguilar, 68, Upper Norton Street, Portland Place.

HERR CARL DEICHMANN'S ANNUAL MORNING CONCERT will take place at the Hanover Square Rooms, on SATURDAY, June 16, to commence at Three o'clock. Vocalists: Madame Clara Novello, Mdlle. Emilie Krall (from the Imperial Opera, Vienna), Signor Bianchi, and Signor Belletti. Instrumentalists: Pianoforte, Herr Ernst Pauer; Violon, Messrs. Ries and Deichmann; Viola, Mr. Vogel; Violoncello, Messrs. Pague and Hausmann.—Conductors: Messrs. F. E. Bache and Francesco Berger.—Reserved Seats, Half-a-Guinea; Tickets, 7s. each; may be had at all the principal Music Warehouses, and of Herr Carl Deichmann, 6, Maddox Street, Regent Street.

MR. ALFRED MELLON respectfully announces that the last Grand ORCHESTRAL UNION CONCERT this season will take place at ST. MARTIN'S HALL early in July. Full particulars will be duly announced.

CONCERTS OF THE WEEK.—These are now numerous, and of every degree of interest in their appeals. Yesterday week Herr Pauer, besides exhibiting his known skill as a pianist, and his disciplinary power in the chorus of amateur German part-singers (who sang selections from Mendelssohn's Greek music), presented himself in a third worthy aspect, as writer of a Symphony in c minor. This is a clever and well instrumented work—honourable to the energy of the professor who has made time to complete it—honourable, too, to his skill as contrapuntist and orchestral writer. Practice, and the self-correction which an aspirant can only derive from hearing his works executed, may give Herr Pauer improved freshness and contrast in his subjects, and increased mastery in filling up his outlines and working out his designs. What we have had from him already is sound and promising.

Those who went seven miles and a half to Sydenham on Monday morning, with the hope of hearing Madame Albani sing in the Crystal Palace—and who had to content themselves with Madame Amadei and Herr Formes in her stead—are probably as well aware by this time as the *Athenæum* that, but for the name of the thing, one vocalist proves to be just as good as another, in that vast area,—except for some few hundreds of the thousands assembled, who can squeeze into the right places, to which the sound penetrates. The facts that such places are capriciously disposed—that certain tones which are null near at hand pierce to distant retreats, and *vice versa*—do not lessen the difficulty—let us say, at once, the absurdity—of giving miscellaneous concerts in the transept of Sir Joseph's fairy building. If the Crystal Palace is laid out to compete with Cremorne and the Surrey Gardens, of course its managers will not care, so long as thousands can be attracted, whether the music be good or bad, heard or unheard, amid the jingling of spoons, the grumbling of elderly gentlemen in quest of seats, the shuffling of several thousand pairs of feet, and the furling of parasols; but why not (supposing such the purpose) prefer showers of perfumed rockets warranted not to break the glass vault—or any other tea-garden pleasure? On the other hand, if the idea of Art is to be kept up,—the same idea which led to the preparation and decking of the respective Courts, we cannot allow Music to be maltreated any more than we could overlook violence done to Mr. Layard's Nineveh Bulls or Mr. Owen Jones's superb Alhambra ceilings. Whether the speculation be a forty-thousand-pound organ, or a performance in pantomime by the best vocalists and instrumentalists attainable, so often as a piece of clap-trap is projected or performed, "clap-trap" it must be called,—and the Directors must be duly warned against the tendency of such proceedings. A day or two earlier, we perceive "the little Napoleon" had played on the pianoforte in the

Crystal Palace! It is sad enough, already, to hear this gifted child in a room, and to observe how the character of a Prodigy, with which he has been invested, has tempted him to substitute false force in his mechanism and false taste in his expression, for those immature graces indicating the presence of aptitude and genius, by which the artist-child promises the artist-man; but there is less of proportion, less of propriety still, when the arena is so outrageously enlarged.—The success of Madame Novello's solo on the day of opening the Sydenham building, when the assemblage of visitors was hushed to expectation, and when her voice was thrown forward by the lofty screen in front of which she sang, will be a deadly thing for other *soprani*, if they be lured out of town to scream in emulation of her, by way of symphony to the fountains playing, or to some distribution of prizes for the newest *Azalea*, *Volkameria*, *Strelitzia*, *Nymphaea*, or other botanical or floricultural curiosity, imported by an indefatigable Hooker or fortunate Fortune! Because the *Athenæum* chronicled its admiration of Madame Novello's unaccompanied verses of 'God save the Queen,' it is bound to state that Monday's "convention" was totally ineffective, and that if Music is to be represented at Sydenham, it must be in some other form than the one then chosen.

On Monday evening there were only four concerts that we know of—probably as many more in other parts of London:—one given by *Miss Cole* and *Mr. and Mrs. A. Gilbert*,—one by *Mdlle. Hermann*,—one by the *Messrs. Blagrove*,—and one by that clever tenor singer, *Mr. Benson*. If this last-named artist is heard less frequently in public than we once fancied might be the case, where lies the fault? May it not have been ascribable to his resolution to sing more than nature determined he should sing?—and to his forgetfulness that an excellent second tenor holds higher rank than a feeble first one? The mania for disclaiming subordinate occupation would bear curious fruits in music did it pervade instrumentalists as largely as it does their vocal brethren. What would become of our orchestras were all violins to be *violini primi*?

HAYMARKET.—After a series of successful performances of those translated French and Italian operas, in which Mr. and Mrs. Sims Reeves have gained well-deserved popularity, Mr. Buckstone produced on Saturday last a new opera, entitled 'The Gnome of Hartzberg,'—the words of which are by Mr. Fitzball, the music by Mr. Henry Smart. The *librettist* in his 'Gnome' has produced, probably, the most remarkable of his many remarkable combinations of rhyme, dialogue, and situation,—but neither analysis of the fable nor quotation from the text would serve any good purpose. What manner of music would illustrate these with due proportion imagination fails to represent. Mr. H. Smart may have found the mystery as deep as we do, since he has contented himself by writing airs, ballads, choruses and concerted pieces, after the usual opera pattern, without apparent attempt to parallel the peculiarities of his mate. There is clever and careful music in 'The Gnome,' but too great an admixture of styles, and too many reminiscences of popular foreign composers.—High praise is due to Mr. and Mrs. Sims Reeves, Mr. Weiss, Miss H. Gordon, Mr. W. Farren, Mr. Manvers, and Mr. Farquharson for the good will and nerve brought by them to bear on the performance of Mr. Fitzball's drama, and for the finish and spirit with which Mr. H. Smart's music was rendered. The first-named lady and gentleman have never been heard to greater advantage. Chance of acting there is none for either—unless fancy could in this matter also strike out some new style adequate to the representation of the phrases and positions allotted to them. If Mr. Buckstone's Opera-experiment is to be continued at the Haymarket, and if English Opera is to be tried, some production more national than Mr. H. Smart's music, and more rational than Mr. Fitzball's play, must be brought forward.

ASTLEY'S.—The production of Mr. Stocqueler's piece, entitled 'England and France in the Days

of Chivalry,'—as the Whitsuntide novelty at this theatre bears so closely upon the question of spectacle in general that, with positive merits as a piece designed for its introduction, on an arena proper to its exhibition, it cannot but be instructive to bestow some brief consideration on it. The evil that we have implied by the prevalence of Shakspearian revivals, however well acted, if too expensively mounted, does not pertain to the production of the pure spectacle, as a distinct entertainment having its own conditions and special admirers. The mischief against which we would guard the intelligent and conscientious manager, is where both the poetry and acting of a great drama are subordinated to ornament. The adornment of a play within reasonable compass is not to be objected to; but any attempt beyond that is hurtful both to the play and the player. To compliment, under such circumstances, any performer, however eminent, on the success of a particular revival, is merely the mockery of criticism. The spectacle is the great feature, not any actor or actress whatever; and the former must be as much preferred by the spectators, as the quadrupeds at the theatre now under review are to the company. We all know the anecdote of Mr. Warde being rebuked by a former manager of this establishment, for daring to stand before a horse during rehearsal. The stage-director well knew which the house would desire most to see. In this piece of Mr. Stocqueler, the spectacle flourishes alone in its glory, commends itself on its own proper merits, and brings no contempt upon either the dramatic or histrionic art. It is, in fact, a reproduction of a spectacle in old times, and instructs us what such gorgeous amusements were in the days of Henry the Eighth. The "Field of the Cloth of Gold" is the scene,—to give full effect to which the circle is connected with the stage, so that the Tournament is illustrated on the largest possible scale. The new drama is, as it ought to be, a mere vehicle for such reproduction. The same law applies to such vehicles as to pantomimes, which, really to interest, should be composed on none but well-known subjects. This particular, considered in connexion with the necessity of abstaining from the use of words, completely proves, not only the imperfect nature of the pantomimic art, but that the understanding can be little enriched by it, though the senses may. Spectacle, though not entirely prohibited from employing words, is restricted to few, and must depend on a prior acquaintance with the theme. This is one reason why managers prefer revivals to new plays for the exercise of their illustrative talents. The dialogue is already known, and might, for any attention generally paid to it, be altogether omitted. We prefer, therefore, the genuine thing, in which such dialogue is, in fact, omitted, and only that kind is substituted which is proper to it as a vehicle.

FOREIGN CORRESPONDENCE.

Cologne.

A musical note or two may be added, by way of appendix to the sketch of the Lower Rhenish Festival, published last week. Cologne is to have a grand concert-room, with sundry accessory buildings,—for the quaint old Gürzenich Hall is to be heightened and materially altered—still keeping up the old style. This is to be accomplished before the Festival for 1856 is held,—a later period of the year than Whitsuntide being mentioned as its probable date. The Quindnuns are already beginning to speculate on the "yes" or "no" of Madame Lind as a matter of first necessity,—while the musicians are already discovering that if such a singer and such scenes as the Whitsuntide gathering at Düsseldorf exhibited are essential to make musical meetings attractive, their power, glory, and real being are near an end. More than a dozen artists have said to me, "No, this last was no real Rhine Musical Festival, but a Lind-Festival." Now a like excitement will hardly be got up for any successor, even supposing she should prove as great a singer and as munificent a woman as the Swedish Lady. But the difficulty to be dealt with is not confined to the

engagement of some one artist—for which this Düsseldorf meeting is thought to establish a precedent:—"What are we to sing that is new?" is already a question flying about at Cologne. The general impression of Dr. Schumann's 'Paradise' is anything but Paradisiacal,—the work being found heavy, trivial, and uninteresting, with some cleverness of detail. This is conceded even by some of the most vehement supporters of the new musical gospel; but, as I have before remarked, these gentlemen are beginning to wrangle among themselves about shades and distinctions of ugliness in Art, such as are too delicate for the eyes of old-fashioned heretics to distinguish. Perhaps Cologne may give to the Cologne Musical Festival a work worth hearing,—since Herr Reinthaler, a young composer who began his studies in the Conservatory, and is now, I believe, a Professor of singing there, has completed an Oratorio, with 'Jephtha' for subject. This is a venture, seeing that by his choice of that story the composer enters into the lists with Handel. But this new 'Jephtha' in no point of arrangement resembles Dr. Morell's 'Jephtha,'—and Herr Reinthaler can in no characteristic or quality be paralleled with Handel, save in the fact of both having sojourned in Italy. Herr Reinthaler was sent to study at Rome at the instance of the King of Prussia; and there is Rome in such parts of his 'Jephtha' as I have seen,—a roundness and grace of melody which the English have not yet become too old (or too young, is it?) to appreciate,—a careful study of the voice, and what it can do:—in a chorus *alla Palestrina*, masterly part-writing:—everywhere fair contrivance and solid sustaining power,—in short, that combination of form and science which augurs well for its possessor, with an apparent sufficiency of dramatic force and orchestral brilliancy when these are required. If Herr Reinthaler prove capable of fluent working—if he be willing to think, to select, to wait, but still to continue creating—I am disposed to fancy that he may do honour to German music.—Never did Germany stand in more need of a composer than at present. For Herr Wagner's operas do not please, in spite of the picturesque and sympathetic nature of their *libretti*,—and in spite of all the machinery of wit, sarcasm, misplaced enthusiasm, and political sympathy brought to bear on recommending them. 'Tannhäuser' is the most liked among them, but this principally in the holes and corners, and not the high-places, of German opera, Dresden excepted. Curious it was, after reading the composer's letter to the Cologne manager, translated in the *Athenæum* a few weeks since, to hear at Cologne on every side that 'Lohengrin' had there proved an entire and profitless failure. I cannot but give currency to this report, in confirmation of my idea that the new doctrine, howsoever it may disturb young writers, blighting and burning up all their geniality by encouraging in them a humour at once *blasé* and arrogant,—does not and cannot command a public,—and that, though it may represent the irritations and discontents of a part of the rising generation of pseudo-artists, it has neither gone to the heart nor touched the sympathies of the great music-loving people of Germany, north and south.

P.S. A bar was left out in my last letter. When I referred in it to M. Adolphe Adam *apropos* of the Chorus of Houriis in Herr Schumann's *Can-tata*, the words should have been, not "one of his two" (as printed), but "one of his two-in-a-bar" opera tunes.

MUSICAL AND DRAMATIC GOSSIP.—The appearances of Madame Arga as *Norma* at the Drury-Lane Opera, and of Madame Rüdersdorff, *vice* Mdlle. Jenny Ney, at Covent Garden, as *Donna Anna*, will be sufficiently commemorated by announcement.—The recitatives substituted by M. Meyerbeer, in place of the original spoken dialogue, having arrived, we are told that 'L'Étoile' is now in busy rehearsal at the *Royal Italian Opera*.

Among other entertainers of our London season, M. Levassor—who has been always a favourite here—is opening his "budget" of comic-alities at the *St. James's Theatre*, with the assistance of Mdlle. Teisseire.

Lovers of musical curiosities will learn with interest, that the original MS. score of 'Don Juan' (Mozart's own score, it is attested, by the representatives of Herr André, of Offenbach, to whom it was confided for publication), after having been long in the market and offered to many libraries (that of our own British Museum among the number, we are told), has at last found a purchaser in Madame Viardot. It is described as all but complete, and full of interesting *indicia* and changes made by the composer's own hand.

A Correspondent who writes on questions of pitch and key, in reference to what was said by us of Herr Volkmann's Quartett, will, perhaps, let further discussion be waived till the time of year when Opera is gone to sleep and Concerts are "dead and dumb."—Another Correspondent, who kindly addresses us on the reputed plagiarism of Weber from Böhner (respecting which we sought information), has, we think, overlooked Herr Engel's communication, published by us a week or two since.

Madame Lagrange has arrived in America,—has appeared at Niblo's,—and is pronounced by the *New York Musical Review* to be "the greatest performer our present age has at command." In the article on her performances we are further informed that "arrangements have been made, by which rival Italian companies are not to compete in our midst."—Magnificent offers have been made to M. Roger (so the French journals assure us) to tempt him to the United States.—Magnificent offers, from the Opera at Rio Janeiro, are said to have been accepted by Madame Stoltz, who is always (if we are to trust French journals) reaping new triumphs and making huge receipts at the *Grand Opéra* of Paris,—yet never somehow staying there.—While French opera is the matter talked of, we may notice that M. Verdi's 'Les Vêpres' (in rehearsal ever since 'La Nonne Sanglante' was produced in October last) has been again postponed for the sake of "alterations to be made to the first act."—Private letters assure us, that in order the next opera to be represented at that theatre will be the 'Santa Chiara' of H.R.H. the Duke of Saxe Coburg, by express Imperial command; *querre*, as

A dainty dish to set before our Queen?
After this is to come Signor Biletta's three-act work, for the *début* of Mdle. Moreau-Sainti.—Mr. Charles Braham, who has just been giving a concert in Paris, with fair success, is said to have been offered an engagement at the *Grand Opéra*.

Miss Edith Heraud will shortly appear at the Haymarket, in a new play, in five acts.

While we learn the English theatrical speculation in Paris has been already dispersed in "empty air," we observe that the series of Italian dramatic representations has commenced there. According to universal testimony, the *Signora Ristori* has produced a real impression as an actress of the highest order, in the 'Francesca' of Silvio Pellico, and in Alfieri's 'Mirra,' the drama (it may be recollected) which produced so tremendous an impression on Byron, when he saw it with the principal partacted by some Italian tragedian of his day. The Italian Lady is further commended as being, likewise, excellent in one of Giraud's comedies; and we observe more than one French journalist calling attention to this versatility of power, as a characteristic, also, of our best English actors! The illustration is a curious one, the respective "natures and properties" of the Theatre in the two countries considered, but perfectly in harmony with the fancies of those who hold that the best actors are those who have "no style," no exclusive range of emotions beyond which they cannot venture; and who believe that personation is no affair of beetle-brows, of fair or brown hair, of a voice in this or the other register,—but an intellectual study and an impulsive presentment of all moods, humours, and emotions. Such persons owning (as every one must) the admirable ease, taste, and finish of the average French actor, after a while, dare to become a little weary of the mechanical structure of the pieces contrived to exhibit class-acting to its utmost perfection.

"Chimes" says a Correspondent, "hardly amount to music any more than do the silvery talk and the liquid trills of a Swiss snuff-box. Neither

will Victor Hugo's fantastic and delicate verses, written on 'the pane of a Flemish window,' well known to the readers of his 'Rayons et Ombres,' set the *carillon* in an honourable place among the lutes, sackbuts, and psalteries and other instruments which human fingers touch. Yet, the other day, while crossing Flanders—that land of chimes—I could not help being struck more than once with the strangeness given to these voices from tower and belfry, by this very absence of human agency,—and finding them in picturesque harmony with their architectural framework. The evening glow lingered on the top of the tower at Malines for a good minute, after twilight was in the lime-tree walk under the cathedral walls; and then those singular metallic sounds—sonorous, yet not always in tune—precise in rhythm, yet dead so far as accent is concerned—seemed to fall into the spirit of the place and the hour.—A morning or two later, while strolling among the grass-grown fortifications at the mouth of Dunkerque Harbour, and looking over the wild shore-picture, made up of sea, sand, and sun, stretching away towards Ostend, it was not unpleasing to be reminded of the town by its mid-day music. Just now the chimes of Dunkerque are very good; and the tower of St. Eloi has a large repertory, though the tunes be not the holiest of the holy. Fancy, under such circumstances, hearing, a mile off, the Spanish *rondo* from 'Le Domino Noir,' the 'Laughing Chorus' and 'Drinking Song' from 'Der Frieschutz,' and (more modern and modish still) the opening chorus from 'Ernani.' The effect was odd and faëry-like,—anything but unpleasing."

MISCELLANEA

Paris Exhibition.—An official return has been made of the number of works of Art contributed by various countries to the Paris Exhibition. They are thus classified:—

Countries.	No. of Artists.	No. of Paintings.	No. of Sculptures.	No. of Engravings, &c.

Earthquake in Japan.—The following extract from a letter written by the Rev. Joseph Edkins, of Shanghai, has been courteously placed in our hands by Mr. Robert Halley, jun., to whom the letter in which it occurs was addressed:—"You will have seen an account of the great earthquake in Japan. The newspaper notices of it will not mention the coincidence in time of a remarkable rising of water in all the land streams near Hangchow, Hoochow and Kiahing. It happened on the 24th of December, the day after the earthquake at Simoda, at 5 p.m. The water rose to different heights, varying from half a foot to two or three feet in various parts of the region containing those three cities. The water had gone back to its own level in half an hour. Nothing has been said of any alterations in the form of the land surface. The land streams in that region are quite shut off from the sea by a system of embankments made long ago to keep out the waters of the ocean. The water at Hangchow and Chapoo is a little salt through the oozing in of sea-water, but there is never any tide there inland. The tides that come in by the mouth of the Yang-tze-Kiang do not reach to this part, extending no further than sixty miles up the Shanghai river, the Hwang-poo."

 John Murray, Albemarle-street.

PARIS, BY SIR FRANCIS HEAD.
 Next week, Third and Cheaper Edition, 2 vols. post 8vo.
SKETCHES of PARIS: being a New Edition
 of 'A Pageant of French Sights.' By SIR FRANCIS B.
 HEAD, Author of 'Babbles from the Broom of Nossah.'
 "Sir Francis Head took with him to his task the kindly spirit
 and minute observation for which he is distinguished. We prize
 that this book is one we can honestly praise."—*Literary Gazette*.
 "The book is very curious and readable; but perhaps its most
 remarkable feature is, how much may be seen in Paris in a short
 time by a man who resolutely sets about it."—*Spectator*.
 John Murray, Albemarle-street.

MURRAY'S BRITISH CLASSICS.
 This day is published.
THE EIGHTH and Concluding VOLUME of
**DR. SMITH'S EDITION of GIBBON'S ROMAN EM-
 PIRE**, including a very carefully-compiled Index. 8vo. 7s. 6d.

 "It contains a world of poetical thoughts, of glorious and beau-
 tiful images, drawn from the sacred and deepest springs of the
 imagination."—*Sunday Times*.

Royal 4to. price 21s.
THE POETICAL WORKS of the late
CATHERINE GRACE GODWIN.
 Edited, with a Memoir, by A. C. WIGAN.
 With Forty Illustrations by Birket Foster, John Gilbert, &c.
 "There are many striking and pleasing pieces in Mrs. Godwin's
 collection of poetry, and we think that Mr. Wordsworth expressed
 a fair and candid opinion of the writer's general merit when he
 said, 'I have read your volume. The Wanderer's Legacy, &c.,
 through with much pleasure. Whenever it is read, such poetry
 cannot but do us good. It is neither wanting in feeling, nor
 in that much rarer gift which is the soul of poetry—imagination.
 There is great command of language and fine versification.'"
Literary Gazette.
 London: Chapman & Hall, 193, Piccadilly.

A BOON COMPANION FOR RAILWAY TRAVELLERS.
 Now ready, a New Edition, handsomely bound in cloth,
 reduced from 5s. 6d. to 3s. 6d.

 ments. In the original Arabic. 4 vols. royal 8vo. 1l. 8s.
 W. Thacker & Co., 57, Newgate-street, London.

DARLEY'S SCIENTIFIC LIBRARY,
 for the Use of Schools, Private Students, Artists and
 Mechanics.

It is the purpose of this Work to furnish a Series of Elementary
 Treatises on Mathematical Science, adapted to the wants of the
 public at large. To youth of either sex at public and private
 schools; to persons whose education has been neglected, or whose
 attention has not been directed in early life to such studies; and
 to Artists and Mechanics, these little works will be found particu-
 larly suited. The principles of the various Sciences are rendered
 as familiar and brought as near to our commonest ideas as pos-
 sible; the demonstrations of propositions are made plain for the
 mind; and brief for the memory; and the Elements of each Science
 are reduced not only to their simplest but to their shortest form.

1. A System of Popular Geometry; containing
 in a few Lessons so much of the Elements of Euclid as is neces-
 sary and sufficient for a right understanding of every Art and
 Science in its leading Truths and general Principles. By George
 Darley, A.B. Fifth Edition (now ready). 4s. 6d. cloth.

2. Companion to the Popular Geometry; in which
 the Elements of Abstract Science are familiarized, illustrated and
 rendered practically useful to the various purposes of Life, with
 numerous Cuts. Second Edition. 4s. 6d. cloth.

3. A System of Popular Algebra, with a Section
 on Proportions and Progressions. Third Edition. 4s. 6d.

4. A System of Popular Trigonometry, both
 Plane and Spherical; with Popular Treatises on Logarithms, and
 the Application of Algebra to Geometry. Third Edition. 3s. 6d.
 cloth.

Walton & Maberly, Booksellers and Publishers to Univer-
 sity College, 23, Upper Gower-street, and 27, Ivy-lane, Patern-
 aster-row.

ENGINEERING SCHOOL CLASS-BOOKS.
 In cr. 8vo. 4s. 6d. bd. with 220 Diagrams engraved for the Work,
EUCLID'S ELEMENTS of PLANE
GEOMETRY, with EXPLANATORY APPENDIX and
 SUPPLEMENTARY PROPOSITIONS for Exercise. Adapted
 for the Use of Schools, or for Self-instruction.

By W. D. COOLEY, A.B.
 Author of the 'History of Maritime and Indian Discovery,'
 'The Neerland of the Arabs,' &c.

"This is the best edition of the Elements which has yet appeared.
 By the occasional use of algebraic symbols for words, the author
 has both shortened and simplified the reasoning. The few remarks
 on Geometrical Analysis in the Appendix are of great value; and
 the Supplementary Propositions will be found useful both to
 pupils and teachers."—*Athenæum*.

A neat and cheap edition of the universal introduction to mathe-
 matical study, directed by the distinguished and illustrious great
 Alexandrian clothed his expositions. Mr. Cooley has added an
 Appendix of additional matter to exercise the student, and pre-
 fixed a very sensible Preface on the utility of the study and the
 best mode of pursuing it."—*Spectator*.

"Mr. Cooley seems almost to wish to contradict his own motto,
 that 'there is no royal road to Geometry,' for following in the steps
 of Playfair, he has considerably diminished both the volume of the
 work, as well as the labour of the student. Prefixed to the Elements
 are some remarks on the study of mathematics, as valuable
 for the elegance of their style as for the correctness of their rea-
 soning."—*Civil Engineer and Architect's Journal*.

Uniform with the 'Elements,' price 3s. 6d.
COOLEY'S GEOMETRICAL PROPO-
SITIONS DEMONSTRATED; or, a Supplement to Euclid:
 being a KEY to the Exercises appended to the 'Elements,' for the
 use of Teachers and private Students. Upwards of 120 Propositions
 deduced from the First Six Books of Euclid, are illustrated in it
 by new Diagrams.

"The propositions are demonstrated in most instances, in the
 plainest and neatest manner; so that the work may justly claim
 what it professes, to be a HELP TO TEACHERS."—*Scholastic Journal*.
 "The Key contains a collection of deduced propositions calcu-
 lated to make the learner familiar with the chief properties of geo-
 metrical figures."—*Dublin University Magazine*.

"Will be found of considerable value as an aid to teachers of the
 Mathematics."—*New Monthly Magazine*.
 "The propositions given as exercises in the valuable Appendix,
 are demonstrated in the Key, which must, therefore, become a very
 important volume in the eyes of the ambitious and inquiring class
 of students."—*United Service Gazette*.

III.
 In fcap. 8vo. price 1s. 6d.
COOLEY'S FIGURES of EUCLID; being the
 Diagram illustrating the Elements, with the Enunciations
 printed separately for Use in the Classroom.
 Whittaker & Co. Ave Maria-lane, London.

THE ROVING ENGLISHMAN'S WORKS.

1. PICTURES FROM THE BATTLE-FIELDS.

Price 5s. cloth lettered. With Eight Illustrations. Third Thousand.

2. TURKEY; being SKETCHES from LIFE.

Price 2s. boards, or 2s. 6d. cloth lettered. With Portrait of the Sultan. Sixth Thousand.

3. THE ROVING ENGLISHMAN; or, SKETCHES of CONTINENTAL LIFE. Price 1s. Tenth Thousand.

From 'THE TIMES,' June 1.

"We ought to know this Englishman, for we have met him before, and observed him making pictures of familiar things, in the spirit of Sir Francis Head. If the pensive public will take our suggestion, they will find that he is, for particular reasons, especially worth listening to at the present conjuncture."

London: GEORGE ROUTLEDGE & Co. 2, Farringdon-street.

Price 1s. each, or free per post 1s. 6d.

RICHARDSON'S RURAL HANDBOOKS.

"One delights to luxuriate among its ample pages, replete as they are with excellent and clearly-arranged matter, explanatory and illustrative of the French language."
Scottish Educational Journal.
"M. Havet's 'Class-Book' is one of the best arranged and most complete French Manuals yet published in this country. The new features that it possesses are chiefly that it makes frequent comparisons between the English and French idioms, and that it contains CONVERSATIONAL LESSONS, calculated to impart information, as well as to exercise the learner in speaking the language."
The Educational Examiner.

PRACTICAL METEOROLOGY.

By JOHN DREW, Ph.D., F.R.A.S.
Corresponding Member of the Philosophical Institute of Bale.
This work, the result of many years' experience, gives ample directions for the advantageous use of the BAROMETER, THERMOMETER, HYGROMETER, RAIN-GAUGES, and other Meteorological Instruments; suitable Formulae and Tables for the Reduction of Observations; an Account of the Photographic Registration at Greenwich, and of the present state of the Science in this Country. It affords exactly the kind of information in request with private observers, as well as with the Officers of the Royal Navy and Mercantile Marine, in connexion with the arrangements lately entered into between the Governments of this country and the other Maritime States.
John Van Voorst, 1, Paternoster-row.

(by post only) from the Author, at his Institution for the Cure of Stammering, No. 8, New Burlington-street (late of Regent-street).

Just published, in crown 8vo. price 7s. 6d. cloth,
BALDER.

By the AUTHOR of 'THE ROMAN.'
Second Edition, with Preface.
"In this poem we read a magnificent protest against the tendency of our age to materialism and positive philosophy and the apotheosis of mechanism and intellect. An age which everywhere manifests a blind atheistical dedication of force and power. The age to which of all others that trumpet-tongued text, 'What shall it profit a man if he save the whole world and lose his own soul?' needs to be preached and sung. There are two hundred and eighty-three pages in this book, and not one but contains fine thoughts, magnificent imagery, striking similes, or searching reflections. Of the wealth of thought revealed we can scarcely trust ourselves to speak, it is so great. We consider 'Balder' to be the first and worthy part of a great poem—one of such a degree of greatness, that it has scarce an equal in our century, and one that will take the public opinion some years to arrive at that greatness. To those who cannot see its purpose, we may say, as the old chroniclers wrote of Shakespeare,—Read it again and again, and if so be you do not understand it then, there is manifest danger that you are not quick of comprehension."—*Kentish Review.*
"Genius is so immediately present in every page of the strange book before us, that to give examples from one, without injustice to the others, we find to be beyond possibility in the limits of a magazine review. We cannot, however, resist a passing allusion to the absence of all melo-drama in those scenes which nevertheless reach the very boards of the drama, and to the instinctive avoidance of the horrible and attainment of the terrible, under circumstances of the highest tragedy. These general facts infer a property of intuition in the author, which only the true critic can properly estimate; and in such passages as the portrait of Amy in scene twenty-eight, and the *scène* of scene thirty-seven, or scene twenty-four, he will recognize the same wonderful truth of instinct at work, in the calmest nooks and most pastoral quietudes of the many-coloured landscape of life."—*Fraser's Magazine.*
"The lesson to be taught would make a grand theme for poetry, but only a crowned singer could hope to teach it. Let some large and wealthy mind study the darker possibilities of our own being—then the question may be meetly handled. Some such denizen of Parnassus—understanding by experience the peculiar temptations of high poetic temperament—knowing well all those airy illusive tongues that 'silly men's names' in the haunted wilderness of aspiration—looking steadily down that wrong turning, the gloomy avenue of that *vie morte* he himself might have chosen—such an one could address his brethren, and all of us, with happiest effect. Qualifications adequate to an enterprise so worthy, Mr. Vendys unquestionably possesses; to some such purpose he appears to have devoted himself in the present poem, and, in our judgment, with signal success."—*British Quarterly Review.*

Recently published, in post 8vo. price 5s. cloth,
THE ROMAN.

By the AUTHOR of 'BALDER.'
"Should any one after the preceding extracts doubt whether we have a new poet amongst us, we should almost despair of his conversion. But we should not abandon the attempt while we had such an argument in reserve as the ensuing description of the Coliseum."—*Athenæum.*
"How far the merit corresponds with the magnitude of the work there may be some difference of opinion, but none as to the genius and power of the author."—*Literary Gazette.*
"Any man might be proud to be the author of this poem, which, if the first production of an author hitherto unknown, is full of the richest promise; and at any rate shows that we have poets still among us, who, if they would but take equal pains with our older writers, are capable of achievements not any way inferior to theirs."—*Guardian.*
"The hand that has struck this lyre is the hand of a master."—*Sun.*

SMITH, ELDER & CO. 65, Cornhill.
Just published, 1s. per post free,
HOW TO MAKE HAY AT HALF THE COST. Also,

THE CURABILITY OF STOMACH, PULMONARY, NERVOUS, BILIOUS, and LIVER COMPLAINTS, demonstrated by numerous Authentic Cases; without Medicine, Galvanism, Electricity, Hydropathy, Inconvenience, or Expense. By a remedy which saves fifty times its cost in other means of cure!
London: James Gilbert, 49, Paternoster-row; and through all Booksellers.

RUPTURES.—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of a steel spring, so often hurtful in its effects, is here avoided; a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the Manufacturer, Mr. WHITE, 228, Piccadilly, London.

ELASTIC STOCKINGS, KNEE CAPS, &c. for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price, from 7s. 6d. to 16s. each; postage 6d.
MANUFACTORY, 228, PICCADILLY, LONDON.

PHOTOGRAPHIC CHEMICALS, APPARATUS, and LENSES.
R. W. THOMAS,
CHEMIST, &c., 10, PALL MALL,
SOLE MAKER OF THE XYLO-IODIDE OF SILVER,
AND
MANUFACTURER OF PURE PHOTOGRAPHIC CHEMICALS and APPARATUS.

In the APPARATUS DEPARTMENT of this Establishment every kind of first-class Photographic Apparatus may be seen, including—
CAMERAS, folding and rigid, of superior construction.
Folding and other STANDS, of the best make.
GLASS BATHS, arranged for carrying the Silver Solution, thus dispensing with the use of a bottle and funnel.
GUTTA-PERCHA BATHS, mounted, to carry the Silver Solution for Glass Plates, up to 15 by 12 inches.
Jointed LEVELLING-STANDS and SPIRIT-LEVELS.
COLLODION PLATE-HOLDERS, for preparing large plates with facility. Pneumatic, ditto.
PLATE-CLEANERS.
COLLODION GLASSES.
A Choice Collection of PASSEPARTOUTS, made expressly for this house, from original patterns.
Albumenized and other PAPERS, French and English.
A great variety of Glass, Porcelain, and Gutta-Percha DISHES.
Also, a large assortment of ROSS'S Portrait and Landscape LENSES.

PHOTOGRAPHY ON PAPER.
Every requisite for practising the Calotype process may also be seen in the Apparatus-room, including Buckle's Brushes, Shallow Glass Dishes for developing negatives, with case and covers, Deep Porcelain Dishes, for Washing the Iodized Paper, &c. &c.
An excellent Negative Paper, well adapted for iodizing, after the method followed and recommended by Mr. Sutton, price 4s. per quire, or 3l. 10s. per ream, 19 by 15.
N.B. The stock (50 reams) has now been kept two years. This paper may also be had ready iodized.

XYLO-IODIDE OF SILVER.
This important photographic preparation is exclusively used at all the Photographic Establishments. Its superiority is universally acknowledged. Testimonials from the best photographers and principal scientific men of the day warrant the assertion, that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action.
In all cases where a quantity is required, the two solutions may be had at wholesale price in separate bottles; in which state it may be kept for years, and exported to any climate. Full instructions for use.
CAUTION.—Each bottle is stamped with a red label, bearing my name and address,
RICHARD W. THOMAS, CHEMIST,
10, PALL MALL,
to counterfeit which is felony.
NITRATE of SILVER BATH for the above preparation may be always obtained of R. W. THOMAS, ready made, at a cost little more than the price of ingredients used.

CRYSTAL VARNISH.
PREPARED FROM THE FINEST AMBER.
This valuable Varnish, for protecting Negative Pictures, does not require the application of any heat to the plate. The coating will be found free from stickiness, hard, and transparent. It dries immediately.

HYPO-COLOURING BATH.
FOR RENDERING THE POSITIVES ON PAPER DARK AND RICH IN COLOUR.

CYANOGEN SOAP.
FOR REMOVING ALL KINDS OF PHOTOGRAPHIC STAINS.
The genuine is made only by the inventor, and is secured with a red label, bearing this signature and address,
RICHARD W. THOMAS, CHEMIST,
No. 10, PALL MALL,
Manufacturer of Pure Photographic Chemicals and Apparatus.
And may be procured of all respectable Chemists, in pots, at 1s. 2s., and 3s. 6d. each, through Messrs. EDWARDS, 67, St. Paul's Churchyard; and Messrs. BARCLAY & Co., 95, Farringdon-street, Wholesale Agents.

ROSS'S PHOTOGRAPHIC PORTRAIT and LANDSCAPE LENSES.—These Lenses give correct definition at the centre and margin of the picture, and have their visual and chemical acting foci coincident.
Great Exhibition Jurors' Report, p. 274.
"Mr. Ross prepares lenses for Portraiture having the greatest intensity yet produced, by procuring the coincidence of the chemical, actinic and visual rays. The spherical aberration is also very carefully corrected, both in the central and oblique pencils."
"Mr. Ross has exhibited the best Camera in the Exhibition. It is furnished with a double achromatic object-lens, about six inches in aperture. There is no stop, the field is flat, and the image very perfect up to the edge."
Catalogues sent upon application.
A. Ross, 2, Featherstone-buildings, High Holborn.

THE NEW COLLODION, manufactured by BLAND & LONG, 153, Fleet-street, London, will bear comparison with any other preparation offered to Photographers. Price 9d. per oz. Can be had separate from the Iodizing Solution. Nitrate of Silver, 4s. 6d. per oz.; Pyrogallol Acid, 1s. 6d. per drachm; Glacial Acetic Acid, 6d. per oz.; Hyposulphite of Soda, 1s. per lb. **CAMERAS, LENSES,** and every description of Apparatus, of first-class workmanship.
Chemicals of **ABSOLUTE PURITY**, and every material required in the Photographic Art, of the finest quality.
Instruction in all the processes.
Catalogues sent on application.
BLAND & LONG, Opticians, Photographical Instrument Makers and Operative Chemists, 153, Fleet-street, London.

PHOTOGRAPHY, WHOLESALE, RETAIL, AND FOR EXPORTATION.
OTTEWILL & CO. 24, CHARLOTTE-TERRACE, ISLINGTON.—OTTEWILL'S REGISTERED DOUBLE BODY FOLDING CAMERA, with Rack-work Adjustment, is superior to every other form of Camera, and is adapted for Landscapes and Portraits.—May be had of A. Ross, Featherstone-buildings, Holborn; and at the Photographic Institution, Bond-st.
*Catalogues may be had on application.

REMOVAL.—HOCKIN & CO., from 289, Strand, to 38, DUKE-STREET, MANCHESTER-SQUARE.
IODIZED COLLODION, unsurpassed in sensitiveness and density of negative.—LENSES, warranted achromatic, Quarter Plate, double, 2l. 2s.; Half, 5l.; Whole, 10l.—Waxed and Albumenized Papers.
PRACTICAL HINTS ON PHOTOGRAPHY, by J. B. HOCKIN. Price 1s.; per post, 1s. 4d.

LITERARY OPINIONS.

"The title of this excellent book does only partial justice to its contents. It comprises more than the curiosities of London, being a condensed Encyclopædia of London itself. . . . A wonderful little Dictionary of London, in truth, is this volume by Mr. Timbs. There is so much out-of-the-way reading in it, such apt introduction of personal experience, and such a quantity of agreeable illustration, drawn both from books and men. . . . We heartily commend this volume."—*Examiner*, May 5, 1855.

"Life-long observation, books, conversation, and tradition, have each contributed to swell the facts that find a place in the 'Curiosities of London.' These facts are numerous, and well brought together; nor do we know where so much information respecting the metropolis can be found in a single volume, or even in many volumes."—*Spectator*, Feb. 4.

"The execution is creditable to Mr. Timbs's great industry and research, and is remarkable for careful compilation and judicious observations. Juvenile readers, men of business, and antiquaries, may all profit by the 'Curiosities of London.'"—*Economist*, Feb. 10.

"This book may fairly be pronounced the most complete and comprehensive of the many contributions to the illustrative history of London; and the management of the details indicates qualities superior to any which have hitherto been brought to bear upon mere archaeology—the qualities of a first-rate scholarly intellect."—*The Leader*, March 3.

"This volume is one of the most valuable and painstaking of its class. We find in it much that is curious, interesting, and new; and we are not aware of any work that contains so much matter of the last half-century conveyed with so much clearness and accuracy."—*The Press*, Feb. 24.

"This book illustrates the British metropolis with a minuteness, a fidelity, an intelligence, and a charm, rarely, if ever, equalled in any work of its class."—*Weekly Dispatch*, Feb. 10.

"This is an astonishing collection of curious and interesting information."—*Morning Chronicle*, Feb. 23.

"A vast storehouse of facts, judiciously classified and arranged."—*Daily News*, Feb. 15.

"A vast fund of fact and anecdote, displaying a very great amount of diligence and ability, and deserving a high degree of success."—*Morning Advertiser*, Feb. 9.

"A very valuable and excellent book, full of interesting and curious information."—*Globe*, Feb. 26.

"The plan of the work is excellent; and every page bears proof of the research and industry of the author. We have been surprised at the amount and variety as well as the accuracy of the information. The book is sure to be a standard work in the literature of the metropolis; and Mr. Timbs has crowned his long and varied literary labours by this valuable and acceptable volume."—*Literary Gazette*, Feb. 17.

"This work has justly earned for its author a considerable meed of admiration and praise. It is the work of an industrious and learned man; and it is full of anecdotes, information, and good readable ratiocination."—*The Critic*, March 15.

"We give Mr. Timbs credit for his great labour and assiduity, and are fully convinced that the book will form a very useful resource for reference on countless topics of interest and curiosity.—The author has devoted especial pains to the description of the Museums, Libraries, Exhibitions, and other objects of present curiosity."—*Gentleman's Magazine*, March.

"What a mass of information is collected here!—how great the toil, how astonishing the accuracy shown in the compilation! The amount of antiquarian lore interspersed throughout is not the least marvellous characteristic of the book."—*New Quarterly Review*, No. 14.

"Of all modern works on London, this is beyond question the most complete and thorough-going, the most inquisitive, curious, and comprehensive."—*Tait's Edinburgh Magazine*, April.

"Really a very amusing book. The amount of information which it contains is very extraordinary."—*The Art Journal*, March.

"To heap into a single volume everything curious and remarkable in the strange microcosm of London, was surely a great idea; and Mr. Timbs has wrought it out with an industry worthy of that unweary compiler."—*Chambers's Journal*, March 17.

"The book contains a large amount of interesting information pleasantly put together."—*The Builder*, Feb. 17.

"The work of a diligent labourer in the field of literature, who in this book has acquired a claim to a lasting reputation."—*The Land and Building News*, Feb. 15.

LONDON: Published for the Author by DAVID BOGUE, 86, FLEET-STREET.

Printed by JAMES HOLMES, of No. 4, New Ormond-street, in the county of Middlesex, at his printing-office No. 4, Took's-court, Chancery-lane, in the parish of St. Andrew, in said county; and published by JOHN FRANCIS, of No. 14, Wellington-street North, in the said county, Publisher, at No. 14 in Wellington-street aforesaid; and sold by all Booksellers and News-vendors.—Agents: for SCOTLAND, Messrs. Bell & Bradburn, Edinburgh;—for IRELAND, Mr. John Robertson, Dublin.—Saturday, June 9, 1855.

THE ATHENÆUM

THE ARCHITECTURAL MUSEUM, Canon-row, Westminster.—The ANNUAL CONVERSAZIONE will be held on MONDAY, June 25, at 8 o'clock. The Right Hon. the EARL DE GREY, K.G., President.

The Entrance to the Museum is from Parliament-street, near Richmond-terrace. HENRY CLUTTON, Hon. Sec.

THE GOVERNESSES' INSTITUTION, 34, Soho-square.—Mrs. WAGHORN, who has resided many years abroad, respectfully invites the attention of the Nobility, Gentry, and Principals of Schools to her Register of English and Foreign GOVERNESSES, TEACHERS, COMPANIONS, TUTORS, and PROFESSORS. School Property transferred, and Pupils introduced in England, France, and Germany. No charge to Principals.

EDUCATION.—A LADY residing in a healthy locality, near London, RECEIVES a select and limited number of YOUNG LADIES, she has had many years' experience, and can offer the advantages of a superior education, combined with the comforts of home. Professors of reputed talent attend.—Address H.Y., at Roland's Library, 20, Berners-street.

FOREST HOUSE SCHOOL, WOODFORD WELLS.—Conducted by Mr. G. F. H. SKES, B.A., late First Assistant Master of MILL HILL SCHOOL. The object of the Establishment is to furnish an Education based on Christian principles, and comprehending instruction in the Arts of Commerce, in the Languages, and in Science. Omnibuses from the City pass the door several times in the day.—Prospectuses will be forwarded on application.

WESTBOURNE COLLEGE, PORCHESTER—Lancaster, Baywater-road, commenced on the 23rd of April, 1855, under the highest Ecclesiastical and Educational Patronage. The PUBLIC OPENING of the NEW ROOMS of this College will take place on TUESDAY, the 19th inst. The Grounds will be open from 2 till 6; and at 8 o'clock an Inaugural Address will be delivered by the Rev. the Principal. Invitations will be sent to any who may intimate their desire to be present. C. MACKENZIE, A.M., Principal. June 11, 1855.

By permission of the Board of the Royal Caledonian Asylum their Band will play on the lawn from 2 to 6 o'clock.

ST. JOHN'S WOOD PROPRIETARY COLLEGIATE SCHOOL, 25, St. John's Wood Park. Head Master—The Rev. THOMAS MARKBY, M.A., late Scholar of Trinity College, Cambridge, and Classical Master in King's College School. Second Master—H. DEIGHTON, Esq. B.A., late Scholar of Queen's College, Cambridge.

An Exhibition of 30*l.*, open to Students intended for the Universities, or for the Legal and Medical Professions, and tenable for three years, will be annually adjudged. Students entering before Christmas next will be admissible to contend. Each Proprietor has the right of nominating one Pupil at a time to the School at reduced fees. B. HODSON, Hon. Sec. * * * The Second Master RECEIVES BOARDERS at 24, Boundary-road.

HODDESDON SCIENTIFIC SCHOOL, Hoddesdon, Herts.—Accommodation is preparing to admit TEN additional PUPILS after Midsummer. Principal, WILLIAM HASLEWOOD, who for many years has been uniformly successful in preparing Pupils for examination and general instruction, aided by the following Resident Assistant Masters:—Classics and History—Rev. H. W. Wardale, M.A. Mathematics—Mr. J. Tully, A.M. Modern Languages—Dr. Lindau. Chemistry—Mr. F. G. Minasi. Natural Sciences—Mr. Haslewood. English Department—Mr. Sutherland.

This School has been established twelve years on the largest scale of efficiency, and will be found complete in every department. The object is to provide a course of instruction practical in its character, less costly, and adapted to the requirements of the age.—Particulars, with references, may be had, by application to the Principal, Scientific School, Hoddesdon, Herts.

WRITING, ARITHMETIC, GLOBES, ASTRONOMY and NATURAL PHILOSOPHY.—MR. BREWSTER announces to the Heads of Schools and Families that he will have every hour disengaged each week in the next half year, and would therefore be happy to form one or two more ENGAGEMENTS FOR TUITION in the above-mentioned branches of Education, with Latin if required.—Address 10, Paradise-place, Hackney.

GERMAN LANGUAGE and LITERATURE.—DR. A. BUCHHEIM, Graduate of the University of Vienna, Editor of the 'Deutsches Athenæum,' GIVES LESSONS in the German Language and Literature through the medium of the English, French, or Italian.—Address 2, Burton-crescent.

GERMAN, ITALIAN, and FRENCH.—DR. ALTSCHUL, Member Philological Society, London, Examiner Royal College of Preceptors, gives LESSONS in the above-mentioned LANGUAGES and LITERATURE. Pupils may study TWO Languages in the same Lesson, or alternately, without any addition to their terms.—Chandos-street, Cavendish-square.

FRENCH and GERMAN taught Grammatically or Conversationally. Privately or in Class, limited to Six Pupils. Schools and Families attended. Translations done.—For prospectus, terms, &c. apply to HERR S. KOCH, 45, Upper Albany-street, Regent's Park, London.

GERMANY.—The Principal of a first-rate Establishment of Northern Germany RECEIVES into her family a few YOUNG LADIES, the daughters of gentlemen, to enjoy all the advantages of eminent Masters and the comforts of a happy home. Highest references given; an escort offered at the end of June. A Governess Pupil required immediately.—Apply to A. B., Clifton Library, Brighton.

EDUCATION IN GERMANY.—Parents desiring to send their Sons to Germany for the purposes of Instruction, or EDUCATION, may suitably place them with a German Family at Hanover. Good references given and required.—Apply to Mr. SONNE, Hanover, care of Royal Hanoverian Railway Direction.

GERMANY.—EDUCATION for YOUNG LADIES in GERMANY.

A German Protestant Lady, residing at DARMSTADT, well acquainted with the Education of Young Ladies, is now again in London, to take back with her a small number of Pupils. The number being limited, her Establishment will therefore offer the comforts of home. The town is healthy, situated in the South of Germany, and is of easy access. English Service in the Palace Chapel every Sunday.—References of the highest order, and Prospectuses to be had of O. C. MARCUS, Bookseller, 8, Oxford-street.

GERMAN CONVERSATION.—A PRIVATE CLASS, limited to Six Members, and intended principally for the instruction of German Conversation and Composition for the more advanced Student, is now being formed at Professor KLAUER-KLATOWSKI'S, 20, South Molton-street, Bond-street. Terms, 1*l.* 10*s.* for a series of Twelve Lessons.—Mr. KLAUER has just published 'LEIDEN und FREUDEN PETKAS, EINES RUSSISCHEN LIEBESLEBENS,' price 2*s.* This interesting little tale is narrated on store throughout in the German written character, and is therefore well adapted for German students, to familiarize them with reading German handwriting.

A LADY, experienced in general Tuition, viz., Music, French, Drawing, &c., is ready to make AN ENGAGEMENT for the present recess, about twelve weeks, as COMPANION to Two or Three Young Ladies, either in England or on the Continent. Terms moderate. References given and required.—Letter addressed, post free, to Mr. G. L. LESQUE, Professor of Languages, 42, Bloomsbury-street, New Oxford-street.

THE WIFE of a CLERGYMAN of good Birth and Education, wishes to take CHARGE of ONE or TWO CHILDREN under Eight years of Age, to watch over their Health, Dispositions, Manners and Acquirements with all a MOTHER'S care and love. They will have a well appointed Home, with good Nurses, Governess, and the best Masters that London can offer, and mix only with Children of suitable rank. Terms 10*l.* per annum, 1*l.* 10*s.* per week, and Board and Lodging if considered beneficial for their health.—Address, Mrs. LUX, care of Mrs. Pope, 81, Edgware-road.

MEDICAL PRACTICE in LONDON for IMMEDIATE DISPOSAL, in consequence of the sudden severe illness of the Gentleman, who has been in successful practice for upwards of 35 years in the same neighbourhood. The Lease of the House, which is pleasantly situated, would also be disposed of, with the Fixtures: the whole on very moderate terms.—Address, A. Z., Messrs. Moores & Sills, Solicitors, 18, Old Broad-street, City.

NAVIGATION SCHOOL, under the direction of the BOARD OF TRADE.—Separate Classes for Masters and Mates in the Merchant Service at 6*s.* per week, and for Seamen at 6*d.* per week, meet daily at the Sailors' Home, Wells-street, London Docks. Apprentices admitted free.—Application to be made at the Sailors' Home.

MRS. FANNY KEMBLE will give TWO READINGS FROM SHAKESPEARE at the Marylebone Literary Institution, 17, Edwards-street, Portman-square. The Play of 'TWELFTH NIGHT,' on TUESDAY MORNING, June 19, at 3 o'clock precisely; and on FRIDAY EVENING, June 23, the second part of 'HENRY the FOURTH,' at 8 o'clock. Tickets to be obtained at the Institution. Reserved Seats, 5*s.*, Area 2*s.* J. R. WARREN, Secretary.

DRAMATIC READINGS and LECTURES.—Mrs. CHATTERLEY having terminated for the present, her Readings from Shakespeare at the Royal Polytechnic Institution, proposes to extend them to the Literary and Educational Societies of the Metropolis and the Country.—Letters to be addressed to 5, Brompton-grove, London.

MISS POLE, having made arrangements for the reception of EIGHT YOUNG LADIES as RESIDENT PUPILS, in addition to her Morning Pupils, has the honour of announcing that the Studies commenced April 4th, at her residence, 23, Circus, Bath, where the Plan of Study and Prospectuses may be obtained.

HYDROPATHY.—MOOR PARK MEDICAL and HYDROPATHIC ESTABLISHMENT, near Farnham, Surrey, within three miles of the Camp at Aldershot. This Institution is now open for the reception of Patients under the Superintendence of Dr. EDWARD W. LANE, A.M. M.D., Edin.—Dr. Lane may be consulted in London every Tuesday between half-past 12 and 2, at 61, Conduit-street, Regent-street.

BEN RHYDDING HYDROPATHIC ESTABLISHMENT. PHYSICIAN—Dr. William Macleod, F.R.C.P.S. SURGEON—Mr. Tait, Surgeon. Prospectus and Terms to be had of Mr. TAYLOR, House Steward, Ben Rhydding, Otley, Yorkshire.

REMOVAL.—JOHN MABLEY, PRINTER, SELLER and STATIONER, REMOVED from 9, Wellington-street North (where he has been established twenty years), to 143, STRAND. * * * See Catalogue of Engravings at p. 694 of this Journal.

COATS OF ARMS.—A Figure of a Knight, with Coat of Arms correctly emblazoned, to order, on the Shield for 1*s.* 6*d.* Brackets for ditto, with Crest and Motto, 10*s.* 6*d.* A most unique Ornament for Halls, Libraries, &c.—A beautiful Collection of Casts from Armour, in exact imitation of the Originals—Oak Carvings; and thousands of Engravings at unhead-of-Prices. J. MANLEY, 143, Strand. * * * See Catalogue of Engravings at p. 694 of this Journal.

TO PARENTS, &c.—Mr. GEORGE HAYES, 66, Conduit street, Regent-street, has a VACANCY for a PUPIL. He would be fully instructed in Mechanical as well as Operative Dentistry of the highest order, would join the family circle, and receive many unusual advantages. If desired he could attend the Classes at either of the Colleges.

TO NATURALISTS, BOTANISTS, &c.

The following Botanical Collections are now on sale, the specimens being carefully prepared, and mounted on good paper, with names and localities.
100 Grasses, in folio case 15*s.*
50 Ferns and their allies, in ditto 13*s.*
100 Lichens, in two 4to. cases 16*s.*
Next Cabinets, fitted up with 16 drawers, for Microscopic Slides, &c. £0 10 6
Ditto, containing a Collection of British Marine recent Shells (60 Species), arranged in glass-topped boxes 1 15 0
Ditto, with British Land and Freshwater Shells 1 15 0
Ditto, with Fossils of the Isle of Wight and Hampshire (Cliffs) 1 15 0
Hands-made Cabinets made expressly to hold a complete Collection of British recent Shells or British Birds' Eggs 7 7 0
Marine Dredges 1 4 0
Insect collecting Boxes, Geological Hammers, Botanical Cases, and a variety of other Articles required by Naturalists. ROBERT BURCH, Agent.
30, Tavistock-street, Covent garden.

THREE PATENTS, of great worth and utility, FOR SALE, most valuable to any person or party desirous of exhibiting at the Paris Exhibition.—Apply to Mr. W. NEWMAN, 7 St. Giles-street, Norwich.

ASTRONOMICAL TELESCOPE.—TO BE SOLD, a good 4-feet Achromatic TELESCOPE, by Harris & Sons, Opticians to the Royal Family, mounted on a tall mahogany tripod stand, with horizontal and vertical movements. The Object-glass is 3½ inches (clear) in diameter, and there are two day and four astronomical eye-pieces. The Instrument is as good as new, and packed into a case with lock and handles.—Apply to A. Z., Street, Brothers, 11, Serle-street, Lincoln's Inn-field.

THE SANCTUARY, WESTMINSTER.—The NEW HOUSES near the Western Entrance to the Abbey, and in close proximity to Westminster School, the Houses of Parliament, and the Courts of Law, are completed, and those not already disposed of, are now TO BE LET. For particulars apply to Messrs. HUNT & STAMPSON, 4, Parliament-street, Westminster.

MR. MAYALL, PHOTOGRAPHER, begs to announce that he has entirely REMOVED from West Strand to 221, Regent-street, corner of Argyl-place.

MAYALL'S PORTRAIT GALLERY, 221, REGENT-STREET, Corner of Argyl-place.

PHOTOGRAPHS of every size and style, uncoloured or highly finished.
DAGUERREOTYPES, plain or tinted.
STEREOSCOPIC Portraits, singly or in groups.
COPIES on Plate or Paper.

TAKEN DAILY.

"Mr. Mayall's portraits represent the high art of the daguerreotype: they are as superior to the generality of such pictures as a delicate engraving is to a coarse woodcut."—*Art-Journal*, Nov. 1853.
"More pleasing, and far more accurate than the generality of such pictures."—*Times*, July 17, 1854.

Charles Edward Mudie, 510, New Oxford street, London.

RAILWAY ACCIDENT INSURANCE.—16,221/5s. have already been paid as compensation for Fatal and other Railway Accidents, by the

RAILWAY PASSENGERS' ASSURANCE COMPANY.

Examples.

1,000/ was paid to the Widow of J. G. killed on the 24th February, 1852, secured by a payment of 1/.

350/ was paid to H. C. H. J., who had his leg broken on the 31st Aug. 1853, secured by a payment of 1/.

200/ was paid to W. P., severely injured on the 19th September, 1854, secured by a payment of 1/.

For the convenience of frequent travellers, Periodical Insurances are granted, which now cover the risk of Fatal Accidents while travelling in any class carriage on any Railway in the United Kingdom or on the Continent of Europe, and insure Compensation for Personal Injury in any Railway Accident in the United Kingdom only.

To insure 1,000/ at an Annual Premium of 20s.

Ditto 200/ .. ditto .. 5s.

Insurances can also be effected securing the same advantages for terms of five or ten years, or for the whole of life, at greatly reduced rates, which may be learned from the Company's Prospectus, to be had at the Offices, and at all the principal Railway Stations.

A new class of Insurance has also been established in case of Death by Railway Accidents alone, without compensation for Injury.

To insure 1,000/ at an Annual Premium of 10s.

Ditto any sum not exceeding 1,000/ for the whole of life by a single payment of 6s. per cent.: thus one payment of 6/ will secure 1,000/.

Premiums charged include the Stamp Duty, this being the only Company Insuring against Railway Accidents empowered by Special Act of Parliament to pay a commuted Stamp Duty.

Railway Passengers' Assurance Office, WILLIAM J. VIAN, Secretary.

3, Old Broad-street, London.

J. A. BRODHEAD & CO., Boston, United States.

On Wednesday, the 27th inst. will be published, in 8vo. with numerous Illustrations,

PERSONAL NARRATIVE

OF A

PILGRIMAGE TO EL MEDINAH AND MECCA.

Vols. I. and II. MEDINAH.

By RICHARD F. BURTON, Lieutenant, Bombay Army.

London: LONGMAN, BROWN, GREEN, and LONGMANS.

WILLIAM HOWITT'S NEW WORK ON AUSTRALIA.

Just published, in 2 vols. post 8vo. price 21s.

LAND, LABOUR, AND GOLD;

OR, TWO YEARS IN VICTORIA:

WITH VISITS TO SYDNEY AND VAN DIEMEN'S LAND.

By WILLIAM HOWITT,

Author of 'Visits to Remarkable Places,' &c.

"'Land, Labour, and Gold' is a good, fresh, and reliable book, full of original pictures and sound advice."

Athenæum.

"We have yet had no work descriptive of Victoria since the gold discoveries at all comparable to this journal by Mr. Howitt. It is a faithful record of personal observation and experience during his two years' residence in that colony, written with point, vigour, and that talent for natural description which Mr. Howitt is well known to possess; but with great simplicity, and so much minuteness, that the scenes through which the author passes are, as it were, vividly conjured up before our eyes; while his wanderings and adventures, from their continual novelty and forcible reality, strongly seize on our attention and enlist our sympathies in his fortunes. . . . On all points connected with the present state and unparalleled industrial progress of Victoria, these volumes give full and generally fair information."

Press.

London: LONGMAN, BROWN, GREEN, and LONGMANS.

INTERESTING NEW WORKS.

Now ready at all the Booksellers,

Also, just ready, in 2 vols. cloth, 21s.

THE CITY OF THE CRESCENT;

WITH

PICTURES OF HAREM LIFE, AND OF THE DOMESTIC MANNERS OF THE TURKS, IN 1854.

With Illustrations.

By GORDON TRENER, Esq.

Author of 'The Morning Land,' &c. &c.

"In describing the Domestic Manners of the Turks, Harem Life necessarily forms a most important feature. The author, having enjoyed unusual facilities of access to, and of mixing in, the best Osmanli society, has been enabled to obtain the most authentic information in addition to his own personal experience, as well as that of his sister, who accompanied him. From all he has seen and heard, he feels convinced that very erroneous impressions regarding the Life of Woman in Turkey (hitherto vigilantly guarded and kept in seclusion) have long been current in this country.—promulgated by various writers, from the period of the first publication of the 'Letters of Lady Mary Wortley Montagu' to the present day. Under these circumstances, and the more especially as our existing relations with Turkey will doubtless attract numerous visitors, the writer has felt it to be his duty to endeavour to remove such false impressions, and to portray Domestic Life in Turkey as it really is."

CHARLES J. SKEET, Publisher, 10, King William-street, Charing-cross.

*** Orders received by all Booksellers.

NEW TRAGEDY BY THE REV. ARCHER GURNEY.

Just published, in 8vo. price 6s. cloth.

JOHN MABLEY, 143, STRAND,

Established Twenty Years at 9, Wellington-street North, Strand.

13, GREAT MARLBOROUGH-STREET.

HURST & BLACKETT,

Successors to Mr. Colburn,

HAVE JUST PUBLISHED

THE FOLLOWING NEW WORKS.

VOLS. III. and IV. of THE

DUKE of BUCKINGHAM'S ME-

MOIRS of the COURT and CABINETS of GEORGE III., from Original Family Documents. Completing the Work. In 8vo. with Portraits.

From the Times, May 30.—"The present collection is more valuable than the last. Whoever would desire to read the running comments of a prominent and well-informed man as Lord Grenville upon a decade so interesting as that of 1800-10 would do well to consult these volumes. There is a portion of their contents which possesses nearly as high a claim upon our instant and careful consideration as the Minutes of the Sebastopol Committee."

THE MONARCHS of the MAIN;

Or, ADVENTURES of the BUCCANEERS. By GEORGE W. THORNBURY, Esq. 3 vols.

"A book which will interest everybody."—*Standard*.
Up to this time, the history of the Buccaneers remained unwritten, although their career was of the most exciting description. Mr. Thornbury has taken up that history, and the result is a work, the terrible interest of which is not surpassed in any language.—*Observer*.

THE OLD COURT SUBURB.

By LEIGH HUNT, Esq. 2 vols. (Just ready.)

THE WABASH; or, Adven-

TURES of an ENGLISH GENTLEMAN'S FAMILY in the INTERIOR of AMERICA. By J. R. BESTE, Esq. 2 vols.

"This is a most curious book. We never remember to have met with such a compound of personal anecdote, high-wrought feeling, and entertaining adventure, in wild and strange scenes. With the interest of a novel, it bears the impress of truth; and familiarly introduces us to the society and the ways of the Backwoods."—*Chart Journal*.

SAM SLICK'S NEW WORKS.

1. NATURE and HUMAN NATURE. 2 v.
2. WISE SAWS and MODERN INSTANCES. 2 vols.
3. THE ENGLISH in AMERICA. 2 v.
4. THE AMERICANS at HOME. 3 v.
5. TRAITS of AMERICAN HUMOUR. 3 v.

THE NEW NOVELS.

THE NEXT-DOOR NEIGH-

BOURS. By MRS. GASCOIGNE, Author of 'Temptation; or, a Wife's Perils,' &c. 3 vols.

"Contrasted sketches of two families in Belgravia—the one titled and full of proud pretension on account of social rank, and the other vulgar and rich, and pitifully ambitious,—form the main subject of this new tale by the author of 'Temptation.' Of this novel we may say, it is one of the best of its class. The sketches of character and pictures of social life are distinctly drawn. The variety of persons introduced is unusual, the plot is good, and it will be the reader's fault if warnings are not found in the conduct of the foolish and bad, and lessons in that of the wise and good, in the tale."—*Literary Gazette*.

"A most admirable tale."—*John Bull*.
"Faction, pathos, and humour are happily combined in this interesting story."—*Morning Post*.
"The author has successfully portrayed the manners of the day in one of the best novels that have lately appeared."—*Morning Herald*.

THE JEALOUS WIFE. By Miss

PARDOE. 3 vols.

EUSTACE CONYERS. By

JAMES HANNAY, Esq. Author of 'Singleton Fontenoy,' 'Satire and Satirists,' &c. 3 vols.

"Eustace Conyers" is a fresh, genuine, healthy book—beyond comparison Mr. Hannay's ablest, wisest, and maturest work. There is something in it better than story—there is abundance of character. Character is Mr. Hannay's strength. Much of Eustace Conyers will delight the reader beyond the portraits: glimpses of natural scenery—pleasant satire on political and social ways—brief brilliant epigrammatic sayings, thrown off with an affluence and a carelessness testifying to no ordinary wealth of imagination; but the present fascination and lasting charm of the book will be found in its gallery of living, vigorous, and subtle portraits.—*Athenæum*.

THE HEIRESS of HAUGHTON.

By the AUTHOR of 'EMILIA WYNDHAM,' 'TWO OLD MEN'S TALES,' &c. 3 vols.

"We may congratulate the author on having added another to the list of her literary successes."—*Sun*.
"A story of surpassing interest. The heroine is one of the sweetest portraits which even the talented pen of the Author of 'Emilia Wyndham' has produced."—*John Bull*.

THE SECRET MARRIAGE; or,

Contrasts in Life. By Miss FANNY WILLIAMS.

"The Secret Marriage" is one of the best novels of the season."—*Literary Gazette*.
HURST & BLACKETT, Publishers, Successors to HENRY COLBURN, 13, Great Marlborough-street.

CAPTAIN SPENCER'S NEW BOOK.

On Wednesday next, at all the Libraries and Book Clubs, **CONSTANTINE; or, The LAST DAYS of an EMPIRE.**

An Historical Romance.

By CAPTAIN SPENCER.

Author of 'Travels in Circassia, European Turkey,' &c.

With Tinted Lithographs.

2 vols. post 8vo. cloth, 18s.

Sampson Low & Son, 47, Ludgate-hill, London.

NEW PRESENTATION BOOK.

This day,

ICE KING and the SWEET SOUTH WIND. 3s. 6d.

INDESTRUCTIBLE EDITION of WATTS'S SONGS. 1s.

INDESTRUCTIBLE EDITION of MAVOR'S SPELLING-BOOK. 1s.

Sampson Low & Son, 47, Ludgate-hill, London.

LONDON, SATURDAY, JUNE 16, 1855.

REVIEWS

Sketches of the Irish Bar; with Essays, Literary and Political. By William Henry Curran, Esq. 2 vols. Hurst & Blackett.

Mr. Curran's 'Sketches of the Irish Bar,' in this reprint, have many claims on our attention. The author's name on the title-page awakens expectations of brilliancy and lively thought; and the contents of the work show that the first of the family did not carry with him all his intellectual wealth to the grave. Our English political houses are not dependent on single reputations. Sydney, Russells, Temples, St. Johns, Walpoles, Pitts, Foxes, and many more, have been affluent in celebrities. In Ireland, without looking to the great historical races of Norman extraction, like the Fitzgeralds and Butlers, the bright name of Sheridan has hitherto been taken as the exception to the rule of the families of brilliant Irishmen not supporting their founder's fame. Flood, Grattan, Hussey Burgh, Edmund Burke, Yelverton (Lord Avonmore), Plunket, Bushe, O'Connell, shine with the radiance of solitary stars. In the case of Curran, another exception is marked in a style which advertises to the literary world that the old fire is not extinct.

The publication in a separate form of these "Sketches" enables us to compare their literary merits with Mr. Sheil's contributions.

The distinction between the qualities of the two essayists is marked by broad outlines. In Mr. Curran's "Sketches" the tone is more joyous and social than in Sheil's writings. Sheil had more solid matter, and worked at it with partizan zeal. Scarcely less strong in his political sympathies, Mr. Curran is not practically mixed up in the fury of faction. There is excessive personality and much detraction in most of what Sheil wrote about his opponents; on the other hand, Mr. Curran heightens the merits of the friends of "Emancipation," rather than blackens its adversaries. He is never corrosive, though he can be sarcastic when he pleases. As the practised rhetorician is visible in every page of Sheil's articles, so in Mr. Curran's the tone of a genial man of the world, amused with the follies of mankind, gives an airy lightness and a freshness which were often wanting in the papers of his hard-worked friend and fellow labourer. As a professional writer Sheil was more efficient; as a casual contributor Mr. Curran was more agreeable.

The defects and merits of the whole series spring from the levity with which they were written. Their moral tone is not higher than that of the Dublin Literary Whigs of thirty years ago, who seemed to have believed that vice and virtue were to be solved by *for or against* "Emancipation."

Any one familiar with society in the capitals of Scotland and Ireland must have noticed the peculiarities of the Tories and Whigs of the two cities. The Irish Tories have little of that sympathy for "Cavaliers" and sentimental love of "Monarchy" observable in their brethren of Edinburgh; and philosophy never found in Dublin so many Whig votaries as in the Scotch metropolis. Wit rather than thought,—eloquence more than reasoning,—sentiment, not science,—were the characteristics of the literary Whigs of Ireland thirty years ago. In society, the Scotch Whigs have often made us think of the professor's room and its didactic formality; and in their literary exercises the Irish Whigs recall to us the pleasant dinner-tables of Dublin. Problems raised to be solved in pleasant,—arguments supported by anecdotes, refuted by epigrams, and forgotten in the bubbles of champagne,—a conversation frisking between frag-

ments of invectives and effusions of pure fun,—from Corinth to Connaught, from the Forum to the Four Courts,—such are the gifts of memory to any social observer who has spent a happy week in Dublin in those circles where the Whigs of other days are revered as household deities. That school had its strong and weak points. Its superficiality could sparkle; and when it wrangled it was witty. There was fancy even in its light froth, and *vis comica* in its virulence. When it became malignant against the authorities at the "Castle," its enraged epigrammatists made one think of Farquhar and Sheridan. Its politics were as pleasantly peppered as the talk in a green-room—as light, as personal, as anecdotic, and as apt to confound the star-spangled strutters of the scene with real historical characters. The *ephemerides* of Vice-regal life became invested to its Gaelic fancy with mammoth-like proportions. *Tom Thumb*, sent over as a Lord Lieutenant, was wondered at as colossal while he was "on this side,"—but if he was upon "the other side" the telescope was reversed, and his dwarfish existence was scoffed at as merely entomological in scintillating sneers. "Be earnest," said the unsympathizing English:—"be epigrammatic," cried the prophets at Dublin, who would believe in nothing unless it flashed. Their polemical spirit was as full of points as the Irish sea-coast, and as barren in everything—except striking effects. The purely convivial destroyed much of the original in their natures. A new joker was hailed as an original thinker,—and a man who would not sacrifice truth to an antithesis was looked on as decidedly an odd fellow. Hence supper-tables were illumined and periodicals made pleasant by masterly professors of pungency. Songs, not systems,—repartees, not reasoning,—crackling jests, not confuting logic,—marked the literary and oral effusions of the school, which appears to have died away in the contention of succeeding factions, whose assailants were more brawny, though less brilliant, than their predecessors. The light-comedy politicians of their day ornamented society, if they could not rule it, and they had personal spirit as well as Hibernian wit. They would not have objected to a Donnybrook battle, on condition that none but gentlemen rioters were allowed, and that no dull fellow unable to crack jokes should aspire to the fun of cracking skulls.

We accept these sparkling essays as characteristic of the time and country in which they were written. Since then the world has been moving on fast, and it has been discovered that the real evils of Ireland were social rather than political. Economy has offered to perform what Emancipation failed to achieve; science has taken the place of sentiment; and an Exodus following a famine has distanced the efforts of legislation. In nothing have these essays more to contend against, when reprinted, than in the Irish subject having been overworked since they were written.

Yet Mr. Curran's papers stand the trial well. His picture of O'Connell as a barrister at Dublin is the best ever drawn of that remarkable person. It is the agitator of 1825—not of 1835; of the Corn Exchange—and not of Parliament. He makes us see clearly how in his own amazing personal resources O'Connell had means of gaining ascendancy over his country. Every sketch in the whole series of papers—both of Sheil's and Mr. Curran's—fades before the new matter introduced to us here. 'The Conversations with Chief Justice Bushe' are a charming collection of curious anecdote, and they are now printed for the first time. Mr. Curran states that, for the sake of curiosity, he

tried how far he could imitate Boswell, and he took down the conversation of the Chief Justice for two days. He thus picturesquely introduces the anecdotes.—

"Just after the close of the summer circuits of the year 1826, I went, by invitation, to stay for some time with him at his old ancestral place of residence, Kilmurry, in the county of Kilkenny. He was, according to his annual custom, passing his long vacation there, surrounded by a numerous family circle. I had the good luck to be the only stranger, and thus came to be at his side, and to have him all to myself, for many hours daily. * * Every day at one o'clock a pair of horses were brought to his hall door for us. From the heat of the weather (it was 'the hot summer of 1826') we always moved along merely at a walking pace; secure, however, from the same state of the weather, against any annoyance from sudden showers. We seldom returned to Kilmurry before five o'clock. Then came dinner, and at no long interval, tea; and the moment tea was over the Chief Justice rose, and proposed to me a stroll with him through the grounds. We had no occasion to keep to the gravel walks; the grass was as dry as the carpets we had left; and accordingly his habit was to push on at once for the fields, and plunging into them, and crossing and recrossing them, to prolong the stroll often till the approach of midnight."

The stories are excellent of their kind, and have the flavour of Walpoleana; but the vivacity of Boswell is not attained, for the Chief Justice is allowed to speak in monologue.

We are first ushered into the presence of George the Fourth and Lady Conyngham at Slane Castle.—

"Saurin and I went down together, and arrived barely in time to dress for dinner. I had never been seen by the King, but once at the levee. On going down stairs, I met him coming up. The rencontre was most embarrassing, for I imagined that he would not recognise me, but I was at once relieved. He said, 'Bushe, I believe you don't know the ways of this house,' and taking me under the arm, conducted me to the drawing-room. In one moment I was as much at my ease as if I had been his daily companion. I sat opposite to him at dinner. The first words he addressed to me were these (Lady Conyngham, who sat next to him, had been whispering something in his ear).—'Bushe, you never would guess what Lady Conyngham has been saying to me. She has been repeating a passage from one of your speeches against the Union.' He saw that I started, and was rather at a loss for what to say, and instantly changed the subject by recommending me to try a particular French dish, from which he had been just helped. 'This (said he) I can recommend as the perfection of cookery. My cousin, the Duke of Gloucester, often produces it for his guests, but always fails in it. It is the same with all his dishes. He has a remarkable talent for giving bad dinners.'"

—We can readily imagine that Bushe must have been nervous when he heard his famous speech against the Union mentioned. In 'The Court and Cabinets of George the Third' (recently reviewed by us), one of the officials at the Castle significantly alludes to it:—"Bushe, the lawyer, made a wicked speech against us." But let us hear the King upon the Union. The following is very curious.—

"The King soon after returned to the Union. 'My early opinion was (said he, addressing Saurin) that your and the Solicitor-General's opposition to the measure was well founded, and since I have seen this glorious people, and the effects produced by it, that opinion is confirmed; but (he added, as if correcting himself) I am sure you will agree with me in considering that, now the measure is carried, you would both feel it your duty to resist any attempt to repeal it with as much zeal as you originally opposed it. But you all committed a great mistake. Instead of direct opposition, you should have made terms, as the Scotch did, and you could have got good terms.' He then summed up some of the principal stipulations of the Scotch Union (he had history at his fingers' ends). Saurin said (a very odd remark,

as it struck me, to come from him) 'and the Scotch further stipulated for the establishment of their national religion.'—'You are quite right,' said the king; 'they secured that point also—but, no, no,' he added, hastily checking himself, 'you must pay no attention to what I have just said. It would not be right to have it supposed that I entertain an opinion from which inferences might be drawn that would afterwards lead to disappointment.'"

—We shall not comment on this passage. What follows is not a little strange.—

"In the evening despatches arrived from London containing an account of the tumultuous proceedings at the Queen's funeral. The king expressed, without the slightest reserve, his dissatisfaction at the want of energy shown by the Government on the occasion, and contrasted with it the firmness of his father during the riots of 1780. He detailed the particulars of the late king's conduct upon that occasion, who, he said, expressly sent for him to be a witness of it, for the regulation of his own conduct upon any similar emergency. He concluded by suddenly saying, in an altered and broken voice, 'I shall never again see such a man as my father.'"

'The Grenville Papers' record very different filial impressions from those uttered here; and the following, resting on Chief Justice Bushe's authority, is significant. Alluding to the King, Bushe says:—

"He has been known to say, 'I wish those Catholics were damned or emancipated.'"

On Grattan—a favourite theme with Bushe—we are almost tantalized by the following confession.—

"My last scene with Grattan was interesting beyond expression. It lasted an hour, and I have never ceased to regret that I did not commit the particulars to paper, as I might easily have done. The details of that one hour would have filled a volume."

Some of Grattan's sayings recorded here are characteristic of the deep poetry in his mind, which Sydney Smith has so brilliantly described.—

"He loved old trees, and used to say, 'Never cut down a tree for fashion-sake. The tree has its roots in the earth, which the fashion has not.' A favourite old tree stood near the house at Tinnel-hinch. A friend of Grattan's, thinking it obstructed the view, recommended to him to cut it down.—'Why so?' said Grattan.—'Because it stands in the way of the house?'—Grattan. 'You mistake, it is the house that stands in the way of it, and if either must come down, let it be the house.'"

A good Life of Grattan is wanted, but after Moore's performances we do not regret that the materials were not given to him. Here is the Chief Justice's opinion on the point.—

"I said that Moore wished to be the biographer of Grattan. 'No, no,' Grattan's life is not to be written with a dove's quill."

In these 'Conversations of Chief Justice Bushe,' several traits of Grattan are preserved. The following is like his manner.—

"Grattan's last words to Crampton (the surgeon-general), who saw him in London just before his death, were:—'I am perfectly resigned. I am surrounded by my family. I have served my country. I have reliance upon God, and I do not fear the devil.'"

—These 'Conversations with Chief Justice Bushe' are certainly very vivid, and full of interest. It is really a shame that no friendly hand has given us a Life of that eminent person.

Of Mr. Curran's own sketches, that of O'Connell is the best. It has been so often circulated in journals, that we shall only extract from it the following picture of the Agitator in the streets:—

"Body and soul are in a state of permanent insurrection. See him in the streets, and you perceive at once that he is a man who has sworn that his country's wrongs shall be avenged. A Dublin jury (if judiciously selected) would find his very gait and gestures to be high treason by construction, so explicitly do they enforce the national sentiment, of

'Ireland her own, or the world in a blaze.' As he marches along through the streets to court, he shoulders his umbrella as if it were a pike. He flings out one factious foot before the other, as if he had already burst his bonds, and was kicking the Protestant ascendancy before him; while ever and anon, a democratic, broad-shouldered roll of the upper man is manifestly an indignant effort to shuffle off 'the oppression of seven hundred years.'"

The whole sketch is equally good. But for pure Irish humour—as distinguished from mere wit—in the entire series of papers (including Sheil's) there is nothing more unctuously comic than the sketch of Serjeant Goold. It thus commences:—

"The French Revolution had scarcely burst upon the world, and its portentous incidents were still the daily subject of universal astonishment or dismay, when there arose in the metropolis of Ireland a young gentleman, who, feeling jealous of the unrivalled importance the continental phenomenon was enjoying, resolved to start in his own person as an opposition-wonder."

And that high key is sustained. The Serjeant's early adventures are graphically recorded with incomparable fun. Here is a *morceau* of pure Irish humour, recalling the easy, familiar, jocular banter of Farquhar and Sheridan:—

"He left Germany with some precipitation. The rumour ran that there were state-reasons for his departure. The subject was too delicate to be revealed in all its circumstances, but upon his return to Ireland, his friends heard in broken sentences of a certain Palatine princess—the dogged jealousy of royal husbands—the incorrigible babbling of maids of honour—muttered threats of incarceration—and a confidential remonstrance on the part of a very sensible man, a member of the Aulic council, respecting the confusion that might hereafter ensue, should it come to be suspected that the lazy stream of reputed legitimacy had been quickened by a tributary rill of Munster blood."

The anecdotes about Burke in this paper are also remarkable, as testifying to his extraordinary kindness. Mr. W. H. Curran's own recollections of celebrated persons are just as striking as those of Chief Justice Bushe. He relates his acquaintance with Barry the painter at considerable length in a paper of most pathetic interest, with a peculiarly graphic realization of the unhappy artist in his den. But though many people are sick of Barry, who can refuse being struck with this description of his pugnacious countenance?—

"An Englishman would call it an Irish, an Irishman a Munster face; but Barry's had a character independent of national or provincial peculiarities. It had vulgar features, but no vulgar expression. It was rugged, austere, and passion-beaten; but the passions traced there were those of aspiring thought, and unconquerable energy, asserting itself to the last, and sullenly exulting in its resources."

There is poetry in that phrase "passion-beaten." It may be often seen in the faces of the miserable peasantry in the south of Ireland, who never heard of Barry the Royal Academician.

The description of the vaults of St. Michan's at Dublin is very interesting. It was written in 1822,—but since then, we believe, the vaults have been closed. The chemical properties of the soil acted like an embalming process:—

"You descend by a few steps into a long and narrow passage that runs across the site of the church; upon each side there are excavated ample recesses, in which the dead are laid. There is nothing offensive in the atmosphere to deter you from entering. The first thing that strikes you is to find that decay has been more busy with the tenement than the tenant. In some instances the coffins have altogether disappeared; in others, the lids or sides have mouldered away, exposing the remains within, still unsubdued by death from their original form. But the great conqueror of flesh and blood, and of human pride, is not to be baffled with impunity. Even his mercy is dreadful. It is a poor privilege

to be permitted to hold together for a century or so, until your coffin tumbles in about your ears, and then to re-appear, half skeleton, half mummy, exposed to the gaze of a generation, that can know nothing of your name and character, beyond the prosing tradition of some moralizing sexton. Among these remnants of humanity, for instance, there is the body of a pious gentlewoman, who, while she continued above ground, shunned the eyes of men in the recesses of a convent. But the veil of death has not been respected. She stands the very first on the sexton's list of posthumous rarities, and one of the most valuable appendages of his office. She is his buried treasure. Her sapless cheeks yield him a larger rent than some acres of arable land; and what is worse, now that she cannot repel the imputation, he calls her to her face, 'the Old Nun.' In point of fact, I understood that her age was one hundred and eleven years, not including the forty that have elapsed since her second burial in St. Michan's."

The unfortunate Sheares are thus sketched:—

"I had been told that they were here, and the moment the light of the taper fell upon the spot they occupy, I quickly recognized them by one or two circumstances that forcibly recalled the close of their career: the headless trunks, and the remains of the coarse, unadorned, penal shells, to which it seemed necessary to public justice that they should be consigned. Henry's head was lying by his brother's side; John's had not been completely detached by the blow of the executioner: one of the ligaments of the neck still connects it with the body. I knew nothing of these victims of ill-timed enthusiasm, except from historical report; but the companion of my visit to their grave had been their contemporary and friend, and he paid their memories the tribute of some sighs; which even at this distance of time, it would not be prudent to heave in a less privileged place. He lingered long beside them, and seemed to find a sad gratification in relating several particulars connected with their fates."

There is more matter equally curious. Mr. W. H. Curran records that he had seen the Catacombs at Paris; but the preserved individuality of the dead at St. Michan's more deeply affected his mind.

We could have desired that the sketch of Chief Baron Woulfe had not appeared. It is too long, and it is far from being written in Mr. Curran's best style. It will not add to the Chief Baron's reputation; on the contrary, it may rather, perhaps, lower it. It does not appear that Mr. Curran was ever present when Mr. Woulfe had to encounter O'Connell on the Munster Circuit, or to reply off-hand to Sir Robert Peel in the House of Commons. After nearly eighty pages of a prolix description, he omits all reference to the weird countenance and the most extraordinary voice of Woulfe. He does not cite the testimonies given of his merits by Sir Robert Peel and Sir James Graham, and in his biographic detail he leaves out curious particulars. He omits his education at the Isle of Man by a Protestant clergyman, and the cure of his stammering tongue by the affectionate care of a female relative. "Never mind, Stephen; you'll yet be cured of your stammering; the Catholics will be emancipated, and you shall be a member of Parliament," was said to Woulfe in boyhood, by an estimable woman, to whom he owed much. As a foil to the brightness of the other papers, the essay on Woulfe may be endured, but general readers may be advised to skip it.

In the second volume some inferior matter is admitted, which has the effect of *vin ordinaire* after rich Burgundy. But the two volumes have genuine talent, and exhibit many of the best traits of Irish intellect, educated in a high school. If, as is reported, Mr. Curran intends to tell us what he personally remembers of days gone by, when he had near views of Godwin, Shelley, Grattan, and others, we shall look forward with interest to the performances of his graphic pen. His power lies in personal

description, and not in dissertation; but in his own style he is vivid, sparkling, and animated with a true humour, and he has a mine of anecdote.

Imperial Paris: including New Scenes for Old Visitors. By W. Blanchard Jerrold. Bradbury & Evans.

HERE is a very pretty—very pleasant book, full of pictures, lightly and brightly painted;—full of knowledge, thought and observation;—full of kindly sentiment and liberal interpretation of men and things in the capital of our allies. Those who seek to obtain, during their summer trip to the Continent, a closer acquaintance with Parisian life than is to be extracted from a Guide-book, can scarcely do better than carry with them a copy of 'Imperial Paris.'

Mr. W. B. Jerrold is something more, and better, than a mere panoramic painter. He is also a humourist, who sees things through a kindly and generous optic. His chapter, entitled 'The English painted by the French,' is an excellent piece of humour, as a few extracts strung together will show. It is a Frenchman, on his first visit to England, who speaks:—

"A Frenchman, the instant he touches English soil, is suddenly a changed man; all his habits must be set aside; he must be satisfied with the pale English sun of June; he must be content to be frozen, and baked, and wetted within a few hours; he will also be depressed by the sombre aspect which the coal smoke gives to the towns. Again, he approaches England by its taverns and lodging-houses. Here all is in direct opposition to the comfortable habits which the Frenchman brings from home. The furniture is hard and angular: one would think that this England, so essentially maritime, gave to her passing visitors, sea-biscuits to sleep upon! Speaking for myself, I will own, even at the risk of passing for a Sybarite and an effeminate dandy, I rose every morning from my bed, as fatigued from its hardness as from the travels which had sent me to it. * *

It rains: it blows: the streets are marshes, and everybody is at home reading Thomson's Seasons. O! perfidious sky of perfidious Albion! I go out with my cloak over my nose, and my hat over my eyes: I return home frozen to the bones. I forget my dignity and demand fire. I go to bed, and write. * * And now I may show how the people who enjoy the widest political freedom are the slaves of their customs and prejudices. Let me also correct an error of French vaudevilles (and are there any other vaudevilles?) which attribute to the English the frequent use of the exclamation 'Goddem.' Goddem is fossil. In the present time, the popular exclamation expressing surprise or discontent is, 'Ho! ho!' The second 'ho' is a tone lower than the first. But the two words which are heard every minute are *box* and *etiquette*. Everything is *box*—nothing is *etiquette*. Here are examples:—A horse's place in his stable—*box*; a trunk—*box*; Christmas presents—*box*; garden edging—*box*; an opera *box*; the salt *box*; a traveller's luggage—*box*; the seat upon a carriage—*box*; the pepper *box*; a hunting-seat—*box*, shooting *box*; a blow upon the ear—*box* on the ear; a snuff *box*;—*box* for everything and everywhere, without counting *boxing*. In England everything is 'shoking.' Nothing is *etiquette*. It is not *etiquette* to use a handkerchief—to spit—to sneeze. What is to be done? Is it *etiquette* to have a cold? It is not *etiquette* to speak loud, even in the houses of parliament; to walk in the middle of the street; to run in order to escape the wheel of a carriage. Prefer to be run over! It is not *etiquette* to close a letter with a wafer, because this is to send people your saliva; nor to write without an envelope. It is not *etiquette* to go to the opera with the smallest sprig upon the waistcoat or the cravat; to take soup twice; to salute a lady first; to ride in an omnibus; to go to a party before ten or eleven o'clock, or to a ball before midnight; to drink beer at table without giving back your glass at once to the servant. It is not *etiquette* to refrain a day from shaving; to have an appetite; to offer anything to drink to a person of high rank; to appear surprised when the ladies leave

the table at dessert time—that hour which is so charming with us. It is not *etiquette* to dress in black in the morning, nor in colours in the evening. It is not *etiquette* to address a lady without adding her Christian name. To speak to a person, on any pretext, without having been presented; to knock at a door quietly; to have the smallest particle of mud upon the boot, even in the most unfavourable weather; to have pence in your pocket; to wear the hair cut close; to have a white hat; to exhibit a decoration or two; to wear braces, or a small or large beard—to do any of these things is to forget *etiquette*. But that which violates *etiquette* in England more than anything else is—want of money. Ruin yourself—run into debt—nobody will mind this; but, above all, be a spendthrift. If, when a foreigner arrives in London, it becomes known that he lodges in one of the economical hotels near Leicester Square, he is lost to certain society. Never will an equipage, nor even the card of a lord, wander thither. The respectability for which the English contend means simply material advantages—it has no relation to moral qualities. In France worship is paid to mind—to talent—to genius; in Italy and Spain it is paid to pleasure; in other places to ambition and glory; in England gold is the presiding deity! As the middle class always envies the upper class, the commercial people spend considerable sums of money in endeavours to rival the ostentation of the aristocracy."

The French are great painters of manners. Their touch is light, delicate, and original; they look at objects through a strange and picturesque medium. Mr. Jerrold has caught their manner very well. What follows, also a Frenchman's view of England and the English, reads like a translation—rather than an adaptation,—so completely is the point of view preserved throughout.—

"There are really only three things which are cheap in London, viz., flannel, crockery, and lobsters. Flannel includes all woollen goods; we may add cotton also to the list. To the lobsters, I think I may, by association of colour, add oranges. Oranges in this foggy country? Yes; the sea, which produces crabs, bears vessels laden with this fruit! In England, when people are not drinking beer, they drench themselves with tea, and swim in the Chinese pleasure it produces, to facilitate the digestion of so much beef. Tea, therefore, is no longer a medicament for these blasés stomachs. The remedy for all this is—brandy! You have a headache—brandy, not upon the temples, but down the throat; a stomach-ache?—brandy, not upon the stomach, but in it; a heart-burn?—brandy; tooth-ache?—an excellent opportunity to drink brandy; rheumatism?—brandy; cut, scratch, and contusions, etc.?—brandy; everywhere, and for everything—brandy: applied always internally, with resignation—people must be cured. * * I have already asserted that all English ideas are material—positive. All things are massive, heavy, exaggerated. It is a nation, I repeat, of coal and iron, which produce steam strong enough to overthrow the world. The exaggeration which I have already noticed, is distinguishable in the charlatanism which pervades the shop signs and the advertisements, and in the means adopted to obtain publicity. There is nothing more amusing than the advertisement columns of the 'Times'; they pander to the instincts of the public. An hotel-keeper announces that he conducts 'a substantial family-house'—a house where families are treated substantially. The most unexpected epithets are used to create a desire, or sharpen curiosity: 'a very desirable house to let'—that is to say, that people who have once seen it cannot resist a wish to occupy it. Everything is *very valuable*, *very capital*, *most seducing*,—and all this is put forth in enormous letters. Stout, a strong beer, is declared upon every wall to be *celebrated*; and my razor-strop pretends to be, as large gold letters upon its case declare, 'inimitable!' Thus in everything, and everywhere, you must strike the imagination or the reason hard. I hear charming things in the theatres which pass unseen, because they are delicate, as the fable of Les Deux Pigeons, in Adrienne Lecouvreur, and all the mots, finely touched, by Rachel. While she plays, the majority of the audi-

ence read the piece, instead of looking at the actress—and an actress whose physiognomy and gesture deserve the attention paid to an extreme and intelligent pleasure. But here is always the idea of the positive—the desire to know the substance of the matter, without regard to the form. I have noticed the same thing in regard to concerts given in England by foreigners; for England herself has neither singers nor chorographs. Lately the adagio of the air of Norma, *Casta Diva*, sung perfectly, did not awaken any applause. Presently a loud noise, and a throwing about of arms came, strong and easy things to bawl, and the theatre was in commotion. Here my idea returns to me, as in everything, as applicable to this positive people. But it is precisely this positiveness which constitutes English strength and influence. These faults, from our point of view,—we, who are people of subtle sensations, who do not require to be struck hard to vibrate,—rule with the English. Coal and iron—positivism—make this the governing nation of the globe. I repeat it, we have the form—they have the substance. We are ingenious in trifles, delicate, refined, full of taste, light, taken with words, excited with froth, turning to all the phases of pleasure, of caprice, and of inconsequences, for which we pay dear. We make revolutions for a change, without knowing whether we shall gain any advantage,—and we often lose. We mock at our laws—we mock at everything. The Englishman, who laughs but little, respects that strength which he puts in everything. English faults and contradictions, so amusing when contemplated in individuals, in the current of daily life, form, when applied to a collection of men united as a nation, that which gives greatness to a state, and its preponderance in the world. Our *esprit*, our fertility, are charming gifts, by which we lose—with grace! The positivism of this beef-eating people, who do not understand a prolonged sound, fill themselves with beer, make everything of iron, doctor themselves with as much brandy as it is possible to consume,—this positivism has given them one hundred and twenty millions of subjects upon the globe."

Some portions of Mr. W. B. Jerrold's volume have already appeared in a popular contemporary, but several chapters are new,—and among these additions are some of the best portions of 'Imperial Paris.'

Memoirs of the Life, Writings, and Discoveries of Sir Isaac Newton. By Sir David Brewster. 2 vols. Edinburgh, Constable & Co.; London, Hamilton & Co.

UPWARDS of a century has elapsed since the death of Sir Isaac Newton, and we have only within the present month a Life worthy the fame of the philosopher. Even now, when Newton's name is a household word throughout all civilized nations, it would seem as if Sir David Brewster apprehends that his performance, treating as it does of the highest interests of science, requires royal patronage to cause it to be favourably received.

We hoped, and indeed believed, that the bad old days of patronage Dedications had passed away never to return; but here we have one of our leading scientific men dedicating the Life of the Author of the 'Principia' to Prince Albert, from whom he seeks "the protection for his work of a name indissolubly associated with the sciences and the arts." Without pausing to criticize this eulogium, we would ask whether a really good Life of Sir Isaac Newton, such as we believe this to be, requires royalty for its "protection"? We hope not; and we should have thought that the wide circulation and popularity which Sir David Brewster's former brief 'Life of Newton' enjoyed, and for which he gives himself credit in the Preface to his present work, would have warranted him in publishing without courtly patronage.

Sir David Brewster has had the Portsmouth family papers, including numerous manuscripts and correspondence of Sir Isaac, placed at his

disposal for the purposes of this Life. These have been freely used, particularly in defending Newton against a system of calumny and misrepresentation unexampled in the history of science.

In the early life of Newton no new features of interest appear. Here, however, we have a 'Scheme for establishing the Royal Society,' which must have been written by Newton shortly after he was elected into that corporation.—

"Natural Philosophy consists in discovering the frame and operations of Nature, and reducing them, as far as may be, to general rules or laws,—establishing these rules by observations and experiments, and thence deducing the causes and effects of things; and for this end it may be convenient, that *one or two* (and at length perhaps *three or four*) Fellows of the Royal Society, well skilled in any one of the following branches of Philosophy, and as many in each of the rest be obliged by pensions and forfeitures (as soon as it can be compassed), to attend the meetings of the Royal Society.—The branches are—1. Arithmetic, Algebra, Geometry, and Mechanics, with relation to the figures, surfaces, magnitudes, forces, motions, resistances, weights, densities, centres of gravity, and other mathematical affections of solids and fluids;—the composition of forces and motions; the shocks and reflexions of solids;—the centrifugal forces of revolving bodies;—the motion of pendulums, projected and falling bodies;—the mensuration of time and distance;—the efficacy of the five powers;—the running of rivers;—the propagation of light and sound, and the harmony and discord of tunes and colours. 2. Philosophy relating to the Heavens, the Atmosphere, and the surface of the Earth, viz. Optics, — Astronomy, — Geography, — Navigation, and Meteorology; and what relates to the magnitudes, distances, motions, and centrifugal forces of the heavenly bodies; and to the weight, height, form, and motions of the atmosphere, and of the things therein, and to instruments for observing the same; and to the figure and motions of the earth and sea. 3. Philosophy relating to animals,—viz. their species,—qualities,—passions,—anatomy, diseases, &c., and the knowledge of the frame and use of their stomachs,—entrails, blood-vessels, heart, lungs, liver, spleen, glands, juices, and organs of sensation, motion, and generation. 4. Philosophy relating to vegetables, and particularly the knowledge of their species, parts, leaves, flowers, seeds, fruits, juices, virtues, and properties, and the manner of their generation, nutrition, and vegetation. 5. Mineralogy and Chemistry, and the knowledge of the nature of Earths, Stones, Corals, Spars, Metals, semi-metals, Marchasites, Arseniates, Bitumens, Sulphurs, Salts, Vitriols, Rain-Water, Springs, Oils, Tinctures, Spirits, Vapours, Fumes, Air, Fire, Flames and their parts, Tastes, Smells, Colours, Gravity, Density, Fixity, Dissolutions, Fermentations, Coalitions, Separations, Congelations, Liquefactions, Volatility, Distillation, Sublimation, Precipitation, Corrosiveness, Electricity, Magnetism, and other qualities;—and the causes of subterraneous Caves, Rocks, Shells, Waters, Petrifications, Exhalations, Damps, Heats, Fires, and Earthquakes, and the rising or falling of Mountains and Islands. To any one or more of these Fellows, such books, letters, and things as deserve it may be referred by the Royal Society at their meetings from time to time; and as often as any such Fellowship becomes void, it may be filled up by the Royal Society with a person who hath already invented something new, or made some considerable improvement in that branch of philosophy, or is eminent for skill therein, if such a person can be found. For the reward will be an encouragement to inventors; and it will be an advantage to the Royal Society to have such men at their meetings, and tend to make their meetings numerous and useful, and their body famous and lasting."

It will be observed that in this interesting document Newton advocates the endowment of science by the nation; for, as Sir David Brewster observes, "men of science, on whom the wealth of this world is never abundantly bestowed, must have often smarted under the injustice of paying for the publication of dis-

coveries, which it cost them much time, and frequently much money, to complete."

Having heard that certain documents had been discovered among the Portsmouth papers which revealed Newton in the new character of a lover, we turned with considerable curiosity to the chapter devoted to the love story. But the proofs are so feeble that we are compelled to give the reader fair notice that our great philosopher will not be found "sighing like furnace" or even playing the part of a lukewarm lover. Indeed, it is very doubtful whether he was unfaithful for even a brief period to his divine mistress Philosophy. The facts are these. A love-letter, written about 1704, when Newton had attained the ripe age of sixty, has been discovered among the Portsmouth family papers. It is entitled "Copy of a Letter to Lady Norris, by —," and is in the handwriting of Mr. Conduitt, who, as Sir D. Brewster conceives, purposed publishing it. On the back of the letter is written in another hand, "A Letter from Sir I. N. to —." The epistle is as follows:—

"Madam,—Your ladyship's great grief at the loss of Sir William, shows that if he had returned safe home, your ladyship could have been glad to have lived still with a husband, and therefore your aversion at present from marrying again can proceed from nothing else than the memory of him whom you have lost. To be always thinking on the dead, is to live a melancholy life among sepulchres, and how much grief is an enemy to your health is very manifest by the sickness it brought when you received the first news of your widowhood: And can your ladyship resolve to spend the rest of your days in grief and sickness? Can you resolve to wear a widow's habit perpetually,—a habit which is less acceptable to company, a habit which will be always putting you in mind of your lost husband, and thereby promote your grief and indisposition till you leave it off? The proper remedy for all these mischiefs is a new husband, and whether your ladyship should admit of a proper remedy for such maladies, is a question which I hope will not need much time to consider of. Whether your ladyship should go constantly in the melancholy dress of a widow, or flourish once more among the ladies; whether you should spend the rest of your days cheerfully or in sadness, in health or in sickness, are questions which need not much consideration to decide them. Besides that your ladyship will be better able to live according to your quality by the assistance of a husband than upon your own estate alone; and therefore since your ladyship likes the person proposed, I doubt not but in a little time to have notice of your ladyship's inclinations to marry, at least that you will give him leave to discourse with you about it. I am, Madam, your ladyship's most humble, and most obedient servant."

Lady Norris was the widow of Sir William Norris, who died in 1702. Sir William was educated at Trinity College, and resided there while Newton held the Lucasian chair. This circumstance is advanced by Sir D. Brewster as conclusive evidence that Newton was personally acquainted with Sir W. Norris, and that their acquaintance must have been renewed when they resided in London. Stronger evidence of the authorship advocated by Sir David lies in the fact, that Newton had known Lady Norris for some years prior to 1704, as appears by the following letter addressed to his niece Catherine Barton.—

"London, Aug. 5, 1700.

"Dear Niece,—I had your two letters, and am glad the air agrees with you; and though the fever is loth to leave you, yet I hope it abates, and that the remains of the small-pox are dropping off apace. Sir Joseph Tilly is leaving Mr. Toll's house, and it's probable I may succeed him. I intend to send you some wine by the next carrier, which I beg the favour of Mr. Gyre and his lady to accept. *My Lady Norris thinks you forget your promise to write her, and wants a letter from you.* Pray let me know by the next how your face is, and if the fever be

going. Perhaps warm milk from the cow may help to abate it.—I am your very loving uncle,

"IS. NEWTON."

—Such is the evidence upon which Sir D. Brewster bases his assertion that Newton so far forgot his habitual gravity as to play the part of a lover. If the letter in question urged his own suit to Lady Norris, Newton's desire to marry at sixty coincides with that of Leibnitz, his rival in philosophy, who made proposals to a lady when he was fifty.

With proper regard for the high character of the subject of his biography, Sir D. Brewster has made effective use of the unpublished documents to which he has had access for the purpose of modifying, and in many cases of refuting, the grave charges brought against Newton by Flamsteed, and published in Bailly's 'Life of Flamsteed.' It seems that copies of letters to Newton which appear in that work differ from the originals preserved by Newton. This discovery casts a doubt on every document Flamsteed left behind him, and we are compelled to admit that no confidence can be placed in the abstracts of Flamsteed's letters to Newton as printed by Mr. Bailly. Indeed, it is surprising that Government should have furnished public money to print Flamsteed's unsupported evidence against Newton's veracity,—which, in the form of a large volume circulated gratuitously throughout Europe, had a most injurious effect upon Newton's memory. In closing his account of this painful controversy, Sir D. Brewster observes:—

"In the revolting correspondence which Flamsteed has bequeathed to posterity, he has delineated his own character in sharp outlines and glaring tints; and Newton requires no other *Egis* to defend him than one whose compartments are emblazoned with the scurrilous invectives against himself, and garnished with pious appeals to God and to Providence. We have hesitated, however, to associate the sacred character of the accuser with systematic calumny; and we hasten to forget that there may be an astronomer without principle, and a divine without charity."

Sir D. Brewster has taken great pains to investigate the claims advanced by the friends of Newton and Leibnitz to the invention of the Differential Calculus, upon which, after the lapse of nearly two hundred years, a verdict has not yet been pronounced. Our author, however, conceives that it is not difficult to form a correct estimate of the claims of the rival analysts, and arrives at the following results:—

"1. That Newton was the first inventor of the Method of Fluxion; and that the method was incomplete in its notion; and that the fundamental principle of it was not published to the world till 1687, twenty years after he had invented it.—2. That Leibnitz communicated to Newton, in 1677, his Differential Calculus, with a complete system of notation, and that he published it in 1684, three years before the publication of Newton's Method."

Besides giving full and interesting accounts of Newton's various scientific researches, Sir D. Brewster has devoted considerable space to his theological writings, showing their importance to Christianity. The strange story of Newton's mental aberration, so uncharitably insisted on by Biot, is for ever set at rest by new proofs having been discovered of Newton's vigorous and unclouded intellect at the period of his alleged insanity. These, in the form of essays on scientific matters, with other documents, are judiciously printed in an Appendix. We regret that Sir D. Brewster's publishers have not been a little more liberal in the number and execution of the illustrations, which are scarcely equal to the requirements of the work. Typographical errors are also more numerous than they should be. Altogether, however, until some fortunate discovery lays

open unknown correspondence and papers bearing on Newton's life, we regard the present work as the most complete and faithful reflection of a man of whom Pope said that "his life and manners would make as great a discovery of virtue and goodness and rectitude of heart as his works have done of penetration and the utmost stretch of human knowledge."

A Memoir of the Reverend Sydney Smith. By his Daughter, Lady Holland. With a Selection from his Letters. Edited by Mrs. Austin.

[Second Notice.]

LAST week we endeavoured to sketch the high-minded, yet unobtrusive, virtues of the man, Sydney Smith, which in his lifetime were hardly appreciated, because of his gay social qualities. On returning to this 'Memoir' for illustrations of his claims to distinction as a wit, selection becomes difficult. There is hardly a page by which we are not tempted,—hardly a paragraph which would not have made the reputation of a duller man. Such a playful use of unexpected combinations and whimsical images was surely never combined with such disarming fairness and such excellent common sense.—

"I thank God [wrote Sydney Smith to Lady Mary Bennett], who has made me poor, that he has made me merry. I think it a better gift than much wheat and bean land, with a doleful heart."

Sydney Smith might have rejoiced in the possession of justice as well as of merriment had he been Pharisaical in his orisons. Compare, for instance, the stories and the sayings collected in these two volumes with the treasury of brilliant things left us by Horace Walpole. Those will not be found untinged by ill-nature, prejudice, affectation, and a determination to astonish:—in these, sense, spontaneousness, and sweet temper never fail us, let the sarcasm pierce ever so deep or be ever so exquisitely polished. If there be any who fancy Sydney's pedestal too high, let them turn back to the triumphs, and refer to the claims, of another merry man, who, in Sydney Smith's day, might have been also produced to the foreigner as the Tory specimen of English brilliancy—we mean Theodore Hook. Such a parallel is like setting the highest, healthiest comedy against the broadest and smallest farce. The humours of one flowed from "abundance of heart"—the other was manufactured by readiness of tongue. The spoken repartees and improvisations of the author of 'Gilbert Gurney' are already fading from the memories of those who heard them, while the best recorded *bon mot* by him has the gleam of theatrical tinsel. There is much in these volumes which, we fancy, will only perish with our language. Probably, too, some hundreds of their readers could each add something to the collection of traits and anecdotes.

What an inexhaustible, self-generated fountain of mirth does the store, as we have it, reveal! Rarely has such a mass of bright sayings or happy hits been laid together, which owed so little to allusions or suggestions from others,—to odd passages from books,—to the *on dits* of rival practitioners. Sydney—unlike Horace—had few peers,—Luttrell, perhaps, excepted. He had no Charles Townshend—no George Selwyn—to "hold the cards" against him. Old Mrs. Salusbury's praise of Dr. Johnson, that he could say something about "runts," if no higher theme than cattle came up, might be applied, with a difference, to this genial man. So strong was the spirit of whimsy within him, that he could not give an order to a servant without clenching it by some original noun or verb which struck him, nor

answer the commonest note without some quaint turn. Here is an instance:—

"Dear Lady Holland,—I take the liberty to send you two brace of grouse,—curious, because killed by a Scotch metaphysician; in other and better language, they are mere ideas, shot by other ideas, out of a pure intellectual notion, called a gun."

Let us give some further examples. And first, as human beings stood first among Sydney Smith's objects of study and delight, we will string together a few of his personalities. It is fair to presume, that in this portion of the book some suppression has been exercised. One who played with whimsicalities, as the author of 'Peter Plymley's Letters' did, must have dashed off many a sketch inexpedient to circulate,—so dull is the world, and so determined are the many to confound whimsicality with malice. We do not, however, imagine that any one of the persons so gaily hit off in the following fragments could feel the smallest "bristle" stir, supposing he were alive to confront his *penchant* or his personality in print, as under:—

"One speech, I remember, of Dudley's [said Sydney Smith, in a reported conversation], gratified me much. When I took leave of him, on quitting London to go into Yorkshire, he said to me, 'You have been laughing at me constantly, Sydney, for the last seven years, and yet in all that time you never said a single thing to me that I wished unsaid.' This, I confess, pleased me."

There was none of Sydney Smith's friends at whom he did not laugh. We have never met, or heard of, one who would dissent from Lord Dudley's praise.—To proceed with our examples. Here are two Transatlantic celebrities ticketed. Daniel Webster was, we believe, the "Great Western" alluded to, besides being the machine described as under.—

"Daniel Webster struck me much like a steam-engine in trowsers. * * The "Great Western" turns out very well,—grand, simple, cold, slow, wise, and good. I have been introduced to Miss —; she abuses the privilege of literary women to be plain; and, in addition, has the true Kentucky twang through the nose, converting that promontory into an organ of speech. How generous the conduct of Mrs. —, who, as a literary woman, might be ugly if she chose, but is as decidedly handsome as if she were profoundly ignorant. I call such conduct honourable."

A Miniature of Talleyrand.—"Lady Holland laboured incessantly to convince me that Talleyrand was agreeable, and was very angry because his arrival was usually a signal for my departure; but, in the first place, he never spoke at all till he had not only devoured but digested his dinner, and as this was a slow process with him, it did not occur till everybody else was asleep, or ought to have been so; and when he did speak he was so inarticulate I never could understand a word he said." 'It was otherwise with me,' said Dr. Holland; 'I never found much difficulty in following him.'—'Did not you? why it was an abuse of terms to call it talking at all; for he had no teeth, and, I believe, no roof to his mouth—no uvula—no larynx—no trachea—no epiglottis—no anything. It was not talking, it was gurgling; and that, by-the-by, now I think of it, must be the very reason why Holland understood him so much better than I did,' turning suddenly round on him with his merry laugh.—'Yet nobody's wit was of so high an order as Talleyrand's when it did come, or has so well stood the test of time.'

A Hit at the World's Sorrow for a Great Man departed.—"At a large dinner-party my father, or some one else, announced the death of Mr. Dugald Stewart; one whose name ever brings with it feelings of respect for his talents and high character. The news was received with so much levity by a lady of rank, who sat by him, that he turned round and said, 'Madam, when we are told of the death of so great a man as Mr. Dugald Stewart, it is usual, in civilized society, to look grave for at least the space of five seconds.'

There is no need to complete the initial, in the following anecdote, with the full name of

the borrowing peeress. Different was the figure she made in the days when she was reputed to have always "the best bit of blue" at her house; when Johnson, in the fervour of his admiration for "little Burney," was affronted at being asked by her to meet "that jade, Mrs. Siddons."

"It happened to be a charity sermon, and I considered it a wonderful proof of my eloquence, that it actually moved old Lady C—— to borrow a sovereign from Dudley, and that he actually gave it her, though knowing he must take a long farewell of it."

A Trait of the Tragic Muse.—"The gods do not bestow such a face as Mrs. Siddons' on the stage more than once in a century. I knew her very well, and she had the good taste to laugh heartily at my jokes; she was an excellent person, but she was not remarkable out of her profession, and never got out of tragedy even in common life. She used to *stab* the potatoes."

A Few Touches concerning Jeffrey.—"I love Jeffrey very dearly"; and speaking of his knowledge of all subjects, and his review of Madame de Staël: 'I used to say then that the nearest thing Jeffrey had ever seen to a fine Parisian lady was John Playfair. * * Jeffrey has been here with his adjectives, who always travel with him. His throat is giving way; so much wine goes down it, so many million words leap over it, how can it rest?' "

A New Use for Dancing.—"How little you understand young Wedgewood! If he appears to love waltzing, it is only to catch fresh figures for cream-jugs. Depend upon it, he will have Jeffrey and you upon some of his vessels, and you will enjoy an argillaceous immortality."

A Word or two concerning a Party made for Malthus.—"Philosopher Malthus came here last week. I got an agreeable party for him of unmarried people. There was only one lady who had had a child; but he is a good-natured man, and, if there are no appearances of approaching fertility, is civil to every lady. Malthus is a real moral philosopher, and I would almost consent to speak as inarticulately, if I could think and act as wisely."

After the frequent allusions to Luttrell's witticisms contained in Moore's Diary, it is amusing to consider the pleasant absurdities with which Sydney Smith invested this diner-out.—

"Mrs. Sydney was dreadfully alarmed about her side-dishes the first time Luttrell paid us a visit, and grew pale as the covers were lifted; but they stood the test. Luttrell tasted and praised. * * Pray tell Luttrell he did wrong not to come to the music. It tired me to death; it would have pleased him. He is a melodious person, and much given to sacred music. In his fits of absence I have heard him hum the Hundredth Psalm (Old Version)! * * I distinguished myself a good deal at M. A. Taylor's in dressing salads; pray tell Luttrell this. I have thought about salads much, and will talk over the subject with you and Mr. Luttrell when I have the pleasure to find you together. * * Luttrell came over for a day, from whence I know not, but I thought not from good pastures; at least, he had not his usual soup-and-pattie look. There was a forced smile upon his countenance, which seemed to indicate plain roast and boiled; and a sort of apple-pudding depression, as if he had been staying with a clergyman. * * Luttrell came over for the day; he was very agreeable, but spoke too lightly, I thought, of veal soup. I took him aside, and reasoned the matter with him, but in vain; to speak the truth, Luttrell is not steady in his judgments on dishes. Individual failures with him soon degenerate into generic objections, till, by some fortunate accident, he eats himself into better opinions. A person of more calm reflection thinks not only of what he is consuming at that moment, but of the soups of the same kind he has met with in a long course of dining, and which have gradually and justly elevated the species. I am perhaps making too much of this; but the failures of a man of sense are always painful."

What can be better than the solemn comicality of the above?—Only such a French reminiscence as the following, which, as we have touched gastronomy by chance, we will quote:—

"I shall not easily forget a *matelote* at the Rochers

de Cancale, an almond tart at Montreuil, or a *poulet à la Tartare* at Grignon's. These are impressions which no changes in future life can obliterate. I am sure they would have sunk deeply into the mind of Lord Grey; I know nobody more attentive to such matters."

The above *dicta* are especially droll as coming from one who preached and practised table-temperance and experience as essential to health and light-heartedness. Yet, withal, Sydney was no ascetic. As a table must be spread in every house, he held that to see it well spread was a social duty:—and he suited practice to theory. Living in Yorkshire, as he described himself, "twelve miles from a lemon," he had yet taken thought enough on the matter to render of none avail the providence of "C——, the arch-epicure of the Northern Circuit," who, passing Foxton, and being asked to dine there, conceived it possible that ducks might be in the wind.—

"On sitting down to dinner [said Sydney], he turned round to the servant, and desired him to look in his great-coat pocket, and he would find a lemon; 'For,' he said, 'I thought it likely you might have duck and green-peas for dinner, and therefore thought it prudent, at this distance from a town, to provide a lemon.' I turned round, and exclaimed indignantly, 'Bunch, bring in the lemon-bag!' and Bunch appeared with a bag containing a dozen lemons. He respected us wonderfully after that."

The above are pleasant contributions to Dr. Doran's 'Table Traits' when they come to another course. But let us pass to matters less material, though we still keep in sight of dinners and those who gave dinners.

Holland House figures in these volumes almost as prominently as does Bowdoin in the Diaries and Letters of Moore. No record of Whig London society during the past half-century would be complete without honour done to that mansion as a shrine of literary recognition and political influence. Yet, let us ask if the extinction of that shrine—of all similar shrines—be not a sign of the times, betokening health rather than decay? It would be a subject for instructive speculation to examine how much the best of such mansions (supposing it presided over by urbanity without favouritism, and vivacity clear of caprice) gave to the persons frequenting it, in proportion to that which it took from them. We do not here advert to such persons of rank and station as came and went, and fancied that their fiat determined the fate of Scott's new romance, or of "Furniture Hope's" tale. The circle which they adorned was possibly the worthiest one of its time,—a Paradise of poetry, of wit and sense compared with the *coterie* of exclusive Fashion which flourished so vigorously during the same period in another London hemisphere. But what did Holland House do for the struggling artist and man of letters? Doubtless, it is well for the obscure, poor man of letters to have the gates of welcome of such palaces thrown open to him—to be "hall-marked" (as silversmiths say) by the approval of the cultivated and refined. To none is the training which good society imparts of more consequence. But may not this be too dearly bought?—Is it always fairly tendered?—How far must suit and service be demanded in return?—What chance in such an atmosphere have originality and independence, as compared with mediocrity and pliancy?—How shall the nervous avoid being borne down and overawed by the spirit of a circle so authoritative?—How may sincerity assert itself (ever so modestly) among those who believe that they make the "sunshine" and the "latter rain" of a reputation? A house such as Holland House is, we know, reputed to be a wondrous and potent party engine:—but the extent to which Party in turn really serves and benefits

the young and lofty and generous persons who matriculate in such a place is questionable,—and we fancy that the suspicious nature of such compacts will reveal itself increasingly as the true purpose of literature is understood by the man of letters. It is no treason to confidence if we say that some Boswell or Burney to come may offer traits and reminiscences of Holland House far different in character and import from those by which a Macaulay, a Talfourd, and (in these letters) a Sydney Smith have successively contributed to its historical fame. Even the last-named panegyrist in more than one passage indicates "*ifs*" and "*but*" analogous to those which we fancy exist in all great houses, ruled by hospitality and imperiousness. In one letter he tells of the "H. H. fever," meaning by this the fright which must needs be endured by such guests as were sent to sit below the "salt," and who, however mildly received by My Lord, had to endure the

hard questions and two roguish eyes

of My Lady, who was not always a merciful or considerate hostess! A few suggestive "oozings" of like import will be found in these letters of Sydney.—

"I am going to dine with the Granvilles, to meet the Hollands. Lady Granville is nervous, on account of her room being lined with Spitalfields silk, which always makes Lady Holland ill; means to pass it off as foreign and smuggled, but has little chance of success."

—And we apprehend that the following refers to the same fair despot:—

"—— has not yet signified her intentions under the sign manual; but a thousand rumours reach me, and my belief is, she will come. I have spoken to the sheriff, and mentioned it to the magistrates. They have agreed to address her; and she is to be escorted from the station by the yeomanry. The clergy are rather backward; but I think that, after a little bashfulness, they will wait upon her. Brunel, assisted by the ablest philosophers, is to accompany her upon the railroad; and they have been so good as to say that the steam shall be generated from soft water, with a slight infusion of chamomile flowers."

—Timid "Letters" we submit had small chance against such a patroness as this,—who, moreover, had a wondrous memory, and a librarian at her elbow "to refer," if aught was said that did not please her. Sometimes she met with her match:—there might arrive, by chance, guests who, though untitled, were unwed by her splendours; and who could set "My Lady" right as to chapter and verse when even the quotation in debate was a line or two from 'Hudibras.' But this was not an everyday piece of good luck. The ordinary tone of the circle was more arbitrary and acquiescent. Here, in proof, is an outbreak, from one of Sydney Smith's letters to Lady Holland, in which our wit showed impatience of the process by which fame was meted out by the elect.—

"I am sorry we cannot agree about Walter Scott. My test of a book written to amuse is, amusement; but I am rather rash, and ought not to say *I am amused* before I have inquired whether Sharp or Mackintosh is so. Whishaw's plan is the best: he gives no opinion for the first week, but confines himself to chuckling and elevating his chin; in the meantime, he drives diligently about the first critical stations, breakfasts in Mark Lane, hears from Hertford College, and by Saturday night is as bold as a lion, and as decisive as a court of justice."

—No more committees like these sit on the month's "number" by Mr. Dickens or Mr. Thackeray, or the Laureate's last lay, or the oration by which a Layard or a Bright brings down the storm and troubles the waters. We have no more Sydney Smiths, with a few happy hits of sensible nonsense, to settle what

the timid or prosaic or self-important took so much time to adjust; but the day of a party autocracy, which gave and withheld diplomas with all the ceremony (and injustice) of some foreign Academy, is past.

Let us now string together some of the honest thoughts and gay fancies with which these pages are crowded, without much attempt at classification of subject.—

A word or two concerning Female Education.—

"Ah! what female heart can withstand a red-coat? I think this should be a part of female education; it is much neglected. As you have the rocking-horse to accustom them to ride, I would have military dolls in the nursery, to harden their hearts against officers and red-coats. * * Never teach false morality. How exquisitely absurd to tell girls that beauty is of no value, dress of no use! Beauty is of value; her whole prospects and happiness in life may often depend upon a new gown or a becoming bonnet, and if she has five grains of common sense she will find this out. The great thing is to teach her their just value, and that there must be something better under the bonnet than a pretty face for real happiness. But never sacrifice truth."

We may follow this by a letter of farewell advice to a young lady, somewhat different in tone to the wisdom of Fordyce and Chapone, but more practical and not less poetical.—

"Lucy, Lucy, my dear child, don't tear your frock; tearing frocks is not of itself a proof of genius; but write as your mother writes, act as your mother acts; be frank, loyal, affectionate, simple, honest; and then integrity or laceration of frock is of little import. And Lucy, dear child, mind your arithmetic. You know, in the first sum of yours I ever saw, there was a mistake. You had carried two (as a cab is licensed to do), and you ought, dear Lucy, to have carried but one. Is this a trifle? What would life be without arithmetic, but a scene of horrors? You are going to Boulogne, the city of debts, peopled by men who never understood arithmetic; by the time you return, I shall probably have received my first paralytic stroke, and shall have lost all recollection of you; therefore I now give you my parting advice. Don't marry anybody who has not a tolerable understanding and a thousand a year, and God bless you, dear child."

The parting benediction is a coin from the same mint as, another day, opened itself to another friend of Sydney Smith's about to proceed to foreign parts:—"God bless you," said he, warmly, on taking his leave of the traveller, "I have every confidence in your indiscretion." Ere we have done with education let us give Sydney's estimate of "the establishment" suitable for a "scion of the nobility."—

"The usual establishment for an eldest landed baby is, two wet nurses, two ditto dry, two aunts, two physicians, two apothecaries; three female friends of the family, unmarried, advanced in life; and often, in the nursery, one clergyman, six flatterers, and a grandpapa! Less than this would not be decent."

The privileges of gout.—"I observe that gout loves ancestors and genealogy; it needs five or six generations of gentlemen or noblemen to give it its full vigour. Allen deserves the gout more than Lord Holland. I have seen the latter personage resorting occasionally to plain dishes, but Allen passionately loves complexity and artifice in his food."

Having accidentally stumbled on the name of Lord Holland's librarian, let us extract a letter of Whig prophecy, bearing date New Year's Day, 1813, addressed to that gentleman.—

"My dear Allen. * * As to politics, everything is fast setting in for arbitrary power. The Court will grow bolder; a struggle will commence, and if it ends as I wish, there will be Whigs again, or if not, a Whig will be an animal described in books of natural history, and Lord Grey's bones will be put together and shown, by the side of the monument, at the Liverpool Museum. But when these things come to pass, you will no longer be a Warden, but a

brown and impalpable powder in the tombs of Dulwich. In the meantime, enough of liberty will remain to make our old-age tolerably comfortable; and to your last gasp you will remain in the perennial and pleasing delusion that the Whigs are coming in, and will expire mistaking the officiating clergyman for a King's messenger. But whatever your feelings be on this matter, mine for you will be always those of the most sincere respect and regard."

How to receive criticism.—"As for the *Quarterly Review*, I have not read it, nor shall I, nor ought I—where abuse is intended, not for my correction, but my pain. I am, however, very fair game: if the oxen catch the butcher, they have a right to toss and gore him."

The fling at foreign travel, addressed to Lady Davy, whom the writer wanted back in London, is very droll,—in its turn of phrase almost Walpolian.—

"I am astonished that a woman of your sense should yield to such an imposture as the Augsburg Alps;—surely you have found out, by this time, that God has made nothing so curious as human creatures. Deucalion and Pyrrha acted with more wisdom than Sir Humphry and you; for being in the Augsburg Alps, and meeting with a number of specimens, they tossed them over their heads and turned them into men and women. You, on the contrary, are flinging away your animated beings for quartz and feldspar."

The following bit, too, from Sydney's own travelling notes, reminds us of "Strawberry Horace" in its neatness.—

"It is curious to see in what little apartments a French *savant* lives; you find him at his books, covered with snuff, with a little dog that bites your legs."

Here are two bits from a letter, announcing another foreign journey to a lady, from whom he asked a *route* to Paris, and help in the matter of providing a travelling attendant for Mrs. Sydney Smith.—

"Many thanks. The damsel will not take to the water, but we have found another in the house who has long been accustomed to the water, being no other than our laundry-maid. She had some little dread of a ship, but as I have assured her it is like a tub, she is comforted. * * We have had charming weather; and all who come here, or have been here, have been delighted with our little paradise,—for such it really is; except that there is no serpent, and that we wear clothes."

Something on graver matters ere we conclude. Writing to Lady Ashburton, in 1841, Sydney Smith said:—

"I wish you had witnessed, the other day at St. Paul's, my incredible boldness in attacking the Puseyites. I told them that they made the Christian religion a religion of postures and ceremonies, of circumflexions and genuflexions, of garments and vestures, of ostentation and parade; that they took up tithe of mint and cummin, and neglected the weightier matters of the law,—justice, mercy, and the duties of life; and so forth."

It was probably about this time that the Canon of St. Paul's signed a note to some one of the new formulists, whose style or subject-matter had struck him,—"*Washing Day—eve of Ironing Day.*"

Such extracts and passages as the above, and such reminiscences as they call up, could be drawn out further, were there not a time and a limit for everything. But we must have done—closing our paragraphs with a feeling as if many things had been overlooked. This must be always the case with rich books. There will come annotators, amplifiers, cavillers,—each of whom will draw out some neglected point into its due light,—or "cap" some recorded saying by some remembered witticism, racier still,—or by qualification call out admirers of Sydney Smith hitherto silent.

The Ulster Journal of Archaeology. Vols. I. & II. Belfast, Archer & Sons.

AN excellent design, for the publication of papers and other illustrations of the archaeology of the province of Ulster, was formed in the autumn of 1852, and we have before us two entire volumes, and a portion of a third, evincing the very praiseworthy manner in which the objects in view have been carried out. We are not furnished with any list of members, so as to enable us to judge of the kind of support which the 'Ulster Journal' receives; and we apprehend that the publication is, in fact, a private speculation, so that anybody who buys a volume or a number (for it appears quarterly) will so far aid the undertaking. The names of the contributors are not perhaps inserted as often as could be wished, especially in the more recent instances,—but, on the whole, they form a goodly list, which includes such men as Mr. Huband Smith, Rev. Scott Porter, Mr. E. P. Shirley, the Rev. Dr. Hume, Mr. Carruthers, the Archdeacon of Down, Mr. Way, Dr. Purdon, Mr. Windele, Sir Erasmus Borrowes, Mr. D. W. Nash, the Rev. Mr. Reeves, Mr. A. H. Rhind, &c.; we have, therefore, pretty good security both for the variety and excellence of the communications. Neither are they all as local as might be expected,—they extend far beyond the limits of Ulster; and the truth is, that illustrations of archaeology, particularly of the earlier Celtic and Scandinavian periods, do not belong at all exclusively to any one part of the British Empire. The antiquities of the aborigines of England, Ireland, and Scotland are necessarily similar; and the manner in which the weapons of our earliest forefathers are explained and exemplified by those of the Polynesian Islands in our own day shows over what a vast surface of the globe it is requisite in such cases to extend our researches. But it is not merely on this account that Irish antiquities have of late attracted attention on this side of St. George's Channel: they possess some peculiar and striking features, and we need only refer to the important topic of the Round Towers (existing nowhere but in Ireland, with two exceptions in Scotland, themselves of Irish origin) to show the interest that must always attach to inquiries of this description.

In the work in our hands we find more than one addition to the many learned dissertations upon this often-discussed question; and although we could hardly hope that any very new or strong light would be thrown upon it, we are bound to say that some important matter has been added to our previous stock of knowledge, all of which tends to establish the extreme antiquity of these monuments,—the precise application of which will, probably, never be ascertained. The late Mr. O'Brien opened a fresh view regarding them, which has not since been confirmed by any adequate authority, and was strongly opposed by the late Mr. Petrie. It was rather upon the novelty of his notions than upon any strength of argument or weight of evidence that Mr. O'Brien relied. That his volume, solely devoted to them, ought to be treated with all respect, we readily allow; and when we recollect how much we are indebted for nearly all advances in art, science and learning to enthusiasm, even if it be mistaken or misdirected, we cannot but admit our obligations to him.

It does not appear who is the Editor of the *Ulster Archaeological Journal*, but he is evidently in most respects a competent man; and dealing, as he unavoidably does, with so many points of antiquity, we cannot be surprised that at the back of the title-page of every number he should enter a caveat against responsi-

bility for the statements and opinions of correspondents. There are, however, one or two matters of fact which seem to have escaped his vigilance, and when Mr. F. H. Hore in the first paragraph of his paper upon "St. Colum Cille's Cross," speaks of Sir John Perrot, Lord Deputy of Ireland, and of Sir F. Walsingham, Secretary of State, in October, 1504, (Vol. II. p. 1251) it is clear that some error must have been committed, which it was the duty of the editor to set right. Neither Sir John Perrot nor Sir F. Walsingham was born at the time specified, and the addition of half-a-century to the date would not cure the blunder.

The anonymous communication, which immediately follows the above, is of a different character, and we should like to have seen the subject carried much further, as indeed it might easily have been: it relates to "Rustic Proverbs current in Ulster," and they are curiously illustrated by references to corresponding popular sayings in England and Scotland. The little book recently published by the Rev. Mr. Trench proves how pleasantly inquiries of this kind may be conducted, and we should much rejoice at the appearance of any new volume, which would give us at one view the proverbs in various languages of Europe, enforcing similar lessons of wisdom. Of course each must be modified by the circumstances of country, climate, opinions, and habits; and it would deserve consideration how it happens that in particular realms proverbs are much more abundant, and in much more frequent use, than in others. We have happily outlived the day when it was not only promulgated, but held as an axiom, that no gentleman ever uttered a proverb. Some of those in the article to which we refer, are remarkable for their truth, shrewdness, and brevity, and they not unfrequently felicitously illustrate the manners of the age in which they were current.

The Synagogue-Poetry of the Middle Ages—
[*Die Synagogale Poesie des Mittelalters*].

By Dr. Zunz. Berlin, Sprenger; London, Nutt.

It has been remarked of the Comedies of Aristophanes and his contemporaries, that with the ancient Athenians they performed functions which modern society, consistently with the doctrine of the division of labour, distributes among several hands,—answering the purposes of the political pamphlet, the electioneering squib, the newspaper, and we forget what besides, in addition to the more obvious end of theatrical entertainment. Something similar may be said of the Jewish synagogue during the Middle Ages:—it was not a mere place of devotion where worshippers separated themselves for a while from the rest of the world; but its varying ritual was the record of the terrible events without. The Temple, with its ceremonies, had passed away; but in the synagogue the Jewish mind found its rallying point; and though the period of burnt-offerings had gone by, the song of constancy under persecution, faith amid universal derision, hope when all seemed desperate, rose with sublime vigour. In the synagogue alone could the Hebrew, as a Hebrew, manifest his higher aspirations and feelings. The more persecution increased, the more was he drawn within the precincts of the holy place; and it was there that the poetical side of his nature could alone find its expression. From the simplest of rituals arose a gigantic mass of sacred lyrical poetry, such as probably no other ecclesiastical establishment can show. To the modern reader, who merely judges these songs according to their own intrinsic value, they will possibly appear tedious repetitions of

one set of sentiments; but taken in connexion with the history of the events under which they arose, they assume an interest almost fascinating. The very monotony of the song corresponds to the unshaken firmness of the hapless songsters:—the sameness of ideas represents the sameness of persecution. For instance, when Elasar Ben Jehuda, a poet of the twelfth century, sings—

Thy faithful ones with stones they slay,
Tormented, strangled, bruised are they;
Broken on the wheel or hung,
Into the grave while living flung.
One with eyeless sockets stands,
Another bleeds with lopp'd-off hands.

The horrors seem to find difficulty in elbowing their way into the limited space of six short lines. The picture appears about as poetical as the notable description of crimes and their punishments which we find in the 'Orbis Pictus' of Comenius. But let us only bear in mind the fact, that the enumerated torments were all hanging over the head of the bard—who, be it remarked, *en passant*, lost his wife and all his children on the occasion of one of the crusades—and at once a degree of grandeur is given to the ghastly catalogue. Only fancy such a song hymned forth in the midst of a congregation, every member of which could find one of the maimed and slaughtered among his own kin.

All other histories of persecution are but records of cruel whims and caprices compared with the chronicles of Jewish suffering. The savage sport of the worst Roman emperors,—the martyrdom of Christians by Pagans,—of Huguenots by Catholics,—even the wholesale slaughter of the Attilas and the Djingis-Khans lasted but a short time,—so that the duration of the horrors seems to be in an inverse ratio to their intensity. But the tale of Jewish persecution is an unvarying narrative of a hatred that defied the power of wear and tear. There is nothing impulsive in the operations of the chronic malignity; but century follows century, and the tortures and the massacres and the false accusations undergo no diminution. "If," says Dr. Zunz, "a literature is to be called rich because it possesses a few classical tragedies,—what rank belongs to a tragedy that lasts 1,500 years, written and acted by its own heroes?"

Nor is the persecution merely long in duration,—it is always gigantic in its workings. Just as certain philosophers of the present day can find the origin of the cholera in the Maynooth Grant, so in the Middle Ages every calamity that could befall a nation was traced to the Jews, who were perpetually accused of slaughtering children, drinking blood, poisoning wells and crucifying hosts. The epidemic which ravaged a large portion of Europe in the middle of the fourteenth century, was without hesitation laid to Jewish account; and the persecution that ensued extended from Thuringia to Catalonia, that is to say, over nations that had nothing in common with each other beyond a participation in the universal brutality. In 1181, three Christian children were lost in Vienna; and as there was no lack of witnesses to allege that the missing urchins had been sacrificed by Jews, after the fashion immortalized in the 'Prioress's Tale' of Chaucer, no less than 300 Jews were burnt alive. The notion of killing Jews by units seems never to have occurred to the Mediæval mind. When all was over, it was discovered that the children had been accidentally drowned while sliding on the ice. This anecdote, be it understood, is a mere sample of the general, long-enduring horrors, not a whit more important than countless others recorded in the ghastly chronicle of Hebrew suffering. It may easily be conceived that, regarding history from

a Jewish point of view, Dr. Zunz has but small affection for those Middle Ages that so many sentimental bards affect to admire and to regret. "In that golden age," he says, with ironical applause, "several noble inventions were made, e. g. auricular confession, celibacy, prohibitions of the Scripture, Carthusians, Crusades, persecutions for witchcraft, inquisitions, and the burning of heretics. Priestcraft and rapacity trampled down the flower of Provence, impoverished Spain, depopulated Asia and America;—despots and priests have left upon their track more misery and more marks of desolation than all the Scythians, Huns, and Vandals put together."

The history of persecution is also a history of the most marvellous fortitude on the part of the oppressed; and the heroism *en masse* is as remarkable as the wholesale slaughter. Indeed, after a perusal of Dr. Zunz's records of calamity, and his collection of the songs which it inspired, we rise with the conviction that the sort of virtue which is popularly termed "Roman" would more properly be called "Jewish." The history of the Eternal City can show one Brutus, who did violence to the paternal sentiment for the sake of the Republic,—one Virginius, who immolated his daughter to save the family honour,—but the Jews of the Middle Ages can show crowds of such characters, who would undergo any amount of torture, and vie with each other in the work of mutual slaughter rather than offer "sacrifice to Baal," as they termed the rite of Baptism. What shall we say of a French Rabbi who put the whole of his school to death, lest they might be captured and baptized by the Christian enemy?

At all events, the Hebrews had the satisfaction of knowing that they would not perish museless, like the heroes who died before the Trojan War. The poets of the synagogue were ever at hand to extol constancy and suffering, and inspire the chosen race with renewed fortitude. Thus, for instance, was the execution of a number of Jews at Erfurt, about the end of the twelfth century, on the common pretext of child-murder, celebrated by Salomo ben Abraham, who even records the names of the sufferers:—

As raging birds of prey,
To woman and to man they came.
We earned the martyr's name;
The body only could they slay;
The soul we dared to save.
An ample store of lies they have,
When they would seek our life,
Saying, that with a festal knife
We kill'd and ate a child;
But mercy they will show,
If Baptism we will undergo.
At this the pious smil'd.
So Samuel they slay,
His wife, his daughter too, the lovely one,
His brothers, and his son's wife, and his son.
Simcha, while stretching forth his neck, can pray,
Joseph, and all his race, to us endeared shall be,
They gladly stride through torture unto Thee;
And Moses, great was he,
Who to the fire with his two children came.
Into the jaws of death they stepp'd.
All Israel wept;
But tears could not subdue the flame.
And Schaltai, with his wife,
Because Thy law they have not spurn'd,
Into a heap of ashes now are turn'd.
See, Father, see, for Thee they give their life,
Thee, greatest above all, they fearlessly proclaim,
In death they lift on high Thy name.

To those who would wish to pursue in the fullest detail the story of suffering and the songs which arose from it, the work of Dr. Zunz, who is generally esteemed one of the most profound Hebrew scholars of the age, may be unreservedly commended. Most of the poems which he has translated into German exist only in manuscript; and learning of a peculiar kind was required to form such a Hebrew anthology as that which he now gives to the world, with short notices of the poets and an admirable

survey of the circumstances under which they sang and suffered.

THE WAR.

THE first tale of the war told by a soldier is Lieut. Peard's *Narrative of a Campaign in the Crimea: including an Account of the Battles of Alma, Inkermann, and Balaklava*. (Bentley.) This is chiefly the record of his own adventures, and of the actions he personally witnessed. It is written with clearness and spirit, and preserves the glitter and animation of the great scenes enacted before Sebastopol, up to the close of November. Lieut. Peard landed with the army at Eupatoria in September, and at daylight on the 20th saw the forces parade in perfect silence before commencing their march. The hills beyond the Alma were distinctly visible, crowned with batteries and with masses of troops; but nothing else than hope and joy pervaded the invading ranks.—

"The advance of our armies this day over the vast plain was a sight never to be forgotten by any one who witnessed it: the forest of bayonets of the advancing columns glistened in the bright sun, the heat of which was tempered by a soft sea-breeze. The fleet also was to be seen about four miles distant advancing with us, protecting our right, and the smoke of the steamers clouded the ocean."

The Battle of the Alma is vividly described, especially the general advance of the English lines, when the enemy reeled before them along slopes that were wet and bright with blood. But the soldiers gladly left this arena of their victory to march among the vineyards, gardens, and hamlets of the Katcha. Their excitement rose high when Sebastopol, "the beautifully-situated city," appeared in view, though the prospect was for awhile deserted, for the sake of that famous flank march, still called by some a strategical triumph, and by others a dearly-punished error. On the road immense quantities of baggage had been left by the flying Russians; and the men picked up ornaments, caskets, jewelry, cases of wine, and even money, in abundance. Many a fur-lined cloak, rich enough to wrap a Venetian seignor, was slung to the shoulders of a trooper. As yet, however, no new foe was encountered, except a party of uncouth Tartars, armed with "broomsticks," who drove some stragglers ingloriously within the lines. The army took immediate possession of Balaklava, "and in the afternoon the monster hull of the Agamemnon was seen, as it were being launched out of the mountains. It then entered the great pond, and anchored in the centre." With the land and sea forces thus united, all was ready for the siege.—

"It was cheering to hear our jolly tars hauling up the heavy guns to camp, singing every tune under the sun. You could hear them a mile off, and if any of us approached them, they would pat the monster guns they were drawing, and say, 'This is the boy that will do for them, Sir;—' 'We're going in 'long with you, Sir.'"

During the quiet period which preceded the first bombardment the soldiers were delighted when a chance occurred of returning the Russian fire. Entries of the following kind occur in the 'Narrative':—

"A splendid shot was made to-day by one of our riflemen in the advanced posts, who killed a Cossack at nine hundred yards, to the astonishment of his companions."

Lord Raglan's siege-policy is thus stated by Lieut. Peard:—

"Sir George Cathcart wished to go in and take the batteries the second day after our arrival, with our Division, but Lord Raglan refused, and said that he would not sacrifice a single life more than was absolutely necessary, and that if his present plan did not succeed, he had another by which he trusted to be able to take the place."

When, after three weeks of wasting delay, the Allied armies opened their fire, a tremendous excitement filled the camp. This is well suggested in the 'Narrative.'—

"Shortly after the fire commenced, that of our gallant allies was heard playing away in right good earnest, and a tremendous roll of cannon, like a perpetual peal of thunder, burst on our ears from our noble fleet. It was, however, impossible to discern anything, from the dense smoke which floated over the town. So constant was the fire, and so good the practice, that it was a matter of some danger to look over the parapet. Great reliance was placed in our wooden walls, and the greatest enthusiasm was heard when they first opened their tremendous broadside. We were almost smothered by the dust and sand which was flying on all sides, and the earth seemed to tremble."

At every renewal of the bombardment, and at every alarm,—

"Jack was immediately seen at his gun, cutlass in hand, going through certain evolutions, and showing us how he would cut up 'the Rooskins' if they came in his way."

The terrific shock of cavalry at Balaklava was witnessed by Lieut. Peard. As the Heavy Horse went on, before the Light Brigade was hurried to its ruin, the Russian squadrons came thundering along the plain,—

"Their line being twice as long as ours, and three or four times as deep, as well as that of the reserve. The Greys and Enniskillens charged these advancing Russians, who were only a short distance from them. The Russian wings then wheeled inwards, threatening our cavalry with utter destruction, but they took a slight turn to the right and went clean through the enemy's cavalry with the most thrilling shouts; and with diminished numbers they charged on to the next column of the enemy. It became now a hand-to-hand fight, and the first line of Russians having recovered itself a little, came wheeling round to take the Greys and Enniskillens in rear: when up came the 1st Royal Dragoons, accompanied by the 4th and 5th Dragoon Guards, who charging through the first line of the Russians, continued their desperate course as far as the second, and with their assistance the Greys put them to an utter rout. The Russian horse, or rather half their numbers, now retired at a fearful pace and in the greatest confusion."

—Next, the six hundred Light Cavalry commenced their death-ride.—

"At twelve hundred yards the enemy opened a tremendous broadside on them from thirty guns, which clouded them in smoke, and many fell. Still on they dashed, and flew into the batteries, cutting down the gunners at their post, their sabres flashing above the smoke. The scene now became very awful: the plain was covered with dead men and horses; loose troopers were galloping about in all directions; and wounded Hussars were riding home to the camp with ghastly countenances, their horses covered with blood. One officer was seen galloping towards the camp, cutting and slashing with his sword, and shouting in a most furious manner. Such was the excitement into which he had worked himself."

Never, perhaps, was a scene enacted so terribly dramatic, or in such a marvellous arena. The dispersed troopers returned by twos and threes, some galloping, others faintly leaning on their saddles. Many were seen standing in the reddened grass, and making signs that they were wounded. Horses, with both hind-legs broken, were endeavouring to rise, and swinging round at every plunge. And to perfect the savage picture, Cossacks were stalking to and fro, piercing the sides of the wounded with their lances.—

"We watched with the greatest interest a wounded dragoon, who was creeping on his belly from the battle-field, near the Russian horse, to us. Every now and then he would halt and hold up his sword. He was presently spied by the Russian sharpshooters in the redoubt near us, and they opened a sharp fire on the poor fellow. He still persevered, and was

shortly seen by a sailor, who had a brass helmet on his head, and was walking about picking up trophies, with a friend, quite heedless of their rifles. They immediately went to his rescue, and carried him on their shoulders some little distance, when he was put on a horse, with great difficulty, and brought into our lines. I do not know when my heart felt more relieved."

Between the battles of Balaklava and Inkermann, incidents of heroic interest daily occurred. We quote one, not so much for any striking anecdote it supplies, but to recall to Lieut. Peard an act of justice which he has omitted to fulfil. He was engaged with a working-party in moving a gun into an exposed battery.—

"The horses had been taken out, and the gun was just being put into position, when all on a sudden it got too much way, the men at the drag-ropes were capsized, and a corporal of Artillery, being in the shafts, showed great presence of mind by sticking to the shafts, and guiding this heavy piece of ordnance into its position; whereas the slightest hesitation on his part would have precipitated the gun over the cliff, and in all probability have killed a dozen of my men. He received the greatest praise from all around."

—Who was this "Corporal of Artillery" who probably saved "a dozen" lives? His name surely ought to have had its place in the 'Narrative.'

Lieut. Peard's account of the Battle of Inkermann resembles in all material points those which have been already circulated. It is, perhaps, too fragmentary to represent adequately the character of that mighty, mortal struggle. But the writer does not profess to paint broad effects:—he tells of his own experience, which, at Inkermann, was equal, in dangers and achievements, to that of any man in the army. His regiment—the 20th—elicited from the gallant Brigadier Pennefather the highest compliment that soldiers could receive from a soldier. In this conflict young Lieut. Tryon—who afterwards fell in a night skirmish—was said to have fired two hundred shots, and to have killed or wounded a hundred and fifty men. He was a conspicuous marksman.

As a bright and graphic picture of the war, Lieut. Peard's narrative will be read with keen interest by those who, on such a subject, can bear with a twice-told tale.

Former contests in the same region are recapitulated in an excellent *Historical Sketch of the Crimea*, by Dr. Anthony Grant, Archdeacon of St. Albans. (Bell & Daldy.)—His volume offers a popular epitome of the numerous wars which have, during a long succession of ages, desolated the Tauric Peninsula. It reminds us, also, of all the traditions that haunt those bleak and barren shores, which supplied the idea of the 'Iphigenia in Tauris' of Euripides. There, on the rock between Balaklava and Sebastopol, Pylades and Orestes became the type of true friends. There the Scythian fought with the Greek, the Hun with the Italian, the Tartar with the Russian; and now the Russian again with one race of the East, and two of the West,—united to dispossess him. Dr. Grant preludes his admirable narration by saying that, in the Crimea,—

"the natives of opposite climes and habits have settled side by side in strange disharmony, the colonist or merchant decorating the coast with the refinements of southern luxuries, while behind him the Scythian or wandering Tartar has maintained his nomad habits, pitching his tent and pasturing his herds of sheep or horses in the outstretched steppe, as if he were hundreds of miles from the reach of civilized life. It is just this diversity that strikes the traveller now. He meets with the sweepings of nations. He sees a motley group of inhabitants from all surrounding countries, turbaned, fur-capped, hatted, or veiled; in robe, jacket, sheepskin, or coat, walking the same street; sometimes a picturesque

Tartar town, with its mixed Byzantine and Chinese architecture, deep circular-headed windows, grey historic walls, tapering and decorated minaret, or its feudal and castellated fort, side by side with some miserable Russian modernism of a whitewashed town; all proclaiming the incongruous fate and varied fortunes that cling, like a Nemesis, to this interesting, but unfortunate peninsula."

The importance of the Crimea, as a territory, is more completely shown in this little volume than in any other that we have seen.

Description of the Crimea.—[*Description de la Crimée*]. By J. H. Schnitzler. (Paris, Berger Levrault.)—In the literature of the War, M. Schnitzler's monograph takes high rank. It is based on unexceptionable authorities—it is critical—it is systematic—it is comprehensive and clear. The author originally designed his work as a light in the path of the French army whenever it should quit its ground before Sebastopol to chase the Russians through the Crimea; unhappily, neither he nor any other writer warned the Allies in time of the fearful chances they must incur in such a siege as they have undertaken. But, however late, real information is always opportune. M. Schnitzler, indeed, has not inspected for himself the roads and military works of the Tauric peninsula; but his examination has been aided by the most competent testimony; and thus the volume has acquired a solid and positive value above the interest which any work on the Crimea, from an unknown pen, must now possess. To say that among the numerous compilations recently issued in France and England, on the chief topic of the war, M. Schnitzler's is the most historical in tone, and commands most reliance, is only to give the memoir its proper importance.

Intimately acquainted as M. Schnitzler is with the political action of Russia, the reader will be anxious to learn how he estimates the defences of Sebastopol. On this point a French voyager of the last century is quoted, who understood the importance of Sebastopol, and to some extent predicted the present contest. His words were:—"These roads constitute, perhaps, in a political sense, the Russian object, which Europe should most attentively keep in view. . . . There will be struck the blows that will menace Constantinople." Were not these lines, says M. Schnitzler, written as a preface to the events we are now witnessing? He proceeds to describe, in detail, the structure of Sebastopol—its wonderful means of defence—its complete armament of batteries, fleets, and military lines, perpetually refitted from the great arsenals of Russia, far in the rear. This, however, is only one section of his compact volume, which embraces a topographical and geographical view of the whole peninsula—its harbours, roads, and routes of communication with the main body of the Empire. It may therefore serve the purpose of a military guide-book, to prepare future campaigners in the Crimea for the perils, as well as for the facilities, in their way. No nation can afford to plunge twice into the dark:—we have already sent our Curtius into the gulf, and the gulf is open still.

Major E. B. Hamley has published, on a folding sheet, a series of sketches of *The Position on the Alma*,—so arranged as to present a view of the entire battle-field. The Major was on the spot, and made his drawings on the day following the glorious victory achieved by the Allies; and his picture bears few traces of the deadly conflict save such as are absolutely melancholy in their interest. But the natural features of the scene—as they will haunt the imaginations of men for ages to come—are vividly preserved in Major Hamley's sketches.

OUR LIBRARY TABLE.

The Literary Life and Correspondence of the Countess of Blessington. By R. R. Madden. Second Edition. 3 vols. (Newby.)—There is new matter in the second edition of Dr. Madden's "Life"; and among this, we learn, are several new letters. We notice, too, that a remonstrance or two made in the *Athenæum* have been answered by the omission of the passages protested against, and that a few anecdotes, interwoven into our criticism, have been introduced into Dr. Madden's work, the courtesies of acknowledgment being duly observed. But the new matter contains nothing that it suits us to extract just now, or that would justify a return to the work in the form of lengthened criticism. Many of the errors, misprints of the first edition, remain uncorrected. To instance:—Mr. Kenyon, who is, happily for his friends, living and well, is now, as formerly, commented on in that past tense which befits defunct worth and hospitality;—Mr. Tom Taylor is still credited with a son, as partner in the editorial cares extended by him over poor Haydon's *Life and Journals*;—Shelley, who, as a stranger to Lady Blessington, had no more business to a chapter in this book than Sydney Smith, is still set down as having written "Lastrozzi" instead of "Zastrozzi." There is more than common slovenliness in all this; a moderate exercise of care would have corrected errors betokening such ignorance of the current world of London society and letters; and if Dr. Madden was himself indisposed to see after the spelling, it is to be presumed that Mr. Newby's staff comprises some of those useful men called "readers," who, if duly trusted, would, at least, guard a book like this from such blunders. The circumstance of Lady Blessington's "Life" having reached a second edition betokens the possibility of its living as a contribution to our literary history of the century; and hence, discretion and care should have been exercised in preparing it for a permanent existence.

Experimental Researches in Electricity. Vol. III. By Michael Faraday. (Taylor & Francis.)—Following out the plan observed in the two former volumes, of collecting together all the memoirs which have been published in the Philosophical Transactions, and papers which have appeared in scientific journals, Dr. Faraday has brought together his labours for the last ten years in the present volume. These embrace the experiments on the Magnetization of Light, Magnetic Polarity, the Discovery of Diamagnetism, and an examination of the Magnetic conditions of all matter; and in addition, several valuable argumentative papers on lines of magnetic force, on ray-vibrations, the nature of force, &c. The three volumes of 'Experimental Researches in Electricity' now published contain a series of remarkable investigations, which certainly offer the most striking evidence of the value of inductive philosophy that has ever been published in the English language.

Frank Hilton; or, the Queen's Own. By James Grant. (Routledge & Co.)—A reader on the look-out for a novel crammed full of incident, excitement, and the wildest adventure, will find in 'Frank Hilton' what he desires. It is clever,—some of the descriptions of Eastern and desert scenes are even beautiful,—but the incidents are too wonderful and too rapid to give them much chance of being relished on the first perusal. The story is built up like a castle in the clouds:—the impossibilities are bridged over with all the smoothness of a dream. There are neither Jinns nor magicians, as in the 'Arabian Nights,' to assist when matters come to "a dead fix"; but in return, the heroes, the heroines, and all connected with them, are endowed with *ten* lives, and the faculty of turning every one of them to the best account. The reader is carried on breathless to the end of the book, and will feel sorry when it comes to a close. The only drawback he is likely to find upon his satisfaction will be the type and printing, which are in Mr. Routledge's worst style of the art.

The Honeymoon. By Alfred W. Cole. (Blackwood.)—A series of short sketches, which read

like the plots of so many genteel farces. The book will serve its turn to beguile the time in a railway-carriage. There is a well-bred, gentlemanlike feeling throughout; but the book is rather mild than sparkling.

Stanhope Burleigh; or, the Jesuit in our Homes: a Novel. By Helen Dhu. (New York, Stringer & Townsend; London, Low & Co.)—'Stanhope Burleigh' is less a novel than a howl of terror at the progress the Jesuits are making in America, under cover of the free toleration afforded to all sects and denominations of theology and the absence of any state religion. Jesuits have had from their foundation the character for being spiritual foxes,—“wise as serpents” in their generation,—endowed with a facility in the accomplishment of their ends which distances and defies all competition. In former days, clever men were accused of sorcery, by way of explaining their success and consoling the self-love of less fortunate people; to-day, it is the fashion to call it Jesuitism. Upon the showing of this very book, it is allowed that the Jesuits have obtained their mysterious influence by means of the strict, compact discipline of their order, by having a definite object, and pursuing it with a persistence that nothing can weary and a sagacity that looks superhuman only because it is not darkened and distorted by the refraction of self-love and individual interest. We are not of the number of those who fear Jesuitism or any other conspiracy against the general liberty of mankind:—we believe the whole to be greater than the part. The machinery of Jesuitism may be perfect; but its object contains within itself the germ of limitation and decay,—it aspires to regulate the education of men and to keep the mind of the many in subjection to the dictation of the few, and those few the company of their own order. Their abnegation of self and individual interest are only merged in the interests of the order. But humanity is greater than Jesuitism. Our great objection to books of declamation like the one before us, is that they neglect to recognize the great fact, that man's own cowardice and moral weakness can alone injure him:—if a man will be true, “the Truth will make him free,” let all the Jesuits in the world be leagued together to prevent it. The plot of 'Stanhope Burleigh' is laid in 1848, and begins with the expulsion of the Jesuits from Sardinia and the flight of the General of the Order to America. The first scene is very like some of the melo-dramas which have had a thrilling success at the Princess's Theatre:—a tall “grey octagon tower” is described, with “moving platforms,” “trapdoors,” “secret pannels,” and all the resources of stage machinery. Here the Padre Jaudan, the General of the Order, is “discovered,” when the curtain rises, “sitting, late at night, beside a small bronze table, of antique sculpture, over which hung a silver lamp.” He is dressed “in a robe de chambre of the purple velvet of Genoa, lined with crimson satin, and confined at the waist by a cord of the same colour, from which was suspended a rosary with beads of jet and links of gold, and at the end glittered a cross of brilliants, set in silver. On his left breast was the broad crimson cross,” &c. The Padre, thus elaborately costumed, was expecting to have to fly for his life at a moment's notice, and he had not even a valet de chambre to be impressed with his splendour. We doubt whether Jesuits in real life would wear such fine clothes on such an occasion.

Nicholas Ferrar: Two Lives, by his Brother John and by Dr. Jebb. Now first edited, with illustrations. By J. E. B. Mayor. (Cambridge, Macmillan.)—Of late years, Cambridge has become a theme for antiquaries and illustrators. Messrs. Heywood, Gunning, Cooper, Prickett, Peacocks, and many more have added to our stores of information on this worthy and not outworn subject. In the footsteps of these writers Mr. Mayor is content to tread,—but to tread in no servile mood. His present work is not very important or very interesting, yet it contains some curious particulars of Cambridge life in the seventeenth century, and will furnish to more powerful and picturesque writers a few hints and details which may figure in a general history of the age with effect.

The Town Garden: a Manual for the Manage-

ment of City and Suburban Gardens. By Shirley Hibberd. (Groombridge & Sons.)—To the dweller in cities, in whom the first brightness of a love of what is beautiful is not yet wholly dimmed, this volume will be welcome. Mr. Shirley Hibberd declares that it is our own fault if we have not healthy plants and flowers in our town gardens; there being a great number of these which will flourish in a town atmosphere in spite of smoke. We are glad to hear it, and to learn how these may be chosen and trained. Domestic life has few sweeter solaces than the innocent pleasures of gardening. Of course the culture of flowers in close neighbourhoods requires greater care and more assiduous attention to make up for the absence of sun and air. But who will grudge this necessary care? Beauty is always worth its cost. In his chapter on “Pests,” Mr. Hibberd makes some remarks on a certain domestic animal much petted by maiden ladies, which will seem to these latter atrociously cruel. “What rabbits are to men,” he says, “cats are to grape-vines; they nourish and they are wholesome!”—from which we are left to infer that the proper use of poor tabby is to serve as manure for the vine, a doctrine against the practical application of which our gratitude to Mr. Hibberd shall not prevent us from entering a solemn protest.

The Crystal Palace Game: a Voyage round the World. An Entertaining Excursion in Search of Knowledge, whereby Geography is made Easy. By Smith Evans. (Davis & Co.)—The idea of this little work is capital, the execution less so. By means of a simple game, to the comprehension of which the youngest child in a nursery school-room is equal, it turns the acquisition of knowledge into a play. But it requires a teacher. A “Key” to the mystery is sold with the board; but this Key is of little use, as it asks a great many questions without giving answers; and in place of necessary information, we have not unfrequently bad puns and wretched street slang. Take the following balderdash by way of illustration—(the ship is supposed to have arrived at the Antipodes):—“Read the Tables, and reflect on the vast extent of the British Empire, ‘on which the sun never sets’—to which curious notion add, ‘nor the tax-gatherer goes to bed!’ Well may our gracious Queen be proud of her dominions, in which slaves cannot live. Sing ‘God save the Queen’—if you can. You are also at liberty to turn two summersaults, by way of exemplifying the revolutions of the globe. Suppose you were shot through the tunnel, what a glorious ‘bore’ it would be!” Surely Mr. Evans cannot think this pleasantry! Take one other example of his style—(the vessel has now arrived in the Gulf of Mexico): “Whilst flowing on with the stream, and all apparently serene, the ship suddenly strikes on a rock and is wrecked.” The purchaser will do well to put the “Key” into the fire. Without it the board is perfectly intelligible; and the acute teacher who rewards good conduct by the ‘Voyage Round the World’ will know better what to explain to his pupils, so as to engage their interest in the places and events described than the book can tell him.

The Confession of Faith; the Larger and Shorter Catechisms, with the Scripture Proofs at large; together with the Sum of Saving Knowledge. (Edinburgh, Seton; London, Whittaker.)—The authorized formularies of the Church of Scotland, with all their panoply of Scripture-proofs, have never been printed in a more satisfactory or readable form. Here they are, in the hardness impressed upon them by the period in which they took their rise. Not even the typography of the Edinburgh University Press can invest the Solemn League and Covenant, or the Directory of the Westminster Assembly, with anything like an attractive external character,—as to their real, substantive, and solemn meaning, we presume not to deal with it. Whilst we give this praise to the typography and form of the book in general, we hope we may be allowed, without offence to any sensitive friend of the rights of Scotland, to inquire what may be the meaning of the peculiar form in which the kingly crown and the royal arms are presented on the title-page? We say nothing of the regal animals on each side—which is a sore subject, we

believe, to those who are deep in Scotland's heraldic grievances:—but may we ask, what has happened to the royal arms in Scotland? They look, for all the world, as if they had been subjected to centuries of hydraulic pressure. If the empire of Russia had been piled upon the top of them for years past, they would scarcely, we should think, have assumed more of the pancake character. If this be not one of the Scottish rose points, regard for Art, as well as some true conception of our national dignity, ought to stir up the good people of Edinburgh to let us have a more adequate representation of the crown and the quarterings, under the protection of which the Firths of Forth and Tay have as yet been spared the visitation of a hostile Russian fleet.

The History of Christian Churches and Sects, from the Earliest Ages of Christianity. By the Rev. J. B. Marsden. Part V. (Bentley).—The conclusion of the Society of Friends, the Greek Church, the Gnostics, the Huntingdonians, the Independents, the Church of Ireland, and the Irvingites occupy this part of Mr. Marsden's volume. Subjects of vital moment and interest, not only in the past but in the present, are connected with almost every one of these religious bodies. But the author is too much in a hurry to pause, even where his readers would most desire him to be communicative. The article on the Quakers is the best, and that on the Greek Church the worst, we have yet seen in this book. The history of the Greek Church for the last two centuries, including its present condition, which is most nearly, as the author sees, connected with the present war, is dismissed in a quarter of a page; and woe betide the miserable wight who supposes that he can obtain any idea of the actual position and relative circumstances of the Church of Ireland from what the author has written upon that subject. In a certain fairy tale we read of a garment which a tailor put together with a red-hot needle and a burning thread. It did not last long; nor will the author's 'History of Christian Churches,' unless he abates a little of his fiery haste and inconsiderateness. We wish he would do so; for the subject is a good one, and the author can do better than he does here.

The World a Workshop; or, the Physical Relation of Man to Earth. By Thomas Ewbank. (New York, Appleton & Co.)—We have heard a professor in one of our Universities describe the Deity as "a divine factotum." Mr. Ewbank falls not far short of this eccentric style. In his effort to be familiar, he arranges the world as a factory, with an overseer and operatives, combining to produce one result. Having adopted this plan, which is bad, he proceeds to its development, which is not original. There is a theory somewhere proposed and argued, but its principles have eluded us; and all we can make out of the volume is a confused view of the productive processes continually taking place on our terraqueous globe. Mr. Ewbank's error arises mainly from his resolve to esteem all things as inferior to chemistry and mechanics. These sciences, conducing to "the elaboration of matter," include the entire design of our mundane economy. All else is subordinate or illusory. But, unless it be to exalt material industry, we do not see why Mr. Ewbank is so fervent or so positive. And if it be so to exalt the industrial arts, that he has composed this ingenious treatise, let us suggest that no one can produce a philosophical essay without proving that "the elaboration of matter" is not the highest function of man on earth.

A "ruby edition," in one volume, of *Moore's Poetical Works* has been issued by the Messrs. Longman—a very close, portable, and useful edition for travel or reference. The type, though small, is singularly clear. But why not the "emerald edition"?—Dr. Forbes has reprinted *The Tour of Mont Blanc and Monte Rosa* from his larger work 'Travels in the Alps of Savoy.'—A series of pleasant papers have been gathered from various sources by Mr. Dudley Costello, under the title of *Stories from a Screen*.—The fourteenth and fifteenth volumes of *The Illustrated History of England* have appeared.—Sir William Napier has reprinted, with some additions and corrections, his extracts from the 'Peninsular War,' under the title *English Battles and Sieges in the Peninsula*.—

We have before us reprints of *The History of the Life of Thomas Ellwood*, the friend of Milton and Penn, with the supplement by Joseph Wyeth,—*Memoir of Vice-Admiral Sir Jahleel Brenton*,—*The Forger's Wife*, by Mr. John Lang,—Part I. of "Works of the Rev. Dr. M'Crie," edited by his son, and containing his *Life of Knox*,—Vol. IV. of the *Select Works of Dr. Chalmers*,—and the April edition of *Webster's Royal Red Book*.—The various Libraries have received their usual additions. Messrs. Chapman & Hall's "Select Library of Fiction" has been enriched by Mrs. Gaskell's *Cranford*, and Miss Mulock's *Ogilvies*,—Mr. Hodgson's "Parlour Library," by Margaret Maitland and *The Castle of Ehenstein*,—Messrs. Routledge's "Railway Library," by *The Hour and the Man*.—We have on our table a reprint of Capt. Marryat's *Frank Mildmay*,—Mrs. Stowe's *Tales and Sketches of New England Life*,—and two short tales, which we infer are reprints, though we are not sure, *The Sisters* and *Jonas Clint*, both from the press of Messrs. J. & J. Parker. Mr. Havet's *Complete French Class-Book* re-appears in a "new and improved" edition.—The following have appeared in second editions:—*Poems*, by Mary Brotherton,—*Favourite Song Birds*, by H. G. Adams,—*Practical Illustrations of the Principles of School Architecture*, by Henry Bernard,—*London Tradesmen's Tokens* (Beaufoy Cabinet),—*Manual of Arithmetic*, by Messrs. Galbraith & Haughton,—Archdeacon Hare's *Vindication of Luther*,—the Bishop of Oxford's *Rome; Her New Dogma and Our Duties*,—and Mr. Headland's *Essay on the Action of Medicines in the System*.—Prof. Johnstone's *Analysis of Soils* appears in a third edition,—and Mr. Montgomery's *Omnipresence of the Deity* in a "twenty-eighth edition."—We may also announce the publication, in a separate form, of the *Dublin Journal of Industrial Progress*, and *Journal of Social Progress*, both edited by Mr. W. K. Sullivan.—*The Kilkenny and South of Ireland Archaeological Society* have published their "Proceedings and Transactions" for 1854.—Among recent issues of works in parts we must announce the appearance of Part XII. of Dr. Smith's *Dictionary of Greek and Roman Geography*,—of Part IV. of the *Dictionary of Architecture*, by the Architectural Publication Society,—of Parts III., IV., and V. of Mr. Hatton's *Water-Colour without a Master*,—Part VI. of Mr. B. R. Morris's *British Game Birds*,—Part XXVII. of *The English Cyclopædia*, conducted by Mr. Charles Knight,—Parts V., VI., VII. of Mr. G. Barnard's *Theory and Practice of Landscape-Painting in Water-Colours*,—and Part XIV. of *The Land we Live in* (Orr & Co.).

LIST OF NEW BOOKS.

Acton's Modern Cookery, new edit. 8vo. 7s. 6d. cl.
Ainsworth's Ballads, Fantastic and Humorous, illust. 3s. 6d. cl.
Black's Tourist's Guide to Derbyshire, 2mo. 1s. 6d. cl.
Black's Tourist's Guide to Hampshire and Dorsetshire, 18mo. 1s. 6d.
Blackstone's Commentaries, abridged by Warren, post 8vo. 18s. cl.
Blakey's (R.) Angler's Song-Book, 8vo. 2s. 6d. cl.
Blunt's (J. H.) Atonement, 8vo. 5s. cl.
Bowman's Practical House Book of Med. Chemistry, new ed. 6s. 6d.
Campbell's Pleasures of Hot Weather, 8vo. 7s. 6d. cl.
Codd's Sermons to a Country Congregation, Second Series, 6s. 6d. cl.
Cole's (A. W.) The World in Light and Shade, 8vo. 3s. 6d. cl.
Constantine; or, Last Days of an Empire, by Spencer, 2 vols. 18s.
Cante's Divine Comedy, Notes on Translation, by Cayley, 10s. 6d.
Delessaux & Elliott's Street Architecture, Steel Engravings, 25s.
Des Carrières' French Idiomatical Phrases, 14th edit. 3s. 6d. cl.
Edison's Legitimate System of National Education, 8vo. 3s. 6d.
Excelsior, Vol. 3, cr. 8vo. 4s. cl.
Gurney's (A.) Iphigenia at Delphi, 8vo. 6s. cl.
Heathman's (Rev. W. C.) Switzerland in 1854-5, 8vo. 12s. 6d. cl.
Hogg's Instructor, Vol. 4, 8vo. 6s. 6d. cl.
Holden's History of the Colony of Natal, Maps, 8vo. 10s. 6d. cl.
Huyshe's (Miss J. M.) Bible Stories—Animals, 16mo. 2s. cl.
Irish Widow, by Author of 'Poor Paddy's Cabin,' 1s. 6d. swn.
James's County Veto's Manual, 12mo. 2s. swn.
Jowett's (Rev. H.) Practical Hymns, 8vo. 4s. 2 vols. 30s. cl.
Kenrick's (John) Phenicia, maps and illustrations, 8vo. 16s. cl.
Kidd's (W.) The Canary, people's ed. 12mo. 1s. swn.
Lardner's Museum of Science and Art, Vols 5 and 6 in 1 vol. 3s. 6d.
Lectures of the Young Men's Christian Association, 1853-4, new ed. cl. or 8vo. 4s. cl.
Leigh, Remarkable Incidents in Life of, by Strachan, 2nd edit. 4s.
Mozley's (Rev. J. B.) Augustinian Doctrine Predestination, 8vo. 14s.
Murray's British Classics, Gibbon's Roman Empire, Vol. 1, 9s.
Newcomb's (Rev. H.) Cyclopædia of Missions, new edit. 8vo. 18s.
Noble's (Dr. D.) Elements of Psychological Medicine, 2nd edit. 10s.
North and South, by the Author of 'Mary Barton,' 2nd edit. 21s.
Pike's Memoir and Remains, ed. by J. B. and J. C. Pike, 6s. 6d.
Post Office Directory, Lincolnshire, royal 8vo. 10s. cl.
Protestant Martyrs, by the Rev. R. Maguire, 24mo. 2s. cl.
Riego's (Middle) Crochet Book, 14th Series, square 1s. swn.
Rival Roses, by the Author of 'Royalists and Roundheads,' 31s. 6d.
Run & Read Lib. 'Pilgrims of New England,' by Mrs. Webb, 1s. 6d.
Scott's (W.) Sermons on Various Subjects, cr. 8vo. 2s. 6d. cl.
Stowe's Sketches of American Life, 32mo. 1s. cl.
Trench's Memoir and Remains, by Dr. Andrew Thompson, 2s. 6d.
Trip to the Trenches in February and March, 1855, 2nd edit. 7s. 6d.
True Story from Modern History, 4th edit. 32mo. 5s. cl.
Twombly's Considerations on Tactics and Strategy, 2nd edit. 6s.
Twining's Types and Figures of the Bible, 4to. 21s. cl.
Wheeler's (G.) Homes for the People, cr. 8vo. 3s. cl.
Williams's Sermons on the Epistles and Gospels, 2nd edit. 16s. 6d.

THE JOURNALISTIC REVOLUTION.

SOME few of the consequences of the abolition of the newspaper stamp are already seen. Among our established contemporaries in London, there is much reserve: the daily papers withhold to the last moment their declaration as to modifications, if any, which they may propose to make in price or mode of publication. The weekly papers are, for the most part, equally secretive; only one here and there—such as *Lloyd's Newspaper*—announcing that the penny which the Government presents to them,—so far as concerns the unstamped impression,—they will in turn present to the public. But there is a host of new papers. Messrs. Willett & Ledger announce a penny newspaper; and there are other such, less authentically rumoured. There is a twopenny illustrated paper, the *Illustrated Times*,—of which a number is out, lightly and prettily executed, and likely enough to run its heavily-weighted rival closely; and no doubt an existing penny illustrated paper will, for the future, give its readers news. There is Mr. Charles Knight's twopenny weekly newspaper already out. There is a new daily paper advertised, of "full size," for 2d.,—but everything else unknown, so that speculation is forbidden as to the effect of such a competition on the existing daily papers. All this,—and we confine ourselves to actual advertisements, without reference to rumours of other experiments,—indicates agitation in the newspaper market, and suggests some excitement in the news-vender's mind during the next few months, while matters are settling down.

It is possibly a mistake to suppose that, because persons can print cheaply under the new law, they are sure of a market. Probably most of those who can pay a penny for their literature were, to a great extent, already supplied with some sort of paper: certainly, the natural tendency, under such circumstances as the present, is to over-supply the market, and to risk a good deal of capital. Some few, however, of the new ventures may succeed: the settling down will be of those papers which are not really cheap, which are only of a low price,—between which things the difference is vast: the public will not have useless papers, even though they are offered for nothing. But it is a great point, and a great public benefit, for which we are indebted to Sir G. C. Lewis, that the public are here seeing the results of free trade, and being enabled to make their choice of good articles at their natural price. Worthless papers may be proffered, and even obtruded: yet the public will in the end take due care of itself. At any rate, there is no announcement—so far as we see—of vicious or seditious trash,—nay, not even of that great piratical paper, which, we were assured, and as Sir G. C. Lewis was half persuaded, would be prepared for us every morning at eleven o'clock, with the contents of all the other morning papers packed up in it, after being duly filched.

What, for the present, more interests us, because there is here more clearness of result and greater explicitness of intention, is the revolution which the change of law appears to be preparing in the provincial press. At Manchester, Liverpool, and Glasgow the revolution is announced in its completeness. At Manchester, one of the greatest of provincial papers, the *Manchester Guardian*,—the revenues of which were those of a Prince, and for which even Ministers are said to have written,—will cease to appear in its bulky bi-weekly form and at its ancient price of 4½d. per copy, and will become a daily paper, size of the *Times*, at the price of 2d. per copy. Its powerful rival in the same city, the *Manchester Examiner*, has challenged the new era quite as boldly: it is to come out on Saturdays, size of the *Times* and Supplement, at the price of 3d.,—while it will come out also daily, size of the *Globe*, for 1d. At Liverpool, the *Liverpool Mercury*, a great property, of large circulation, continues to be a bi-weekly paper,—but it reduces its price to 2½d., though one of its impressions is double the size of the *Times*. The *Liverpool Journal*, another prominent paper of Lancashire,—written with a power and knowledge which would honour any of our metropolitan contemporaries,—publishes on Saturdays an enormous paper for 3d., and daily a paper,

size of the *Globe*, for 1d.,—being the first paper to announce a penny news publication. Already, in Liverpool, there was a daily paper, the *Daily Times*, which reduces its price from 3d. to 2d. At Glasgow an existing daily paper takes the same course; but there are no less than four penny daily papers to be published in the metropolis of Scotland, which is greatly to the credit of the spirit, if rather in excess both of the population and the means, of the modern Athens. The *Scotsman* advertises a sheet every morning at 1d., besides continuing as a bi-weekly organ of its party. The *Caledonian Mercury* is announced to issue daily at 1½d. The *Courant* promises something—we do not quite know what, the *Courant* is so “canny” and cautious in its expressions,—but, at least, something daily. The *Edinburgh Guardian* (a young paper, which told the world that it would equal the *Spectator*, *Ecaminer*, and *Leader*, of London,) consents to die, but re-appears as a *Daily Express* at 1d. Then, in Glasgow, in addition to the existing daily paper, a *Daily News* is attempted, at what Mr. Richard Swiveller called “an absurdly low price,” and a *Morning Bulletin* is to be sold at 1d.,—while a *Glasgow Times* looms in the distance as a daily paper. Of press doings in other large provincial towns we know nothing very authentic; but it is obvious that what can be done in Manchester can—and probably will—be done in Birmingham, in Leeds, and in Sheffield. In Dublin we find that the historical *Freeman* is to come out daily at 1d., while Irish weekly papers announce large reductions,—the *Nation*, for instance, reducing its price from 6d. to 4d.

From these circumstances it would appear as though newspaper people were more energetic in the provinces than in London:—for if a penny morning paper is possible in Liverpool it would appear to be more likely to succeed—just in proportion to population—in London. The London journalist may perhaps be disposed to account for the contrast by resorting to the tone which he took in his communications with members of Parliament during the discussions on the bill,—he may say, “They are all pirates in the provinces, they live on us, and are therefore at no expense.” But, from what we can make out, on examination of one of these daily papers of the provinces, we cannot see that the charge is well founded. It is, of course, not to be expected that the provincial paper will always—in every respect—be equal to the London paper; and this may be said apart from any question of resources: for even although the same man may write for a Manchester paper and for a London paper, he will necessarily write his best and express his largest convictions in the paper which takes the national point of view and which addresses a nation. It is also pretty clear that no single sheet—whether metropolitan or provincial—can attain to the perfection of the broad and all-embracing *Times*, even in the mere newspaper aspect. But a daily paper published in Liverpool or Manchester may, nevertheless, be a production useful to its locality and creditable to the English intellect.

As to the great question about Piracy—on which some of our friends excite themselves a great deal—we confess we see little cause for alarm. The *Athenæum* is probably one of the papers most highly favoured by the professors of paste and scissors. Most of the provincial journals owe us something: we read for them and write for them without fee. They adopt our opinions and borrow our correspondence. They extract our extracts and copy our gossip—very often with, sometimes without, acknowledgment. But we do not complain. We seek to be useful to our own readers—and have no objection to be useful to the readers of other periodicals. As to the piracy of news, we suspect there is really less of it than many people think.

The reports of proceedings in Parliament on Friday nights appear in the Saturday morning paper at Liverpool, and other distant towns, without any aid from the London press. The Telegraph Companies collect and sell the foreign news to the Provincial as well as to the London papers. These Companies have their corps of stenographers in the galleries of Parliament, and their correspondents in Paris, Vienna, Brus-

sels, Berlin; in short, at every centre of news—commercial and political—they have active and able collectors of it; and they telegraph it incessantly, intercommunicating it to all parts of Europe. From Vienna they send it to the *Times*, sometimes taking the news from the Vienna papers;—and we scarcely see that it is more piracy to fasten, on occasion, on some semi-official announcement of the *Times*, and send it on to Manchester or Liverpool, than it is for the same collectors of news to seize on paragraphs in the *Moniteur* or *Oest Correspondenz* and transmit them to London. The chief papers in the provinces are almost independent, in parliamentary and foreign news, of the London press; and if, on a second day, a fully-reported speech, or an excellent paragraph, or a smart article, is copied in *extenso*, what is that but the system which has always prevailed, and which is an advantageous system so far as regards the reputation and the sale of the journal from which the extract is copied? There is no immediate piracy; and, to that extent, we see in the number of announcements of Provincial cheap papers nothing but the legitimate issue of a change in the law. These cheap Provincial daily papers are mostly excellent in their local characteristics, and contain prompt and full supply of reports of markets and of local proceedings generally. They will probably obtain large circulations; and politicians must begin to see that England is getting into the condition, in regard to the press, of the United States, where the political student must look to the New Orleans as well as to the New York journals in order to understand whether public opinion is working. It cannot be otherwise than an advantage to our social life to see the Provincial press thus elevated in importance; and we can see no reason why, in the competition, journalistic talent should be confined to the London press. In point of fact, that is not the case. Nearly all the successful journals of the great towns—the *Manchester Guardian*, *Liverpool Mercury*, *Leeds Mercury*, *Liverpool Journal*—have been managed and edited, like all successful journals in London and Paris, by their proprietors, who, of course, reside near their papers. But the very circumstance of their success in a direction where political and literary as well as commercial talents are required, suggests their intellectual equality with the London journalist of the ordinary calibre; and, as is very well known, every one of these great journals, affluent enough to command literary skill and political capacity, has its London editors or correspondents, many of whom are at the same time contributors to London journals of first class character. In future, therefore, we shall have to look at the Provincial daily paper—with its 20,000 or 30,000, or perhaps 100,000 readers—with more interest,—with, at least, not less interest, in its kind, than we attach to the London morning paper.

FOREIGN CORRESPONDENCE.

Ypres.

AN hour or two were spent by me so agreeably the other day at Ypres, that for the benefit of travellers “out” or “home” I beg leave to say as much in a paragraph;—seeing that Ypres has been out of the beaten way till lately, when the line of railroad from Bruges (*viâ Courtrai*) to Poperinghe was opened,—and seeing that the old town is spoken of in the Red Book as a place scant of attractions—the Town Hall excepted.—To begin, this exception is not made enough of. There could be hardly mentioned a single building of simple design better worth the trouble of a long day’s journey (were that needed) than this same Town Hall at Ypres. Prints and water-colour drawings have already shown to the English lover of architecture that it does not compete with the *Hôtels de Ville* of Brussels and Louvain in richness of pannel and pinnacle,—but no print or picture had prepared me for the grandeur of its effect, caused, I fancy, not wholly by scale, but also by that general justness of proportion and harmony of detail, the charm of which strikes at the first glance. What hints might not our domestic and municipal architects derive from the upper story of this grand building!

The lower one, with its range of pillars and piers, is poorer,—perhaps it has been tampered with;—but the central tower is grand without heaviness, and commands the thoroughfares of the town in a manner dignified enough to make English pilgrims sigh, who recollect how systematically, when we have an object of interest, it is pushed away into some by-place, so that no good view of it is attainable. Behind the Town Hall stands the Cathedral of St. Martin. The Red Book makes light of this building; yet the interior is almost as richly dressed with marbles as the Antwerp Churches. The tower is in the style of the tower at Malines, and purer in some of its details, while the extensive and excellent restorations in progress at one of the transepts are calculated to engage any pilgrim ecclesiologically disposed.—But, besides these two great buildings, a stroll through Ypres emboldens me to fancy that it may have many other street-pictures to show. The old manufacture which bears the name of the town, (which Porson so whimsically derived from the Greek pronoun, and from which he more whimsically still derived *King Pepin*), *diaper*, has shifted its seat from Ypres to Courtrai, where capital table-linen is now manufactured; but some of the old diaper-makers’ houses have gables and gateways,—and it is fair to guess, inner details, too,—as good as Ghent or Bruges can furnish. Out of these houses look the handsomest faces I have seen in Belgium. A young Sister of some holy order, in her black, white, and blue dress, who was endeavouring, like a prudent hen, to gather her flock of restless children within the shadow of the school archway, will be remembered for her countenance of fresh, grand beauty, such as could not be exceeded in an Italian town, where the very fish-wives and fig-sellers seem so many Pastas!—This passing allusion to comestibles reminds me of another good impression made on me during that noon at Ypres:—a dinner at “The Golden Head,” where the bread, fish, and vegetables were of memorable excellence, capitally cooked, and presided over by an urbane and intelligent host, and where the table-talk, as I have more than once ere this remarked is the case in Belgium, ran on flowers and gardens and farming,—pleasanter topics these for the passing traveller than that eternal comparison of hotel charges and hotel bills which makes up the staple of such casual dinner conversation in Germany!—Such are some of the features, the remembered pleasantness of which makes me beg a corner for Ypres. C.

OUR WEEKLY GOSSIP.

THE Twenty-fifth Meeting of the British Association for the Advancement of Science is fixed for Wednesday the 12th of September, at Glasgow. The Duke of Argyll will preside. The following general officers are appointed for the year:—Vice Presidents, The Very Rev. Principal McFarlane, D.D., Sir William Jardine, Bart., Sir Charles Lyell, Messrs. James Smith and Walter Crum, and Profs. Graham and Thomson; General Secretary, Col. Sabine; Assistant General Secretary, Mr. John Phillips; General Treasurer, Mr. John Taylor; Secretaries for the Meeting at Glasgow, Drs. J. Strang and T. Anderson, and Mr. William Gourlie; Treasurer for the Meeting at Glasgow, Prof. W. Ramsay. The sectional officers will be chosen on the day of meeting.

We understand that at the Oxford Commemoration on the 20th inst., the Poet Laureate will be created a D.C.L. This honour will also be conferred on Col. Sabine, and Sir Charles Lyell.

At the next meeting of the Royal Society, Sir Roderick Murchison, Director General of the Geological Survey, will read a paper ‘On the Aerolite recently discovered in the Heart of a Tree at Battersea.’ This specimen, in part composed of meteoric iron, and in part of stony matter, has been acquired for the Museum of Practical Geology, and will be exhibited at the Royal Society next Thursday,—when Prof. Sheperd, of the United States, so distinguished for his acquaintance with meteorites, will also be present.

The Regius Professorship of Civil Law in the University of Oxford, recently vacated by the death of Dr. Joseph Phillimore, has been filled up by

the appointment of Dr. Travers Twiss, Vicar-general of the Archbishop of Canterbury, and recently Professor of Political Economy in the same University.

A certain basket of glass belonged to a certain *Alnaschar*, in a certain fairy tale, which the wisdom of ages has accepted as a type of wild projects and immoderate ambitions. That "brittle ware" and its morals have been brought back to us, as with a side-wind, by the plans for metropolitan communications lately submitted to the Government by Sir Joseph Paxton. These at first sight seem absolutely Oriental in their scope and sublimity,—resembling some decree of *Kubla Khan* in 'Xanadu' rather than a working project which has been laid before H.R.H. Prince Albert, and has obtained "his entire approval." To connect our scattered railway lines, and to ease the choked thoroughfares which traverse London, Sir Joseph proposes to establish a circular road, or girdle, ten miles three furlongs long, with lines of railway, "worked on the atmospheric principle," on either side of a crystal arcade, 72 feet wide, and 180 feet high, lined with shops. The plan further includes three new bridges over the river—one at Queenhithe, one at the Strand, one at Westminster. The roads, with arcades, &c., are to cross Kensington Gardens. The project is backed by a scheme for raising the required millions of money—and those precise calculations as to traffic, dividends, &c., which fall into rank so excellently on paper. The advantages are stated to be without stint or limit, besides the obvious one of economizing time and facilitating communication. Granted the arcade tenanted with shopkeepers and filled with shoppers, among other benefits to London, it is contemplated "to prevent the necessity of infirm persons going into foreign countries in winter." Are we wrong, when we come upon such a gravely-stated probability as the last, appertaining to the use of Crystal architecture on so gigantic a scale, in being reminded of *Alnaschar*? While we ask the question, however, let us bear in mind the first day of trial of locomotives on the Liverpool and Manchester Railroad, close by "the skew bridge" (as it is called in Lancashire) at Rainhill. On the bank above the iron road was collected the engineering wisdom and enterprise of England—*Nestors* as well as *Diomedes* of mechanical science—men of every age and of every degree of confidence in the new principle. "Sir," said one authority, venerable in years and high in renown, to his neighbour, who bowed to catch the oracle,—"I don't doubt that they can make the engines; but that they can ever make them keep the rail when they are made, is —" Ere the veteran could follow his "absolute is" by an adjective:—something dashed from under the bridge, with its smoke-flag flying,—rattled past him,—and was gone!—The riddle was solved—the doubt settled—the feat performed. Therefore, while we hint that Sir Joseph's plans seem Utopian, let us not be understood to commit the *Athenæum* to saying that it is impossible for ten miles of new shops to be tenanted with new tenants without ruin to the old quarters of the town,—nor that any delicate Lady may find a Madeira—a Malta—a Nice where Union Street was,—and a *Hygieia* fountain in a covered railway station over the Thames, somewhere about 3 P.M. on a November afternoon. With the question of finance we do not pretend to intermeddle, while dreaming over a dream.

A contemporary, whose "Table Talk" about the Lockhart Testimonial we corrected a few days ago, not content with being set right, returns to the subject, and, of course, gets deeper into error. "While correcting ourselves," he says, "we can also correct our contemporary"—meaning the *Athenæum*. He then goes on to tell his readers that the Right Hon. Sir Henry Ellis, whom we described as taking a deep interest in the "Testimonial," is not a Right Honourable and a Privy Councillor, but a simple Knight, who ought to be known to every man of letters as Librarian to the British Museum! Were it not that we know how painful this confusion of persons is to the parties concerned, we should not think it worth our while

to repeat, that the Sir Henry Ellis who is active in the matter of this "Testimonial" is not Sir Henry of the British Museum, and is a Right Honourable, a Privy Councillor, a K.C.B.,—and as the author of a history of Lord Amherst's 'Embassy to China,' published by Mr. Murray, is a man who "ought to be known to every man of letters."

The second exhibition of flowers and fruit took place on Wednesday last at the Royal Botanic Society's gardens, Regent's Park. Although the weather was uncertain and slight showers of rain alarmed the company, the attendance was very numerous. The gardens never looked to greater advantage; although the lilac and horse-chestnut had ceased to exhibit their flowers, the hawthorns and laburnums still retained their beauty. In the large tent the great objects of attraction were the orchids, which were both in excellence and number unusual. The fruit, as was to be expected, was not perhaps equal to the same exhibition in previous years. The rhododendrons, preparing for Monday's exhibition, excited a lively interest among the exhibitors. Seldom have they given more promise, and already the space devoted to them presents a blaze of colour of extraordinary beauty and variety.

On Wednesday next the second meeting of the Horticultural Society will be held,—this time the gathering will take place at the old classic ground of Flora, Chiswick.

Messrs. Low & Son ask our attention to what they call our "attack" on Dr. Andrews's 'Latin Dictionary,' and to the opinion we pronounced on the work some years ago. We have compared our opinions:—and abide by them. The statement that the Dictionaries of Dr. Andrews and Dr. Smith are mainly derived from the same sources, necessarily implies that the commendation bestowed upon one is to some extent applicable to the other. The points of superiority which we think Dr. Smith's Dictionary may claim, are its masterly treatment of etymology—its correction of mistakes in the original—and the skill displayed in its editorship. What we said as to the preparation of Dr. Andrews's Lexicon—as we stated at the time—was little more than simple inference from the statements in his Preface, supported by an examination of the contents, which was necessarily brief. Subsequent use of the book has revealed to us many faults,—faults for which Dr. Andrews is not always responsible: Dr. Freund must share the blame. Some of the blunders which we had marked on the margin of Dr. Andrews's 'Dictionary'—and which we took the trouble to trace back to the German original,—we found, on reference, that Dr. Smith had corrected. Such a discovery gave us confidence in the care and accuracy of the editor, and allowed us to speak in high terms inferentially of the whole work.

Strange things are to be learnt now-a-days:—Caligraphy, *Polichomanie*, French in six lessons, Fencing in one; but we never, till within the week, heard or read of an Ambition-master. Here, however, is the advertisement of such a parliamentary *Mr. Turveydrop*, literally transcribed from the columns of a morning paper:—

"Politics.—Any Gentleman whose ambition leads him to public life, and prompts him to soar above the characteristic mediocrity of modern representation when seats are sought to found a trade, or ephemeralise a speculation, can have his wishes promoted, and his ambition directed, by one who is qualified by education and Parliamentary experience.—Address, —"

—Perhaps, before he goes any further on the suggested way to fame, the "gentleman whose ambition leads him to public life," will ask Mr. — why any man should desire to "ephemeralise a speculation."

Mrs. Everett Green, as we are informed, is preparing for publication the 'Lives of the Queens of England of the House of Brunswick.'

An inquiry has lately been conducted before a select committee of the House of Lords for the purpose of ascertaining whether it may not be desirable to construct standard measures of length on the plan of Mr. Whitworth of Manchester; the principle being that the standard is obtained by measuring the distance between the perfectly flat ends of a solid bar having true surfaces. The present standard yard made by the Royal Com-

missioners, is so contrived that the dimensions are determined by measuring with the aid of microscopes the distance between two points, each about an inch from the ends of the bar, which is made of gun-metal. This is an extremely delicate operation; whereas, by Mr. Whitworth's machine, which measures to the millionth of an inch, standard measures can be constructed with very great accuracy, the test being that of touch, by which errors can be detected to the millionth of an inch. Mr. Whitworth explained his measuring machine to the Committee, and so satisfactory has his evidence been, that we believe the Committee have come to the decision of recommending "that his standard yard measure constructed of the same length as that of the Royal Commission, be legalized as the secondary standard for comparison with local standards of measure throughout the country, and that his standard foot and inch have the same sanction attached to them."

London is alive with illustrations of the war. At the "Gallery" in Regent Street, Messrs. Grieve & Telbin have added to their series of attractive pictures two new scenes—one representing a night attack by Gen. Pelissier's troops, and the other, Mr. Fergusson's new system of Fortification. The night attack is particularly spirited and exciting.—At the Great Globe, in Leicester Square, the large model of Cronstadt is being prepared for the events of the coming campaign in the Baltic. Even at the Surrey Gardens a fine model of Sevastopol has been erected for the amusement of holiday-makers.—Of the splendid picture at the Panorama in Leicester Square, we have already spoken; and a fresh view of its striking and raised surface has deepened our first impression of its artistic beauty.—In this place, we may announce the appearance of Part II. of Capt. Biddulph's 'Topographical Sketches of the Ground before Sevastopol, accompanied by an Explanatory Description,' showing the position of the Mamelon, the Malakof Tower, the Redan, and the connecting works. This is a very able and instructive work; though the form is a little too professional for general readers.

From Paris we hear that the French government has granted a fresh delay of three years for the completion of the two dictionaries—French and Arabic, and Arabic and French—for which two prizes of 5,000 francs each, were offered by a decree of the 29th of November, 1852. From the same place we hear that M. Lamartine—whose literary activity is most remarkable—is about to commence a series of contributions to the *Siècle* newspaper.

M. Cortambert, First Secretary of the *Société de Géographie*, has published a map of the celebrities of France, showing the distribution of talent over the country by indicating the birth-places of the great men. It appears, from this map, that the district of *La Manche* has produced the greatest number of poets, historians, philosophers and artists;—that the part of the country near the North Sea is the cradle of most of the great warriors;—that orators, naturalists, physicians and inventors were mostly born in the regions of the Mediterranean;—and that the number of politicians and lawyers is fairly balanced between the Mediterranean and *La Manche*.

The Town Library of Trieste is said to possess 772 different editions of Petrarch's Poems, and 123 of the works of Pope Pius the Second (*Æneas Sylvius Piccolomini*, Bishop of Trieste). The Library contains at present 24,000 volumes, mostly works on commerce, navigation, geography, &c. Last year twenty-two very rare editions were added to the collection of the works of Petrarch and *Æneas Sylvius*.

The old Guelphic castle of "Weibertreue" (well known by Bürger's ballad, 'Die Weiber von Weinsberg') is to be rebuilt, we read in the German papers, by the munificence of the King of Wurtemberg, who intends to establish in it a female Walhalla,—"*Eine Ehrenhalle für verdiente grosse deutsche Frauen*." Prof. Heideloff, the Wurtemberg architect, has suggested the plan to the King,—old, amiable Justinus Kerner, of Weinsberg (now, with Uhland, one of the patriarchs of the Suabian poets), supports it,—and the Queen

of Wurtemberg has accepted the patronage of the undertaking.

The famous controversialist, Dr. David Strauss, of Ludwigsburg (Author of 'The Life of Jesus'), has retired, we are told, from theological polemics, and has devoted himself to literary pursuits of a more peaceable nature. He is making minute and valuable researches as to the lives of the older poets and artists of his Suabian fatherland; and after having published some years since a very interesting biography of Schubart, the patriotic prisoner of the Hohen-Asperg, he is now preparing a work on the old Wurtemberg poet, Frischlin, who, after having been incarcerated for his various vehement writings in the Castle of Hohen-Urach, tried to escape, but in scaling one of the high walls broke his skull, and died in the attempt. Revolutionary characters, it appears, are still most attractive to the learned Doctor, even after having retired himself from the scene of agitation. Monographs of this kind, however, cannot fail to be of the greatest use to the history of German literature in general.

Among other objects of interest shown at the conversazione of the Royal Society last week, were a series of photographic copies of the magnetic registers at the Royal Observatory. These were of special interest in a double point of view, both as copies of photographs produced by artificial light, and as copies of records far too important in their bearing upon magnetic inquiry to risk the casualties of an engraver's office, and too nice in their details to be of value unless impressed as fac-similes. The perfection to which these copies have been brought by Mr. Glaisher, leaves little to be desired, many of them, even, being more vivid than the originals, the multiplication of which promises to be of scarcely less importance than the first application of photography to the registration of the magnets, which until then had been recorded by the usual method of observation, and was necessarily wanting to the continuity secured by Mr. Brooke's method by the application of photography. By a modification of the same process there were exhibited a collection of British ferns by Mrs. Glaisher, from specimens selected by Mr. Newman. These beautiful copies, the size of life, and perfect in all their details, promise to be of value to the botanist, to whose requirements they are better adapted than any that have yet been placed at his command. Their effect is that of delicate sepia drawings, and at the same time that the venation of the leaves is displayed with the fidelity and delicacy of the original, it is, as in nature, only to be detected on near inspection. Our acquaintance with the natural history of the ferns, and their peculiar elegance of form, is likely to be much increased by this valuable and interesting series, which, we understand, is in course of publication by Mr. Newman. The same process likewise supplied numerous copies of snow crystals, as observed by Mrs. Glaisher, and drawn and photographed by Mrs. Glaisher. The application of photography in this, one of its most elementary but important branches, promises to be an important feature in aid of philosophical inquiry, and is well worthy of considerable extension in its applications.

ROYAL ACADEMY OF ARTS, Trafalgar Square.—The EXHIBITION of the ROYAL ACADEMY IS NOW OPEN.—Admission (from Eight to Seven o'clock), 1s. Catalogue, 1s.
JOHN PRESCOTT KNIGHT, R.A. Secretary.

SOCIETY OF PAINTERS IN WATER-COLOURS.—The FIFTY-FIRST ANNUAL EXHIBITION IS NOW OPEN, at their Gallery, 5, Pall Mall East, close to Trafalgar Square.—Admission, 1s.; Catalogue, 6d.
JOSEPH J. JENKINS, Secretary.

THE NEW SOCIETY OF PAINTERS IN WATER COLOURS.—The TWENTY-FIRST ANNUAL EXHIBITION of this Society IS NOW OPEN, at their Gallery, 53, Pall Mall, near St. James's Palace, daily, from 9 till dusk.—Admission, 1s.; Season Ticket, 5s.
JAMES FAHEY, Secretary.

BRITISH INSTITUTION, Mall Pav.—The Gallery, with a COLLECTION OF PICTURES BY ANCIENT MASTERS and deceased BRITISH ARTISTS, IS OPEN DAILY, from Ten to Six.—Admission, 1s.; Catalogue, 6d.
GEORGE NICOL, Secretary.

GALLERY OF GERMAN ARTISTS.—The THIRD ANNUAL EXHIBITION of the WORKS of MODERN GERMAN ARTISTS, IS NOW OPEN daily, from 10 till 6.—Admission, 1s.; Catalogue, 6d.—Gallery, 168, New Bond Street, next door to the Clarendon.

THE SECOND ANNUAL EXHIBITION of the FRENCH SCHOOL of the FINE ARTS IS NOW OPEN daily, from 10 to 6 o'clock, at the Gallery, 121, Pall Mall, opposite the Opera Colonnade.—Admission, 1s.; Catalogue, 6d.

WIDOWS AND ORPHANS of BRITISH OFFICERS who fell in the WAR with RUSSIA.—The EXHIBITION of the ROYAL DRAWINGS and upwards of 1,200 Works of Art, by Amateurs and of the Artists, for the relief of these most interesting objects of their country's sympathy, IS NOW OPEN at BURCHINGTON HOUSE, Piccadilly.—Admission, 1s.—All the Works are for Sale.

CHALON EXHIBITION, SOCIETY OF ARTS.—This Collection of the Paintings, Drawings, and Sketches of the late JOHN CHALON, Esq.—R.A., with a selection from the Works of ALFRED E. CHALON, Esq., R.A., IS NOW OPEN, at the Society's House, Adelphi.—Admission, 1s.

PHOTOGRAPHIC EXHIBITION.—An Exhibition of the finest English, French and Italian Photographs IS NOW OPEN at the PHOTOGRAPHIC INSTITUTION, 168, New Bond Street.—Open from 10 to 5. Admission, with Catalogue, 1s.

THE BATTLE OF THE ALMA.—NOW OPEN, from 10 until 6, at the Egyptian Hall, Piccadilly, the GREAT PICTURE of this important Military Event, Painted by Mr. COOMANS, from studies made during four months spent in the Crimea during the present war. Admission, 1s.

ADAM AND EVE.—This great original Work, by JOSEPH VAN LERUUS, IS NOW ON VIEW at 57, Pall Mall, opposite Marlborough House, from 11 to 6 daily.—Admission, 1s.

ROYAL GALLERY OF ILLUSTRATION, 14, Regent Street.—Additional Pictures.—English Mortar Battery, the Redan and Ridge Pits, General Pelissier's Night Attack, and Mr. Ferguson's New System of Fortification are now added to the Diorama, 'The Events of the War.' The Lecture by Mr. Stocquer, Daily at 3 and 8.—Admission, 1s., 2s., and 3s.

PANORAMA of SEBASTOPOL IS NOW OPEN at BURFORD'S, Leicester Square, including the Fortifications, Encampments, the Attack of the Allied Armies, and the combined Fleets, and all the beautiful surrounding country. THE BATTLE of the ALMA and the BERNSE ALPS are also exhibited. Admission, 1s. each.

LONDON SEASON BY DAY.—On Saturday next, at 3 o'clock, Mr. LOVE will present, for the second time, his NEW ENTERTAINMENT, 'THE LONDON SEASON,' by day.—LOVE'S ENTERTAINMENTS.—VENTRILLOQUISM EXTRAORDINARY.—REGENT GALLERY, 69, Quadrant, Regent Street.—Mr. Love will appear every Evening at 8, except Saturday; Saturday at 3.—Monday and Tuesday Evenings at 8, and on Saturday Morning at 3. Mr. Love, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, called 'THE LONDON SEASON,' Wednesday, Thursday, and Friday, the ENTERTAINMENT, LOVE IN ALL SHAPES, to be followed by a ZOOLOGICAL CONCERT, and LOVE'S LABOUR'S LOST.—Pianoforte, Miss Julia Warman.—Stalls, 3s.; Arca, 2s.; Gallery, 1s.

ROYAL POLYTECHNIC INSTITUTION.—FOR ONE NIGHT ONLY, TUESDAY, the 13th inst., at Eight o'clock, A GRAND MUSICAL ENTERTAINMENT will be given by Mr. GEORGE BUCKLAND, assisted by the following eminent Artists, Messrs. T. YOUNG, MONTAGU SMITH, HENRY BUCKLAND, and GEORGE LAKE, consisting of SELECTIONS from the GLEES and SONGS of the late Sir HENRY BISHOP, and other COMPOSERS.

SCIENTIFIC

SOCIETIES.

ROYAL.—June 7.—The Lord Wrottesley, President, in the chair.—The Annual Meeting for the election of Fellows was held this day. The following gentlemen, recommended by the Council to the Society for election, were elected. There were thirty-eight candidates:—A. Connell, Esq., W. Farr, Esq., W. L. F. Fischer, Esq., I. Fletcher, Esq., W. J. Hamilton, Esq., J. Hawkshaw, Esq., J. Hippisley, Esq., J. Luke, Esq., A. F. Osler, Esq., T. Thomson, M.D., C. B. Vignoles, Esq., C. V. Walker, Esq., R. Wight, M.D., A. W. Williamson, Esq., G. F. Wilson, Esq.

GEOGRAPHICAL.—June 11.—Sir George Back, R.N., V.P., in the chair.—On the table was exhibited a collection of articles brought home by Mr. Bollaert, who has recently returned from South America, including specimens of the strata, coal and fossils, from the coalfields of Loto, in Chili; also, of the first fossil bones discovered in Chili; and a fine collection of Ancient Peruvian Pottery and Antiquarian Remains of Textile Fabrics, Ornaments, Utensils, Weapons, &c.; likewise specimens of Meteoric Iron, found in various parts of the Desert of Atacama.—'Narrative of a Trip to Harar, in the Somali Country, North-Eastern Horn of Africa,' by Lieut. Burton.—'On the Coal Formation of the Province of Concepcion, in Chili, South America; and on the Meteoric Iron of Atacama,' by Mr. W. Bollaert.

SOCIETY OF ANTIQUARIES.—May 24.—The Earl Stanhope, President, in the chair.—The ballot was taken for a Member of the Council, to fill the place of Sir Robert Inglis, deceased, when Mr. Edward Hawkins, Keeper of the Antiquities

in the British Museum, was unanimously elected. The Rev. Edward Maskell and Mr. Henry Farrer were elected Fellows.—Mr. Corner communicated some particulars relating to Anthony Copley, whose name occurs in one of the Society's proclamations, dated the 2nd July, 1603.

June 7.—Admiral Smyth, V.P., in the chair.—The President's nomination of Mr. Edward Hawkins to the vacant Vice-President's chair was read to the meeting. Mr. A. Henry Rhind and Mr. Thomas Batchelder were elected Fellows.—Mr. Bollaert exhibited a very curious collection of Peruvian antiquities, collected by him during a residence in South America.—Mr. Thomas Lott exhibited a curious Pedigree of the Irish family of Conans in Kildare, attested by several of the Archbishops and Bishops.—Mr. Corner communicated some further particulars relating to Anthony Copley.—The first portion of a memoir 'On the British Gun Trade,' by Mr. Josiah Goodwin, was read.

ZOOLOGICAL.—June 12.—W. Yarrell, Esq., in the chair.—Mr. Gould brought before the meeting two beautiful species of Humming-Birds, which he believed to be new to science. He stated, that they belonged to that section of the Trochilidae to which the generic appellation of *Heliothrix* has been given. Of this form only three species had been previously characterized,—namely, *H. auritus*, *H. auriculatus*, and *H. Barroti*. One of these new species, for which the specific name of *Purpureiceps* is proposed, is nearly allied to *H. Barroti*, but differs from that bird in having a much shorter bill, in the blue of the head being of a paler purple, and in that blue not being confined to the crown, but extending some distance down the nape of the neck. This species was obtained from the districts near Popayan. The second species, for which the name of *Phanolema* was proposed, has several characters in common with *H. auritus* and *H. auriculatus*. It differs, however, from both those species in the beautiful metallic green colouring, extending over the throat and front as well as the sides of the throat. The *habitat* of this species is on the River Napo.—Through the kindness of Mr. Yarrell, Mr. Gould next brought before the meeting a bird, which he conceived to be a new species of *Prion*, and which had been captured on the Island of Madeira, or on the neighbouring rocky islets, called the Desertas. Mr. Gould also exhibited five other species (forming part of his own collection), which he considers to belong to the same beautiful group, and which had been captured by himself during his voyages to or from Australia. The entire series present a great similarity in the colour of their plumage; but a great diversity in the breadth, or lateral development of their mandibles, as well as in the fringe-like pectinations of the base of the upper mandible, this latter character being much more prominent in the larger than in the smaller species of the group, in which, indeed, it is almost obsolete, if not entirely absent. Mr. Gould considered the members of this genus to constitute a very distinct group among the petrels, quite equal, in point of interest and value, to that of the *Thalassidromæ*. For this new species, indubitably distinct from all previously known, and the only one which ever has, as yet, occurred to the north of the line, Mr. Gould gave the name of *Prion brevirostris*.—Mr. Selater read a paper 'On some New Species of Ant-Thrushes (*Formicariinae*), from Santa Fé di Bogota, which he characterized under the following names:—*Grallaria hypoleuca*, *G. modesta*, *Chamaea mollissima*, *Formicivora callinota*, *Dysithamnus semicinctus*, *Pyrgilena* (?) *tyrannina*.—The Secretary read three papers, by Dr. L. Pfeiffer, containing descriptions, in his usual elaborate and careful style, of seventy-nine new species of shells, chiefly *Helicea*, in the collection of Mr. Cuming.

ROYAL INSTITUTION.—May 11.—Sir C. Fellows, V.P., in the chair.—'On Nature-Printing,' by Mr. H. Bradbury. Mr. Bradbury's lecture was very long and interesting—and of that special kind which is most difficult to condense. His history of experiments in the art was especially elaborate. He said:—"Nature herself, in her mysterious

operations, seems to have given the first hint upon the subject: witness the impressions of ferns so beautifully and accurately to be seen in the coal-formations. Experiments to print direct from nature were made as far back as about 250 years—it is certain that the present success of the art is mainly attributable to the general advance of science and the perfection to which it has been brought in particular instances. On account of the great expense attending the production of woodcuts of plants in early times, many naturalists suggested the possibility of making direct use of Nature herself as a copyist. In the 'Book of Art,' of Alexis Pedemontanus, (printed in the year 1572,) and translated into German by Wecker, may be found the first recorded hint as to taking impressions of plants. At a later period—in the 'Journal des Voyages,' by M. de Moncoys, in 1650, it is mentioned that one Welkenstein, a Dane, gave instructions in making impressions of plants. The process adopted to produce impressions of plants at this period, consisted in laying out flat and drying the plants. By holding them over the smoke of a candle, or an oil lamp, they became blackened in an equal manner all over; and by being placed between two soft leaves of paper, and by being rubbed down with a smoothing-bone, the soot was imparted to the paper, and the impression of the veins and fibres was so transferred. Linnæus, in his 'Philosophia Botanica,' relates that in America, in 1707, one Hessel made impressions of plants; and between 1728 and 1757, Prof. Kniphof, at Erfurt, who refers to the experiments of Hessel, in conjunction with the bookseller Fünke, established a printing-office for the purpose. Seligmann, an engraver at Nuremberg in 1748, published in folio plates figures of several leaves he had reduced to skeletons. As he thought it impossible to make drawings sufficiently correct, he took impressions from the leaves in red ink, but no mention is made of the means he adopted. Of the greater part he gave two figures, one of the upper and another of the lower side. About from twenty-five to thirty years later, Hoppe edited his 'Ectypa Plantarum Ratisbonensium,' and also his 'Ectypa Plantarum Selectarum,' the illustrations in which were produced in a manner similar to that employed by Kniphof. These impressions were found also to be durable, but still were defective. The production of impressions could only take place very slowly, as the blacking of the plants with the printer's ball required much time. Rude as the process was, and imperfect the result, it was nevertheless found that the figures thus produced were far more characteristic than any which artists could produce. The fault of the method consisted in its limited application and its incompleteness; since the fragile nature of the prepared plant, if ever so carefully treated, would admit of but very few copies being taken, and where any great number would have been required, many plants must have been prepared, a circumstance which was in itself a great obstacle. In the year 1809 mention is made in Pritzell's 'Thesaurus' of a new method of taking natural impressions of plants; and lastly, in reference to the earlier history of the subject, the attention of scientific men was called to an article, in a work published by Grazer, in 1814, on a 'New Impression of Plants.' Twenty years afterwards, the subject had undergone remarkable change, not only in the mode of operation to be pursued, but also in the result produced,—which consisted in fixing an impression of the prepared plant in a plate of metal by pressure. It appears, on the authority of Prof. Thiele, that Peter Kyhl, a Danish goldsmith and engraver, established at Copenhagen, applied himself for a length of time to the ornamentation of articles in silver ware, and the means he adopted were, taking copies of flat objects of nature and art in plates of metal by means of two steel rollers. Various productions in silver of this process were exposed in the Exhibition of Industry held at Charlottenburgh, in May 1833. In a manuscript, written by this Danish goldsmith, entitled 'The Description (with forty-six plates) of the method to Copy Flat Objects of Nature and Art,' dated 1st of May, 1833, is suggested the idea of applying this invention to the advancement of science in general. The plates

accompanying this description represented printed copies of leaves, of linen and woven stuffs, of laces, of feathers, of birds, scales of fishes, and even of serpent-skins."—Passing over a great deal of intervening ground, we come to Mr. Bradbury's conclusion and summary:—"The first practical application of Nature-Printing for illustrating a botanical work, and which has been attended with considerable success, is Chevalier Von Heuffler's work on the Mosses collected from the Valley of Arpasch, in Transylvania; the second, (the first in this country), is the 'Ferns of Great Britain and Ireland,' in course of publication, under the editorship of Dr. Lindley, and printed by Messrs. Bradbury & Evans. Ferns, by their peculiar structure and general flatness, are especially adapted to develop the capabilities of the process, and there is no race of plants where minute accuracy in delineation is of more vital importance than the Ferns; in the distinction of which, the form of indentations, general outline, the exact manner in which repeated subdivision is effected, and most especially the distribution of veins scarcely visible to the naked eye, play the most important part. To express such facts with the necessary accuracy, the art of a Talbot or a Daguerre would have been insufficient until Nature-Printing was brought to its present state of perfection." Mr. Bradbury then adverted to the ingenious and beautiful productions of Felix Abate, of Naples. His Nature-representations consist of sections of wood, in which the grain is admirably represented. He terms his peculiar process Thermography, or the Art of Printing by Heat. The process consists in wetting slightly the surface of the wood of which fac-similes are to be made, with any diluted acid or alkali, and then taking an impression upon paper, or calico, or white wood: the impression is quite invisible, but by exposing it for a few instants to a strong heat, the impression appears in a more or less deep tone, according to the strength of the acid or alkali. In this way every gradation of brown from maple to walnut is produced; but for some woods which have a peculiar colour, the paper, &c. is to be coloured, either before or after the impression, according to the lightest shades of the wood. Abate, in his manipulations, also employs the ordinary dyeing process. It is to be hoped that Abate's process may become alike useful to the natural sciences and the decorative arts. Mr. Bradbury stated, in conclusion, that we are indebted to—Kniphof, for the application of the process in its rude state; Kyhl, for having first made use of steel rollers; Branson, for the suggestion of the electrotype; Leydolt, for the remarkable results he obtained in the representation of flat objects of mineralogy, such as agates, fossils, and petrifications; Haidinger, for having promptly suggested the impression of a plant into a plate of metal at the very time the *modus operandi* had been provided; Abate, for its application to the representation of different sorts of ornamental woods on woven fabrics, paper and plain wood; Worrington, of the Imperial Printing Office, Vienna, for his practical services in carrying out the plans of Leydolt and Haidinger. Nature-Printing may be considered as still in its infancy; but the results already obtained in its application encourage us to expect from continued efforts such further improvements as will place it not least among the Printing Arts.

June 4.—The Duke of Northumberland, President, in the chair.—Messrs. J. S. Coleman, W. De Lannoy, G. H. Ingall, Col. W. K. Loyd, and Dr. R. B. Todd were elected Members.

MEETINGS FOR THE ENSUING WEEK.

- MON. Statistical, 8.—'On the Mortality from Naval Operations,' by Mr. Hodge.—'An Analysis of the Statistics of the Clearing-House during the Year 1830,' by Mr. Babbage.—'On the Nature and Extent of the Benefits conferred by Hospitals on the Working Classes and the Poor,' by Dr. Guy.
- WED. Horticultural.—Exhibition.
- THURS. Numismatic, 7.—Anniversary.
- Society of Antiquaries, 8.
- Royal, 8.—'On the Discovery of an Aerolite in the Heart of a Tree which stood recently in Battersea Fields,' by Sir R. I. Murchison.
- FRI. Philological, 8.

FINE ARTS

A Plea for Painted Glass: being an Inquiry into its Nature, Character and Objects, and its Claims as an Art. By F. W. Oliphant. J. H. Parker.

THIS is a modest and judicious little book, professing rather to clear up than expound the subject of glass-painting, and giving the architectural and artistic professions a hint of what the art has been and may be.

While most other branches of architectural decoration have their codes of laws, no rules for the successful execution of stained glass windows have yet been laid down. When erected, they are, therefore, poor imitations or servile copies. Mr. Oliphant describes with much critical taste the gradual growth of the stained window from the simple red bud of early Art to the glowing fruit of the flamboyant age. The Gothic builders' first windows were mere pierced apertures for light, and the first use of coloured glass was to bind the window together and break the blank mass of light. At the end of the thirteenth century, more peace and more wealth turned the plain castellated loop into an ornamented window. Mullions and a rich labyrinth of geometrical ornament grew common. Spring had grown into summer. The even-coloured border of the first style narrows and twines round the edges of the tracery like tendrilled parasites. The backgrounds are diapered and the saints are canopied. The kings and martyrs, whose blood in the rich sunlight we seem to see flowing preternaturally in their veins, awake from their long sleep, lose their grimness,—the frost of mummy death thaws,—and they look down benign, as from the sunset clouds of heaven. The south wind blows and the colours of the orient bloom in the panes. Then come the dull science and the rule and level of the mechanical Perpendicular. Stone transoms, in the fifteenth century, divide the window into pannels. The colour is more delicate, but it is blanched, hectic, sickly and unwholesome. The paintings become too highly finished, and are painted without reference to their position. Allowing this, as at York and Great Malvern, Mr. Oliphant, with a poet's eye, finds in this period a summer twilight influence, a soft pearly sweetness, that at evening and morning is harmonious and soothing. The religion of this period was also a religion of seasons, not of daily life.

In 1450, when the Perpendicular had run its best, in spite of Ulm, Munich, Cologne and Rouen, glass-painting lost its harmony of purpose and integrity of design. The Cinque-Cento brought with it huge colonnades, triumphal arches, cupids, and all the refurbished lumber of a galvanized paganism.

The present ruin of glass-painting is, that some artists merely imitate old, unapproachable examples, while others foolishly try to execute oil painting with a material limited in its nature, and requiring conventional treatment. Mr. Oliphant says, to remedy these evils, no customer should purchase windows on which the paintings are not well drawn and composed, harmonious in colour, with low, well-discriminated relief, that should not destroy the flatness of the surface. At present, it is a mere glazier's trade; it would with more discriminating purchases and with the numerous churches now building, soon grow into an art. For Classic and Palladian buildings, the writer thinks examples from the Romanesque might be used,—and yet, even with these, the colour and general artistic arrangement would require to be different.

NEW PUBLICATIONS.

Walter Goodall's Rustic Figures, from Drawings exhibited at the Old Water-Colour Society and Winter Exhibition, made on the Spot during his Visit to some of the more Remote and Primitive Villages of Old England. Gambart & Co.

THESE lithographs have all Mr. Goodall's usual grace and sense of beauty. They are full of the poetry of domestic life, and are idealized without becoming untruthful. The present number includes six drawings:—'The Pillow-Lace Maker'—

'The Cottage Door'—'The Spelling Lesson'—'The Hen Coop'—'The Spring Garland'—and 'The Water Lily.' Of these, we prefer 'The Spring Garland.' The subject is simple:—it is merely a little girl (in Cornwall, we should think, to judge by the quaint stile) tying a necklace of birds' eggs round the neck of her younger sister, while a boy lies on the grass watching them with a look of pleasure and surprise. The drawing of these figures is careful, without becoming rigid and statue-like. The landscape is tinted with delightful care,—the air is all summer, and the grass all flowers. The tints of the lithograph are unusually soft and full of colour, and the old thunder-and-lightning character of this art appears transmuted into gentle light and shade. We might object, that every face is beautiful, every group refined, every face thoughtful and good-natured, every cottage clean, and no coat ragged; but as Mr. Goodall, by the necessity of fate, must be a gentle idealist, and will look at Nature through sunshine, not through rain, we even let him, as a wilful man, "gang his ain gate," on the principle of the old Scotch proverb, "He that will to Cupar, maun to Cupar," or that of the Italian fatalist, "Che sara sara." If a man does carry perpetual April with him, he would not thank any one who convinced him that it was now actually November. It is doing good work to show our scented friends in satin and broadcloth what joy and peace may reign in the chambers of the wearers of fustian and kersey.

The Royal and Imperial Visit to the Crystal Palace.
Negretti & Zambra.

THIS is an interesting illustration of the use the photographer may be to the future historian, when we shall have such tell-tale certainties as this to check our chroniclers. Can any modern annalist ever go wrong with newspapers and photographs lying by his side as he writes? Of course, as might be expected in a work of a moment, especially when the artist is so fond of detail as Herr Phœbus, there are not more than two faces sharp and perfect, and those are the Queen's and the Emperor's. Prince Albert and the Empress are the next in merit. The flowers in the foreground are miracles, and so are the pillars entwined with garlands. The rest is a wonderful cloud, which seems teeming with life, if the air would only grow clearer; but such superhuman failures as this are better than most human successes. Who, ten years back, could ever have looked forward to such a use of Art as we witness here?

SCULPTURE IN THE UNITED STATES.

VERY few works in Sculpture have ever been objects of public exhibition in the United States, and those exhibited have been principally busts of distinguished living Americans, which occasionally found their way into the annual Exhibitions of paintings. In 1846, Crawford's statue of 'Orpheus' was shown in the Boston Athenæum; but, having unfortunately been much broken on ship-board, it was impossible to remove it to other cities for the purpose of exhibition. But such was the public apathy regarding sculpture at that time, even in the "Athenian City," that the proceeds of the exposition of this beautiful and highly classic production, by an American hand, did not exceed 500 dollars,—a sum scarcely sufficient to defray expenses.

At the commencement of the American Revolution there stood in Bowling Green, New York, a statue of George the Third; and, during the retreat of the Americans before the advancing British army, the indignant populace decapitated the statue and demolished the pedestal with every mark of resentment. From that day to a period little short of half a century, nothing in the nature of a statue was seen in the Union, if we except that of Washington (by Houdon) in the capital of Virginia. This glorious statue, so fully representing the majestic dignity of the original, may be as truly termed the *father* of American sculpture as the subject of it is the "Father of his Country." It struck the first blow at that prejudice in the American mind which blinded it to the usefulness

and noble mission of an art which gives to virtue a pedestal, and to patriotism a permanent form and place before the eyes of the millions whom they have blessed with freedom and happiness. I say, it struck the first blow at prejudice; but it did not conquer:—this is the work of time. The name, however, of Washington was a host in itself, for what American heart could deny to his services so simple and appropriate a testimony of a nation's love and gratitude? North Carolina soon followed Virginia in the grateful path, by ordering a full-length statue of him from Canova; then Chantrey was commissioned by Massachusetts to execute another; and thus was Sculpture breathed into life, or, in the safer phrase, *nationalized*, in the American Republic. But how long it languished, nearly giving up the ghost! Still, the acknowledgment was made, that statues were not necessarily idols, nor their admirers idolaters; and then followed as a consequence, among all gifted minds, an appreciation and encouragement of the art.

The spacious halls of the Capitol at Washington were almost destitute of sculpture till within a very few years. In the Hall of Representatives were a colossal plaster figure of Liberty, and a fine marble one of History adorning the clock;—in the Rotunda, a series of pannels, containing miserable *bassi-relievi* scenes from American history;—in the tympanum, over the east front of the Capitol, a very low relief allegoric group. All these were by Italian hands.

The few intelligent lovers of Art among the representatives in Congress, whom foreign travel had educated to its uses and beauties, struggled steadily and long for its advancement, and at last succeeded in carrying through resolutions to fill the two niches under the portico with statues of Peace and War. These were given to Persico, an Italian, to execute. Next came an order for a colossal 'Washington'; and this was given to Greenough, a young American, struggling manfully against adversity in Florence,—the Pioneer of American sculptors. In a few years Persico returned from Italy with the statues of Peace and War; and these were so much admired that other resolutions were soon passed for two important groups, 'Columbus discovering the New World,' and the 'Pioneer's Struggle,'—the first being given to Persico, and the second to Greenough,—20,000 dollars being appropriated for each.

Whilst these commissions were being completed in Italy, the 'Washington' was sent home by Greenough, and placed on its granite pedestal in the beautiful grounds in front of the Capitol. In 1845, Persico's Columbus arrived.

This was about the state of Sculpture in the United States down to as late as the year 1847. From its rarity, and the great sums paid for it, it was naturally looked upon as a higher branch of Art, requiring greater abilities and attended with more difficulty and expense than Painting; for painting had become familiarized to the people through the works of many artists from the time of West and Trumbull to that of Wier: it had its chartered academies and unions and pictures of all degrees of merit,—“Old Masters” and new were scattered or exhibited throughout the country,—hence there was no mystery attached to Painting, for all could have access to a studio and witness its secrets. Not so with Sculpture;—for the general supposition was, that to make even a bust it was necessary to cast the sitter's face in plaster to obtain a likeness even in that material,—how much more difficult, then, must it be to make a bust in *marble*, which could not be thus moulded! And then to cut the whole figure in this hard and brittle substance, where a single false blow would destroy the whole work, and actually to imitate the softness and flexibility of flesh, was considered something almost marvellous,—requiring a ready genius and a dextrous hand, and allowing neither experiment, correction, nor change. As these opinions are still extensively entertained in America, I may be excused for making a few remarks upon them.

As far as mere execution is concerned, the sculptor's art is of all others the easiest of attainment. Viewed in this light, it falls among the lowest handicrafts. Even machinery is now suc-

cessfully employed in cutting marble to almost any required form; and it is no more ingenious than that which turns out lasts of every shape from a simple block of wood. Indeed, so little *artistic* skill is necessary in the mere execution of statuary, that the sculptor need not touch it. His art is higher and nobler, dealing with things of feeling, imagination and philosophy, and bringing them into visible forms in the most manageable substance he can find, such as clay, or wax, or any other which shall readiest receive the impress of his thought,—and here his work is done. His *fortune* is left for other hands to gain for him by mechanical means alone,—by transferring to any required dimensions the perishable *model* to enduring bronze or marble. Thus, a figure of fifty feet in height costs little more of the sculptor's time or talent than one of three feet. Copy after copy may be made to any number, without even the supervision of the artist's eye; so that if he chooses to multiply his works, he has only to increase the number of workmen and the quantity of marble to fulfil any number of commissions in a given time. The town of Carrara, in the midst of the marble quarries of Italy, is one great factory of this kind, repeating *ad infinitum* the works of ancient and modern masters at very low rates, to be sent to all parts of Christendom; so that if a Venus de' Medici, an Apollo, or a Laocoon is sought of equal merit to the original, *money* can find either of them in a very short time.

It is considered by sculptors themselves that cutting marble is not an essential part of their profession, and none but those whose means do not allow them to employ workmen, ever take the chisel in hand. In the clay *model* is shown the artist's merit; the clay and modelling tools are the only *necessary* implements in the hands of genius to pave the way to fortune and to fame. That the essentials of the sculptor's art lie in the *clay model* is not only according to reason, but to all history of the plastic art,—for they do not depend upon the material, but upon the form it is made to assume. In fact, it was from the potter's art that sculpture sprang,—first, by baking the clay after it was modelled into the required form, as may be known from the household gods of the Egyptians; after these came carving figures in wood and ivory, and lastly, metals and stone.

The Etruscans and Greeks were particularly celebrated for their works in clay, the former being employed in decorating the Roman Capitol, and the latter in adorning the most magnificent temples in Greece. Pausanias mentions a temple at Tritæa, called that of the greatest gods, “the statues of which were of clay;” and the Athenians are known to have held annual exhibitions of their best works in the same substance. European collections contain many specimens of the ancient *terra-cottas*, or baked earth figures; in that at Naples are some as large as life. No traveller in Italy can fail to be struck by the beauty of those of the famous Luca della Robbia, and to join in the esteem in which they have so long been held; were they of marble their value as works of Art would not be increased. Among the noblest productions of the fifteenth century are the clay statues of Begarelli of Reggio, of whom Michael Angelo remarked: “*If the clay could become marble, woe to the antique statues*,”—and it is only necessary to see them to believe the assertion.

Simple and well known as these facts are to persons at all conversant with Art, they seem to have escaped the attention of Americans, if we take as a criterion the great disparity in the sums they appropriate for statuary and for paintings. For instance, Congress pays 10,000 dollars for an historical picture, 18 feet long, by 12 high,—whilst 25,000 are given for a single statue, or for a group of two figures, and as much as 50,000 for an equestrian statue in bronze! Now, any one acquainted with artistic labour knows that to execute an historical picture of the above large dimensions requires not only as much talent and experience, but infinitely more time, than either of the sculptures named,—for all must be done by the painter's own hand, no mere *labourer* can be employed. That these appropriations prove a willingness in statesmen to give liberally for the

advancement of the Fine Arts is most certain; still it is to be regretted that their errors of judgment tend not only to induce young men to enter a profession through hopes of great and sudden reward, in which their native talents are inadequate to success, but to create unjust and invidious distinctions as to the merits of the productions of different branches of these liberal arts.

In 1847 'The Greek Slave' was placed on exhibition in New York. A painter-friend of the sculptor went over from Italy and undertook the enterprise entirely at his own risk and expense; and notwithstanding the strong repugnance that existed in many minds to the public exhibition of a *naked* statue, it was so judiciously conducted as in some measure to disarm serious opposition. Without reading the papers of the day, it is hardly possible to conceive the peculiar grounds of this repugnance, which at first threatened the failure of the purpose of the exhibition; but generous friends of Art came to the rescue, and, backed by a liberal and powerful press, carried the field triumphantly. Enthusiastic and reiterated appeals were made on behalf of the sculptor, cramped for the means of pursuing his studies in a foreign land, and his right to a generous reception of his first statue among his countrymen. The national pride and sympathy were thus aroused to such a pitch as to postpone to some future day the duty of impartial criticism upon the merits of the work itself. Under such favourable auspices the statue was taken through the States, everywhere received by the masses as a work of almost miraculous power, and giving to thousands for the first time the opportunity and pleasure of looking upon a statue in marble. The result to the artist was celebrity and money, and numerous valuable commissions from States and individuals,—placing him at once in an easy, if not independent position.

It is in the highest degree creditable to the hearts of Americans that they responded so handsomely to these appeals for native struggling talent: it is not strange, however; for if one country more than another is blessed with a commendable patriotic pride in the genius of her sons, that country is America,—and where this is fully awakened she adopts no half measures to gratify it.

As a remarkable instance of this, and of the success which sometimes, though very rarely, attends an artist's *début*, we may state that, since 1846, Mr. Powers has sent from his workshop no less than five 'Greek Slaves,' three 'Fisher-Boys,' one 'Eve,' one 'Calhoun,' one 'Washington,' all full-sized statues; forty busts of 'Proserpine,' several of 'Diana,' 'Psyche,' 'Washington,' 'Fisher-Boy,' and 'Slave,' and a large number of portrait busts,—still having on hand, in various stages of progress, a great many works of a similar kind. It may be truly divined that posterity will not have to go a-begging for a sight of his works. Many artists, for a much less recompense, would cheerfully embrace an exile to such a country as Italy; few, however, there will be who will find the two together.

The increasing patronage of sculpture in the United States is not now limited to this one of its professors; others are beginning to receive that to which they have shown themselves entitled. Crawford, at Rome, is executing for the State of Virginia a magnificent monument to Washington and other citizens of revolutionary renown. Washington is represented upon a spirited steed:—beneath and surrounding the pedestal stand his civil and military associates in that day of trial. The figures are all to be of bronze. When completed, it will be one of the most striking monuments of modern times in general effect and artistic power. The sculptor has received during the past year a highly complimentary and lucrative commission from his Government to fill one of the pediments of the enlargement of the Capitol. It will give scope to his abilities in the highest departments of his art,—invention, composition, action, and expression, and the lucid rendering of his story. His long and severe studies in Rome and his past productions are the surest guarantees of success. By this great work his name may be favourably known as long as the Capitol stands.

Clark Mills has given such satisfaction in an equestrian statue of Jackson, recently erected in front of the White House, that he has been ordered by Congress to make a similar work of Washington for 50,000 dollars.

Other young men are making their way to public favour. Among the most distinguished is Mr. Rogers, of Rome; whose figure of 'Nidia' has excited universal admiration, and the most sanguine hopes of an honourable career for the artist.

Thus, everything looks propitious for the rapid growth of Sculpture in the Republic. Money there is, and to spare:—if it be judiciously expended, America may at no distant time place herself in the front rank of nations in respect to the refinements of educated life, as she has already in political and religious liberty, in commercial enterprise and mechanical ingenuity, and in the abundance and security of social comforts. Her people have arrived at that degree of outward prosperity when they yearn for subjects of internal interest such as the Arts possess, and when it is important that a study of the True and Beautiful in matters of taste should guide them to a pure delight in the objects of their new desires.

F. G.

FINE-ART GOSSIP.—An old and very disreputable trick in the Art-trade has recently been revived,—and is now, we understand, working much mischief. A Correspondent—one of the most eminent printsellers in the country—writes to denounce this trick and to put purchasers of prints on their guard. He says:—"Certain parties in London have bought plates from the publishers after these plates have been comparatively worn out by printing; the lettering has been taken out, and the plates have been reprinted on India paper without letters, and are offered by auction in every large town in the kingdom as genuine proofs. The advertisement is generally headed 'Messrs. Greaves & Co. of London,' obviously intended to be mistaken by the unwary for Graves & Co. The fault against which I protest commences with the publishers, who, not content with getting large subscriptions from the printsellers and stocking their folios, sell their plates to men who reprint mock proofs to an unlimited extent. Some years ago, the *Athenæum* first took up the subject of electrotyping, which was attempted by a publishing-house on one of Landseer's plates, the 'Horses Drinking.' That announcement of the *Athenæum* roused the whole of the printsellers, who met in London, and formed an association, pledging themselves not to subscribe to any plate of which the number of proofs intended to be taken was not limited and previously stated to the Printsellers' Secretary, who should stamp each with a number. The simple proposition, a mere matter of truth required by the printsellers, was derided by the publishers, who were ultimately obliged to consent; and the advantage to the publishers themselves since has been considerable, by giving confidence to private buyers that only a certain number of proofs is printed. But this system of respectable publishers, after having realized a handsome sum on a plate, of selling it with the full knowledge that the parties to whom it is sold will injure the publishers, and also the printsellers, and their private customers, by selling mock proofs (which are not worth the paper they are printed on) in every town in the kingdom, appears suicidal in the extreme."—The subject of these pretended proofs, we may usefully add, has been taken up by the Manchester "Guardian Society for the Protection of Trade;" and a circular has been sent to the members of that Society advertising them of the imposition. But the interests at stake are not local or individual: they concern all purchasers of prints, and all painters of pictures, and all engravers of the same,—for it is very clear that a worn-out plate will misrepresent to the eye the merit of artist and translator; and therefore we feel bound to give our readers timely warning of the fraud.

Lord Harrowby, as chairman of the annual meeting of the Artists' Benevolent Fund—which took place on Saturday last at Freemasons' Tavern—stated that, during the past year, the fund had

paid annuities of 15*l.* each to 52 widows, and granted assistance to 29 orphans of artists to the extent of 137*l.* 10*s.* A list of subscriptions was read—including a hundred guineas from the Queen—which amounted in the whole to 350*l.*

Our Correspondent, "T. V.," writes in explanation:—

I repudiate the honour "W. X." has conferred upon me of being the spokesman of the Royal Academy, or of holding, or having ever held, any of the offices of clerk, porter, or housemaid, in that institution. Perfectly independent of that body, I expressed my own sentiments, and I am quite sure that the duty of replying to what the Academy may consider a sufficient ground for publicity would never be delegated to an anonymous correspondent. "W. X." admits the validity of the reason assigned for the typographical errors, and points to the curtailment of quotations as the real grievance. There are doubtless sufficient reasons for not indulging artists to the top of their poetical bent, and there must of necessity be a limit to description, whether of prose or poetry. This limitation is, however, I believe, the act of the Council, and is not left, as stated by "W. X.," to the "capricious taste" or will of an individual.

—On the same subject we have the following:—

Your Correspondent, "T. V.," who advocates the inaccuracies of the Royal Academy Catalogue, has not, I think, given any sufficient reply to the charge—to which "R. M." drew public attention some weeks ago—of cutting and slashing quotations appended by artists in explanation of their pictures. Lest it should be thought the instances of injudicious pruning are but isolated, I beg to submit my complaint against very similar treatment. A picture of mine is suspended on the walls of the Academy,—a Scriptural subject, with which I forwarded, as necessary for explanation of the subject treated, three short verses, which could not have occupied much more than half of the number of lines to which by the Academy Rules quotations and descriptions are limited. The compiler has quietly and remorselessly docked off the first and last of the verses sent, and the remnant leaves an absolutely wrong impression of the design,—for instance, describes repose where action is manifest in the picture. As I can scarcely conceive that the first and last verses were so much worse written than the one remaining as to be utterly illegible, even supposing that the compiler had never by any chance met with the generally well-known lines before, I can find no adequate reason in any of the seven extenuating pleas of "T. V." why the two should be taken and the other left, or why I should be complimented by critical friends upon Hibernicisms I never contemplated. It is possible, however, that the Hanging Committee have considered they had sufficiently screened, if not redeemed, the delinquency of their officer when they shrouded at once his fault and my picture by placing it in its present terrific proximity to the skies.

I am, &c.

C. ROLT.

2, Gower Street, Bedford Square, June 4.

Signor Monti delivered his third Lecture on Art on Wednesday evening. Having already dismissed Hellenic Archaic Art, he proceeded to criticize and expound the works of the flourishing period of civilization and the age of Phidias. Art had now escaped with joy and exultation from the chains of religious symbolism, and began to embody the ideas of national poetry and national faith; and Greek sculpture took Nature itself for its type, and from it created the Ideal, the highest form of sublimity attainable by genius. The lecturer traced the development and progress of the new tendency towards the ideal, from the merely imitative and conventional, from the earliest period down to the Periclean and Macedonian age,—pointing out the modifications undergone by Greek society by the character of the different schools that followed each other, and by their choice of subject and their various modes of treatment. Retracing his narrative, the lecturer showed examples of works of all the various periods, describing and reviewing them as he proceeded. His most valuable remarks were on the Parthenon frieze, the Venus of Milo, the Achilles of the Louvre,—casts of several of these being shown in the room. In the next lecture, Signor Monti, whose taste and experience qualify him so well for the task, will describe the *modus operandi* of the Greek sculptor; and chromatic and other aids to the chisel will be discussed.

In our last notice of the Royal Academy, our few remarks relating to Mr. Cope's picture referred to his *Penserosa* (201), and not to his *Consolation* (69), the name of which was incorrectly attached to it.

Let any of our readers who are incredulous about the progress of English Art during the last ten years visit the collection of drawings and sketches by the Messrs. Chalon, now exhibiting in the rooms of the Society of Arts, in John Street, Adelphi. It will, if it does not gratify his ideal cravings, at least carry him, if he is a mediævalist—that is to say, a middle-aged man—pleasantly back to the days of George the Fourth, poke-

bonnets, short waists, pantaloons, and watch-seals. He will find a poor portrait of the Princess Charlotte, who is glorified in red curtains and tassels, below a full-length of Our Saviour, which is much less regally honoured. The sketches are of all degrees of demerit, from the "Pussy Cat, drawn by Mr. J. J. Chalon, at the surprising age of fourteen." We have lamp-light landscapes and liquorish landscapes, exactly like the Old Masters,—at least, so far as varnish and dirt can make them. The figures are feeble,—the landscapes without air, nature, or light,—but, with this exception, cleverly put together, and with all proper degrees of warm and cold, and light and shade. We cannot help saying, in justice to struggling men, that we cannot imagine how the late Mr. Chalon could ever have been made R.A., except the title was conferred as a punishment, or that there was really no one else more deserving. The greatest proof of artistic weakness that can be found is the absence of any peculiar class of thought in an artist's works. Now this is peculiarly the case with the present collection. We have semi-Claude embarkations, sketches in Paris, scenes from 'Macbeth' and 'Gil Blas' views of Hampstead, and the Nativity. Of these, the 'Hay-Cart' (No. 42), and 'Macbeth and the Witches' (32) are the most ambitious, and not the least successful. The greater part of the rest are such things as we meet with in inn parlours. Of the works of Mr. A. E. Chalon, the portraits are the most interesting,—particularly those of the late 'Countess of Blessington' (98), 'Madame Vestris' (100), and 'Mrs. Fitzgerald' (101). This Exhibition can do no good to Art.

MUSIC AND THE DRAMA

MUSICAL UNION.—DIRECTOR'S MATINÉE, TUESDAY NEXT, June 19. Three o'clock, doors open at half-past Two.—**WILLIS'S ROOMS.** Quartett in D. G. Haydn; Quintett, E flat Minor, Piano, &c. (Hummel). Vocal Music. Solo, Violoncello, Flauti, Kreutzer; Sonata, Violin and Piano, Beethoven; Vocal Solo, Contra Bass, Bottesini, &c. &c. Artists: Ernst, Cooper, Hill, Piatti, and Bottesini; Pianist, Halle, &c. &c. Tickets to be had at Cramer & Co., Chappell, and Ollivier, Pond Street. Extra Seats will be provided for visitors, and all free admissions for Artists suspended.

J. ELLA, Director.

ST. MARTIN'S HALL.—The EIGHTH (and last) CONCERT this season, under the direction of Mr. JOHN HULLAH, will be given on **WEDNESDAY, June 20**, when will be performed a Grand Selection of Vocal Music, chiefly without accompaniment. Vocalists: Miss Fanny Rowland, Miss Palmer, Mr. Montem Smith, Mr. Thomas. Tickets (1s. and 2s. *ad. Stalls*, 5s.) may be had of the Music-sellers, and at St. Martin's Hall. To commence at Eight o'clock.

SIGNOR GIULIO REGONDI'S MATINÉE MUSICALE will take place at **WILLIS'S ROOMS**, on **FRIDAY, June 22**, to commence at Three o'clock precisely. Vocalists: Madame Clara Novello, Miss Lascelles, Missie Eunnie Krali, (Hot opera singerin aus Wien), Madame F. Lablache, and Signor MARIAS. Instrumentalists: Harp, Mr. Boleyn Reeves; Concertinas, Messrs R. Blagrove, W. Evans, G. Lake, and Signor Giulio Regondi; Guitar, Signor Giulio Regondi; Pianiste-Accompagnateur, Signor Li Caisi. Reserved Seats (Half-a-Guinea), to be had only of Signor Regondi, 24, Upper George Street, Devonshire Square. Unreserved Seats (7s.) to be had at the principal Music-sellers.

Mr. SIMS REEVES begs respectfully to announce, that his **BENEFIT** and last appearance at the Theatre Royal Haymarket will take place on **SATURDAY EVENING, NEXt, June 23**, on which occasion will be presented Henry Smart's highly successful Opera of 'BERTA'; to be followed by a favourite Farce, in which Mr. Buckstone will appear; to conclude with the last act of 'LUCIA DI LAMMERMOOR.' Tickets and Private Boxes to be had of Mr. Sims Reeves, 123, Gloucester Terrace, Hyde Park, or at the Theatre.

NEW PUBLICATIONS.

INSTRUMENTAL.

Duett in E Flat Major for the Pianoforte, by E. Silas (No. 5, Op. 23), (Cramer & Co.), is a single movement. The style and distribution of parts here are hardly those of music originally written for two players on one instrument; and suggest the idea that we may be dealing with orchestral music arranged. There is a certain dignity in the subjects, and the duett is conducted with regularity and skill. M. Silas, however, has to rid himself of some heaviness of manner ere the above good qualities will be recognized as largely as they deserve.

Sleepless Nights: Characteristic Pieces for the Pianoforte. By Stephen Heller. Op. 82. (Scheurmann.)—Since Mendelssohn and Chopin have ceased to write there has been no "short music" for the pianoforte so clever, so characteristic, and so agreeable as M. Heller's. But his resolution to write nothing accessible that is not short (his more ambitious pianoforte works being outrageous in their difficulty), seems to be telling on M. Heller's invention. A sameness is coming over

his works, which can only be escaped from by a resolution to express his thoughts in some new form, which shall demand variety in construction as well as grace in first idea. There are, however, many charming fancies among these 'Sleepless Nights'; and if M. Heller will only keep awake long enough to yield us bits and fragments, in default of wares more substantial, we must accept them thankfully,—our present plight of dearth considered. How good they are may be seen by comparing them with three slight pianoforte pieces, entitled *Album Leaves*, by Herr Gade. This composer, for whom so much was promised, seems to be set fast betwixt what is solid and what is fantastic;—and thus disappoints us. The choice of his subjects is monotonous in its fantasy. We observe that one of his later works, which has just been given with success at Leipzig, is an orchestral and choral setting, with *solos*, of a Danish ballad called 'The Erl-King's Daughter.' The essays before us are trifling, rather than engaging. Few things are less precious than gossamer which will not float.—*Ariel*, *Allegro Scherzando—Homewards*, an *Allegro Marciale*, by Mr. Lindsay Sloper (Chappell), may possibly have been "called names" by their publisher, not their composer. Yet sense, skill, and self-respect may be recognized in all that Mr. Sloper writes. Among our English composers he occupies a place analogous to that held by M. Moscheles among the Webers and Mendelssohns of his time. By exercising his talent, too, he is easing it of stiffness and pedantry. But an "Ariel" in B flat minor is not Shakespeare's "delicate Ariel." Besides the pair of characteristic movements just mentioned, Mr. Sloper has published an arrangement of the ballad "Early one morning" (Campbell, Ransford & Co.).—*La Notte Serena, Romance Variée—Il Mulino, Caprice* (on a theme by Signor Gordigiani)—*Clodia, Romance sans Paroles—Una Fantasma, Morceau Brillant*, by C. Salaman (Schott & Co.)—are four new *bagatelles* of various difficulty, by a writer whom the *Athenæum* has more than once commended. But "why *bagatelles* only?" is a question which must be put to Mr. Salaman as well as to Mr. Heller.—*The Vesper Hymn* (transcribed),—*Fading away: Ballad* (transcribed),—*The Old Hundredth Psalm* (transcribed),—*Il Sostenuto, Etude de Salon* (Cocks & Co.), are four new pieces by Mr. W. V. Wallace.—The first three of these are worthless; and in the 'Etude de Salon' a *sostenuto* execution is all but impossible; since the theme is a group of chords amplified in the extremity of that style of amplification which "came up" when *sostenuto* execution on the pianoforte "went out." We cannot fancy such productions either good for the shops, or (as advertisements phrase it) of "use in schools."—To this paragraph we may add the Arcadian titles of *Euphrosyne* and *Victoria, Two Movements for the Pianoforte*, by T. M. Mudie (Mills),—and name a *Mélodie pour le Piano*, by William George Cousins (Leader & Cock). The last-named writer cannot assume the French manner (in its way so *piquant*), though he does abjure an English title.

Almost our last dealing with instrumental music on the present occasion will be a word or two concerning Mr. W. J. Best's *Modern School for the Organ*, (Cocks & Co.) a work which (considered as an instruction book) no English musician could have written fifty—nay, five-and-twenty years ago, and which cannot be gone through without profit to the pupil.—But it must not be implied from this, that Mr. Best, however capital as a player and thorough-going as a teacher, ranks among the great composers for his instrument. His subjects want pith, interest, and decided feature; and he is unwisely fond of tampering with over-curious modulations, and what may be called illicit keys.—We have also, somewhere about the ten-thousandth book of *Pianoforte Instructions, Exercises, and Lessons*, (Cramer, Beale & Co.) this time put together by Mr. Lindsay Sloper. Probably, there are not ten books in the ten thousand calculated to keep the faith of their title-pages, and to do what they undertake to do more completely than this one.

CONCERTS OF THE WEEK.—The past has been the most distracting concert week which we recollect in London, since though entertainments may have been in former years as numerous as this year, we do not remember a similar contest or concurrence of noticeable meetings on the same days.

On Monday morning the *Glee and Madrigal Union* gave their third concert. We are glad to see that Mr. Hatton's compositions continue to form part of the repertory.

Monday evening's *Philharmonic Concert* displayed such a rarity as a royal visit to a room by no means crowded. "The world" does well to stay away from execution so coarse and caricatured as Herr Wagner's treatment of Mozart's and Beethoven's symphonies, and from music so utterly antipathetic as the 'Tannhäuser' overture, which was repeated (it was said in the room) by desire of the composer,—and appeared to please the subscribers even less than on its first performance. The Concert was opened by Mr. Macfarren's Overture to 'Chevy Chase.'—Madame Clara Novello and Signor Belletti were the singers,—and did their best, in spite of the orchestra. Herr Wagner's engagement is near its close; and modern German romanticism has been indulged with such a trial as is unprecedented in the annals of the Philharmonic Society. But who—or what—is to entice back the audience that has been frightened away by the indulgence?—It is understood that at the next annual meeting a reconsideration of the laws of the *Philharmonic Society* is to be urged by some of the members, naturally enough discouraged at the present aspect of affairs. We may have something to say concerning the statutes as they stand next week.

The fifth meeting of Mr. Ella's *Musical Union* was memorable, as including the finest performance (by MM. Halle, Ernst, and Piatti) of Beethoven's finest *Pianoforte Trio*—the one in B major—we have ever heard. In his *Analysis* of the *Andante* Mr. Ella might have helped the amateurs, for whose benefit he circulates his concert-tracts, by reminding them that it is simply a slow and extensive *tema* with variations and a *coda*,—the earliest specimen, perhaps, of that kind of movement. Subsequently, Beethoven carried out the idea to a morbid excess; selecting themes without a view to their simplicity,—in his changes alternating that which is essential with that which is episodical, and in the pattern of his embroideries introducing intricacies for intricacy's sake. But in the *Andante* alluded to there is nothing deep or difficult, save its length.

Wednesday's *New Philharmonic Concert* was satisfactory, inasmuch as the appearance of M. Berlioz at the head of the band ensured as good a performance of the music selected as was possible under the circumstances, which included the absence of several important orchestral players. It was not fair to the French conductor (by way, we suppose, of economizing chorus, *solis*, and rehearsals) to give only a part of the selections from his 'Romeo and Juliet' which had been given in former years, and none of the movements as yet unheard in England, which are some of the principal portions of the Symphony.—Mr. H. Leslie's Overture, 'The Templar,' was played, and M. and Madame Gassier were the singers. The performances were for the benefit of the German Hospital, but the amount of empty benches was considerable. Our impression of the want of life, stability, and purpose in these concerts was confirmed on this occasion. They have, at present, but a feeble existence among the entertainments of London.—On Wednesday evening the *Harmonic Union* was holding a concert in the Hanover Square Rooms, with Beethoven's music from 'The Ruins of Athens' as one of the principal attractions of the evening.

Let us now speak of some benefit concerts. That given by Miss Messent and Mr. Brintley Richards afforded many features of attraction, besides the singing of the lady and the playing of the gentleman. It gave a large audience an opportunity of again hearing Signor Bottesini,—that wonder of wonders, whose *contra-basso* is a greater marvel than Paganini's violin. Madame Novello sang one of Haydn's canzonets, 'Recollection,' very finely. Miss Dolby was *encored* in a setting,

by Mr. Brinley Richards, of Herrick's 'Litanie,'—the best music to those fine words which we recollect.—On Monday morning *Madame Bassano and Herr Kuhe* "followed the suit" led by the concert-giving songstress and pianist just mentioned, and received their friends in company. We can specify but a few of the pieces contained in the liberal programme:—a smoothly written duett by Campana, honestly sung by Madame Bassano and her sister, and a romance from 'Don Sebastian,' given by Herr Reichardt, with less exaggeration and greater delicacy than any song by him in our recollection, and thus in proportion charming. Herr Kuhe's showy concert-piece was a *fantasia* on airs from 'L'Étoile,' which contained one or two of the most taking themes, brilliantly set rather than solidly cemented. Herr Fornes sang Peter's romance, from M. Meyerbeer's Russian opera, with French words (it was said,—no words being audible). We trust that his execution is not a specimen of the manner in which he intends to carry through the most difficult and delicate part ever written for basso. Middle. Krall was too obstreperous in a pleasing chamber-song by Mozart to be passed over. Could violence enchant, instead of alarming, the ear, this young Lady would be the sorceress of song: as it was, every amateur present might gather from her crude and misdirected energy a lesson how music should not be executed.—A third duett-concert was given by Miss Dolby and Mr. Lindsay Sloper, at St. Martin's Hall, on Wednesday; and a better miscellaneous concert it would be hard to imagine. Miss Dolby was singing capitably: besides graver and more florid music she introduced a new ballad, 'Wild Bells,' by Mr. Duggan, one of those real national melodies,—neither semi-French, nor pseudo-German, nor Italian-and-water,—which a ballad to English words should be. In another style, a Rover's Song, written for Mr. Sims Reeves by Mr. Sloper, is excellent, with a graceful tuneable melody,—and well deserved its *encore*. It is a comfort to perceive that our rising men as yet show no signs of joining what the wit called the "broken crockery school" of music. Mr. L. Sloper, as one of his *solos*, gave Chopin's grand variations on 'La ci darem.' There are many good points in these, but not interest or brilliancy enough to compensate for the tremendous labour imposed on the player, this *solo* being about the most ungracious one in our knowledge,—not merely from the nature of the passage-music, but from the manner in which Chopin mixed his principal instrument with its orchestral support. Middle. Jenny Ney was singing very finely at this concert. We do not recollect a German *prima donna* who, as voice and singer, has made so favourable an impression in England, and one so likely to last, as this Lady.

Such have been some of the entertainments of the week:—besides those reported, however, we may mention Concerts by the Misses M'Alpine, Mr. Blumenthal, Herr Wilhelm Ganz, and Mr. Aguilar, as having taken place. Yesterday, another piano-forte *Matinée* by M. Halle, and Mr. Benedict's Concert at the Royal Italian Opera were given. Of these two last we may speak on Saturday next.

HAYMARKET.—A play by Mr. John Saunders, late Editor of *The People's Journal*, has been for some months in print, and privately circulated; on Monday it was produced on the stage. The title, 'Love's Martyrdom,' is suggestive of a high aim and a psychological purpose on the part of the author;—the substance of the play presents us with a poem founded on shadowy motives, in which less than the usual dramatic tact is exhibited. We may say, at once, that Mr. Saunders is not only a novice in dramatic art, but at present altogether ignorant of the playwright's craft. But not the less is he entitled to consideration as a dramatic poet, and the degree of success which he has achieved may be fairly set down to a perception of the poetic beauties by which his first stage production is distinguished. Poetic as it is, however, the play is not wholly original, either as to style or conception. A hunchback, with his moral character modified by the influence of his physical deformity, has been a common stage property from the ear-

liest period; and the incident of a painter ready to rip up his picture that has become offensive to a particular state of feeling, may be found in striking sort in Schiller's *Fiesco*, and less powerfully indicated in inferior dramas. In other respects, too, Mr. Saunders shows that he lacks inventive power; but he somewhat compensates its want by passionate energy and poetic sentiment. The tide of passion sets in early. The eccentricities of the hunchback are the theme of the initial scene, and are justified to the letter on his first appearance. *Franklyn*, a gentleman of Lincoln, born with the specific deformity, is affianced to a lady named *Margaret*, who has conceived a great respect for his intellectual qualities, but is yet uncertain whether she has any real love for his person. It is doubtful to both whether she has not rather a liking for his handsome brother *Clarence*, to whom, years ago, he was willing to resign her, and had a picture, called 'Love's Martyrdom,' painted in order to commemorate the intended sacrifice. That purpose was not fulfilled; *Clarence* has been absent,—has engaged in fact in another *amour*,—but returns just at the time when *Franklyn* and *Margaret* are about to be married. Old recollections are now naturally revived, and circumstances occur which excite the suspicion of the irascible hunchback, always suffering from a want of confidence in himself. A trial of hearts now takes place, inexpressibly painful to all parties, but needful for the purification of their several natures and the security of their future happiness. *Margaret* must be entirely weaned from *Clarence*, and *Franklyn* must be taught thoroughly to trust *Margaret*. For this reason there must be an almost fratricidal quarrel; there must be generous self-sacrifice; there must be great suffering, under which both *Margaret* and *Franklyn* must be brought, that by the martyrdom of despair they may win the immortality of love. This idea the poet has very finely conceived, and in some measure beautifully expressed. *Margaret*, in a late stage of the process, finds herself abandoned to *Clarence*, and *Franklyn* is driven forth, like an alien from civilization, to commune with nature. The trial of *Margaret* is exhibited on the stage; that of *Franklyn* is only found in the book; it was deemed hopeless to find an exponent of such a mental state in any histrionic representative. So far therefore the triumph of the situation remained with Miss Faucit, who sustained the difficult part of the heroine, and was rewarded for the pains she took in the development of its peculiarities by a triumph in the fourth act. As the culminating point of the poem, and an example of its style, we may here give the salient portion of the scene.—

Margaret. My fate is fixed.
You understand me? Save him all you can.
Laneham. Is there no hope?
Mar. None! none!
Lane. Then Heaven protect you!
(*Aside.*) Unhappy maiden!
O'er her bright field of life, so full of flowers,
How fast she sees the sudden shadow run,
Beneath whose pall henceforth her heart will lie. (*Exit.*)
Hester. How feel you now?
(*Margaret starts, and paces the stage hurriedly, without speaking.*)
Nay, speak! dear cousin, speak!
Mar. Hester, look to me. Desperate—wicked—thoughts
Are crowding forth into my darkened brain,
Urging each other, like some midnight mob,
Onward, to that which none dare even name.
Were I a man, now, I would call for wine,
And drink!—ha! ha!—like a Bacchante drink!
Nay, frown not! see, I have my wine; these tears,—
These hot, salt tears,—these let me riot in.
Hester. Come, *Margaret*, dear, some effort must be made.
What is it moves you so? Your love for *Franklyn*,
If love it were, seemed but so small a spark
That your mere will might tread it out at once.
Out with it, then, since fate will have it so.
Look back no more. The future take, and make;
Another's happiness is in your hands,
A solemn trust. *Clarence* has much to charm
The eye and heart of woman. Talents, youth,
A winning mien, a stately graceful form,
A pliant mind that you may mould at will.
Mar. Oh, yes, a toy! a pretty—woman's—toy!
Amusing for a while, then laid aside
Like toys. But *Franklyn* is a man! True man!
One would be led by me, who look for guidance;
The other, spite of me, would make me tread
The difficult but glorious upward life.
Ah, yes! the one I must command: the other
Would still be king of me! Would'st think it? *Franklyn's*
The only man that never flattered me.
When all that swarm of painted women flies

Came floating round me, murmuring of love
So gently, as they feared the very breath
Of their own voices would shake off their bloom,
I would you had seen him—heard him. Then 'twas
He let into my soul the daylight pure,
And the rough honest plainly-speaking breeze,
Taught me I had a mind. Ah, now he adds
The knowledge of a heart.

Hester. You do not mean—
Mar. I do! I do! Away all vain disguise!
Let who will hear me! All my soul cries out,
Franklyn, I love thee! Love thee! I do love thee!
Hester (graciously). Nay—*Margaret!*
Mar. *Franklyn!* ay, too well I love thee
To give thee such a wife.

Hester (severely). Why, *Margaret*—this—
Mar. I know what you would say,—and you may say it
After a little while. Let me but taste
This cup delicious! Cry but once—once more—
Franklyn, I love thee!

All is over! Burst,
My heart's brimmed fountain! It shall run till dry;
That will be soon, for no springs nourish it.
There! I am calm! I smile! Accept my lot!
Believe me, never more through these firm lips—
Firm though they quiver—shall the secret pass.
The dread, sweet secret you have heard just now.
Hester. Poor lips,—how white they are!

Mar. White! Are they white?
At the soul's gates already stand the mutes,
Announcing death within. Well—kiss me—come!

One fault compromised somewhat the effect of the above scene. The revelation made in it had too much the air of a surprise. The character of *Franklyn*, as developed in the previous scenes, had not expressly justified this description;—it had not been expressed, though it might have been implied. The sympathy of the audience was accordingly scarcely up to the mark. The triumph achieved was mainly due to the actress, and well it was so, for the rest of the *personæ* were but ill realized. Mr. Barry Sullivan was not equal to the hero, and endeavoured to supply his physical deficiencies by exaggeration of manner; and one part, that of *Freelove*, with whom rested the motive plotting of the general action, was entrusted to a novice who failed to make the business which he had to transact intelligible. Mr. Howe, in the character of the artist, was, next to Miss Faucit, the most intelligent representative, and indeed in some situations was remarkably successful. Miss Swanborough, too, in the subordinate heroine, *Julia*, was occasionally pathetic. On the whole, however, the play derived no advantage from the players, and its success was due to its intrinsic merits, struggling through a mass of difficulties and a series of perils such as seldom have transpired in our experience. Some of these pertained to defects of structure, but more to the incapacity of the performers. In fact, the company is wanting in heavy material, and there was a general want of weight in the executants of this drama. The usual ovations at the conclusion, however, were awarded to author and actors;—and Miss Faucit was especially honoured by two recalls. As to the eventual success of the piece on the stage it is impossible to speak until we have seen it decently acted.

MUSICAL AND DRAMATIC GOSSIP.—So universal and well-grounded seems to be the dissatisfaction expressed at the appointment of Sir F. B. Ouseley to the Oxford Professorship, vacated by the death of Sir H. R. Bishop, that we return to the subject. The "tuft," so far as we can perceive, is the deciding justification for the appointment of the clerical Baronet,—supposing him admitted to be competent to examine exercises and to confer degrees. We have learnt, since our former paragraph on this appointment was written, that residence at Oxford can hardly be possible to Sir F. B. Ouseley, since he already holds a minor canonry in Hereford Cathedral, and, moreover, is busily interested in the building of a new church, to which, we presume, his pastoral services will be devoted. It might have been hoped that, at least, one good result might have arisen from the formation of that party in our English church, to which Sir F. B. Ouseley is understood to belong,—some development of earnestness in religious Art. Can this be compatible with an appointment accepted under circumstances which make it a sinecure? There is at present a wide field for a Professor of taste and intelligence in Oxford. The old-fashioned collegiate contempt for aught more melodious than *Alcaics* and *Iam-*

bics has passed away in favour of an enlightened interest in music. This must be as well known to the Rev. Sir F. B. Ouseley as to ourselves. We shall be glad to find such knowledge conscientiously acted on by him; but the difficulties in his way seem to be great, and the discontent excited on the occasion, we repeat, is wide and general.

M. Berlioz, in his *feuilleton* on M. Auber's last opera, skims, as lightly as *Camilla's* self, over the music, pronouncing it to be richer in fancy and detail than many of its composer's later operas, and bestowing "the lion's share" of his space to the *libretto*.—A week or two since, when we announced the title of M. Scribe's last piece of operatic handiwork, as 'Jenny Bell,' we were ignorant of the rumour which Paris, it appears, has accepted,—to the effect, that the new opera is a tribute to Madame Goldschmidt,—even as MM. Scribe and Auber's 'L'Ambassadrice' had been a tribute to Madame Sontag-Rossi. We do not, however, imagine, that this musical drama will keep the stage so long as that one does,—with its comical scenes of *Madame Barnek* over her breakfast, the wiles of the spiteful *Charlotte*, and the love of the sentimental *Benedict*,—with its capital singing lesson, and its delicious melody—

"Que ces murs coquets!"

It appears, however, that the Swedish original (if Swedish original there has been, as M. Berlioz hints) need not complain of being misrepresented, or of too direct a portraiture in the drama devoted to her. She is represented as everything that is brave, charming, and clever. Further, the new opera seems contrived "a double debt to pay." By way of falling in with the humour of alliance betwixt the two great countries which just now prevails, *Jenny Bell* is made an English songstress, who sings a variation on 'Rule Britannia' and another on 'God save the King.' She is personated by Mdle. Duprez.

For some of the most agreeable and instructive musical reading of the time (as we have already had occasion to point out) we are indebted to the musical composers of France, and among these, to men so busy over their notes that they must have small time for letters. Some years ago we paraphrased a lively interesting paper on music in Russia, which was contributed to a Russian periodical by M. Adolphe Adam. Now we call attention to a monograph on Monsigny the composer by him, which appeared in the *Revue Contemporaine* of the 31st ultimo.

Good artists, like good wine, need "no bush." Puffery cannot help them, prejudice cannot keep them back. A couple of months ago, the world of Paris was shrugging its shoulders at the idea of Italian tragedy holding its ground one hour in the French capital. We now read that *Signora Ristori*, on the strength of the impression produced by her in only two dramas, has been invited to fill Madame Rachel's throne at the *Théâtre Français*,—the *Signora* being, it is added, a thorough mistress of the French language. The invitation, however, seems to have wrought a miracle with Madame Rachel, who has chosen to re-appear in the part of *Camille* on the anniversary of Corneille's birthday; and, it is now said, will probably come back and behave in her theatre as an artist should,—till Mdle. Ristori is safe on the other side of the Alps again. This is paltry work;—and no artist, assuredly, has acted towards her public, her comrades, and her authors, less generously than this great actress.

We perceive that the re-appearance of Mrs. Sterling is announced to take place on Wednesday next at the *Olympic Theatre*, when she will take the part of *Lady Teazle* to Mr. Wigan's *Joseph Surface*, on the occasion of that gentleman's benefit.—Mrs. Escott, the American *cantatrice*, the mention of whom with praise by several of the Neapolitan journals was noticed in these columns, is announced in the opera-bills of Drury Lane, as rehearsing the part of *Elena* in 'La Donna del Lago.'

TO CORRESPONDENTS.—W. R.—A.—C. B. F.—J. N.—G.—J. B. L.—Respectful—W. S.—K. O.—received.
The Correspondent who has been good enough to send us a copy of the *Athenæum*, with pencil marks, is requested to observe that all the passages marked are *Sidney Smith's* own—not ours.

LIBRARY EDITION, in 14 vols. demy 8vo. with Portraits. In 20 volumes crown 8vo. .. £10 10 0 .. 6 0 0

ESSAYS; HISTORICAL, POLITICAL, and MISCELLANEOUS. By SIR ARCHIBALD ALISON, Bart. D.C.L. 3 vols. demy 8vo. uniform with the Library Edition of the 'History of Europe.' 2l. 5s.

LIFE OF JOHN DUKE OF MARLBOROUGH, with some Account of his Contemporaries, and of the War of the Succession. By SIR ARCHIBALD ALISON, Bart. D.C.L. The Third Edition, 2 vols. 8vo. with Portraits and Maps, 30s.

ATLAS of 109 COLOURED MAPS AND PLANS of Countries, Battles, Sieges, and Sea-fights, to illustrate the 'History of Europe, with a Vocabulary of Military and Marine Terms. By A. KEITH JOHNSTON, Geographer to the Queen. Demy 4to. Library Edition, 3l. 3s. Crown 4to. 2l. 12s. 6d.

EPITOME OF ALISON'S HISTORY OF EUROPE, for the use of Schools and Young Persons. Ninth Edition, price 7s. 6d. bound.

Sold by all Booksellers.

THE NATIONAL REVIEW.

ON the 30th JUNE, 1855, it is intended to publish the First Number of 'THE NATIONAL REVIEW,' a new QUARTERLY JOURNAL OF GENERAL LITERATURE, POLITICS, and SOCIAL and RELIGIOUS PHILOSOPHY.

In originating such a Periodical the Conductors believe that they will supply a want long recognized, and every day more urgently felt by thousands of their thoughtful countrymen, who are unable to identify themselves with any one of the acknowledged parties in Church or State. It appears to us that there is no party, ecclesiastical or political, that is not manifestly embarrassed rather than sustained by its own watchwords and traditions. The established and conventional formulas of thought are confessedly inadequate to express the actual convictions of the time; and, though often liberally interpreted or questionably stretched to embrace the new conditions, this very accommodation virtually surrenders the real life, and confesses the presence of younger energies and aspirations, which claim independent and original expression.

The effects of this have naturally been unfavourable to periodical literature. We are far from denying the excellent tone, taste, and temper, the great information, the high and available literary talent which characterize many of our leading periodicals; but we believe they suffer from the state of the parties of which they are the organs—they are marked by a want of steady adherence to ascertained principle, of coherent and strict deductions, of defined and searching discussion.

On religious subjects especially we think it painfully evident, that there is not at present in this country any adequate organ for the expression and instruction of the many minds which are trying to combine, with a habit of free inquiry, the faithful adherence to realized and defined truths. The very aim at compromise principles is not recognized in most quarters; and in others the feeling of reverence, and the real existence of objects for reverence, seem to be altogether disregarded.

The selection of our name is no accident. Having a rooted faith in all indigenous products of thought and feeling, we conceive that too foreign a cast has been imparted to the character of our Christianity by the historical accidents of its introduction into this country. Neither Catholicism nor Protestantism is the growth of English soil;—they are not till Christian truth has shaped itself afresh under the home conditions of affection and character, will the religious *malaise* of our society cease. The NATIONAL REVIEW will interpret, it is believed, the deliberate faith of most cultivated Englishmen, however now scattered among different churches,—the faith that fears no reality, and will permanently endure no fiction. No one who recognizes in Historic Christianity God's highest wisdom and revelation, can suppose that the world and the human mind are, or ever were, abandoned by their Divine and living guide; and we believe that to ignore or to disown the traces of His agency in the excellence and truth of every age, is not piety, but treason to His spirit. To preserve, in our treatment of philosophical or historical theology, the tone of reverence which is due to the earnest convictions of others, will be to us no artificial self-restraint, but the expression of natural disposition. With two things only in this relation, we profess to be content,—the unqualified indifference, which, as its humbler changes, pets or persecutes all faiths alike; and the insolent Dogmatism, which treats eternal truth as a private and exclusive property. Believing that in this country, amid all the clamour of sects, the Religion of widest range and deepest seat is as yet without a voice or name, we aspire, in this department of our work, to help it into adequate expression.

As Englishmen, we place unbounded confidence in the bases of English character,—its reverence for law and right; its firm hold on reality; its reverence for law and right; its historical tendency; its aversion to *a priori* politics, and to revolutions generated out of speculative data.

We think, however, that even here there is room for a more constant reference to general principle than is now usual in this country. Many of our most influential organs seem to us to wander into discussions of business and detail, which may be useful in the narrow circles of local or merely political society, but are sorely suited to the pursuit of thoughtful and able men in the country at large, whose occupations prevent their following the minutiae of transitory discussion, but who wish to be guided to general conclusions on important topics, and whose incalculable influence on public opinion makes it most important to give them the means of arriving at just conclusions.

We conceive the office of theory in such matters not to be, as was once thought, the elaborate construction of paper constitutions for all ages and all countries; but rather to ascertain and clearly define the conditions under which the various national characters and institutions have developed themselves; and to deduce, if possible, with fullness and sequence the rationale of the suitability of each polity to its appropriate nation. We would neither confine our political sympathies at home, nor carry our political doctrines ruthlessly and indiscriminately abroad. We feel no vocation for any sort of cosmopolitan propaganda, which would merge the distinctions of Race in the common features of Humanity; and would assume that what is good for us must be good for all, without regard to intrinsic character or historic antecedents. But we do acknowledge and will enforce those mutual claims of sympathy and duty between nations which no division of the great human family can guiltlessly evade, believing that the virtue and well-being of States is forfeited, not fostered, by selfish exclusiveness, as surely as the egoist, most studious of his own happiness, finds at last some waste away in the present, exciting crisis may not be the most favourable for the prosecution of internal reforms; but the prospect of European danger, and the appeal to all classes for noble sacrifices, which have done so much to sweep away the dissensions of sect and party, and to make the whole Empire conscious more of the pulsation of a common heart, have, we think, created a conjuncture pre-eminently favourable to the re-appearing of national sentiment, and the abatement of artificial divisions; and a survey of our institutions and relations, while the dominant temper is thus genial and generous, may prepare a body of opinion uncorrupted by narrow prejudices or selfish claims.

For the working classes we confidently anticipate a social condition far in advance of their present state; we have earnestly at heart the people's happiness and the people's elevation; but we shall not allow our warm sympathies and earnest wishes in this direction to betray us into any faithless compromise of the principles of economic science.

Our object in literature will be analogous to our aim in politics. We wish as before to secure a more constant reference to ascertained principle than we think is now common; but, at the same time, we shall not try to apply arbitrary canons to all writers and all ages, but rather to examine and describe the real features of great literary nations and writers, and explain the manner in which the genius and circumstances of each have influenced the works they have bequeathed to us.

In two points, moreover, it will be our endeavour to avoid errors which have been much and justly complained of in the conduct of

other Quarterly Organs. We purpose to study brevity on all topics which will not justify length—and to give to the lighter departments of literature that share to which they are fairly entitled to a periodical which aspires to please and aid the general reader, as well as to interest the studious one.

Like most other Quarterly Journals, the NATIONAL REVIEW will not be able to find room for more than a selection from the books which from time to time appear. We must endeavour to excel by making that selection judicious. We shall, however, endeavour to give a systematic summary of the new publications on topics insufficiently noticed by the daily and weekly journals—especially Theology and Mental and Political Philosophy. We shall likewise give a list of the books appearing in each quarter which seem suitable for Reading Societies, and are most likely to interest the general reader.

PRICE FIVE SHILLINGS;
Or 22s. per Annum, Free by Post.

London: ROBERT THEOBALD, 26, Paternoster-row.

AN ESSAY ON FINGERING, chiefly as connected with EXPRESSION; together with some general Observations on PIANOFORTE PLAYING. By CHARLES NEATE. Price 15s.

To be had of the Author, 2, Chapel-street, Portland-place; at Messrs. Longmans, Paternoster-row; and of the principal Music-sellers.

A TREATISE ON THE SCIENCE OF MUSIC.

By DANIEL M. G. S. REEVES. Demy 8vo. cloth. This work contains not only a practical view of the laws of harmony, but a philosophical account of the musical system, possessing interest for men of a scientific turn, whether themselves musical artists or not; and comprising (*inter alia*) explanations on the constitution of the scale, on the musical ratios, on temperament, and on the causes of the pleasure which the ear derives from music.

Alfred Novello, 69, Dean-street, Soho, and 24, Poultry; also in New York, at 339, Broadway.

MR. COTTON'S NEW VOLUME OF SERMONS.

This day, fcap. 8vo. cloth, price 3s.

The most Complete London Guide for Visitors.

THE ILLUSTRATED HANDBOOK TO LONDON and its ENVIRONS. With Fifty Engravings, Two Maps, and a Panorama of the River Thames from Windsor to the North. Crown 8vo. in wrapper, 1s.; cloth, 1s. 6d.

London: Herbert Ingram & Co. 195, Strand.

MR. HEPWORTH DIXON'S HISTORICAL MEMOIRS.

I.
FIFTH EDITION.

JOHN HOWARD:

A CONTRIBUTION TO THE SOCIAL HISTORY OF ENGLAND IN THE EIGHTEENTH CENTURY.

"The adventures of Howard are recorded in a loving and energetic spirit. The reflections are just, often ingenious and eloquent, almost always striking. The book contains many satisfactory evidences of an independent and vigorous intellect."—*Examiner.*

II.
SECOND EDITION.

WILLIAM PENN:

AN HISTORICAL BIOGRAPHY.

Founded on Family and State Papers.

"Mr. Dixon's sketch of the Governor's life in his American dwelling is tempting and picturesque. His style is good and easy. There is life in his narrative and vigour in his descriptions."—*Edinburgh Review.*

III.

ROBERT BLAKE:

ADMIRAL AND GENERAL AT SEA.

Based on Family and State Papers.

"The subject is noble; and Mr. Dixon has treated it with rare vigour, spirit, and conscientiousness. The glorious victories won by Robert Blake are universally known; but to find out *how* they were won, and what sort of man achieved them, we must apply to the famous Republican Admiral's latest, best, and completest biographer. His narrative is not only historically valuable, but is terse, vivid, and dramatic in no ordinary degree. We especially like the manner in which the extraordinary events of Blake's period are interwoven with Blake's life; and the rigorous and masterly clearness of the descriptions of the sea-fights."—*Leader.*

IV.

THE LONDON PRISONS:

WITH SOME ACCOUNT OF THE MOST CELEBRATED PERSONS CONFINED IN THEM.

"The London Prisons' is an enchanting volume. It is a book no less of great principles, which all statesmen and philanthropists would do well to ponder." *Evangelical Magazine.*

V.

THE FRENCH IN ENGLAND;

BOTH SIDES OF THE QUESTION ON BOTH SIDES OF THE CHANNEL.

"The author wields a skilful pen, and tells his story with true historical fervour. The circumstances were worthy of his powers. The sketch of Bonaparte's measures for the concentration of his troops, and those for rendering Boulogne and the other harbours on that coast capable of containing his powerful armaments, and the description of the various kinds of troops and vessels, are admirable. The power and force of despotism stand before us in their grandest and most imposing characters. But far nobler and more inspiring is the account of what was meanwhile going on upon our own shores. The description of all this is brilliant."—*Gentleman's Magazine.*

CHAPMAN & HALL; and all Booksellers.

Now ready, in 1 vol. demy 8vo. price 7s. 6d. cloth,
THE HAPPY COLONY.
 With Bird's-eye Views of the Model Town and Colleges, and
 surrounding Farms. Dedicated to the Workmen of Great Britain.
 By ROBERT PEMBERTON, F.R.S.E.
 This is the most beautiful and perfect system of colonizing that
 has ever been devised, as it combines and unites all the grand
 powers of civilization. The education of the children is founded
 on the natural system, combining science with productive labour,
 and the highest polish of manners.
 London: Saunders & Otley, Conduit-street.

NEW WORKS AND NEW EDITIONS.

I.
LIVES of the QUEENS of ENGLAND
 of the HOUSE of HANOVER.
 SOPHIA DOROTHEA. | CHARLOTTE. [WICK.
 CAROLINE. | CAROLINE OF BRUNSWICK.
 By Dr. DORAN, Author of 'Habits and Men,' 'Table Traits,'
 &c. [Just ready.]

II.
WORLDS BEYOND THE EARTH.
 By MONTAGU LYON PHILLIPS. Small 8vo. 6s.

FROM THE ATHENÆUM.—"It is due to Mr. Phillips to say
 that he is an original thinker, and gives forth his less expression to
 every thought. The work is popularly written, and is an use-
 ful contribution to the discussion of the question upon which it
 treats."

III.
THE INGOLDSBY LEGENDS; or,
MIRTH and MARVELS. Tenth Edition. 3 vols. with all
 the Illustrations of Cruikshank and Leech, 21s.

IV.
HISTORY of MODERN ITALY, from
 the first French Revolution to the Year 1850. By RICHARD
 HEBER WRIGHTSON. Post 8vo. 10s. 6d.
 "If any one wishes to know what Italy is now, or why it is
 impossible she could be anything else, with a few elements
 ever at work to compass her destruction, he will find the infor-
 mation in these pages. Mr. Wrightson's narrative of the revolu-
 tionary movements in Rome and Venice is spirited and
 accurate. The history is as valuable as it was necessary."
Daily News.

V.
LAMARTINE'S MEMOIRS of CELE-
BRATED CHARACTERS; to which is now first added,
A LIFE OF MILTON. Second Edition. 2 vols. crown 8vo. 12s.

VI.
LARPERT'S PRIVATE JOURNAL
KEPT THROUGHOUT THE PENINSULAR WAR. Third
 Edition. 8vo. 15s.

"This work deserves to range with the 'Wellington Dis-
 patches.' Independently of its being the civilian's account of
 the Peninsular War, it is almost the only personal picture of
 the Duke which we have at any, and especially the most
 arduous, period of his life."—*Spectator.*

London: RICHARD BENTLEY, Publisher in Ordinary to
 Her Majesty.

On JULY 1, price 12s. 6d. crown 8vo.

A MANUAL OF GEOLOGY: PRACTICAL AND THEORETICAL.

By JOHN PHILLIPS, M.A. F.R.S. F.G.S.,
 Deputy Reader of Geology in the University of Oxford.

With GEOLOGICAL MAP of GREAT BRITAIN, and numerous Illustrations of Fossils, Scenery, &c. &c.

THE OVERLAND MAIL.—On July 10th
 will appear the First Number of THE OVERLAND MAIL,
 a newspaper, published on the mornings of the 10th and 20th of
 each month, for despatch to India, China, Singapore, Ceylon, &c.
 &c., by the Overland Mail, via Marseilles; contents—Political and
 Social Intelligence, Military and Naval News, Commercial and
 Monetary Affairs, Legal Reports, Reviews of Books, Literary,
 Artistic, and Musical Gossip, Abstract of Sporting News, &c. &c.
 with all the most important News up to the morning of the day of
 publication.

The price of THE OVERLAND MAIL will be 9d. per copy, or
 18s. per annum, payable in advance, and the postage, via Mar-
 seilles, 3d. each number, or 6s. per annum.
 Subscribers' names may be sent to the Proprietors, Messrs.
 Smith, Elder & Co. 65, Cornhill, or through any respectable New-
 sman in Town or Country. Communications to the Editor are to be
 addressed to the care of Messrs. Smith, Elder & Co. Cornhill.
 Advertisements intended for insertion in the First Number
 should be sent not later than the 4th July.

KIDD'S TREATISE ON THE SKYLARK, &c.
KIDD'S BRITISH BIRDS OF SONG.
NOTICE. These popular Papers, originally commenced in
 the *Gardener's Chronicle*, will be resumed and continued monthly,
 in the 'FAMILY ECONOMIST,' price 2d. The number for July will
 open with the SKYLARK.—Office of Publication, 52, Paternester-
 row.

ENGINEERING SCHOOL CLASS-BOOKS.
 In cr. 8vo. 4s. 6d., with 220 Diagrams engraved for the Work,
EUCLID'S ELEMENTS OF PLANE
GEOMETRY; with EXPLANATORY APPENDIX, and
SUPPLEMENTARY PROPOSITIONS for Exercise. Adapted
 for the Use of Schools, or for Self-instruction.

By W. D. COOLEY, A.B.
 Author of the 'History of Maritime and Island Discovery,'
 'The Negeir of the Arabs,' &c.

"Mr. Cooley has produced an edition of Euclid's Elements, which
 for brevity, clearness, and discerning attention to the wants of
 learners, cannot be easily surpassed. When we add, that it is re-
 markable for its typographical neatness, that its form is convenient
 and price moderate, we feel justified in predicting for it an exten-
 sive circulation."—*Dublin University Magazine.*
 "The introductory essay to this edition of Euclid, 'On the Study
 of Mathematics,' contains some sensible and judicious remarks,
 especially as the Editor intends his book for the use of schools....
 On the whole, we consider the Editor to have done all that could be
 done to make the study of Euclid easy to beginners."
Cambridge Chronicle.

II.
 Uniform with the 'Elements,' price 3s. 6d.
COOLEY'S GEOMETRICAL PROPO-
SITIONS DEMONSTRATED; or, a Supplement to Euclid:
 being a KEY to the Exercises appended to the 'Elements,' for the
 use of Teachers and Private Students. Upwards of 120 Propositions
 deduced from the First Six Books of Euclid, are illustrated in it
 by new Diagrams.

"The propositions are demonstrated, in most instances, in the
 plainest and neatest manner; so that the work may justly claim
 what it professes to be a help to teachers."—*Scholastic Journal.*
 "The key contains a collection of deduced propositions calcu-
 lated to make the learner familiar with the chief properties of geo-
 metrical figures."—*Dublin University Magazine.*

III.
 In fcap. 8vo. price 1s. 6d.
COOLEY'S FIGURES OF EUCLID; being the
 Diagrams illustrating the 'Elements,' with the Enunciations
 printed separately for Use in the Classroom.
 Whittaker & Co. Ave Maria-lane, London.

REDUCTION OF BOOK POSTAGE.
In consequence of the above, any of the following Books will be forwarded post-paid on receipt of postage stamps or Post-office order to the amount of the published prices of Books required.

Of all the medical guides that have come to our hands, this is by far the best. For fullness and completeness they all yield the palm to Dr. Graham's. — *Edinburgh*, August, 1853.

"Invaluable. Unquestionably the best in the language." *Literary Times*.

PRINTED FOR
WALTON & MABERLY,
Booksellers and Publishers to University College,
28, UPPER GOWER-STREET, and 27, IVY-LANE, PATERNOSTER-ROW.

**DARLEY'S
SCIENTIFIC LIBRARY,**
FOR THE USE OF
SCHOOLS, PRIVATE STUDENTS, ARTISTS,
AND MECHANICS.

It is the purpose of this Work to furnish a Series of Elementary Treatises on Mathematical Science, adapted to the wants of the public at large. To youth of either sex at public and private schools; to persons whose education has been neglected, or whose attention has not been directed in early life to such studies; and to Artists and Mechanics these little works will be particularly suited. The principles of the various Sciences are rendered as familiar and brought as near to our commonest ideas as possible; the demonstrations of propositions are made plain for the mind and brief for the memory; and the Elements of each Science are reduced not only to their simplest but to their shortest form.

I.
FIFTH EDITION.
**A SYSTEM
OF
POPULAR GEOMETRY;**

Containing in a few Lessons so much of the Elements of Euclid as is necessary and sufficient for a right understanding of every Art and Science in its leading truths and great principles.

By **GEORGE DARLEY, A.B.**
Price 4s. 6d. cloth.

II.
NEW EDITION.
**COMPANION
TO THE
POPULAR GEOMETRY;**

in which the Elements of Abstract Science are familiarized, illustrated, and rendered practically useful to the various purposes of life, with numerous Cuts.

By **GEORGE DARLEY, A.B.**
Price 4s. 6d. cloth.

III.
THIRD EDITION.
**A SYSTEM
OF
POPULAR ALGEBRA;**

WITH
A Section on PROPORTIONS and PROGRESSIONS.

By **GEORGE DARLEY, A.B.**
Price 4s. 6d.

IV.
THIRD EDITION, Just Published,
**A SYSTEM
OF
POPULAR TRIGONOMETRY,**

Both Plane and Spherical;

With **POPULAR TREATISES on LOGARITHMS,** and the Application of Algebra to Geometry.

By **GEORGE DARLEY, A.B.**
Price 3s. 6d. cloth.

"For students who only seek this limited knowledge of these sciences, there are perhaps no treatises which can be read with more advantage than Darley's Popular Geometry and Algebra."—*Library of Useful Knowledge*, article 'Mechanics.'

**PHOTOGRAPHIC CHEMICALS,
APPARATUS, and LENSES.**

R. W. THOMAS,
CHEMIST, &c., 10, PALL MALL,
SOLE MAKER OF THE XYLO-IODIDE OF SILVER,

AND
MANUFACTURER OF PURE PHOTOGRAPHIC

CAMERAS, folding and rigid, of superior construction.

Folding and other **STANDS,** of the best make.

GLASS BATHS, arranged for carrying the Silver Solution, thus dispensing with the use of a bottle and funnel.

GUTTA-PERCHA BATHS, mounted, to carry the Silver Solution for Glass Plates, up to 15 by 12 inches.

Jointed LEVELLING-STANDS and SPIRIT-LEVELS.

COLLODION PLATE-HOLDERS, for preparing large plates with facility. Pneumatic, ditto.

PLATE-CLEANERS.

COLLODION GLASSES.

A Choice Collection of **PASSEPARTOUTES,** made expressly for this house, from original patterns.

Albumenized and other PAPERS, French and English.

A great variety of Glass, Porcelain, and Gutta-Percha **DISHES.**

Also, a large assortment of **ROSS'S Portrait and Landscape LENSES.**

PHOTOGRAPHY ON PAPER.

Every requisite for practising the Calotype process may also be seen in the Apparatus room, including Buckle's Brushes, Shallow Glass Dishes for developing negatives, with case and covers, Deep Porcelain Dishes, for Washing the Iodized Paper, &c. &c.

An excellent Negative Paper, well adapted for Iodizing, after the method followed and recommended by Mr. Sutton, price 4s. per quire, or 3s. 10s. per ream, 19 by 15.

N.B. The stock (50 reams) has now been kept two years. This paper may also be had ready iodized.

XYLO-IODIDE OF SILVER.

This important photographic preparation is exclusively used at all the Photographic Establishments. Its superiority is universally acknowledged. Testimonials from the best photographers and principal scientific men of the day warrant the assertion, that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action.

In all cases where a quantity is required, the two solutions may be had at wholesale price in separate bottles; in which state it may be kept for years, and exported to any climate. Full instructions for use.

CAUTION.—Each bottle is stamped with a red label, bearing my name and address,

RICHARD W. THOMAS, CHEMIST,
10, PALL MALL,

to counterfeit which is felony.

NITRATE of SILVER BATH for the above preparation may be always obtained of R. W. THOMAS, ready made, at a cost little more than the price of ingredients used.

CRYSTAL VARNISH.

PREPARED FROM THE FINEST AMBER.

This valuable Varnish, for protecting Negative Pictures, does not require the application of any heat to the plate. The coating will be found free from stickiness, hard, and transparent. It dries immediately.

HYPO-COLOURING BATH.

FOR RENDERING THE POSITIVES ON PAPER DARK AND RICH IN COLOUR.

CYANOGEN SOAP.

FOR REMOVING ALL KINDS OF PHOTOGRAPHIC STAINS

The genuine is made only by the inventor, and is secured with a red label, bearing this signature and address,

RICHARD W. THOMAS, CHEMIST,
No. 10, PALL MALL.

Manufacturer of Pure Photographic Chemicals and Apparatus. And may be procured of all respectable Chemists, in pots, at 1s. 2s., and 3s. 6d. each, through Messrs. EDWARDS, 67, St. Paul's Churchyard; and Messrs. BARCLAY & Co., 95, Farringdon-street, Wholesale Agents.

Just published, New and Cheaper Edition, price 1s.; or by post for 1s. 6d.

THE SCIENCE OF LIFE; or, How to Live
and What to Live for: with ample Rules for Diet, Regimen, and Self-Management; together with Instructions for securing health, longevity, and that sterling happiness only attainable through the judicious observance of a well-regulated course of life. By a PHYSICIAN.—London: Piper Brothers & Co. 23, Paternoster-row; Hammy, 65, Oxford-street; Mann, 39, Cornhill; and all Booksellers.

ROSS'S PHOTOGRAPHIC PORTRAIT and LANDSCAPE LENSES.—These Lenses give correct definition at the centre and margin of the picture, and have their visual and chemical action perfectly coincident.

Great Exhibition Jurors' Report, p. 274.
"Mr. Ross prepares lenses for Portraiture having the greatest intensity yet produced, by procuring the coincidence of the chemical, actinic and visual rays. The spherical aberration is also very carefully corrected, both in the central and oblique pencils."

"Mr. Ross has exhibited the best camera in the Exhibition. It is furnished with a double achromatic object-lens, about 3 inches in aperture. There is no stop, the field is flat, and the image very perfect up to the edge."

Catalogues sent upon application.
A. Ross, 2, Featherstone-buildings, High Holborn.

PHOTOGRAPHY, WHOLESALE, RETAIL, AND FOR EXPORTATION.

OTTEWILL & CO. 24, CHARLOTTE-TERRACE, ISLINGTON.—OTTEWILL'S REGISTERED DOUBLE BODY FOLDING CAMERA, with Rack-work Adjustment, is superior to every other form of Camera, and is adapted for Landscapes and Portraits.—May be had of A. Ross, Featherstone-buildings, Holborn; and at the Photographic Institution, Bond-st. *Catalogues may be had on application.

THE NEW COLLODION, manufactured by BLAND & LONG, 153, Fleet-street, London, will bear comparison with any other preparation offered to Photographers. Price 9d. per oz. Can be had separate from the Iodizing Solution. Nitrate of Silver, 4s. 6d. per oz.; Pyrogallic Acid, 1s. 6d. per drachm; Glacial Acetic Acid, 10s. 6d. per lb.; Hyposulphite of Soda, 1s. per lb. CAMERAS, LENSES, and every description of Apparatus, of first-class workmanship.

Chemicals of ABSOLUTE PURITY, and every material required in the Photographic Art, of the finest quality. Instruction in all the processes.

Catalogues sent upon application.

BLAND & LONG, Opticians, Photographical Instrument Makers and Operative Chemists, 153, Fleet-street, London.

REMOVAL.—HOCKIN & CO., from 289, Strand, to 38, DUKE-STREET, MANCHESTER-SQUARE.
IODIZED COLLODION, unsurpassed in sensitiveness and density of negative.—LENSES, warranted achromatic, Quarter Plate, double, 2s. 2s.; Half, 3s.; Whole, 4s.—Waxed and Albumenized Papers.
PRACTICAL HINTS ON PHOTOGRAPHY, by J. B. HOCKIN. Price 1s.; per post, 1s. 4d.

CIRCULAR NOTES, Letters of Credit, and Bank of Exchange.—The LONDON AND WESTMINSTER BANK ISSUES CIRCULAR NOTES of 10s. each, payable at every important place in Europe. These Notes are issued without charge, and they are cashed abroad, free of commission. The Bank also issues, free of charge, Letters of Credit on all the principal Cities and Towns in Europe, and upon New York and Chicago, United States, Canton, Graham's Town, and Port Elizabeth, Cape Colony. Letters of Credit and Bills of Exchange are likewise granted upon Melbourne, Geelong, Belfast, Ballarat, Castlemaine, Sandhurst, and Hobart Town, Australia, at par. The Circular Notes may be obtained at the Bank or any of its Branches. The Letters of Credit and Bills of Exchange are issued only at the Head Office, in Lombard.

J. W. GILBERT, General Manager.

BANK OF DEPOSIT, No. 3, PAUL MALL EAST, LONDON.
Established A.D. 1844.

Parties desirous of INVESTING MONEY are requested to examine the plan of this Institution, by which a high rate of interest may be obtained with perfect security.

The Interest is payable in January and July at the Head Office in London; and may also be received at the various Branches, or through country bankers, without delay or expense.

PETER MORRISON, Managing Director.
Prospectuses and Forms for opening Accounts sent free on application.

ECONOMIC LIFE ASSURANCE SOCIETY.

HENRY FREDERICK STEPHENSON, Esq. Chairman.
ROBERT BIDDULPH, Esq. Deputy-Chairman.

Advantages.

The LOWEST rates of Premium on the MUTUAL SYSTEM. THE WHOLE OF THE PROFITS divided among the Assured every Fifth Year.

No charge for Policy Stamps, nor for Service in the Yeomanry or Militia Corps.

Policies in force upwards of 7,000.

The Assurance Fund exceeds 1,402,532l. Income upwards of 250,000l. per Annum.

The sum of 397,000l. was added to Policies at the last Division, which produced an average Bonus of 67 per Cent. on the Premiums paid.

For particulars apply to
ALEXANDER MACDONALD, Secretary,
6, New Bridge-street, Blackfriars.

VICTORIA LIFE ASSURANCE COMPANY, 18, KING WILLIAM-STREET, CITY.

Frederick Valiant, Esq.

Rev. F. W. J. Vickery.

This Society is established on the tried and approved principle of Mutual Assurance. The funds are accumulated for the exclusive benefit of the Policy-holders, under their own immediate superintendence and control. The Profits are divided annually, and applied in reduction of the current Premiums. Policy-holders participate in Profits after payment of five annual Premiums.

The Annual General Meeting of this Society was held on the 30th of May, 1854, when a Report of the business for the last year was presented, exhibiting a statement of most satisfactory progress. It appeared that the Assurances in 1853 considerably exceeded those effected in any previous year; the number of Policies issued being more than 400, and the annual income thereon being upwards of 7,500l. It also appeared that, except in 1849, when the visitation of the cholera took place, the claims arising from deaths were, in every year, much below their estimated amount.

The Members present at the Meeting were fully satisfied with the Report, and resolved unanimously that a Reduction of 3 1/2 per Cent. should be made in the current year's Premium payable by all Policy-holders now entitled to participate in the profits.

Credit is allowed for half the Annual Premiums for the first five years.

The following Table exemplifies the effect of the present reduction.

Age when Assured.	Amount Assured.	Annual Premium originally paid.	Allowance of 3 1/2 per Cent.	Annual Premium now payable.
20	£1,000	£50 17 6	£16 11 6	£34 6 0
30	1,000	25 14 4	8 1 8	17 11 8
40	1,000	33 14 4	10 13 8	23 4 0
50	1,000	48 16 8	15 8 0	33 9 0
60	1,000	75 17 6	23 18 0	51 19 6

A. R. IRVINE, Managing Director.

14, Waterloo-place, London.

ST. GEORGE ASSURANCE COMPANY,
118, PAUL MALL, London.

Chairman.—Viscount RANELAGH, Park-place, St. James's.
Deputy-Chairman.—HENRY POWNALL, Esq., Ladbroke-square.

Indisputable Policies, Annuities, and Provision for Families and Children on the most favourable terms. Unmarketable titles assured.

Loans granted on a new and liberal principle.

For further particulars apply at the Office as above.

W. C. URQUHART, Secretary.

PIANOFORTES.—To all who desire a First-rate PIANO at a moderate price.—Messrs. LAMBERT & CO., lately removed from Percy-street to 314, Oxford-street, near Horse-guards, beg to call particular attention to their new PATENT REPEATER CHECK ACTION PIANOFORTES, and method of constructing the bracing, which they warrant not to give way in any climate. For purity of tone, easy and elastic touch, and durability, Messrs. L. & Co. have no hesitation in asserting that their Pianofortes are an excellent substitute for an organ, and have received most numerous and flattering testimonies to this effect from purchasers both at home and abroad, and they feel confident that their Instruments have only to be tried to be appreciated. Mr. Lambert gained a prize for his Patent Cottage Piano at the Great Exhibition, and is the sole inventor of the Check Action.—Pianos taken in exchange, tuned, repaired, regulated, and lent on hire. Lists may be had on application.

THE TEN GUINEA HARMONIUM,
with the Improvements. Manufactured solely by Messrs. WHEATSTONE & CO., who obtained the only Prize Medal for this Instrument. Has the full compass of five octaves, with one stop, a rich sustained quality of tone, which can be produced either loud or soft at pleasure, and is an excellent substitute for an organ, and does not require tuning.—Warren's Tutor for the above, 4s.—WHEATSTONE & CO., Inventors and Patentees of the Conchertina, 26, Conduit-street, Regent-street, London.

RECONNOITERING TELESCOPES.—These well-known Instruments to be had of the Maker, JOHN DAVIS, OPTICIAN, DERRY. The Telescope, when closed, measures 3 1/2 in., and shows Jupiter's moons. Price sent through the post, 36s. The same Instrument fitted up with an additional Eye-piece and Stand, price 32s. 2s. Thus fitted, it will show Saturn's Ring.—Map Metres in case by post, 3s. 6d.

THE ROYAL EXHIBITION.—A valuable, newly-invented very small powerful Waistcoat Pocket-glass, the size of a Walnut, to discern minute objects at a distance of from four to five miles, which is found to be invaluable for YACHTING, and to SPORTSMEN, GENTLEMEN, and GAME-KEEPERS. Price 12 1/2s. each free.—TELESCOPES. A new and most important INVENTION in TELESCOPES, possessing such extraordinary powers, that some, 3 1/2 inches, with an extra eye-piece, will show distinctly Jupiter's Moons, Saturn's Ring, and the Double stars. They supersede every other kind, and are of all sizes for the waistcoat-pocket, Shanty, Military purposes, &c. Opera and Race-course Glasses with wonderful powers; a minute object can be clearly seen from 10 to 12 miles distant.—Invaluable newly-invented preserving Spectacles. Invisible and all kinds of Acoustic Instruments for relief of extreme deafness.—Messrs. S. G. & B. WILKINSON, Jewellers, 39, Abchurch-lane, Piceadilly, opposite the York Hotel.

ELKINGTON and CO., PATENTERS OF THE ELECTRO PLATE, MANUFACTURING SILVERSMITHS, BRONZISTS, &c. Respectfully urge upon Purchasers to observe that each article bears their Patent Mark, "E. & Co. under a crown," as no others are warranted by them.

The fact frequently met with of articles being plated by "Elkington's process," affords no guarantee of the quality. These productions were honoured at the late Great Exhibition by an award of the "Council Medal," and may be obtained at their Establishments,

22, REGENT-STREET, 45, MOORGATE-STREET, LONDON;

MANUFACTORY, NEW HALL-STREET, BIRMINGHAM. Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

F. DENT, 61, STRAND, and 34 and 35, ROYAL EXCHANGE, Chronometer, Watch, and Clock Maker, by appointment to the Queen and Prince Albert, sole Successor to the late E. J. Dent in all his patent rights and business at the above Shops, and at the Clock and Compass Factory, at Somerset House, Maker of Chronometers, Watches, Astronomical, Turret, and other Clocks, Dipleidoscopes, and Patent Ships' Compasses, used on board Her Majesty's Yacht, *Lady's Gold Watches*, 6s. guineas; Gentlemen's, 10 guineas. Strong Silver Lever Watches, 6s. guineas.

row, Islington-green.

RUPTURES.—BY ROYAL LETTERS PATENT,
WHITE'S MOC-MAIN LEVER TRUSS is
allowed by upwards of 200 Medical Gentlemen to be the most
effective invention in the curative treatment of HERNIA. The use
of a steel spring, so often hurtful in its effects, is here avoided; a soft
bandage being worn round the body, while the requisite resisting
power is supplied by the MOC-MAIN PAD and PATENT LEVER
fitting with so much ease and closeness that it cannot be detected,
and may be worn during sleep. A descriptive circular may be had,
and the Truss (which cannot fail to fit) forwarded by post, on the
circumference of the body, two inches below the hips, being sent to
the Manufacturer, Mr. WHITE, 228, PICCADILLY, LONDON.

ELASTIC STOCKINGS, KNEE CAPS, &c.
FOR VARICOSE VEINS, and all cases of WEAKNESS
and SWELLING of the LEGS, SPRAINS, &c. They are not only
light in texture, and inexpensive, and are drawn on like an
ordinary stocking. Price, from 7s. 6d. to 16s. each; postage 6d.
MANUFACTORY, 228, PICCADILLY, LONDON.

RIFE FRUIT, STRAWBERRIES, and SEED BEDS.
NEW TWINE NETTING, Tanned if required,
1 yard wide, 2d. per yard; 2 yards wide, 4d. per yard; 4
yards wide, 6d. per yard. Half-inch MESH ditto, 2 yards wide,
6d. per yard. The ELASTIC HEXAGON GARDEN NETTING,
7½ Meshes to the square inch, *effectually excludes* birds, wasps, flies,
&c. from fruit, flower or seed beds, 4½d. per square yard.
TANNED NETTING, 2 or 3 yards wide, 14d. per yard; or 6
yards wide, 2d. per yard. At W. CULLINGFORD'S, 11, Edmund-
terrace, Ball's Pond, Islington.—Samples exhibited, with prices
attached, in the South-West Gallery of the Crystal Palace,
Sydenham.

LIZARD SERPENTINE.—A Magnificent
Font, a large Vase on high Pedestal, and several Chimney-
pieces, fit for Palaces, Club Houses, and Mansions, are ON SALE
at the LIZARD COMPANY'S SHOW ROOMS, 20, Surrey-street,
Strand. Work executed to order.

THE PEN SUPERSEDED.—MARK your
LINEN.—The most easy, permanent, and best method of
Marking Linen, Silk, or Books, is with the PATENT ELECTRO-
SILVER PLATES. With these Plates a thousand articles can
be marked in ten minutes. Any person can use them. Initial
Plate, 1s.; Name, 2s.; Crest, 3s.; Numbers, per set, 2s. Sent free
with instructions for use, by the inventor, Mr. George Paton, 10,
T. CULLETON, 2, Long-acre, one door from St. Martin's-lane.

SISAL CIGARS.—At GOODRICH'S, 416,
Oxford-street, London, nearly opposite Hanway-street. Box,
containing 14, for 1s. 9d.; post free, 6 stamps extra. None are
genuine unless signed "H. N. Goodrich." No good cigars have ever
been sold so cheap.

ROYAL CAMBRIDGE SHERRY.—This
beautiful dry Wine is now supplied to the elite throughout
England, under the patronage of H.R.H. the Duke of Cambridge,
to nearly all the Clubs, and to Her Majesty's Household. It is
guaranteed to be the pure Wine of Xeres unadulterated. It is
recommended to invalids by sound medical authority, while its
high character is appreciable to all who understand Sherry
Wines. Can be had only of BELLINGHAM & COMPANY, 4,
Beaufort Buildings, Strand, 38s. per dozen; or, in quarter cask,
brand, C.A.M., 122. 10s. Sample forwarded gratuitously.

CHOCOLAT.—F. MARQUIS, highly recom-
mended by the faculty of France, Passage des Panoramas
and Rue Vivienne, Paris. This celebrated Manufacturer has
appointed for his Agent, in England, J. CHACK, 38, Castle-street,
Holborn, for the Wholesale of his superior Chocolate; to be had
also, Retail, at Messrs. Fortnum, Mason & Co.'s, Piccadilly; and at
all respectable Tea, Coffee, and Foreign Warehouses and
Chemists in the United Kingdom.

**SCHWEPPE'S SODA, POTASS, and
MAGNESIA WATERS,** and Aërated Lemonade, continue to
be manufactured upon the largest scale at their several estab-
lishments in London, Liverpool, Bristol, and Derby. The cele-
brity of these well-known waters, and the preference they uni-
versally command, are evidences that their original superior
quality over all others is well sustained. Every bottle is pro-
tected by a label, with the name of their firm, without which
none is genuine, and it may be had of nearly all respectable
Chemists throughout the Kingdom. Importers of the German
Seltzer Waters, direct from the springs, as for the last thirty
years.—51, Berners-street, London.

HARVEY'S SAUCE.—The admirers of this
celebrated Fish-Sauce are particularly requested to observe,
that none is genuine but that which bears the name of WILLIAM
LAZENBY on the back of each bottle, in addition to the front
label used so many years, and signed ELIZABETH LAZENBY,
6, Edwards-street, Portman-square, London.

DINNEFORD'S FAMILY MEDICINE
DIRECTORY, containing a variety of Practical Informa-
tion especially adapted for the Clergy, Ladies, Schools, and Heads
of Families, in the absence of Professional Assistance. New Edi-
tion, price 2s. 6d., by post 3s.

MEDICINE CHESTS in great variety; a large Assortment of
Patterns, at prices from 10s. to 102.
172, New Bond-street, London.

DINNEFORD'S PURE FLUID MAGNESIA
has been for many years sanctioned by the most eminent
of the Medical Profession as an excellent remedy for Acidities,
Heartburn, Headache, Gout, and Indigestion. As a Mild Aperient
it is admirably adapted for delicate Females, particularly during
Pregnancy, and it prevents the Food of Infants from turning sour
during digestion. Combined with the ACIDULATED LEMON
SYRUP, it forms an Effervescent Aperient Druggist, which is
highly agreeable and efficacious.—Prepared by DINNEFORD &
CO., Dispensing Chemists, (and General Agents for the improved
Horse-Hair Gloves and Belts,) 172, New Bond-street, London; and
sold by all respectable Chemists throughout the Empire.

**MISS KIRBY, 23, Mortimer-street, Caven-
dish-square,** having received numerous orders for her
EMOLLIENT POMADE for RESTORING the HAIR, has
appointed the following Agents:—Forster, 52, and Barton, 77,
King's-road, Brighton; Savory & Moore, High-street, Chelms-
ford; Wells, Sturges-street, Dover; J. R. Chemist, Watford;
Morris, 29, High-street, Kensington; Davies, Chemist, Bridge-
street-row, Chester; Hallows, 2, High-street, Islington; M'Dou-
gal, 174, Regent-street; Adolphus, 195, Oxford-street; and Barclay,
Farringdon-street.

THE TOILET OF BEAUTY furnishes innum-
erable proofs of the high estimation in which GOWLAND'S
LOTION is held by the most distinguished possessors of brilliant
complexions. This elegant preparation comprehends the pre-
vention of the complexion both from the effects of cutaneous
maturity and the operation of variable temperature, by refreshing
its delicacy and preserving the brightest tints with which beauty
is adorned. "Robert Shaw, London," is in white letters on the
government stamp, without which none are genuine.—Prices 2s. 9d.
and 5s. 6d.; quarts, 8s. 6d. Sold by Perfumers and Chemists.

**METCALFE & CO'S NEW PATTERN
TOOTH BRUSH & PENETRATING HAIR BRUSHES.**
—The Tooth Brush has the important advantage of searching
thoroughly into the divisions of the Teeth, and is famous for the
hairs not coming loose, is. An improved Clothes Brush, incapable
of injuring the finest nap. Penetrating Hair Brushes, with the
Barbican and Russian bristles, are guaranteed to produce Whiskers, Moun-
tains, and powerful friction. Velvet Brushes, which act in
the most successful manner. Smyrna Sponges.—By means of
direct importations, Metcalfe & Co. are enabled to secure to their
customers the luxury of a Genuine Smyrna Sponge. Only at
METCALFE & CO., 10, HOLLES-STREET, CO. ISLE Establishment, 130s,
Oxford-street, one door from Holles-street.
Caution.—Beware of the words "From Metcalfe's," adopted by
some houses.

METCALFE'S ALKALINE TOOTH POWDER, 2s. per box.

DO YOU WANT LUXURIANT HAIR,
WHISKERS, &c.?—No other compound for the Hair has
maintained such an enduring celebrity as EMILY DEAN'S
CRINOLINE. It is guaranteed to produce Whiskers, Moun-
tains, Eyebrows, &c. in a few weeks, and restore the Hair in
baldness, from whatever cause, strengthen it when weak, prevent
its falling off, and effectually check greyness in all its stages. Price
2s. per Package (elegantly perfumed). Sent post free on receipt of
24 penny postage stamps, by MISS DEAN, 37A, Manchester-street,
Gray's Inn-road, London. Sold by every Chemist in the world.
"In one fortnight it produced a beautiful set of moustaches." "H.
Adams." "It has prevented my hair falling off." "J. Hickson." "It
has quite checked the greyness that was coming on." Mrs. Elder.
Beware of imitations under closely similar names.

THE TEETH and BREATH.
**ROWLAND'S ODONTO, or PEARL DENTI-
FRICE,** composed of the choicest and most recondite
ingredients of the ORIENTAL HERBAL, and of an inestimable
value in PRESERVING and BEAUTIFYING the TEETH, and
STRENGTHENING the GUMS, and in rendering the BREATH
SWEET and PURE. Price 2s. 9d. per box.
CAUTION.—The words ROWLAND'S ODONTO are on the
label, and A. ROWLAND & SONS, 29, Abchurch-lane, engraved
on the Government Stamp affixed on each box. Sold by them and
by Chemists and Perfumers.

VIOLETS.
H. BREIDENBACH, Distiller of Flowers
and Eau de Cologne to the Queen, has now in great per-
fection several EXTRAITS of the VIOLET VIOLET. It has
a lasting odour, and will not stain the handkerchief. Violet Po-
made, Cold Cream of Violets, Violet Sachet Powder, and several
toilet preparations of the same flower equally fragrant.—157 A, New
Bond-street, London.

**DR. DE JONGH'S
LIGHT-BROWN COD LIVER OIL.**

THE process by which this pure, genuine, and
speedily efficacious Oil is extracted secures the presence of a
larger proportion of the active and essential properties of this
valuable medicine than is obtained by the methods usually em-
ployed in the manufacture of ordinary Cod Liver Oil, particularly
much of the pale or yellow, which is too often partially or wholly
derived of its remedial efficacy by attempts to clarify and render it
more agreeable in taste, or colourless. All who have used this
Light-Brown Oil agree that, neither at the time of taking it or
afterwards is it nauseous or repulsive.
It is invariably and carefully submitted to chemical analysis;
and, in order to preclude any possible adulteration or adulteration,
it is supplied only in Bottles, capsuled, and labelled with
Dr. de Jongh's Stamp and Signature, WITHOUT WHICH NONE ARE
GENUINE. Sold by ANSAR, HARFORD & CO., 77, STRAND,
London. Dr. de Jongh's sole Co-signees and Agents; and in the
country by respectable Chemists.
Half-pints (10 ounces), 5s. 6d.; Pints (20 ounces), 4s. 9d.;
Quarts (40 ounces), 18s. IMPERIAL MEASURE.

**NO MORE PILLS NOR ANY OTHER
MEDICINE.**—For Indigestion (Dyspepsia), Constipation,
Nervous, Bilious, and Liver Complaints, Asthma, Bronchitis,
Cough, Consumption, and Debility. By DR. BARRY'S delicious
REVALANT A ARABICA FOOD, which saves fifty times its cost
in medicine.
A few out of 50,000 cures are here given.
Cure No. 71, of dyspepsia, from the Right Hon. the LORD
STUART DE DECIES.—"I have derived considerable benefit
from Dr. Barry's Revalent A Arabica Food, and consider myself
yourself and the public to authorize the publication of these
lines."
STUART DE DECIES.

From the Dowager-Countess of Castle Stuart.
Cure No. 52, 692.—Rosstrevor, County of Down, Ireland, 9th De-
cember, 1851. The DOWAGER-COUNTRESS OF CASTLE
STUART is indebted, in the injured, to the Rev. Dr. Barry, for
stating that Dr. Barry's excellent Revalent A Arabica Food has cured
her, after all medicines had failed, of indigestion, bile, great ner-
vousness and irritability of many years' standing. This food de-
serves the confidence of all sufferers, and may be considered a real
benefit. Inquiries will be cheerfully answered.
Cure No. 53, 692.—Fifty years' indescribable agony from dys-
pepsia, nervousness, asthma, cough, constipation, flatulency,
spasms, sickness at the stomach and vomiting, have been removed
by Dr. Barry's excellent food.
"M. MARIA JOLLY, Wortham, Ling, near Diss, Norfolk."

1lb., 2s. 9d.; 2lb., 4s. 6d.; 5lb., 11s.; 12lb., 22s.; super-refined,
11b., 6s.; 2lb., 11s.; 5lb., 22s.; 12lb., 33s. The 10th and 12th
Carriage for order of a Post-office order.—Dr. Barry &
Co., 77, Regent-street, London; London Agents, Fortnum, Mason &
Co., Piccadilly; to Her Majesty, 182, Piccadilly; and also at 60,
Gracechurch-street; 29, Bishopsgate-street; 4, Cheapside; 330, and
451, Strand; 55, Charing-cross; 54, Upper Baker-street.

RUPTURES EFFECTUALLY CURED
WITHOUT A TRUSS!—All sufferers from this alarming
complaint are earnestly invited to consult or write to Dr. LESLIE,
as he guarantees them relief in every case. His remedy has been
successful in curing thousands of persons during the last twelve
years, and is applicable to every kind of single and double Rup-
ture, however bad or long standing, in male or female of any age,
causing no confinement or inconvenience in its use whatever. Sent
post free to any part of the world, with full instructions for use,
on receipt of 7s. 6d. in postage stamps, or post-office order, pay-
able at the General Post-office, to Dr. Herbert Leslie, 37A, Man-
chester-street, Gray's Inn-road, London.—At home daily (except
Sunday) from 11 till 4 o'clock. A Full and complete list of testimonials, cases,
&c. sent post free on receipt of one postage stamp.

**LITERARY MEN, STUDENTS,
TEACHERS, CLERGYMEN,**
and others, whose care and most anxious feeling is constantly
being called forth, can hope for but little pleasure in their
high and important undertakings, unless seconded by a proper
buoyancy of spirits and vigour of mind. To secure this, then, be-
comes the first consideration of every thoughtful individual; and
the fine balsamic preparation, PARR'S LIFE PILLS, of all medicines
is without dispute the best calculated to produce a fine flow of
animal spirits, a clear head and a ready perception.
Sold by E. Edwards, 47, St. Paul's Church-yard; Barclay & Sons,
Farringdon-street; Sutton & Co. Bow Church-yard; Hannay &
Co. 63, and Saenger, 150, Oxford-street, London; and by all respect-
able Chemists and Medicine Vendors in Town and Country. In
Boxes, price 1s. 1d., 2s. 9d., and in Family Packets, 11s. each.
ASK FOR PARR'S LIFE PILLS.

**ANOTHER CURE OF A NINE YEARS
COUGH BY**
DR. JOCK'S PULMONIC WATERS.
"99, High-street, Lynn. Sir.—A lady who had a severe cough
for nine years, and could get nothing to allay it, from one box of
Dr. Jock's Waters is enabled to speak more freely, and I
therefore, those who are so predisposed should have recourse to
Holloway's Pills, which will effectually check every symptom and
restore the patient to the soundest health.—Sold by all Medicine
Vendors; and at Professor Holloway's Establishments, 214,
Strand, London, and 50, Maiden-lane, New York.

HOLLOWAY'S PILLS, the far-famed remedy
for various complaints.—In all cases of deranged system, in-
digestion, bile, head-ache, liver complaint, or determina-
tion of blood to the head, there is no medicine more equal to
these wonderful Pills, that will so quickly alleviate and ulti-
mately cure persons suffering from disorders of this nature; the
peculiar properties they possess act on the very mechanism of
life, so that such diseases are sure to yield to their influence;
therefore, those who are so predisposed should have recourse to
Holloway's Pills, which will effectually check every symptom and
restore the patient to the soundest health.—Sold by all Medicine
Vendors; and at Professor Holloway's Establishments, 214,
Strand, London, and 50, Maiden-lane, New York.

A List of Mr. Halliwell's Privately Printed Works.

MR. SKEFFINGTON, having purchased the entire remainders of these valuable Works, begs to inform the Public that only the small number of *eight* complete sets remain, while the largest stock of any separate volume is but *fourteen*, some being out of print, and several others nearly so. Collectors of fine libraries may, therefore, rest assured that these publications must ere long become of great rarity.

ALL are printed in Quarto, uniform with the works of the *Roxburghe* and other private Book-clubs, the impression of each work being most strictly limited to a small number of copies.

I.*

MORTE ARTHURE: The Alliterative Romance of the Death of King Arthur. Now first printed, from a Manuscript in the Library of Lincoln Cathedral.

Seventy-five copies printed. 5l.

. A very curious Romance, full of allusions interesting to the Antiquary and Philologist. It contains nearly eight thousand lines.

Only One separate copy left.

II.*

The CASTLE of LOVE: A Poem, by ROBERT GROSTESTE, Bishop of Lincoln. Now first printed from inedited MSS. of the Fourteenth Century.

One Hundred copies printed. 15s.

. This is a religious poetical Romance, unknown to Wharton. Its poetical merits are beyond its age.

III.

CONTRIBUTIONS to EARLY ENGLISH LITERATURE, derived chiefly from the Rare Books and Ancient Inedited Manuscripts from the Fifteenth to the Seventeenth Century.

Seventy-five copies printed. 3l. 3s.

CONTENTS:—The Suddaine Turne of Fortune's Whele, an inedited Poem, by Taylor, the Water-poet; the Life of Saint Katherine; the Knight and his Wife; Dr. Caius's Magical MS.; the Tale of the Smyth and his Dame; the Booke of Robin Conscience; Ballads on Hugh of Lincoln; Baud, Kuffe, and Cuffe; Newes out of Islington; a Derbyshire Mummers Play; the Interlude of Youth.

Out of print separately.

IV.

A NEW BOKE about SHAKESPEARE and STRATFORD-ON-AVON, illustrated with numerous Woodcuts and Fac-similes of Shakespeare's Marriage Bond, and other curious Articles.

Seventy-five copies printed. 1l. 1s.

Out of print separately.

V.

The PALATINE ANTHOLOGY. An extensive Collection of Ancient Poems and Ballads relating to Cheshire and Lancashire; to which is added THE PALATINE GARLAND.

One Hundred and Ten copies printed. 2l. 2s.

Out of print separately.

VI.

The LITERATURE of the SIXTEENTH and SEVENTEENTH CENTURIES, illustrated by Reprints of very Rare Tracts.

Seventy-five copies printed. 2l. 2s.

CONTENTS:—Harry White his Humour, set forth by M. P.; Comedie of the two Italian Gentlemen; Tailor's Travels from London to the Isle of Wight, 1645; Wyl Bucke his Testament; The Booke of Merry Riddles, 1629; Comedie of All for Money, 1578; Wine, Beere, Ale, and Tobacco, 1639; Johnson's New Booke of New Conceites, 1639; Love's Garland, 1624.

Out of print separately.

A COMPLETE SET may, for the present, be obtained for 12l. 12s. Those works marked with an asterisk may be purchased at the prices affixed. The rest are out of print except in complete sets.

All applications for Copies to be made to MR. SKEFFINGTON, 163, Piccadilly.

The Chandos Portrait of Shakespeare.

MR. SKEFFINGTON has the honour to announce that he has purchased the remaining impressions of the far-famed Chandos Portrait of Shakespeare, so exquisitely engraved for the Shakespeare Society by Samuel Cousins, A.E.R.A. This highly-interesting Portrait of the great Poet ranks in the authenticity of its likeness with the Stratford Bust and the Droeshout Engraving, before the highly-priced and highly-prized folio of 1623. Its genealogy has been traced from Sir William Davenant (who lived with those to whom Shakespeare was personally known) to Betterton the great actor; thence to Mrs. Barry the great actress, who sold it for forty guineas to Mr. Keck, from whom it descended to the Duke of Buckingham, and at the Stowe sale was bought by the Earl of Ellesmere for 355 guineas. Another proof of its genuineness, if other proof is wanting, is, that Sir Godfrey Kneller made a copy of it for Dryden, and that the copy thus made is now at Earl Fitzwilliam's, at Wentworth House, in Yorkshire, as an old inscription on its back attests. Dr. Waagen has described the Chandos Portrait in his able account of the Bridgewater Gallery, and refers to Mr. Cousins's engraving as "a very faithful version of the portrait." He also alludes to the Kneller copy as corroborating the truth of the Chandos original. The plate was destroyed by the Shakespeare Society after a very limited number of impressions. Mr. S. has a few impressions remaining. A suitable frame has been designed, surmounted with the Shakespeare Arms. Proofs, 3l. 3s.; Prints, 1l. 1s.

Mr. S. has also remaining copies of the following splendidly illustrated Works of Art, viz.:—

ROBERTS'S HOLY LAND, EGYPT, &c. Complete in 41 Parts, 21l., published at 43l. 1s.

SIR DIGBY WYATT'S INDUSTRIAL ARTS of the NINETEENTH CENTURY. 2 vols. folio, original copy, in half-morocco, 10l. 10s.; published at 17l. 17s.

W. SKEFFINGTON, 163, PICCADILLY.

Printed by JAMES HOLMES, of No. 1, New Ormond-street, in the county of Middlesex, at his printing-office No. 4, Took's-court, Chancery-lane, in the parish of St. Andrew, in said county; and published by JOHN FRANCIS, of No. 13, Wellington-street North, in the said county, Publisher, at No. 14 in Wellington-street aforesaid; and sold by all Booksellers and News-venders.—Agents: for SCOTLAND, Messrs. Bell & Bradfute, Edinburgh;—for IRELAND, Mr. John Robertson, Dublin.—Saturday, June 16, 1855.

THE ATHENÆUM

Journal of English and Foreign Literature, Science, and the Fine Arts.

No. 1443.

LONDON, SATURDAY, JUNE 23, 1855.

PRICE
FOURPENCE
Stamped Edition, 5d.

* * * The Second Master RECEIVES BOARDERS at 24, Boundary-road.

LIBERAL EDUCATION.—Mr. JAMES SHERRAT, M.A., has recently opened MANOR HOUSE, BATHURST, for the reception of Pupils. A careful grounding is guaranteed. Speaking French constantly practised. Healthy exercise secured. Moral and Religious training earnestly attended to. Mr. Sherrat is both a Mathematician and a Linguist. He brings the principles of Comparative Philology to bear upon the teaching of Languages; progress is thus greatly accelerated, while from the very commencement the reasoning faculty is exercised as well as the memory. Terms (inclusive) from 60 to 80 Guineas. The Sons of Widows of limited means received at a reduced charge. The highest references given.

MILL-HILL SCHOOL, HENDON, MIDDLESEX.

Head Master—The Rev. HENRY LATH, B.A., assisted by Five Resident Masters, besides other Teachers.
The object of this Public School is to give a first-class Education, based on religious principles. The Course of Study includes Classics, Mathematics, and the various branches of a sound English education. The situation is beautiful and healthy; the spacious premises were provided expressly for the School; and the domestic arrangements are on a most liberal scale.
Prospectuses on application to the Head Master, at the School; or the Secretary, at the Committee Room, Founders' Hall, Swithin-lane, London.
By order of the Committee.
ALGERNON WELLS, Secretary.

CALNE SCHOOL, WILTS.

THE REV. W. B. JACOB, M.A.,
Of Emmanuel College, Cambridge;
Assistant Classical Master, Mr. T. CLAYTON, B.A., of Trinity College, Oxford, Hertford Scholar;

RECEIVES Pupils between the Ages of Eight and Fifteen, undertaking to give them either a strictly classical or a more general Education, to prepare them for the Public Schools, for the Military Colleges, for the India Appointments, or for any of the Professions.

HOME EDUCATION.—A Lady, the widow of a medical man, who has resided in the East, and is about to establish herself in Cheltenham, is desirous of RECEIVING PUPILS to EDUCATE with her own daughters, with the assistance of a Resident Governess. Further particulars and references will be furnished on application to H. E. M., at the Rev. G. Butler's, St. Giles, Oxford.

UNIVERSITY of LONDON, APOTHECARIES' HALL, &c.—A FIRST-CLASS B.A. and M.D. PREPARES GENTLEMEN, privately or in Class, for the Matriculation, Medical and Arts Examinations, the Preliminary at the Hall, the Fellowship Examinations, &c. Full MS. and printed Notes forwarded.—Address, A.Z., Ferriman's, 49, Albany-street, Regent's Park.

EDUCATION in PARIS.—Mlle. de CORNET and her Sisters, 11, Rue de Chaillot, Champs-Élysées, RECEIVE a NUMBER of SELECT PUPILS and PARLOUR BOARDERS. She will arrive in London on the 23rd inst., and leave on the 29th. Reference is kindly permitted to the Rev. Dr. Emerton, Principal of Hanwell College, Hanwell, Middlesex; and to Mons. Alfred Du Val, Professor of the French Language and Literature, 40, Somerset-square, Portman-square, where a Prospectus may be had.

BONN ON THE RHINE.
GERMAN PROTESTANT ESTABLISHMENT for YOUNG GENTLEMEN, opened 1847, under the Direction of HERR THOMAS, a native of Bonn, combines the advantages of a sound Classical and Commercial EDUCATION with all the comforts of an English home. German, French, and English taught by most eminent Masters. Terms moderate. Apply by letter to Th. Th. Messrs. Druke & Co. Bookbinders, 47, Soho-square; or to the Director, at Mr. Mann's, Guild Pitts, Stratford-on-Avon.

FRENCH and GERMAN taught Grammatically or Conversationally. Privately or in Class, limited to Six Pupils. Schools and Families attended. Translations done. Apply by letter to Th. Th. Messrs. Druke & Co. Bookbinders, 47, Soho-square; or to the Director, at Mr. Mann's, Guild Pitts, Stratford-on-Avon.

EDUCATION in GERMANY.—Parents desiring to send their Sons to Germany for the purposes of Instruction, or EDUCATION, may suitably place them with a German Family at Hanover. Good references given and required.—Apply to Mr. SONNE, Hanover, care of Royal Hanoverian Railway Direction.

EDUCATION in GERMANY.—A Professor of a College, in a beautiful country town near Berlin, wishes to take into his home an ENGLISH PUPIL as BOARDER, who will have the double advantage of enjoying the instruction of the Professors in the College, and a careful superintendence and preparation for his lessons at home.—For particulars apply to Dr. HEIMANN, 57, Gordon-square.

GOVERNNESS PUPIL.—The Friends of a Young Lady are desirous of an ENGAGEMENT for her in a respectable establishment at the Seaside. She is competent to prepare Pupils for Masters in the German and French Languages, and also Music.—Address E., 11, Serle-street, Lincoln's Inn-fields.

LITERATURE. By a LADY.—Manuscripts arranged. Translations executed from the French, German, and Italian, with idiomatic accuracy. A RE-ENGAGEMENT AS READING OR STENOGRAPHY is granted.—Address, Mrs. MAY, care of Mr. Franz Thimm, Foreign Bookseller, 3, Brook-street, Grosvenor-square.

SCHOOL ASSISTANTS, duly qualified, in search of Engagements either in Ladies or Gentlemen's Establishments, are invited to Register their Names, Qualifications, and References, in person, at Messrs. BELF'S BROTHERS, School Booksellers and Stationers, 150, Aldersgate-street, London. These Registers are opened Half-Yearly, for One Month, from the 16th of December and June. No charge is made, the object being to provide Messrs. B's connexion with Assistants of ability and worth.

LONDON and WESTMINSTER BANK.—The TEMPLE-BAR BRANCH of this Bank was OPENED on Friday, the 15th inst., at the Temporary Offices, 211, Strand. The Capital of the Bank is 5,000,000*l.* sterling, in 50,000 Shares of 100*l.* each. The sum of 20*l.* has been paid on each Share, so that the paid-up capital is 1,000,000*l.* sterling. The Bank has above twelve hundred partners, whose names are registered at the Stamp Office, and are printed with the Annual Report of the Directors.

Current Accounts are received on the same principles as those observed by the London Bankers. Sums from 10*l.* upwards are received upon interest. For these sums receipts are granted, called Deposit Receipts. Circular Notes are issued for the use of Travellers on the Continent.
J. W. GILBERT, General Manager.
Lothbury, June 19, 1855.

BEN RHYDDING HYDROPATHIC ESTABLISHMENT.

PHYSICIAN—Dr. William Macleod, F.R.C.P.S.
SURGEON—Mr. Tait, Surgeon.
Prospectus and Terms to be had of Mr. TAYLOR, House Steward, Ben Rhydding, Otley, Yorkshire.

THE ASYLUM FOR IDIOTS, EARLSWOOD, RED HILL, SURREY.

Patroness—Her Most Gracious Majesty.

His Royal Highness PRINCE ALBERT has appointed TUESDAY, July 3, for the OPENING of this Institution. It is on the line of the Rail. It is half-an-hour from town. Special Trains will be provided for the company, with reduced charges. The ceremonial, and other particulars, will be supplied at the earliest date.

Ladies presenting Purse with Five Guineas and upwards will take part in the ceremony. Purse may be had on application. Gentlemen, Stewards, and others, will also be supplied with an opportunity of making their offerings on behalf of the Charity. Artists are invited to contribute something of their stores to ornament a great national institution. Form and colour are great means of education, and of gratification in the training of such a family.

Persons within a reasonable distance are invited to give cheerfulness to the day, by the presentation of Plants and Flowers.

Presentations also, adapted to the cultivation of the little farm, which is to be mainly worked by the family, will be very appropriate and acceptable.

The Musical arrangements, instrumental and vocal, are in the hands of Mr. BENEDICT, who has generously offered his services. No other pledge need be given of their excellence and propriety.

Refreshments of the best kind will be provided by Mr. Bathe, of the London Tavern, at regulated charges.

Admission by Tickets, 2s. 6d. each; but free to Subscribers on application at the Office, or to the Stewards.

All contributions will be thankfully acknowledged. Every information may be had at the Office.

WE PLEAD FOR THOSE WHO CANNOT PLEAD FOR THEMSELVES.

THOSE WHO HAVE MOST MIND, WILL PITY THOSE WHO HAVE THE LEAST.

THE GREATER THE NECESSITY, THE GREATER THE CHARITY. IT IS MORE BLESSED TO GIVE THAN TO RECEIVE.

A most unique Ornament for Halls, Libraries, &c.—A beautiful Collection of Casts from Antiquity, in exact imitation of the Originals—Oak Carvings, and thousands of Engravings at unobtainable Prices.
J. MABLEY, 143, Strand.
* * * See Catalogue of Engravings.

TO LITERARY MEN.—A Literary Man, of popular talent and business habits, who has from 1,000, to 1,500, at command, may hear of an opportunity of obtaining a SHARE in a PROMISING ENTERPRISE. He must be a Conservative and a Churchman. Apply, by letter, giving real name and address, to L. D., at Mr. White's, 33, Fleet-street.

TO NEWSPAPER PROPRIETORS.—A Graduate of an English University, who has been lately engaged in Sub-editing and Writing occasional Leaders and Literary Notices for a first-class Daily Paper, will shortly be at liberty to forward to Mr. GAGNEPAIN, Reference and Specimens of Articles will be sent.—Address R. M. N., 44, Ducie-street, Green-hay, Manchester.

SUB-EDITOR and REPORTER.—WANTED, for a Provincial Newspaper, an experienced SUB-EDITOR and REPORTER. Letters stating qualifications, probable amount of salary required, &c., to be addressed to G. D. S., care of Messrs. Grosvenor, Chater & Co., Cannon-street West, London.

TO NOBLEMEN and GENTLEMEN.—A Young Gentleman, aged 21 years, one of a large family, respectfully connected, and of some literary attainments, is anxious to obtain the SITUATION of PRIVATE SECRETARY or CHAUNCELER to a Nobleman or Gentleman about to make a tour of the Continent or proceeding to India. The Advertiser understands French, and can give the highest references as to character and respectability.—Address A. B., Post-office, Stockbridge, Hants.

TO PARENTS and GUARDIANS.—An ARCHITECT and SURVEYOR in extensive practice has a VACANCY for a gentlemanly, well-educated youth as a PUPIL. The best references will be given and required.—Address E. G., Messrs. Waterlow & Sons, Pall-mall-street, Westminster.

TO PARENTS, &c.—Mr. GEORGE HAYES, 66, Conduit-street, Regent-street, has a VACANCY for a PUPIL. He would be fully instructed in Mechanical as well as Operative Machinery of the highest order, would join the family circle, and receive many unusual advantages. If desired, he could attend the Classes at either of the Colleges.

TO PARENTS and GUARDIANS.—An opportunity now offers of PLACING with a Scientific Lecturer, Author, and well-known Journalist in London, for a few years, a well-educated YOUTH, who will be boarded and lodged, and as one of the family, and have many peculiar advantages, under the eye of his Principal, of acquiring Literary, Scientific, Financial, and Commercial Information of a high character. Premium 100*l.* Address DEBRA, care of Messrs. Spott, 16, Bucklersbury.

MR. MAYALL, PHOTOGRAPHER, begs to announce that he has recently REMOVED from West Strand to 224, Regent-street, corner of Argyll-place.

MAYALL'S PORTRAIT GALLERY, 224, REGENT-STREET, corner of Argyll-place. PHOTOGRAPHS of every size and style, uncoloured or highly coloured. DAGEOTYPES, plain or tinted. STEREOSCOPIC Portraits, singly or in groups. COPIES on Plate or Paper.

TAKEN DAILY.
"Mr. Mayall's portraits represent the high art of the daguerreotype; they are superior to the generality of such pictures as a delicate engraving is to a common print."—*Art-Journal*, Nov. 1853.
"More pleasing, and far more accurate than the generality of such pictures."—*Times*, July 17, 1854.

THE SANCTUARY, WESTMINSTER.—THE NEW HOUSES near the Western Entrance to the Abbey, and in close proximity to Westminster School, the Houses of Parliament, and the Courts of Law, are completed, and those ready for disposal of are now to be LET, or particulars apply to Messrs. HUNT & PENNISON, 4, Parliament-street, Westminster.

THE TWENTY-EIGHTH PUBLIC DRAWING.—THE CONSERVATIVE LAND SOCIETY.

At the Eleventh Quarterly Meeting of the Members at Exeter Hall, on WEDNESDAY, June 27, at 3 o'clock.

Viscount RANELAGH in the Chair.—A PUBLIC DRAWING for One Hundred Rights of Choice on the valuable Estates of the Society will take place, and fifty Shares will be added to the Register by seniority or date of Membership. Shares taken up to the time of the Drawing will be included therein. Numbers drawn will lose their privilege if the Subscriptions be in arrear. First cost of a single Share, 12s. 6d. including fees. Subsequent payments, 6s. per month, and 1s. for quarterage.

THE HOUSES, BRIGHTON, and READING ESTATES will be ALLOTTED on THURSDAY, July 10th.

CHARLES LEWIS GRUNISEN, Secretary.
Offices, 33, Norfolk-street, Strand, London.

TO MICROSCOPISTS.—A number of interesting Microscopical Slides for sale, at 5s. 6d. per dozen. A List of those on hand sent, free on application to J. W. WATSON, Norton, Stockton.

BOOKS and MUSIC POSTAGE FREE to any part of the Kingdom.—Books, Magazines, Reviews, or Music, ordered to the amount of 1s. and upwards, sent FREE, per rail of post; or, if preferred, an allowance of 2d. in the Shilling will be made, and the Postage paid by the publisher; or postage not exceeding 4*d.* 1*d.*; 1*d.* 2*d.*; 1*d.* 4*d.*; and for every additional 1*d.* 2*d.*. Remittances by post-office order or stamps.
W. DREWITT, Bookseller, 265, High-street, Borough, near London Bridge.

GREAT WESTERN RAILWAY.—CHEAP EXCURSION TO GLOUCESTER, CHELTENHAM, ROSS, and CHEPSTOW.—On Sunday, July 1, a Train will leave Paddington at 7 A.M., returning the same evening, from Ross and Chepstow at 7, Cheltenham 7.45, and Gloucester at 7.50. Fare: Gloucester and Cheltenham, 10s. and 6s.; Ross, 10s. 6d. and 6s. 6d.; and Chepstow, 11s. and 7s.—No luggage allowed.

RAILWAY ACCIDENT INSURANCE.—16,221, 5s. have already been paid as compensation for Fatal and other Railway Accidents, by the RAILWAY PASSENGERS' ASSURANCE COMPANY.

Examples.
1,000*l.* was paid to the Widow of J. G. killed on the 24th February, 1852, secured by a payment of 1*l.*
31st Aug. 1852, was paid to H. C. H. J., who had his leg broken on the 31st Aug. 1852, secured by a payment of 1*l.*
200*l.* was paid to W. P., severely injured on the 19th September, 1854, secured by a payment of 1*l.*
For the convenience of frequent travellers, Periodical Insurances are granted, which now cover the risk of Fatal Accidents while travelling in any class carriage on any Railway in the United Kingdom, or on the Continent of Europe, and insure Compensation for Personal Injury in any Railway Accident in the United Kingdom only.

To insure 1,000*l.* at an Annual Premium of 2*l.* 6*d.* 2*l.* 6*d.* 2*l.* 6*d.*
Insurances can also be effected securing the same advantages for terms of five or ten years, or for the whole of life, at greatly reduced rates, which may be learned from the Company's Prospectus, to be had at the Offices, and at all the principal Railway Stations. A new class of Insurances has also been established in case of Death by Railway Accidents alone, without compensation for injury.

To Insure 1,000*l.* at an Annual Premium of 1*l.* 10*s.* 10*s.* 10*s.*
Ditto any sum not exceeding 1,000*l.* for the whole of life by a single payment of 6s. per cent.; thus one payment of 3*l.* will secure 1,000*l.*

The Premiums charged include the Stamp Duty, this being the only Company Insuring against Railway Accidents empowered by Special Act of Parliament to pay a commuted Stamp Duty. Railway Assurance Office, WILLIAM J. VIAN, Secretary, 3, Old Broad-street, London.

THE PRESS.—For SALE, an established LIBERAL PROVINCIAL NEWSPAPER, complete, inclusive of Copyright and Plant, under 500*l.*; for part of which approved Bills will be taken.—Address G. S., care of Williams, Cooper & Co. 85, West Smithfield.

The Works of F. C. LEWIS, Esq.

MESSRS. CHRISTIE & MANSON respectfully give notice that they will SELL by AUCTION, at their Great Room, King-street, St. James's, on WEDNESDAY, June 27, at 1 precisely, and following day, the beautiful finished Works and Sketches in Oils and Water-colours, together with the very valuable Collection of ENGRAVINGS and COPPER PLATES of that highly talented Artist F. C. LEWIS, Esq. sold in consequence of his having altogether retired from the Profession, consisting of upwards of four hundred beautiful Drawings and Sketches, mostly in Water-colours, of Picturesque English Scenery, coloured from Nature—a few Landscapes in Oils—Thirty Studies by J. F. Lewis—a few Pictures by Old Masters, including a noble work of Van Dyck; also, the very valuable Collection of Engravings and Etchings, comprising the choicest early proofs of the beautiful works of F. C. Lewis, C. Y. Lewis, after Lawrence, Turner, Landseer, Martin, Danby, and other Masters—and of the admirable works etched by F. C. Lewis; also, Engravings by Old Masters and Books of Prints, including a very fine large paper proof copy of Young Ottley's Italian School—Gruner's Decorations of the Vatican, &c.
 May be viewed two days preceding, and Catalogues had.

The celebrated BAPTISM PICTURE, by JOHN WOOD.
BY MESSRS. CHRISTIE & MANSON, at their Great Room, King-street, St. James's, on SATURDAY, June 30, at 2 o'clock, the celebrated grand Gallery Picture of the BAPTISM OF CHRIST, by JOHN WOOD. This fine work, displaying great artistic excellence, gained the Thousand Pounds Premium offered by the late Mr. Thomas Bell, of Jarrow. The Picture may be viewed on and after the 22nd inst.

Important Sale of the Works of JOHN LEWIS.

BY MESSRS. CHRISTIE & MANSON, at their Great Room, King-street, St. James's, on THURSDAY, July 5, at 1 precisely, 140 of the well-known and admirable SKETCHES of that distinguished Painter in Water-colours, JOHN F. LEWIS, Esq., many of them partaking of that exquisite finish and elaborate detail so much prized in this great artist's finished works. They consist of the Original Studies made from Nature in Spain, Belgium, Italy, Greece and the Levant, and Egypt, representing the most interesting Scenery, Monuments of Antiquity, and characteristic Figures, in the costume of those picturesque countries, coloured with the most brilliant effect.
 May be viewed two days preceding, and Catalogues had.

THE FIFTEEN DECISIVE BATTLES OF THE WORLD, from Marathon to Waterloo. By Professor CREASY. 6th Edition. 8vo. with Plans, 15s.

On the 1st of July will be published,
in Quarto, price 8s.

ENCYCLOPÆDIA
BRITANNICA,

VOLUME IX. PART I.

CONTAINING

THE ARTICLE ENTOMOLOGY.

BY

JAMES WILSON, F.R.S.E. &c.

The ENCYCLOPÆDIA BRITANNICA has, from the completion of the First Edition in 1771, always held a pre-eminent place among similar works in this or any other country. During the currency of its publication its stores have been enriched, from edition to edition, by the contributions of the most distinguished men of science and literature, whose names it would be too tedious to enumerate. Many of these contributions cannot be surpassed, and have therefore been preserved; and the rest have either been superseded by new articles, or they have received such additions and emendations as the lapse of time rendered necessary. The Editor has no hesitation in affirming that no previous edition has received corrections and improvements so varied and extensive. Although the Seventh Edition was all stereotyped, so extensive has been the alterations and additions in the present, that they have involved the destruction of four-fifths of the stereotype plates; and the Proprietors have never permitted such sacrifices to stand in the way of manifest improvement.

The last edition contained many valuable literary and scientific articles, the displacement of which would have depreciated the book; such as **BEAUTY**, by Lord Jeffrey; **ALGEBRA**, **CONIC SECTIONS**, and **FLUXIONS**, by Professor Wallace; **CHINA**, by Sir John Barrow (with additions); **CHIVALRY**, by Sir Walter Scott; **ELECTRICITY** (with additions), by Sir David Brewster; and **ENTOMOLOGY**, by James Wilson, &c. The last of these the author refused to supersede by one more condensed and new, on the ground that the present was preferable.

Where necessary, other important articles have been cancelled, and replaced by entirely new contributions; such as **AGRICULTURE**, by John Wilson; **CHEMISTRY**, by Professor Gregory; **BOTANY**, by Professor Balfour; **EGYPT**, by R. S. Poole, of the British Museum; **BUNYAN**, by T. B. Macaulay; **BUTLER**, by H. Rogers; **East Indian Geographical Articles**, by E. Thornton; **AUSTRALIA**, **CANADA**, **BELGIUM**, **CHILE**, **CEYLON**, **CLOCK AND WATCH WORK**, and a multitude of others.

The Editor has been promised and has received the aid of many of the most distinguished writers of the day; and neither labour nor expense will be spared to render this great national work worthy of its name.

Edinburgh: ADAM & CHARLES BLACK.

London: SIMPKIN, MARSHALL & Co.

And sold by all Booksellers.

NEW BOOKS AND NEW EDITIONS

PUBLISHED BY

JOHN W. PARKER & SON, West Strand.

THE SPANISH CONQUEST in AMERICA, and its Relation to the History of Slavery and to the Government of Colonies. By ARTHUR HELPS. Vols. I. and II. with Maps, 2vo. [Nearly ready.]

ANCIENT and MODERN FISH TATTLE. By the Rev. C. DAVID BADHAM, M.D., Author of 'The Esculent Funguses of England.' Reprinted, with Additions, from *Fraser's Magazine*. With Index. 12s.

LONDON, SATURDAY, JUNE 23, 1855.

REVIEWS

Russia on the Black Sea and Sea of Azof: being a Narrative of Travels in the Crimea and Bordering Provinces. With Notices of the Naval, Military and Commercial Resources of those Countries. By H. D. Seymour, M.P. Murray.

THE Russian war has effected a great historical restoration. Through its vistas the seas—the steppes—the peninsulas—the valleys—that lie around the Euxine, have been opened to the familiar view of Western Europe. They had previously been explored by many agreeable and sagacious travellers—the most graphic of whom were M. and Madame Hommaire de Hell; but there was no popular call for landscapes, groups, statistics, topography, and civil and military records from every city of the plain, and every tribe of the hill, in all that extensive region. The sword has borne with it an illumining light. The southern tracts of Russia have become radiant under the investigations that have been directed to them. A Circassian chief might hear his military situation discussed wherever three people are met in London; the Tatar has had many a new social polity constructed for him within the sound of Bow bells; even the tomb of Mithridates has been transplanted by “our own Correspondent” from Sinope to Kertch, and consumed as table-talk.

Among the books, light and heavy, which have resulted from this enthusiastic interest, Mr. Seymour's is one of the most admirable. It exhibits a lucid plan of arrangement, a concentrated power of description, a fullness and solidity of statement which entitle it to rank as a durable authority. Mr. Seymour adds to his personal observations, gathered in the course of three protracted journeys, a body of facts collected from authentic sources, critically examined, and placed in systematic order. His narrative, which abounds in matter of antiquarian, social, historical, and scientific interest, is also sprinkled with anecdotes and sketches which illustrate and render it amusing.

Mr. Seymour starts with a general picture of the Crimea, defines and describes the territory of Little Russia, the Steppes, the country between Perekop and the interior cities of the peninsula, and enters into a recapitulation on the annals and manners of the Tatar race. All this portion of the volume is alive with incident and bright with picturesque varieties. Sebastopol—the Russian army and navy—the ancient remains of the Crimea, and its ethnological history, form the subjects of highly instructive chapters. Mr. Seymour then diverges to the Sea of Azof; and it is fair to say, that we have learnt more of its cities and coasts from this account—derived in great part from a merchant of Taganrog—than from any work we had hitherto examined. The writer's industry, judgment and experience are of no common order; his book, therefore, while it contains strong statements and remarks, and is rich in striking social illustrations, is thoroughly reliable, and cannot fail to excite an interest in all classes of readers. Mr. Seymour has much to say in favour of the Russian people, and is not a bigot in his views of the Russian Government. But the Russian policy he explicitly represents to be that of violence and usurpation, and adds to proofs already accumulated. When, in 1840, the Czar's flotillas broke into Persian river-territory on the borders of the Caspian, a Turcoman chief resisted their seductions and their aggressions.—

“One night, therefore, troops were disembarked, his house was surrounded, and he and all his sons were carried off and conveyed into the interior of Russia, whence, at the prayer of a very influential personage, his place of exile was changed to Tiflis, where I knew him.”

A gallant Georgian Khan, when Persia yielded one of her provinces to Russian intrigue, refused the yoke and fled.—

“After many years he thought he might venture to come and live at Tabreez, the capital of Azerbajan, and near his own country. He had sounded the Russian consulate, and found them apparently favourable, and when he arrived he was invited to dinner by the Russian Consul-General. Everything passed off very agreeably until after dinner, when, as he was sitting on a sofa with the Consul, drinking his coffee, the latter begged to be excused for an instant, and left the room. Immediately upon his quitting, a file of Russians appeared at the door, with their pieces levelled at the Khan, and the Consul, from behind them, told him he was extremely sorry that he was obliged to treat a guest in so un courteous a manner, but that he must execute his orders, that Suleiman Khan must consider himself a prisoner, and prepare instantly to be conveyed into the interior of Russia.”

Among the Tatars Mr. Seymour found many curious and romantic traits of character. As a nation they scarcely survive; but one of their princesses—the celebrated Adel Bey—still lives in her palace in the Crimea. She it was who received Madame de Hell in saloons of exquisite splendour, and showed her the flowers of the race—three girls of wondrous beauty and enchanting grace, clad in such attire as Haidée wore in her island, and such as Hafiz might have written of in odes bedropped with allusions to roses, to myrrh, and to the moon. These angels were sprung from the family of gentle natives of which one chief commenced his career by boiling seventy refractory nobles in cauldrons—an invention more successful than Cayenne. But the soil of the Tatar is now possessed by men of different blood. Mr. Seymour describes the Russian workman as a child, who needs to be watched and guided.—

“As an instance of this, Col. Upton said, while he was building the dock-gates at Sevastopol, when the stone-work was prepared for the wood, he found to his astonishment that the parts did not fit, although he was certain that his calculations were right, and the work apparently correctly executed. At length he thought of measuring his gauge, and then he found that his Russian workmen, having done their work wrong, cut his gauge to make it appear right, and never thought that there were other parts of the work which must fit in with theirs, and consequently make their error appear.”

Apropos of the fortress, he has a statement which it would be well to verify in details:—

“We have found to our cost how inexhaustible are the stores of Sevastopol, and yet it is said that a still greater amount is laid up in the chain of fortresses that have been erected during the last twenty years on the German, and particularly on the Prussian, frontier.”

Haxthausen is quoted to show that Cruys and Byng would have been esteemed in Russia, where the example of Golovin is followed—the Admiral who said it was his rule never to fight unless he had three Russian ships to engage two Swedes. Clearly, the maritime forces of the Empire are yet in embryo.—

“At Sevastopol there was an outcry against the English engineers of the steam-vessels, and the Emperor consented to appoint a Russian on trial, who took a steamer out to sea, and damaged her machinery so much after a few hours, that she was towed into port again by another steamer sent out to fetch her. The Emperor then said that he would continue to employ the English until his own people were really able to undertake their duties.”

The *morale* of the soldier is that of passionless, rigid, inveterate courage. He obeys the Em-

peror, because it seems impossible, and would be unnatural, to disobey.—

“A soldier on duty at the palace of the Emperor at Petersburg, which was burnt a few years ago, was stationed and had been forgotten in one suite of apartments that was in flames: a Greek priest was the last person to rush through the burning rooms, at the imminent risk of his life, to save a crucifix in a chapel, and returning he was hailed by the sentry, who must in a few instants more have been suffocated. ‘What do you want?’ cried the priest, ‘save yourself or you will be lost.’—‘I can't leave,’ replied the sentry, ‘because I am unrelieved, but I called to you to give me your blessing before I die.’ The priest blessed him, and the soldier died at his post. The late Emperor himself on one occasion attempted to pass a sentinel in one of the corridors of the palace at Petersburg, who had orders to let no person pass, but the man resisted him, and when the Emperor tried to disarm him, wrestled with him, and flung him back against the wall.”

The first of these stories seems apocryphal. The Emperor Nicholas, however, gave his troops credit for incomparable steadiness. The Jews, though good military artificers, failed in the field.—

“The story is told of the late Emperor, that on one occasion, when he was reviewing some troops, he found out all the Jews by snapping his fingers in each man's face. If they stood immovable they were Russians, and if they flinched they were invariably Jews.”

The Russians have discovered a martial stimulus unknown to the Western nations:—

“There is often a buffoon attached to each company, who amuses his comrades by his jests and antics, and is generally a great favourite. On one occasion in the Caucasus, when the troops were driven back by the Circassians, the buffoon was wounded and left behind. A favourite jest of his had been to crow like a cock, and as he lay on the ground he thought of the only way to save himself, and crowed. This had such an effect on his comrades that they rallied, charged again, and saved him.”

Their favourite weapon is the bayonet. It was exalted by Souvârov in his “Discourse under the trigger.”—

“Push hard with the bayonet! The ball will lose its way—the bayonet never! The ball is a fool—the bayonet a hero! Stab once: and off with the Turk from the bayonet! Even when he's dead you may get a scratch from his sabre. If the sabre is near your neck, dodge back one step, and push on again. Stab the second! Stab the third! A hero will stab half-a-dozen. * * In the attack there is no time to load again. When you fire, take aim at their guts; and fire about twenty balls.”

Explaining “swiftness” to be an element of military success, Souvârov adds:—

“We fall all at once upon him (the enemy), like snow on the head. His head turns. Attack instantly with whatever arrives,—with what God sends. The cavalry instantly fall to work; hack and slash! Stab and drive! Cut them off! Don't give them a moment's rest!”

The pith of this general order is contained in that terrible tactician's advice on the point of straightforward speech and action. He himself is straightforward, at least:—

“For the healthy, drink, air, and food; for the sick, air, drink, and food. Brothers, the enemy trembles for you! But there is another enemy, greater than the hospital,—the damned ‘I don't know.’ From the half-confessing, the guessing, lying, deceitful, the palavering, equivocation, squeamishness, and nonsense of ‘Don't know,’ many disasters originate. Stammering, hawking, and so forth; it's shameful to relate!”

The Soldier's Cross of St. George illustrates the subject of honorary rewards, as compared with pecuniary donations. It is the most honourable military decoration, yet intrinsically the least valuable, being of lead. Other incentives to valour are described by Mr. Seymour:—

"The Preobrajenski guards, the few companies which Peter undertook to drill ostensibly for his amusement, and which became the nucleus of the whole Russian army, still wear the original helmets of his time; and it is a glory among the men to have those that are the most pierced by bullets and battered by sabre cuts. The regiment of Tchernigoff obtained the privilege of alone wearing red-stockings (probably gaiters to the knee, which were then worn all over Europe), because at the battle of Pultava they marched in blood up to their knees."

Mr. Seymour relates the incidents of the excavations at Kertch, which brought to light so many relics of a former epoch. When the tumulus, vulgarly supposed to be Mithridates' tomb, was opened, the crowd overwhelmed the sentinels, and commenced a search on its own account:—

"The people penetrated into the tomb, examined everything, and then were discovered the little plates of gold which covered the pavement. While they were thus occupied in examining and disputing about the smallest spoils, some persons perceived that the tomb resounded as if there was something hollow underneath. Raising the stones of the hollow square in the corner, they discovered a second tomb below much richer than the first, and from this the masses of gold were drawn which for several years afterwards were in circulation at Kertch. There was not a Greek woman there who did not retain some relic of this great discovery, especially in the form of earrings. It was said that no less than 120 lb. weight of gold jewellery were extracted from these tombs, of which the Government obtained about 15 lb., and the rest was dispersed."

On every point of commercial, military and political interest connected with the Crimea, the Sea of Azof, and neighbouring territories, Mr. Seymour supplies information. His summary on the importance of the coasts which the allied squadrons have lately swept of their defenders is as follows:—

"The commerce of the Sea of Azof is rapidly increasing in importance; the countries surrounding it are rich and, as yet, undeveloped; and from the fine system of river communication which reaches the sea at Rostof, it is constantly drawing towards it for shipment a larger portion of the productions of Great Russia. There cannot be a doubt that, when peace is restored, a great impetus will be given to its trade; that it will benefit by the increased movement that will probably take place on all the shores of the Black Sea; and, should the Russian Government wisely change its military policy, and allow its stout-hearted and enterprising subjects to pursue their natural industrious bent, capital and population will flock to the south, and Rostof and Kertch will rival the Tana and Panti-capæum of ancient days."

To talk to Russia of mitigating her restrictive system seems as futile as to argue with her, as Mr. Seymour does, for a reduction of her military force:—

"Her people is the most peaceable in the world, and the troops cannot be wanted to coerce them. Indeed, it is notorious that there are hardly any troops in Great Russia, the most thickly peopled and important part of the Empire. There is only one infantry corps stationed at Moscow out of ten corps which compose the whole army. Where are the rest of her forces stationed? There where she expects to make conquests. They are distributed fan-shape round the European edge of the Russian Empire, from the Baltic to the Black Sea, that they may overawe Germany, and advance to support one another in any move upon Turkey; while 170,000 men are kept in the Caucasus to root out the principles of liberty and extend Asiatic conquests."

We have no space to analyze Mr. Seymour's theory of Russian politics. If he digresses to such matters, the reader will bear with him, for the sake of the knowledge and pleasure to be derived from a perusal of this work.

The Mercantile and Bankrupt Law of France: a Practical Treatise. By Henry Davies, Solicitor, and Émile Laurent, Avoué. E. Fingham Wilson.

The great operations of the French and English firm of Pelissier, Raglan and Co.,—the Lord Mayor's "eminent and successful labours in cementing the cordial alliance of the two countries,"—and the opening of the French Exhibition,—appear to have moved our authors to the production of this compendium of the Mercantile Law of France. War does not foster commerce; and we should probably have been on equally good terms with our new friends if the Lord Mayor had been abolished with John Doe, the common voucher, and other time-honoured personages of doubtful utility. It is, therefore, fortunate that this book needs no excuse and no special reason for its production.

The authors renounce any attempt to produce a scientific work; they address, not the Temple, but the City, and endeavour to supply, with reference to our nation, that general knowledge which a well-informed merchant should possess of the laws of every community with which he trades.

The "perfection of reason" which we enjoy in this country is based on the Common Law, on which is engrafted the *lex mercatoria*, which yields to local or special customs, all which are overridden by statutes, which are amended by other statutes, which must be construed with reference to other statutes, none of which statutes can a man of common ability understand, should he be fortunate (or perhaps unfortunate) enough to find them all out in the chaos of our Statutes at Large.

The French law, on the other hand, based on a Code of no remote date, expressed with clearness and precision, may boast, perhaps, of as much simplicity as is compatible with the complicated transactions of modern commerce.

In a small book, of about 125 pages, it has been found possible to give a very good outline of the Mercantile Law of France, which will, we think, be found quite sufficient for the guidance of our mercantile men in their dealings with that country. The law of Sales—of Transport and Carriage—of Payment—of Bills and Notes—of Insurance, Partnership and Bankruptcy—are clearly stated; and there is also a sufficient sketch of the jurisdiction and practice of the different courts before which commercial suits are prosecuted.

The principal defect in the execution of this task is of no great importance: it arises from the fact that the authors do not always give the reader credit for the knowledge which, if he belong to that class to whom alone the book will be useful, he is sure to have, namely, a general acquaintance with the English mercantile law:—for instance, we find a document drawn up upon the non-payment of a bill of exchange, and "which is called a protest," referred to and explained more than once, as if no such document were known in England. A more just view of the position of the reader might, we think, have shortened the book; and the statement or illustration of many points by reference to our own law instead of by passages that sound like the enunciation of the law of England, would have made this treatise more clear to those to whom it is addressed, as well as more concise.

Another growl and we have done. Our worst enemies can hardly accuse us of being an inhospitable nation. We exclude no foreigner who is rejected by his own nation, or who settles quietly amongst us; but we do not like aggressive aliens. What have the inhabitants of our Dictionaries done that they should be pushed from their proper places by such de-

cided aliens as *solidarity* and *solidarity*? Why should we hear of the "expedition of goods" from one to another?—of "the special authorization of Government"? When such strangers stand before us, suspicion is a virtue: if not watched, we shall find our dear old English terms destroyed, as the beautiful word *mercy* is in danger of being, through the unaccountable predilection which the bishops who compose our prayers entertain for the ugly monster, *mercifulness*. In conclusion, we may remark, that many of the provisions of the French law are worthy of the particular attention of our Law reformers. We trust they have already considered the working of the provisions for the limited liability of sleeping partners; if not, they can do so before the new Acts are amended, as, no doubt, they will be in the sessions of 1856, 1857, and 1858. Again, while we do not altogether like the principle of the French bankruptcy laws, and should be sorry to see a man who fails in business re-instated only on payment of his debts in full with interest, we cannot but consider the law that sends the *fraudulent* bankrupt to the hulks as justly applicable to those disgraceful cases that occasionally, though rarely, occur in this country.

Notes on Duels and Duelling, alphabetically arranged; with a Preliminary Historical Essay. By Lorenzo Sabine. Boston, Crosby, Nichols & Co.

DUELLING has found a pleasant advocate in Jules Janin. The French critic holds, that the man who is reluctant to meet a fellow man, "with swords for two," is lost not merely in the world of brave men, but in that of cravens,—on the ground that the multitude of cowards, by whom he is surrounded, will affect courage at his expense. Further, it is M. Janin's opinion, that the man is lost in this world—in which opinion is everything—who is afraid to win good opinion at the point of the sword. "What is to become of the man," exclaims M. Janin, "who in this world of hypocrites and calumniators dares not demand reparation, sword in hand, for the calumnies and malicious reports to which he has been exposed?" The best thing he could do, to our thinking, would be to disprove the calumny—or to despise it. He proves nothing by giving the calumniator a chance to run him through the body or to send a bullet through his brain. M. Janin thinks otherwise. In his view of the subject, we owe the small remains of civilization upon earth to the practice of duelling. Suppress that practice, and humanity would perish; we should have no more of the sinews and sentiments of men than are possessed by the pulpy people who, according to Prof. Whewell, inhabit the wide-spreading plain of the planet Jupiter.

There have been two or three men in our own world almost as wise as M. Jules Janin. "If thou art weary of life," said Marius to the bold Teuton who challenged him, "go and hang thyself." Themistocles was no coward, and yet he would rather take a blow than neglect of good counsel from Eurybiades. In later times, the Count of Savoy challenged the Dauphin of Viennois:—"Hark ye, Sir Count," said the lusty Dauphin, "I will send you one of my wild bulls; and, if you be so minded, you may struggle till you are tired with an antagonist not easily overcome." We suppose that M. Janin will not dispute the bravery and gallant bearing of Turenne; and yet, according to the critic, the hero of Sintzheim and the Rhine must be a lost man in the eyes of all the sections into which M. Janin divides the world, for Turenne refused to fight a duel, under the grossest of provocations. He had been sub-

jected to a disgusting insult by a rash young officer, and as quickly drew his sword to resent as the other to defend it. But Turenne thrust his weapon back into the sheath, remarking as he did so:—"Young man, if I could wipe your blood from my conscience as easily as I have wiped the filthy proof of your folly from my face, I would take your life upon the spot." M. Janin is an exceedingly clever person, but we very much doubt if even he will be able to persuade his countrymen that the Turenne who fell so gloriously at Salzbach, in front of the artillery of Montecuculi, was a coward for refusing to avenge an insult by a crime.

The very founders of the "institution" of duelling seem to have had some suspicion as to the iniquity of the practice. They, at all events, impeded the free adoption of the latter by introducing "the Saviour's Truce," by which duels were prohibited from Wednesday to Monday, because those days had been consecrated by our Saviour's Passion. This only left Tuesday open as the "fashionable day" for killing; and this result was a good one,—although there is some obscurity in the religious reason upon which it was founded.

The good St. Augustine never was challenged, except by some malignant, but not always illogical, Donatist, and then only to a duel of literary controversy. St. Augustine, therefore, is not to be found in Mr. Sabine's 'Dictionary of Duellists.' Nevertheless, we find in the Saint an excellent remark, very germane to the matter. When a Donatist adversary added to his arguments a taunt, to the effect that the majority of writers were on *his* side, and against St. Augustine, the Numidian saint replied with great force, that it was the sign of a cause destitute of truth to rely only on the authority of many men, who may err. So may it be said that it is better to obey the injunction which says, "Thou shalt commit no murder," rather than to be led away by the arguments of any number of men who endeavour to persuade you that you may infringe the law in the shape of duelling.

The opinion of St. Augustine, thus applied, has not had, it must be confessed, much efficacy in France. In the palmy days of duelling, 4,000 gentlemen were killed in *rencontres* in the short space of eighteen months, according to some chroniclers; of ten years, according to Mr. Sabine. In the former period of time, 14,000 pardons were granted to parties who had been caught in the act of breaking the law, by settling their paltry disputes on an issue of death. In one province alone of France,—in Limousin,—120 gentlemen were slain in duels within six months! The Church encouraged what the State denounced, by giving absolution to the survivor, in return for some appropriate offering. The piety of the giver was made the ground of extending pardon to him, just as Hector was declared to be dear to the gods in general, and to Jupiter in particular, for the reason that the son of Priam had covered with "*rich gifts*" the altar of the Father of Olympus.

In the Historical Essay prefixed to the Dictionary, Mr. Sabine pleasantly points out how cunningly the knightly wit suited the quarrel to the chivalric conscience:—

"In theory, as will be seen, the combatants always fought in a *just* cause. But it could not have been so in fact, nor was it so in many cases, even in the belief of the parties themselves; and those who in passion, or from unworthy motives, took up an unrighteous quarrel, resorted to various expedients to relieve their consciences, and to put themselves in the right. These evasive shifts are well illustrated in the story of a knight who entered the lists upon a case which he knew was wrong, and who, to change the issue, fled at the first onset. 'Turn, coward!' exclaimed his antagonist.—'Thou liest!' retorted the

knight: 'coward I am none, and in *this* quarrel will I fight to the death; but my *first* cause of combat was unjust, and I abandon it.'"

Cardinal de Richelieu endeavoured to suppress duelling by executing duellists, but he could not suppress their spirit. When François de Montmorency was on the scaffold, about to lose his head for indulging too extensively in the prohibited amusement, he caressed his mustachios while the executioner sharpened his axe. "Oh, my son," said the Bishop of Nantes, who stood by him, "do you still think of the vanities of this life?"—"I think only of my mustachios," said François; "they are the prettiest mustachios in all France."

The Cavalier custom of duelling was, strangely enough, introduced into New England by two Puritan serving-men. The *rencontre* is thus recorded.—

"Doty, Edward, and Edward Leicester. At Plymouth, in 1621. The parties were servants of Stephen Hopkins, and having a dispute, they settled it—gentleman-like—with sword and dagger. Both were wounded. Without a statute law on the subject, the whole company of Puritans assembled to consider and to punish the offence. The decision was the wisest that could have been made. Doty and Leicester were ordered to be tied together, heads and feet, for twenty-four hours, without food or drink; but the intercession of their master, their own humility, and promises, procured a speedy release."

—This checked the hot blood of young Puritans, but only for a time. In later days, "Castle Island (now Fort Independence), in Boston Harbour, was once celebrated as a duelling-ground for the hot-headed sons of New England." We are inclined to think that the evil practice would have been effectually checked in Old England had Parliament adopted the very serious resolution moved by Mr. Turner in the year 1844, whereby the survivor in a duel was to be liable to pay the debts of a deceased antagonist! In such a case the dying man would have the satisfaction of knowing that he owed no man anything. But then who would call out a man who had a heavy account against him at his tailor's? Chivalry would suffer more than it did at the hands of Cervantes were Mr. Nugee, or any other fashionable tailor, to be found present at a contest between two customers, and, at the close of it, stepping over the body of a slain patron, to present his "little bill" to the disgusted survivor.

The German governments have sought to check the practice of duelling by a melodramatic and rather Germanically-solemn contrivance. "In 1851, the survivor of a duel was compelled by the authorities to be present at the post-mortem examination of the body of his victim, and to pay strict attention to the proceedings of the surgeons."

Mr. Sabine's pages are full of pleasant research, and he even traces prize-fights to the filial piety of the Brutus who introduced gladiatorial combats to solemnize the funeral of his father. From this Roman-ist source we should, however, be rather disposed to derive the "skrimmages" which enliven, if they do not solemnize, the incidents of an Irish wake. To show further how remotely Mr. Sabine goes back in his researches, it is only necessary to point to the account, at page 184, of the little *rencontre* between a young Hebrew and a gentleman of Gath. The latter was the challenger, but Mr. Sabine thinks that "perhaps the motives of the former, in accepting the cartel, were not entirely patriotic or disinterested." Mr. Sabine seems to be of opinion that the youth was less courteous than need have been to his elder adversary, and that the latter was not a man deserving to be so treated by a stripling. The ancient manner of duelling, as adopted on the occasion

alluded to in the page above quoted, was not that which was in the memory of the hero of the following record.—

"Allen, — (an eccentric, half-insane Irish lawyer, of some note in his time), and a brother of the bar, whose name does not appear. It is related in 'Curran and his Contemporaries,' that Allen dashed his bar-wig in the face of his brother lawyer, and nearly blinded him with the powder, and that a meeting was the consequence. The attorney fired and missed; Allen, who had purposely reserved his fire, brandishing his pistol furiously about, to the imminent danger of all within its range, wildly demanded of his awe-struck second, in whose mind's eye the gallows largely loomed, 'Shall I rush on him with a shout, after the manner of the ancients?'"

The ancients themselves, however, could hardly have been more barbarous than some of the moderns,—witness the following:—

"Biddle, Thomas, and Spencer Pettis. In Missouri, in 1831. Both killed. Biddle was the challenged party, and, being near-sighted, stipulated a distance of five feet, with pistols. *Their weapons, in position, actually overlapped each other.* Both conducted with remarkable coolness. They exchanged forgiveness on the ground. Pettis died the day after, and Biddle the third day after the duel: the former was a member of Congress elect from Missouri, the latter a major in the army of the United States, and a brother of Nicholas Biddle, the celebrated banker. The quarrel commenced in the newspapers of St. Louis, during an election canvass."

American senators often fight upon any or no quarrel; but some among them are too wise for such a folly,—and we are happy to record a fact so satisfactory. Thus, in 1797, the two honourable members Blount and Thatcher quarrelled in the Senate.—

"The offence was given in debate. Mr. Blount introduced a series of resolutions on the subject of 'Defensive Measures,' one of which contemplated the putting of eighty thousand of the militia of the country 'in a state of *requisition*.' Mr. Thatcher, in the course of his remarks to the House, commented upon the phrase '*requisition*,' as a *French* term of which he was not fond, and said that, while he had no objection to holding such a number of men '*in readiness*,' he entertained the hope that the sentiment would be expressed in '*American language*.'"

—Language of a very sharp quality ensued, the end of which was that Blount sent a "*requisition*" to Thatcher to meet him in deadly combat, but Thatcher declared in good *American* language (which need not be translated into barbarous *English*) that he was not in readiness.—

"Mr. Thatcher's answer afforded much amusement at the expense of his chivalrous adversary, and was, in substance, that, being a husband and a father, his family had an interest in his life, and that he could not think of accepting the invitation without the consent of his wife, then at home at Massachusetts, whom he would immediately consult."

Mr. Thatcher was wiser than the Irish gentleman Mr. Bourke, whose fight with Amby Bodkin is thus described.—

"The parties fought, principals and seconds, at ten paces, with pistols, at right angles, and all fired on a signal from an umpire. A child of Bourke (subsequently Sir John Bourke) was held upon a man's shoulder to see 'papa fight.' The two principals were slightly wounded at the first fire, and at the second the seconds and Bodkin were severely hurt; but no lives were sacrificed. Several of Bourke's servants were present."

We believe that these incidents are correctly related; but there are several statements in these pages which evidence haste, if not lack of knowledge, on the part of the author. Thus, Mr. Sabine speaks of the old *Courier* as "a paper which supported the Liberals,"—and he gives the locality of the duel, for fighting which François de Montmorency suffered while admiring his mustachios, as the *Palais Royal*, instead of the *Place Royale*. Of the mustachio

incident, so characteristic of the man and of the times in which he lived and was about to die, Mr. Sabine makes no mention. Mr. Sabine's French also seems to be rather that of Stratford-atte-Bowe than that of Paris. For example:—

"Charles X., King of France, and the Duke of Bourbon. In the year 1778, when the king was known as the Count d'Artois. The offence was on the part of the Count, who, at a ball in the opera hall, Paris, pulled off the mask worn by the Duchess of Bourbon. The Duke, who was a Condé, and father of the Duke d'Enghien, for his challenge to the Count, was banished to Chantilly."

Salle de l'opéra does not mean, as Mr. Sabine has translated it, "opera-hall," but "opera-house." We have, however, quite as indifferent translators on this side the Atlantic. Thus, in an English version of Lamartine's 'Girondins,' some courtly people and incidents are described as figuring "under the vaults" of the Tuileries, instead of "beneath the arched galleries" (*sous les voûtes*) of that palace. These remarks will not, we trust, be followed by sanguinary results; but comments quite as simple appear to have been occasionally followed in America by fatal consequences. Some editors there, like Lord Norbury in Ireland, would seem to have begun the world with "50*l.* and a pair of horse-trigger pistols." The Irish Judge was not less cool than our own lawyer Thurlow, who when on his way to fight Stewart in Kensington Gardens, stopped to eat an enormous breakfast by the way, at a tavern near Hyde Park Corner. It must be confessed, too, that if the American duels recorded in this volume are some of them comic and some of them barbarous, the English duels are in nowise behind them in either respect. Here are samples of both,—the first of the barbarous.—

"Williams and Bennett. British physicians of note, in the seventeenth century. They fought with swords and pistols. Bennett, mortally wounded, and with the sword of his antagonist in his body, prayed to God for strength to avenge himself, and succeeded in giving Williams a fatal stab."

The following is of a comic cast:—

"Winnington, —, and Augustus Townsend. In Hyde Park, in 1741. Winnington, a statesman who held various offices, and Pitt's predecessor as Paymaster of the Forces; Townsend, 'a pert boy,' says Walpole, the second son of the minister, Lord Townsend, and Captain of an Indianman. Winnington was the challenger. They walked into the Park on Sunday morning, 'scratched one another's fingers, tumbled into two ditches,—that is, Augustus did,—kissed, and walked home together.'"

We began by speaking of the first Puritan duel in America between two serving-men:—we conclude with the description of the first political or party duel in England, between two peers.—

"Marlborough, Duke of. Challenge to the Earl of Paulet, in 1712. The Tories of England, as early as 1706, commenced their clamours against the Duke, who, they declared, was governed by selfish motives, and sacrificed the interests of his country for his own private advantage. Three years later, the public sentiment had become general, and he was accused, on all hands, of prolonging the war, and of sacrificing human life to increase his property and reputation. In 1710, he became an object of derision. Instances of his fraud, avarice, and extortion, of his cruelty and misconduct, were related everywhere. The year following, the Earl of Anglesey said in Parliament, that 'a good peace might have been obtained, but for the conduct of some persons who prolonged the war, for their own private ends.' The Duke could not misunderstand the insinuation, and vindicated himself in a long speech. Finally, in 1712, the Earl of Paulet ventured to utter in his place, that the Duke of Ormond 'was not like a certain general'—led troops to the slaughter, to cause a great number of officers to be knocked in the head, that he might fill his pockets by disposing of their commissions.' Marlborough remained silent. But as soon as the Lords adjourned,

he sent Lord Mohun to the Earl of Paulet, with an invitation 'to go and take the air in the country.' The Earl inquired, whether he should take the invitation to mean a challenge. 'The message,' replied Mohun, 'requires no explanation; I shall accompany the Duke of Marlborough, and your lordship will do well to provide a second.' The Earl was unable to conceal his emotion; and his wife communicated the affair to the Earl of Dartmouth, Secretary of State, who informed the Queen. Her Majesty desired the Duke to relinquish his design, and he accordingly abandoned it. *This, as is supposed, is the first party or political ducl ever contemplated.*"

With this extract we commit to the shelves, where are ranged other books of reference, this alphabetical record of fighting, fury, folly, and fanaticism.

Life with the Zulus of Natal, South Africa.
By G. H. Mason. Longman & Co.

Mr. Mason is a simple narrator, and that is the secret of the charm which we find in his book. He tells us, tritely, of the difficulties which beset a young man's career; he invites us to sympathize with himself and his brother when they quitted College for Africa; he adds to the thousand and one dioramas of a sea voyage, and even expects that we shall bestow the praise of ingenuity upon a youth of original conceptions, who put a hair across a telescope and affirmed it to be "the line." This, however, is venial monotony, incomparable with the prescriptive iteration of more pedantic travellers. As soon as Mr. Mason sets foot in Natal he fulfils the promise of his title-page, and records his anecdotes of life in a wild country. He has no statistics, no notes on political economy, no parenthetical pamphlet wedged into his narrative: all is personal, vivacious and entertaining.

The brothers found themselves in the capital of Natal possessed of 28*l.* sterling. With this sum they resolved to buy an estate, or "erf," and the way in which they effected their object, with all solemnity and legality, would have been an example to Chancery. They were now burghers of Pieter Maritzberg, with a vested interest in the church, the common, and the cattle-market; but their acres on the Illovo, though purchased and paid for, were yet to be discovered. After many inquiries, Mr. Mason ascertained in what direction to move in search of his virgin lands. Through forests, mountains, and dreary plains he tracked his way, until the Illovo appeared — and "The Mason Estate."—

"Here and there a limpid fountain gushed out amongst rich pasturage, high up on the hill-side, and sparkled like a mirror in the bright sunshine. Of course we took advantage of this magnificent landscape, and built our house with its front overlooking it, while behind lay the pretty town, scattered over two square miles, with its groves of fruit-trees enclosed by hedgerows of figs and almonds, its snow-white buildings and vacant erven; the whole commanded by the formidable batteries of Fort Napier, reposing on a rounding hill to the extreme right."

They dug the foundation of their house, found a quarry, and worked it themselves.—

"And in this way, by the end of a week, we had laid a substantial stone foundation for a house, twenty odd feet long, and fourteen wide, which, as we were bachelors, would be quite large enough for our purpose."

The superstructure was to be formed of brick, and a pit was opened in which these two Cambridge men set themselves to knead the clay. They laboured by night.—

"We tucked up our trousers legs, and doffing shoes and stockings, fell to work right merrily treading the cold clam clay. * * The hungry wolves, roaming in search of prey about the neighbouring hills, were howling dismally at our cheerless lot; while laughing jackals, uttering their piercing cry,

came skeltering past in troops within a hundred yards, and joined with the croaking frogs of a neighbouring swamp in ridiculing our midnight labours. A few hours' work enabled us to prepare sufficient clay for several hundred bricks, and as the tramping of it was the only obnoxious part of the proceeding, we postponed all further operations till next morning. * * Our first day at brick-making was not so remarkable for the number made, as for the peculiarity of their shape: some of the bricks had 'come out with a run,' and spread themselves into flooring tiles; others had stuck to the moulds so tenaciously, that, when they did come out, they had grown to double their proper length, and had assumed a twisted form; while some few had managed to retain their shape right manfully, in spite of jerks and finger-marks. All of them, however, *long, short, and broad*, were bricks, and though they differed as to *form*, still served alike to build the house. A useful hint to churchmen!"

A Zulu hired himself to them at a low salary; but he could not undertake to do "skilled labour," such as reaping flags for thatch.—

"This was a very disagreeable operation, for the marsh abounded with long green snakes, very beautiful but venomous; and as we reaped we were continually killing them with our sickles. Indeed, on several occasions, especially when tying up bundles of the flags that had lain in heaps at the brink of the marsh all night, we actually got them in our hands with the flags, and, from their bright green hue, only discovered them as they wriggled out of the handful of rushes and endeavoured to escape."

Their earliest profits were made by the sale of oats and straw; and the account of their ways and means supplies a genuine picture of the settler's first struggles in a new country. But they manfully braved their perplexities, and soon began to gain a reputation for bricks.

"The only fault in our Caffre labourers arose from their excessive gallantry; for (I should observe) it is a native rule never to allow Caffre maidens to pass within sight without saluting them, or else, intercepting their path, standing quite mute and motionless, while the girls survey them and pass on. Now it frequently happened that troops of girls came in from the Caffre kraals with maize, thatch, milk, eggs, wild fruit, sugar-cane, potatoes, &c. &c. for sale; and, no sooner did their shrill song reach the ears of our servants, than they rushed from their work just as they were, some besmeared with mud, others spattered with white-wash, and the rest armed with spades, pickaxes, buckets, brick-moulds, or whatever else chanced to be in their hands at the moment."

Building cottages, they procured tenants for them, and had commissions from Dutchmen with heavy purses to erect shooting boxes on their South African estates. Mr. Mason's narrative of a waggon journey to one of these locations is uncommonly picturesque; as well as his account of a bridal pageant on the Umlaass.

"Scarcely had we taken our station near the Umdodie (husband), when a low shrill chant came floating on the breeze from the bottom of a lovely vale hard by; where I discovered a long train of damsels, slowly wending their way amongst bright green patches of Indian corn and masses of flowering shrubs, studded with giant cactus and the huge flowering aloe. As the procession neared the huts, they quickened their pace and raised their voices to the highest pitch, till they arrived at the said cattle craal, where they stood motionless and silent."

Entering the habitation of the bridegroom,— "the ladies formed two lines, with the bride in the centre, and struck up a lively air; whereupon the whole body of armed Caffres rushed from all parts of the craal, beating their shields and uttering demon yells as they charged headlong at the smiling girls, who joined with the stalwart warriors in cutting capers and singing lustily, till the whole craal was one confused mass of dancers, roaring out hoarse war-songs and shrill love-ditties. After an hour dancing ceased, and Joila (Caffre beer) was served round, while the *lovely bride* stood in the midst of the ring alone, stared at by all and staring in turn at all, until she brought her eyes to bear on her admiring lord; then, advancing leisurely, she danced before him,

amid shouts of the bystanders, singing at the top of her voice, and brandishing a huge carving-knife."

Jacob, the Zulu, who sat over the fire "taking snuff wholesale with a small bone spoon, till the tears streamed down his cheeks," was a sort of hospitable Man Friday, with a talent for milking wild cows. The manners of the half-sophisticated servitors, of whom he was a specimen, contrast distinctly with those of the Caffre or Zulu uninfluenced by contact with Europeans. The Caffres, like the Arabs, have an intense hatred of swine, and will not touch pigs' flesh except with long sticks. Their antipathy to the Dutch seems almost as inveterate. Mr. Mason was entertained by his driver with many stories of the warfare thus engendered.—

"Waggon camps, he told us, were the favourite resorts of the Dutch in times of trouble: they are formed simply by drawing up a number of waggons in a circle, within which the oxen and families are placed for security. The spaces beneath and between the waggons are then closely filled with goods and bushes, so as to prevent the possibility of a Caffre creeping through, without getting his head split with an axe by the swarms of women and children who carefully keep guard; while the men fire from under cover of their waggons, each man having several guns for the women to load as fast as the men fire, and thus they keep up an incessant shower of balls on their assailants, not one of which is ever fired at random."

Mr. Mason's record of his adventures among the Zulus is neither formal nor profound: it contains, however, some graphic sketches of life in a half-savage country. We must consult other writers on the "progress and resources" of Natal; but to such as would know how a student of Sidney-Sussex College, Cambridge, lived a rough life in South Africa, and prospered by the work of his own hands, these two parts of "The Traveller's Library" offer agreeable reading.

Tahiti: a Romance of the South Sea.—[*Tahiti*, &c.]. By F. Gerstäcker. Leipzig, Costenoble; London, Williams & Norgate.

Tales of the Desert and the Bush. From the German of Friedrich Gerstäcker. Edinburgh, Constable & Co.

Herr Gerstäcker is a novelist who has cut out for himself a path in which he is not likely to find many competitors. A traveller in regions which lie far beyond the limits of ordinary tourists, he takes with him a happy faculty for characteristic observation, and shows considerable proficiency in adapting the form of the ordinary historical novel to materials yet untouched by fiction. As the dealer in the common-places of English history forms a background of Cavaliers and Roundheads, and places a domestic story in front, so does Herr Gerstäcker, in his novel of 'Tahiti,' take for the historical basis of a love tale, those squabbles between the English missionaries and the French in the island of Tahiti,—which, about twelve years ago, were regarded with some alarm, as likely to cause an unpleasant feeling between the governments of Queen Victoria and Louis Philippe, and were the cause of much hard speaking in Exeter Hall.

The non-historical hero of Herr Gerstäcker's 'Tahiti' is a young Frenchman, named René Delavigne, who escapes from an American whaler, and takes refuge among the fastnesses of the island of Atiu, one of the group of which Tahiti is the principal. Here he falls in love with Sadie, a native girl, who has saved him from the pursuit of the whaler's crew. Sadie, it should be observed, is a pious, Protestant Christian, educated by Mr. Osborne, a very worthy missionary, and a striking contrast to the rest of his fraternity, as exhibited in the tale,—for Herr Gerstäcker writes with a strong

dislike of the black-coated councillors of Queen Pomaré, painting both them and their coats as black as possible, and evidently thinking that the islanders would have fared much better with their original heathenism. So liberal, indeed, is good Mr. Osborne, that, although René is a Catholic, he consents to his marriage with his adopted daughter, Sadie, in spite of certain misgivings as to the future, and also in spite of the offence he gives to his sterner brethren.

Atiu is a kind of terrestrial paradise, and so long as René, his wife, and the child who soon blesses their union are domiciled there, they form a picture of happiness such as Bernardin de St.-Pierre might have contemplated with delight. But circumstances take them to Papetee, the capital of Tahiti, where native simplicity has been sadly contaminated by European vice. Moreover, the residence at Papetee brings René into contact with some decidedly genteel French families, and poor Sadie is in a somewhat false position. A good-humoured French lady would introduce her into society, but an American dame shrinks from her as a woman of colour; and at a grand party her complexion exposes her to the insult of a naval officer, who does not expect that a girl of the South Sea Islands will be offended by any amount of licentious gallantry. What is worse than all—even than the duel in which René is engaged on account of the insult aforesaid—is the fact that René has made the acquaintance of a fascinating and designing young lady, and indulges in thoughts by no means favourable to domestic felicity. Things look worse and worse, and Sadie can see no prospect of happiness, except in a return to her own island of Atiu. Alas! the dream of bliss is never to be realized. She and her child leave Tahiti for Atiu, and René is to join them,—but the troubles which break out in the island, and in which he is forced to take an active part, hinder him from fulfilling his intention, and he is even persuaded to return to Europe without taking leave of Sadie. When after a lapse of years he visits Atiu, he finds that she has died of grief, leaving behind her a daughter, who is the image of herself, and whom he fondly embraces, but abruptly quits, unwilling to plunge her into the corruptions of the civilized world.

Into this very simple story, which is told with much pathos, Herr Gerstäcker introduces a vast number of vividly-drawn figures, such as can only be found in that peculiar state of semi-civilization which belongs to the South Sea. A convict and his wife, who keep a spirit-shop—a nautical desperado of a new stamp—a converted native, who, though himself a missionary, has strong heathen reminiscences and predilections, are oddities that will not easily be found elsewhere, and stand out conspicuously among a motley group of Tahitian chiefs and kind-hearted Methodists, of refined French ladies and wild native girls,—all of whom receive a due share of attention from Herr Gerstäcker. The political events of the island furnish him with countless adventures of "broil and battle," which he sets forth with all the certainty of a man well acquainted with places and people. We only regret that he has not been a little more endowed with the virtue of brevity; but as he has endeavoured to fill the office of Tahitian historian, at the same time that he sets forth a tale of ordinary interest, we must admit that his double task was a natural temptation to a more than usual amount of prolixity, and allow him his four volumes.

Several of Herr Gerstäcker's tales, illustrative of American life, and remarkable for their truthfulness and simplicity, have been translated into English, and formed into a neat little volume with the title 'Tales of the Desert and

the Bush.' This volume is the second named at the head to this article.

Every Boy's Book: a Complete Encyclopædia of Sports and Amusements, intended to afford Recreation and Instruction in their Leisure Hours. By George Forrest. Routledge & Co.

"Every boy," when he buys this book, will probably be surprised to find that, among the "sports and amusements" which Mr. Forrest has provided for him, as affording "recreation and instruction" in his "leisure hours," is *arithmetic*! He who remembers and indorses the rhyme about "multiplication is a vexation" will be little disposed to account the author liberal. But let him be comforted; Mr. Forrest, a *ludimagister* himself, holds with another ancient saw, touching the effect of "all work and no play" upon the senses of the legendary "Jack"; and his "arithmetic" only forms a portion of the section which comes under the head of "Scientific Amusements." The other sections comprise everything that can concern a boy, and some which ought not to do so. The book would have been as well, nay better, without the chapters on Gymnastics and Boating, matters upon which no tyro should venture without a master, unless he would risk breaking his neck by the one and getting drowned by the other. We think, too, that the instruction on Fireworks might have been omitted without loss.

The other portions of the book, and especially those entitled "The Young Naturalist" and "Parlour Amusements," are well executed. The author loves play as well as teaching, and he is "professor" of both. What made Nausicaa, the daughter of King Alcinoos, so excellent a mother to the young Ptoliporthus? She had been presented, when young, by Aganella, of Corcyra, with the first ball that was ever invented, and was taught that play after labour was the well-earned privilege of the young. Mr. Forrest makes a more valuable present, with similar instruction. The instruction, however, occasionally grows old—as, for instance, where he tells "every boy" that "those most clumsy, dangerous and awkward vehicles, called Hansom's Safety-Cabs, are to be avoided at all times." The more solemn warnings, too, of the author are marked by something of a singular quality. Thus, at the end of a chapter on horsemanship, he exclaims, with a sort of Pythagorean vigour, "My young friends, be kindly affectionate,"—not "one to another," as the apostolic injunction has it, but "to your horse or pony,"—for, adds the author, "be assured of this, that He who made 'an ass to speak,' and reproved the cruelty of a prophet, will love those who are kind to the creatures he has made." This is rather in the vein of the conjuror's sermon upon "He poured me out like water," and the union of the theologian with the master of the ceremonies seems as incongruous as that combination of office in an Athenian family, where the same gentleman—and he a slave—taught mathematics and the flageolet. This was to the boys; and when the young gentlemen had finished their studies, the captive instructor went and gave lessons in dancing to the young ladies.

The Athenian boys were not without their games,—more of which have come down to our times than are noticed in this volume. But both their sports and lessons were different from those given to Spartan lads. The Athenians were lucky enough to know nothing of "boarding schools." When not educated at home, they were only during the day engaged at

school; when evening came, they were again under the roof of their parents; and they could have practised none of the active games explained by Mr. Forrest, on their way; for, going or returning, they were accompanied by the domestic "Pædagogus," whose office it was to inculcate wisdom as he walked along with his pupils. He must have been an awful bore!

The Athenian females seem to have had far more fun in them; and we can fancy that the chapter in the book before us on gymnastics would be exceedingly relished by that damsel immortalized by Aristophanes, who exercised herself in jumping, till her heels touched her back, and who acquired such strength thereby as to be vigorous enough to strangle a bull. She would, probably, have jumped all the higher, could there have ensued what happened to that lively girl "Marie Germain," as recorded in the most sparkling of the *Essays of Montaigne*.

There was as much *system* in the education and sports of the Athenian as of the Lacedæmonian youth;—with this difference, that the former had a private, the latter a public character. The French Republic mimicked and caricatured both systems, when the Government undertook to decree at what month "weaning" should begin. Sparta cared for little, except that the boy should not grow fat. He might be dirty, was taught to despise literature, was thought none the worse for being a thief, and was praised if he could cram much impudent wit into the very briefest of phrases. He learned that to be brave was to be wise, and that a peaceful pursuit like that of agriculture was employment for a slave. Parish Alvars or Frederick Chatterton would never have been able to get up a benefit concert in Laconia. When Timotheus played too exquisitely, the Ephori cut four strings from the lyre.

There was something of a Muscovite spirit in the object of the Athenian education for boys; for they were bound, on ceasing to be mere boys,—bound by the most stringent of oaths,—not only to defend the frontiers of their country, but never to cease attempting to extend them as long as there were wheat, wine, and wealth in any country beyond them! The result in both cases was what Mr. Blackpool would call "a muddle." There were *grand* rather than *great* men in Greece, and inconsistency everywhere. Themistocles was little-minded enough to be jealous of Aristides, as Pericles was of Cimon. The people who starved Pausanias to death honoured his memory—Sparta was aristocratic and simple—Athens democratic and luxurious. We do not know, however, that we moderns have any right to throw stones. With Christian profession we keep to much of the heathen practice; and yet we have what the Athenians had not, an "*Everybody's Book*," with Pelion-upon-Ossa in the way of explanation, in order to make our practice agree with our profession. We are still heathens "with a difference." In Rome, when a father was in debt he could sell his son. In England, when a son is in the same predicament, he sells his father. *Voilà tout!*

Selections from the Papers of Lord Metcalfe, late Governor-General of India, Governor of Jamaica, and Governor-General of Canada.
Edited by John William Kaye. Smith, Elder & Co.

In noticing 'The Life of Lord Metcalfe' [*Athen.* No. 1402], we observed that few works better deserved to be studied by public servants, whether civil or military. The same remark applies to the volume of papers which Mr.

Kaye then promised, and which justify the expectations we had formed of them. The volume is divided into three parts:—the first part contains selections from Metcalfe's earlier papers, until he became a Member of the Supreme Council; the second furnishes the reader with some of his most important minutes while in Council and during his brief Governor-Generalship of India; in the third are a few of his despatches from Jamaica and Canada. The whole volume forms an excellent sequel to the 'Life,' and is worthy of attentive perusal. It is true the interest in the events that gave rise to these despatches has passed away, but the calm sagacity, the candour and disinterestedness, the high and honourable spirit, which they breathe, are for all time. Few men have infused so much of individual character into their despatches as Metcalfe—few Lives require less supplementary labour from the biographer than his life. The task of the biographer has, indeed, been rather to condense and adjust, than to elucidate, and in this concluding volume to select,—a duty which Mr. Kaye has well discharged.

Of the three parts the second is perhaps the most valuable—and at the same time the most interesting. It contains the fruit of many years' official application and study, and is replete with observations which may serve as maxims to the student of Indian politics on almost every subject of importance connected with our Empire in Hindostan. With the truest patriotism and the utmost zeal for the interests and glory of his own country, Metcalfe combined a thoughtful consideration of what is due to the people of India, and a benevolent care of their welfare. He was not one of those, still unfortunately so numerous, who in order to stand well in the opinion of Government, and to make a goodly show of figures in the revenue column, would exact the uttermost from the Ryot, careless of the transfer of long-vested rights which such rigour often entails. What his views on such subjects were we may learn from a letter without date, but which appears to have been written the year before his accession to Council, to one who, with a great and well-founded reputation for zeal, bore also the character of too much sternness, and who afterwards perished by the hand of a dissatisfied claimant. Metcalfe writes:—

"The difference between the system you follow and that which I would like to see established appears to me to be this: you insist on the full share of government, and make that your principal, if not your sole, object. I think that the established share of government is too much, that it ought never to be rigidly exacted, that the interests of government would be more promoted by taking less, and that the revenue would in time be more increased if the cultivators were allowed to enjoy in greater freedom the produce of their own industry. In making a settlement, we must, of course, take the established share of government as a foundation. But in the calculations ensuing, I would lean to the interests of the cultivators, and make the terms of the settlement light and easy for them. And by making the settlements for long periods I would hold out to them the prospect of great profit from their own industry. I think that the result would greatly enrich the government by enriching the body of the people. I would avoid the practice of measuring the crops, that being a practice which is universally disgusting, and which, it appears to me, cannot fail of being so. Putting myself in the situation of the cultivators, I feel that I would, if possible, give up cultivation in disgust if I could not raise a field of corn without the collector's people coming to measure it, and exact the full share, and perhaps more than the share, of government. All compulsory measures in cultivation appear to me to be bad; and whenever it may be necessary to bind people by penalties to cultivate a certain quantity of land, or certain sorts of grain,

and not to cultivate in other villages, such measures I should lament as the bad effects of a rigid and violent system. I would depend for a future increase of revenue on the effects, which I believe to be natural, of allowing men to reap the benefit of their own industry. I would let them cultivate as much or as little as they found it for their own interest to cultivate; and the sort of grain or other produce should be at their own option. The benefit which they would derive from cultivating their own land I should expect would render any restraint on that point unnecessary. No people labour so indolently as those who work in chains and by compulsion. Hearty exertion is always self-willed, and with a view to self-interest. The justice, the benevolence, the wisdom, the expediency, the necessity of a system of conciliation towards the Zameendars, would appear to me to be indisputable, were it not that you apparently pursue one of compulsion. If you think that force alone is calculated for the management of these people, I shall respect both your opinion and your experience, but it will require strong proofs to convince me. The difference in revenue between a light settlement and a rigid one may not be very great; but the difference in consequences is incalculable. A few thousand rupees too much exacted may ruin a district, and drive the inhabitants to emigration."

—We find the same tenderness for the rights of others, the same impartiality and freedom from one-sided views, running throughout these Papers. His zeal for the business in which he was engaged, and his high sense of duty to the Government under which he acted never led Metcalfe into harshness or injustice. Even when commenting on the incapacity of the Nizam for the duties of his station, he adds: "Nevertheless, he is 'more sinned against than sinning,' and I can hardly imagine a situation more entitled to pity, or more calculated to disarm censure, than that of a prince so held in subjection by a servant, supported by an irresistible foreign power." So, too, when justly offended at the incendiary spirit of certain Baptist Missionaries in Jamaica, he does not put out of sight the "inestimable" services they had previously rendered to the Colony; nor even while suffering a protracted martyrdom from the ravages of a cruel disease could the falsehoods or the arrogance of the ultra-liberals in Canada move him from his accustomed candour and equity.

But though equitable to his opponents, Metcalfe, where occasion required, could pursue stern measures with the utmost vigour; and he never palliated abuses or refrained from exposing them. Thus he warred against an iniquitous cabal at Hyderabad with uncompromising hostility. Not even the influence of the Governor-General, for whom he had otherwise the greatest respect, and with whom he had lived on terms of the closest friendship, could sway him to countenance the intrigues of Palmer's house, though one of the members of that house was personally his friend and had married a ward of Lord Hastings. In the same spirit he resisted the encroachments of the Supreme Courts, as the tribunals of the King's Judges at the several Presidencies are called.

It is not necessary to allude, even in the briefest manner, to all the various subjects which are treated of in these Metcalfe Papers:—suffice it to say, that almost all questions of paramount importance are discussed. Military matters are handled as felicitously as civil. Indeed, in the camps of Lake and Combermere, Metcalfe had had much experience, and had won his spurs in the storming of Deeg. He was, therefore, entitled to speak of war, and the following words from him derive increased weight on this account.—

"Our great success in India has induced the systematic habit of despising our enemies, and thence we are liable to disasters and reverses from which otherwise we might be preserved by the actual mag-

nitude of our power and extent of our resources. Our Indian Empire is owing solely to our superiority in arms. It rests entirely on that foundation. It is undermined by every reverse, however trifling, and would not withstand any serious indication of weakness. All India is at all times looking out for our downfall. The people everywhere would rejoice, or fancy that they would rejoice, at our destruction; and numbers are not wanting who would promote it by all means in their power. Our ruin, if it be ever commenced, will probably be rapid and sudden. There is, perhaps, no other power on earth, judging from the superficial nature of our tenure, between whose highest elevation and utter annihilation the interval would be so short. 'Aut Caesar aut nullus.' From the pinnacle to the abyss might be but one step. The fidelity of our native army, on which our existence depends, depends itself on our continued success. Its courage and confidence must be fed by victory, and would not survive repeated defeat and disaster. These sentiments are not new. They are applicable to all times in our Indian history, since our power became predominant. They lie dormant, perhaps, in days of peace and apparent security; but the slightest disaster rouses them into active sensibility."

It will be well if these sentiments are ever borne in mind, and serve as a warning in security. They deserve to be pondered at the present time, at all future times, by our Indian politicians, for our besetting sin in that country seems to be an overweening and incautious spirit, to which, as in the volume before us, are attributed our first failure at Bhurtpore and our repulses in the opening campaigns against Nepaul,—as in later times we have owed to the same pride our Cabul disasters and the protractedness of our struggle with the Sikhs.

OUR LIBRARY TABLE.

Remarks on the Suggested Establishment of a National Order of Merit. By R. Bigsby, LL.D. (Whitfield.)—Why Dr. Bigsby should assume that he is himself so indisputably in the right, and that Mr. Blanchard Jerrold is so clearly in the wrong, in the discussion on an Order of Merit, it is not easy to surmise. Mr. Jerrold represented that the question had been raised in a recent cabinet and set aside, and he inferred that our governing classes object, more or less, to the idea. He even hinted at the exclusive spirit supposed to dwell in all aristocracies. Upon this Dr. Bigsby declares that he has studied the matter more profoundly than Mr. Jerrold, and that Mr. Jerrold is absolutely in error. "Unhesitatingly" he says that no such feeling exists. This is "unquestionable,"—it is "certain,"—it is "not to be doubted." In fact, Dr. Bigsby "cordially believes" that the late Government acted on principles which he proceeds loosely to explain. But, in spite of Dr. Bigsby's ill-concealed dogmatism, we see no reason to rely upon him for a report on the sentiments, "from high to low," of the peerage and its connexions. He has not adduced one statement definite enough to be tested, or one reason better than the prejudice he denies. Indeed, it ought to have been obvious that a person who claims to deal in Cabinet logic, and to bring us intelligence from "the higher circles," should be provided with something more than words as vague as "the idle wind."

Life of Napoleon the Third, Emperor of the French. By Frederick Greenwood. (Partridge & Oakley.)—All the most interesting incidents in the career of Louis Napoleon are here related with dramatic point and vigour. Mr. Greenwood brings out the character of his "hero" by citations from his writings and speeches,—suppressing nothing, and concealing none of the contrasts which a less scrupulous biographer might have attempted to elude. Historical justice is satisfied, without a passionate discussion, at an inconvenient time, of acts which are not likely to be forgotten while MM. Victor Hugo and Schœlcher are remembered. Mr. Greenwood, so far, is right in avoiding a judicial summary of the French Emperor's life. He is scarcely so discreet when he prefaces a political biography

by the oddly-phrased statement, that he "confesses to little knowledge of politics, and less care." This is the deficiency of his book. The narrative is entertaining, the events are well grouped, and the style, though immature, is careful. But "little knowledge and less care" of politics have led Mr. Greenwood into the mistake of endeavouring to explain the conduct of a man whose career has been political and nothing else by other than political reasonings. It results that, while he tells his story well, he interrupts himself by ambitious prosings, which are barely readable. We give this free counsel to Mr. Greenwood because he has talents and must be cautious in the application of them. The 'Life of Napoleon the Third' is a compact and agreeable book, worth perusal.

Lights and Shadows of English Life. By the Authoress of 'Clara Cameron.' 3 vols. (Skeet.)—This is a dull novel, the stupidity of which is only to be equalled by its extreme foolishness. If it had been more lively and more readable, we should have needed to warn young readers against its total want of all right principle and good feeling. As to being "Lights and Shadows of English Life," it might just as well be lights and shadows of life in the moon; properly speaking, there are neither lights nor shadows, but a confusion of discrepancies and improbabilities, which even in the book only hang together from the total absence of the first rudiments of common sense. The heroine falls in love, at a boarding-school where she is a pupil, with a man whose very name she does not know, and whom she has every reason to believe is the last man she ought to marry. The keystone of all her woe is, that she hears him afterwards called by a *wrong* name, and being told that the *real* individual of that name is about to be married, suffers herself to be forced into a marriage with a certain nobleman of weak intellect, and afterwards, finding her mistake, gives him an assignation to explain himself. The result that was most probable is averted by the accident of her husband coming upon them unexpectedly, and shooting him through the heart,—for though an idiot he is an excellent shot. His wife runs away by herself, and finally dies when the novel is little more than half way through; but it is difficult to say whether the beginning, middle or end of the book be the most foolish and ineffectual.

Inez: a Tale of the Alama. (New York, Harper Brothers.)—This is an American tale of fine writing and spasmodic emotion; it is dedicated to "the Texan Patriots, who triumphantly unfurled and waved aloft the 'Banner of the Lone Star' who wrenched a new country from the iron hands of despotic Mexico, and wreathed the brow of 'The Queen State' with the glorious chaplet of civil and religious liberty." There is something about the Mexican war in the book, written from an entirely American point of view,—there are severe invectives against Santa Anna, and still more bitter denunciations of the Roman Catholic Church and of all the priests who serve it:—these are painted in colours black and sulphurous enough to win the admiration of all Exeter Hall. When we add, that the author kills off without remorse all the characters, except two, who after much strong suffering are allowed to live and get married, we have told our readers what material incidents they have to expect in the book; but we cannot forbear warning them that they will find the flowers of American rhetoric and the figures of speech stronger than may be pleasant to delicate nerves.

Olympus. (Simpkin & Co.)—There are in society some who converse, some who talk, and some who chatter. Books may thus be classified, no less than men, and 'Olympus' belongs to the category of solemn tittle-tattle. Its author has boiled down the studies of—we should say—not a very long life, and presents us with the refuse. So, at least, we must judge if it be true that he has received "a sound moral and classical education," for his volume is a revelation of diseased egotism and stolid flippancy. Lemprière, or Smith, to all appearance, has helped him with antique names and allusions, which are spread like caltrops over every page. It is a mistake, however, to suppose that classical words make a classical style, or that a precocious amateur is superior to Locke because he calls him "muddle-headed." Our Olympian

rambler affects familiarity with more books than were burnt at Alexandria, but we need not suppose that he has read Montaigne because he has a saucy mention of the "dear old critic"; or that he understands Rabelais because he quotes his "sad trash." 'Olympus' has been composed in error. Its author has been fascinated by the satirists, and has tried to repeat them, as well as to force himself, by dint of technicalities, into a philosophical dissertation. Thus, the evident ingenuity of his mind has been thrown away. If he write again, he must school himself into better habits of thought and expression. Not even the extremest youth would excuse a second production so impertinent and so unreadable as 'Olympus.'

A Treatise on the Administration of Trust Funds under the Trustee Relief Act. By John Darling. (V. & R. Stevens.)—Every one who has been a trustee knows the vexations of trusteeship. Many will be satisfied to follow Mr. Darling's leadership in escaping from their responsibilities; others will be glad to be furnished with a cabinet councillor on occasions of dispute or deliberation. To all, at any rate, who are concerned, directly or indirectly, in public or private trusts, this Treatise, with its full Appendices, will be of value. It is addressed to ordinary readers as well as the profession, and is, therefore, unlike some legal manuals, intelligible without a glossary.

The Ethnological Exhibitions of London. By John Conolly, M.D. (Churchill.)—The "Aztecs" seem likely to share the fate of Barnum's Mermaid, after having made as many dupes. Dr. Conolly, in a paper read before the Ethnological Society, insists that they are nothing more than two poor idiots, whose humanity has been imperfectly developed, and in whose origin there is nothing ethnologically singular. He quietly ridicules the statements of their exhibitors, as well as the credulity of their audiences. But, clear as the exposure may be, we are not quite certain that it will leave the Aztec sham without believers. There are persons professing much philosophy who love a new chimera, and therefore put faith in the glittering city, the vast temples, the adored dwarfs, and primeval dialect of the fabled nation. For our part, Dr. Conolly's scepticism is far more satisfactory; and we are not surprised to find it applied also to Dr. Kahn's Niam-Niams, or tailed men, representatives of a people said to exist in the unexplored depths of Africa. That there *may* be such a race ought to be admitted; that there *is* no one but an advertiser would affirm. Dr. Conolly's doubts are serious, yet he reserves his final opinion until some real specimens, announced as shortly forthcoming, supplant the wax models in Dr. Kahn's Museum. The rest of his paper is devoted to other ethnographical exhibitions, which are treated in a popular and agreeable style.

Selections from the Best Italian Writers, for the Use of Students in the Italian Language. By J. P. Lacaita, LL.D. (Longman & Co.)—The learned Professor who has arranged this selection from Italian authors has shown equal taste and judgment. By the chronological arrangement of the extracts, the student is enabled to compare the phraseology and style of the best poets and prose writers of Italy, and also to acquire a notion of the progress of Italian literature. These are the author's avowed objects. To us, there appears to have been another,—although what seems so may, no doubt, have been mere matter of accident. For instance, the first piece in the volume is a fine hymn by St. Francis d'Assisi. It is remarkable for its elevation of tone, its warmth of piety, its intensity of thankfulness for benefits received, its fullness of confession, its depth of repentant feeling, and its expression of hope in the Lord alone, and in none other. Here is a hymn, written, in the twelfth century, by a canonized saint of Rome, which contains neither allusion to the saints nor mention of the Virgin, nor of her alleged efficacy. This hymn might be sung in any Christian assembly, and probably with more hearty consent, and less mental reserve or addition, than the 'Universal Prayer' of another son of the Romish Church, not canonized,—Alexander Pope. In some of the other selections we fancy we can discern similar purposes. Thus, in selecting the character

of Castruccio Castracani, Lord of Lucca, the editor probably desired to recall to the minds of his readers the person and principles of the Czar Nicholas; for he records of the former, that "he was faithless in his dealings with foreign powers, and would never attempt to subdue by force where he knew he could conquer by fraud; for he used to say, that "it was victory, and not the manner of victory, which brought glory to the conqueror." The singular logic of this tortuous tyrant is further seen in his assertion, made in a spirit of pious conviction, that "God is the friend of strong men, seeing that he always punishes the weak by the hands of the powerful." This, perhaps, is a little in the spirit of the *idée Napoléonienne*, that Heaven is always on the side of the heavier battalions; but it has less of true logic in it than is seen in the legendary recommendation of Cromwell to his troopers, to put their trust in Heaven and keep their powder dry. The reflections of Montecuculi on the happy effects of always being at war may win a smile from the youngest and least reflecting of readers. The latter will see that, two centuries ago, the great Modenese general, in the service of Austria, held that war was not only a pursuit of a highly civilizing nature, but profitable generally, and especially so when it was directed against the Turks. But this was said in the day when Austria was not degraded to the cowardly condition of following an expectant policy:—she was at that time bold enough to strike for herself, yet dishonest, as she has ever been, from the period of Rudolph to the era of the young Jäger, who shoots capercailzie, and waits to make alliances till victories are won without the aid of his armed hosts. Brief as the extract from Montecuculi is in this volume, it offers endless matter for reflection upon what Austria was when the Modenese wrote it, and what Austria is, with her armies in the Principalities, terrible only to the women.

The Angler's Song-Book. Compiled and edited by Robert Blakey. (Cox.)—We can very well fancy that Christopher North once "killed eleven dozen of trout and three salmon" in less than three hours; but we cannot fancy that he, or any other angler, after such feat, or indeed under any other circumstances whatever, could undergo the far more arduous and less profitable labour of singing such lyrics as those which form nine-tenths of this volume. For our own part, we had rather sit a whole day in a punt, and get no single "bite" as the reward of our folly, than have to read through such stuff. Mr. Blakey may be a very good angler, but he evidently knows nothing of poetry; and skilled as he may be in the matter of "gentles," he has no idea how to amuse the "gentle reader."

The Fortress of Coburg—[*Die Veste Koburg*]. By F. Hofman. (Hildburghausen, Ketteling; London, Nutt.)—This poem is one of several works, in which the author—who, be it observed, for the prevention of mistakes, spells his name with one "f,"—celebrates the glories of Coburg. Doubtless with the castle in full view, and with a guide to set forth the legends connected with it, this little book, which pursues in verse the history of the edifice, from its dark beginnings, is pleasant enough; but the stories are too vaguely told to answer the purpose of an ordinary book of legends, while the notes are insufficient to supply the requirements of the English reader.

Sir John Franklin and the Attempts made for his Recovery—[*Sir John Franklin, die Unternehmungen für seine Rettung, &c.*]. By Dr. Karl Brandes. (Berlin, Nicolai; London, Nutt.)—Availing himself of parliamentary papers, records of travel, and other accessible sources of information, Dr. Karl Brandes, Custos of the Royal Library at Berlin, has reduced into a continuous history the adventurous episodes of Arctic investigation, beginning with the expedition of Capt. Ross in 1818, and ending with the latest searches for Sir John Franklin. The volume cited above was published in 1854, when some of the more recent incidents were yet unknown,—but an Appendix has since been added in the shape of an article, published this year in the *Zeitschrift für allgemeine Erdkunde*. A Table of the average temperature of the various places in the Arctic regions, by Dr. Doye, and a

tinted Map of the Arctic Archipelago, by Herr H. Lange, complete the work.

Atlas of Skeleton Charts, for the Direction and Force of Winds and Currents, and other Phenomena, in the Arabian Sea, the Red Sea, the Persian Gulf, and Bay of Bengal. By A. K. Johnston. With a Preliminary Notice, by Dr. Buist. (Johnston & Co.)—This is a useful publication, and if the compiler's objects be carried out great advantages will accrue to navigation in the Indian seas. Captains of ships are invited to enter their marine meteorological observations in copies of skeleton maps, which will be furnished to them, by which means it is expected that very valuable and perfect charts may be eventually prepared, showing the meteorological phenomena prevalent at various seasons of the year in the Indian seas. The interests involved are very great. According to an estimate made some years ago, it appears that the value of the goods imported into, and exported from, Calcutta, Madras, and Bombay alone amounts annually to upwards of 2,250,000*l.* It has been shown that Lieut. Maury's charts and sailing directions have shortened the voyages of American ships by about a third. Thus, if the voyage to and from India were shortened by no more than a tenth it would secure a saving in freightage alone of 250,000*l.* annually.

Students of the New Testament will find in *The Epistles of St. Paul to the Corinthians*, by A. P. Stanley, Canon of Canterbury, a very elaborate criticism of the Apostle's doctrine and exhortation, as contained in the two "historical epistles." In certain aspects of his style, says Mr. Stanley, St. Paul resembled Thucydides and Oliver Cromwell.—*Job: a Course of Lectures*, by J. E. Kempe, is another commentary on the Bible, illustrated by texts and references.—On points of controversy several treatises, of more than usual solidity, have appeared. The most prominent is that of Dr. Pusey, *The Doctrine of the Real Presence Vindicated*. The writer follows his theory through the works of the Fathers, from the death of the Evangelist to the fourth General Council, and cites an imposing series of authorities.—A subject even more mysterious is developed in *The Philosophy of the Fall, and its Remedy*, by E. C. Topham, which, however, is little more than an amplification of the Book of Genesis, combined with passages from other sections of Scripture.—*The Philosophy of the Cross; or, Christ as Man*, by H. Cooper, is another attempt to explain the spirit and purpose of Sacred History, though its author disavows any pretence of mathematical demonstration.—In *Creation's Testimony to its God; or, the Accord of Science, Philosophy and Revelation*, Mr. T. Ragg describes himself as a poet, who occasionally forsakes ratiocination to address his reader's heart, though it must be said that his sentiment only serves for the peroration after each practical chapter. In the "Hymn," composed in psalmic measure, there are evidences of a glowing imagination and of much earnest self-culture (for Mr. Ragg is a labour-poet).—On applied religion, we have Mr. J. J. Tayler's *Christian Aspects of Faith and Duty*, of which the title is sufficiently explanatory.—Mr. Rowland Williams's *Rational Godliness after the Mind of Christ*, setting forth the original objects of Christianity, as related to human necessities and to social life,—and *Sermons, Preached at Trinity Chapel, Brighton*, by F. W. Robertson, on 'The Parables of the New, and the Incidents of the Old Testament.'—The Rev. J. Cumming has added to his works—which already need a separate catalogue—*Sabbath Evening Readings on the New Testament—St. John*. In these he makes no "pretence to originality," but offers simple instruction to the young.—Religious readers will comprehend from their titles the nature of the following sermons:—*Do all to the Lord Jesus*, by Dr. Pusey,—*Peace, the Gift and Injunction of Our Holy Redeemer*, by E. Kell,—*Spiritual Progress*, by C. H. Curteis,—and *War, its Evils and Duties*, by the Bishop of Lincoln.—*National Daily Prayer* is a tract, made up of extracts from the Liturgy,—and *Considerations on the Presence of Non-Communicants at the Holy Communion*, of quotations and arguments against an innovating practice of the English Church.—Mr. Henry Drummond, in

The Future Destinies of the Celestial Bodies, discusses some interesting problems, and maintains the theory, that a plurality of worlds is a necessary result of the principle of development, which he traces in creation.

LIST OF NEW BOOKS.

THE LITERARY FUND.

OUR readers will have seen in the daily papers very full reports of proceedings at the meeting on the 16th, called for the purpose of taking into consideration the Report of the Sub-Committee appointed at the last General Meeting,—and will have learnt that the Report was rejected.

Mr. M. Milnes, a member of the Committee, moved the following amendment:—"That this meeting acknowledges with gratitude the labours of the Special Committee appointed to consider and report on the question of a new charter for the Literary Fund, and recognizes the value of some of their suggestions as subjects of future deliberation; but, considering that the proposals therein contained involve an entire alteration of the nature and interest of the Society, and that its means are inadequate to the attainment of those purposes, this meeting is not prepared to recommend the application for a new charter to effect those objects." Mr. Milnes stated, that "the proposed changes in the constitution of the Society he conceived to be three. The first was, that the Society should not, as it now does, grant a considerable sum of money to the applicant; but should distribute the amount in small sums over a period of years in the shape of an annuity. The second point he took to be, that instead of giving sums absolutely, they should be considered as loans, made under certain conditions, and ultimately to be restored; and the third, which was perhaps the main one, was that the Society should cease to be a purely charitable association, and become a literary sodality."

A simple reference to the Report itself, which we have already published [*ante*, p. 675], will show that two out of the three changes to which Mr. Milnes referred, and on which he based his arguments and objections, are misconceptions of his own. The Sub-Committee did not recommend either that annuities or loans should be substituted for grants, but that the powers of the Committee (under a new charter) should not, as heretofore, be restricted to grants, but should extend to making loans, and, under especial circumstances and with especial precautions, to granting annuities. Mr. Milnes said there was nothing, under the present regulation, "to prevent an application being renewed annually." Quite true; and the Sub-Committee knew perfectly well, some of them having served on and others being now members of the Committee, that applications are made annually, and that occasionally, parties are relieved annually. The difference is one of feeling rather than of fact; but we cannot think that delicacy and feeling are altogether unworthy of consideration, especially with a Committee that offers its delicacy as a justification of its secrecy, and its secrecy as an apology for its irresponsibility. What is the advantage, as Sir E. B. Lytton asked, when

you acknowledge men to be entitled to relief, of compelling them year after year to expose their rags, to open their wounds, and to reiterate their cry of *Date obolum Belisario*? As to the argument which is founded on the presumed insecurity of loans, the worst that could occur would be, that if the borrower could not repay the sum advanced, the loan would become a gift.

Mr. Pollock, who seconded Mr. Milnes's amendment, argued as Mr. Serjeant Merewether had done; and as the Opinion of that learned gentleman is formally set forth, legal fashion, in an Appendix to the published Report, and was reproduced under a variety of forms during the discussion, it may be well to quote his words.—“From the early history of the institution,” says the learned Serjeant, “it is clear that the principle on which it was founded was, ‘to administer assistance to authors of genius and learning reduced to distress.’”

* * The Charter of 1818, in conformity with the intentions of the original founders, expressly describes the Society as formed for that purpose.” No doubt it was formed for that purpose; but the question is, whether it was formed for that sole purpose. The founders were plain, earnest, practical men, who did not waste their energies in grasping at impossibilities; they did not attempt to accomplish all their objects at once. But that Mr. Serjeant Merewether was wrong in his readings of “early history” was made manifest in a moment by reference to the very first advertisement issued, which was repeated in substance two years later, and which called on the public for subscriptions, to enable the projectors “to provide for the wants of sickness and age, and for the decent termination of life.” The intentions of the founders, therefore, must have been, not only to grant temporary relief, but in one form or another to grant annuities. In fact, if the learned Serjeant had read the “early history” with becoming attention, he would have known that all that was then done or attempted was but a step towards the foundation of an institution which the benevolent founder hoped and believed would ultimately become a centre of communication and action for the literary men of all nations, where the prosperous would be welcomed and the suffering relieved. We will add, that the Report of the Sub-Committee was written with the same views and in the same large and liberal spirit. But Serjeant Merewether's blunders were so astounding, that we should scarcely have noticed them, had they not been repeated by members of the Committee. Thus he stated, that “whilst the claims of so many applicants are unsatisfied, the corporation cannot be justified in diverting any of the funds for any other purpose.” We go further, and say that while the claims of any one applicant remains unsatisfied, not a single shilling is available for any other purpose. But is it a fact that the claims of many applicants remain unsatisfied from want of funds? Mr. Pollock, a member of the Committee, says yes;—“lamentably insufficient.” If this were true, what could be the justification of the Committee for wasting 500*l.* a year in doing nothing, and why have they gone on investing money in the Funds until their accumulations, apart from their real property, has reached 30,000*l.*? But it is not true,—it is a mere mistake. Speaking from memory, we are of opinion that in no one of the last ten or twelve years has the relief granted to applicants ever reached two-thirds of the income of the Society, and it has on occasions fallen below one-half. The strength of the Committee, however, was not in fact but in fiction, and its triumph was the speech of the Bishop of Oxford.

The Sub-Committee having determined how the Society could best, and with the least violence to existing forms and feelings, obtain some reasonable control over the Committee, without injuriously restricting its freedom of action, next considered how to turn the present “enormous expenditure” to beneficial use. The reader must remember that the Sub-Committee were not at liberty to propose a reduction of expenditure. For their own guidance on this point, the Sub-Committee turned naturally to the “early history” of the Society—not Serjeant Merewether's edition—and they pro-

posed that certain of the great empty rooms of the Society should serve as a place of meeting for its members, from 11 o'clock in the forenoon to 3 o'clock in the afternoon, and that a new class of members should be elected by the Committee on proof of their being literary or scientific writers; and that evening meetings or *conversazioni* should be occasionally held,—the small expense of these evening meetings being defrayed by such members as chose to attend. The reader will find all particulars in the Report.

The expenditure of the Committee is now about 600*l.* a year. Out of this 600*l.*, fully 400*l.* is expended on a Secretary who can have little to do, and would have nothing to do if the honorary officers did their duty,—and on apartments only occupied for a few hours on a very few days in the year. The Sub-Committee thought this expenditure might be made of some use to literary men by a very trifling addition,—certainly not adding 100*l.* to the present 600*l.* Here, however, in this union of literary men, was “the detested blot,” to which the Bishop of Oxford directed especial attention. He assured the meeting that the “social cup of tea”—the “dish of Souchong,” common at such *conversazioni*—would not do:—“Societies ‘starved on tea and flourished upon dinners.’” Be it so; then no possible expense or inconvenience could result from trying the “Souchong”; although, on his own “flourishing” principle, his Lordship ought, for consistency, to have moved that dinners should be included. But his own casual reference to dinners carried him in imagination “transverse” to the Athenæum Club and the London Tavern. What did literary men want with rooms and Souchong, when there was the Athenæum Club already established for their especial use?—which, as Mr. Dickens observed, was quite true, if they could but afford to pay down some thirty guineas and wait some five or seven years for admission. In brief, while the Sub-Committee had been dreaming of the Barmecide's feast, the Bishop was thinking of the after feast that rewarded the poor Barmecide for his long fasting. But if the “Souchong” societies find it difficult to get members who are able and willing to pay entrance fee and subscription, it does not necessarily follow that societies would have like difficulties which did not ask for either. After all, be it remembered, even the “Souchong” societies starve on—and some of them have starved on for nearly 200 years. We believe that not one man of science in a hundred, foreigner or Englishman, comes to London as a stranger, but that his first visit, if possible, is to one or other of these societies—the one, of course, in whose especial pursuits he is most interested, and with whose members, therefore, he can most profitably and pleasantly associate. Now, why should not literary men—men whose pleasure or whose profession is letters—why should not they have their central place of meeting, where even a stranger, being a registered Fellow, would be sure of recognition and welcome? It strikes us that many a young literary adventurer from the provinces—many a man of learning and genius from abroad—might there find aid or counsel, of value beyond price—even beyond the value of the Bishop's dinner at the Athenæum. It strikes us as possible that

The marvellous boy who perished in his pride might not have perished in the dreary isolation of his wretched garret had such an institution as the Founder and the Sub-Committee contemplated been then in existence—had he once grasped the hand of such a man as David Williams and received his affectionate counsel, illustrated and strengthened by his own life of literary struggle. It strikes us that even Chateaubriand, when he came here an exile in utter poverty, might have had his heart gladdened by the instant recognition of his genius, even though the genius that welcomed him had nothing to offer but sympathy and suggestion, not even souchong. Nor can we believe that it would have lengthened the weary hours when Johnson and Savage tramped together a whole night, round and round the very Square where the Fund now has its home, had they known that in that corner house there were friendly hands to welcome them in the morning, and friendly voices to say “God help you!” Illus-

trations of a like character crowd on our memory; but we have said enough by way of indication, and all who know anything of literary history can find examples for themselves. Do not let the reader waste his sympathy on barren regrets. Such men are amongst us and around us now and ever, though my Lord Bishop knows them not—though the poet Member knows them not;—and, strange contradiction in sense and sentiment, those who know them not are considered the right persons to legislate for them, and have a voice potential, and for its little hour conclusive, in their affairs.

Here we would willingly conclude all reference to the past; but some misapprehensions have got abroad, to which we think it necessary to refer. Both the Bishop and Mr. Milnes adverted to the Guild of Literature,—and Mr. Milnes hinted that the Guild had failed of its objects, and seemed to assume that the Report embodied the feelings and wishes of the projectors, who were, in consequence of that failure, anxious to engraft the special objects of the Guild on the more prosperous Fund. Sir E. B. Lytton replied, that so far were the members of the Guild from wishing in any way to benefit by the Fund, that it was the intention of those members of the Guild who acted with him to present to the Fund the money which they had collected, if the recommendations of the Sub-Committee were adopted. Thereupon, a discussion arose as to whether the Fund could, or would, grant loans and annuities. The Bishop set Serjeant Merewether at defiance, and maintained that the power was clearly within the charter—in which we agree with him. Mr. Milnes said that his amendment left the power and the policy of granting loans and annuities an open question. Then followed some sharp questioning by Mr. Foster as to whether the Committee would do it, which subsided on the assurance of the Chairman that the propositions should meet with “the most serious attention” of the Committee. The result was a vague impression amongst the members that some sort of compromise had taken place; and that it only remained for the Committee formally to acquiesce, when the Guild would hand over its treasures. Under this confused impression the vote was taken;—and the vote—like other votes adopted under compromise—we venture to say, did not accurately define the feeling of the meeting.

On the subject of this confusion and its results, we will make two brief remarks. There may be, for anything we know to the contrary—we believe there is—a power in the Guild to grant loans and annuities; there was also a recommendation of like effect in the Report of the Sub-Committee—“salmons in both.” The connexion between them we deny. The recommendations in the Report rest on their own reasons. We assert, that there is not a single recommendation in the Report that has not its warrant in the declared intentions or ascertained hopes of the founder of the Literary Fund.

In the second place, Sir E. B. Lytton stated what was the intention of his friends if “the recommendations of the Sub-Committee were adopted.” They were not adopted. Is it possible, under these circumstances, that Sir E. B. Lytton, Mr. Dickens, and Mr. Foster could consent to transfer more money—trust-moneys held under an Act of Parliament—to irresponsible men, and to a Society whose constitution they had within these three months denounced as “utterly absurd,”—to men whose expenses of management they had declared to be “unreasonable and enormous”?

A word now as to the future. The fundamental questions at issue were—and are—economy and control. This was distinctly asserted at the General Meeting,—by a minority, indeed, but a minority of twenty-eight against thirty-two,—all the officers of the Society voting against it. This fact sufficiently indicates within what limits there is a reasonable probability of success. We, therefore, recommend that a motion to the same effect be made at the next annual meeting, or that a special meeting be called to take it into immediate consideration. It might be well to repeat the exact words of the former resolution [see *ante*, p. 321], with some such addition as the following:—“That, whereas the annual receipts of the Lite-

rary Fund Society have for many years greatly exceeded the amount of relief granted to writers in distress, and that, as it is possessed of funded property to the amount of (in round numbers) 30,000*l.*,—is possessed, moreover, of landed estate yielding 200*l.* per annum,—and is also supported by royal patronage,—any further appeal to the public for pecuniary support is wholly unjustifiable."

OUR WEEKLY GOSSIP.

Sir Roderick Murchison holds his second scientific *soirée* for the season, at his residence in Belgrave Square, this (Saturday) evening.

We catch a report—which we trust is not true—that Sir George Grey means to defer the appointment of any one to the Chair of Natural History at Edinburgh till November, in the expectation of some man of greater eminence as a naturalist than any of the present candidates coming forward. Does he suppose that great naturalists will spring up at the stamp of his foot, or can grow, like weeds, in a single summer? The delay, even now sufficiently injurious, would then be disastrous. It would be alike unjust to the students and the Professor appointed, who would thus have to rush at once into a hasty, unprepared, and therefore imperfect, course of lectures:—in other words, would have, during the ensuing nine months, to prepare the substance of several large books, at the rate of two or three chapters a day for five days in the week. Should the Professor appointed be one who now holds any professorship or similar appointment, it would be most unjust to the body who would have hastily to supply his place by a man who must necessarily be equally unprepared for his new duties. It is most unjust and injurious to the present candidates, who will thus be kept dangling for a whole summer on the tenter-hooks of expectation, unknowing whether they are to prepare for new work or steadily to settle back to their old. Professors of Natural History are not to be made at a moment's warning.

Sir George Rose, the diplomatist and editor of the 'Marchmont Papers,' died on Sunday last, at his residence, Christchurch, Hants.

We really cannot oblige M. Cabany by printing any more of his letters—even under the terrible reprisal which he threatens. Enough if we give the last point which he raises in his own favour. He now tells us that several passages of the 'Moredun' MS. are written on the margin; and are apparently of a later date. Such, he says, is the "Granger" paragraph!!

A book like the 'Life of Sydney Smith' can hardly appear without its running commentary of minute criticism and correction. We have accordingly received the usual number of errata, hints, and communications; some of which, it may be as well to record in aid of Lady Holland, against the day when her *second edition* will be prepared. An historical reader of the *Athenæum* points out that there must be some looseness of chronology in her statement of Sydney Smith's pedigree.—

"It is stated [writes he] in Sydney Smith's 'Memoirs' that his maternal grandfather, M. Olier (*qu. D'Olier*), was driven to England by the revocation of the Edict of Nantes. This is impossible. The date of that notorious act is 1685:—had the refugee been an *infant* in that year, he must have been eighty when his daughter married, or thereabouts. But M. Olier, it is plain, was of mature age before he left France; since it is said that he could never learn any other language but French. It is needless to observe, that the effects of the Edict on French Protestants were exhausted at the time of its promulgation; so that no Frenchman, though Protestant, leaving that country for England in the eighteenth century, can have been forced by it to become an exile. According to the usual count of generations, M. Olier must have been born some years after the commencement of that century, even if his youngest daughter were the child of his old age, after a late marriage, and no longer young when she married Mr. Smith."

—Another Correspondent, whom we know to be familiar with the world of which he treats, begs us to correct a mistake made by attributing the lively verses which are printed in Vol. I. p. 81. to Miss Berry. The rhymes in question, our friend assures us, were not from the pen of Lord Orford's ward; but were written by Miss Katharine Fanshawe. The reader who may inquire more concerning Miss Fanshawe, is referred to Miss Mitford's 'Notes of a Literary Life' for a lengthened notice of that

accomplished Lady. Those who are indisposed to take so much pains, may be informed that Miss Fanshawe was a woman of family and fortune,—an amateur artist of the first class—long before Lady Waterford, Lady Lees, Miss Blake, or Miss Lucette Barker were thought of—commanding a pencil more original, humorous, and correct than the "Lady Di," for whose drawings Horace Walpole built a tower at Strawberry Hill. Miss Fanshawe was brilliant in society; and we have proof that besides the playful nonsense, of the parentage of which Lady Holland has deprived her, she could write verse more imaginative:—indeed, so little resembling the usual order of "poetry by a Lady of Quality," that another of her productions—the 'Enigma on the Letter H'—was during many years attributed to Lord Byron, and has figured in collected editions of the poetry of the Author of 'Childe Harold.'

The death of Prof. Blunt, announced in the Cambridge papers, leaves vacant the Margaret chair of Divinity in that University.

Oxford has been gay this week. Events, surprises and festivities have followed each other in that pleasant city during the last few days, with even more than the usually joyous jostling of Commemoration-week. On Saturday a literary party gathered at the Council Chamber, to present a Literary and Artistic Testimonial to Mr. Alderman Spiers, in commemoration of the graceful and splendid hospitality which distinguished his mayoralty. On Sunday, all that is distinguished at Oxford—and not a little that is celebrated beyond its walls—assembled in Magdalen and other chapels, and afterwards paraded in the broad walk of Christchurch. On Monday the ducal glories of Blenheim drew a fair proportion of the literary visitors; who returned in the evening to enjoy the humours and excitement of the boat procession on the Isis. A bazaar, a flower show and a *soirée* at Radcliffe Library filled up Tuesday pleasantly. Next day the meeting in the Theatre to confer the honorary degrees—of which meeting the Poet Laureate was unquestionably hero—the public lunch, and the ceremony of laying the foundation of the New Museum, filled up the measure of excitement, and completed the formal business of the week.

Efforts are being made to bring to a close the long-pending discussion between the Senate and the Graduates of the University of London, relative to the future constitution of the University. A paper has been laid before Sir G. Grey on the part of the Graduates, setting forth the agreement come to in 1854 as to three of the four bases submitted by them to the Senate. The Senate were willing that the Graduates should be incorporated into the University, and should meet in Convocation, with the right to express an opinion, which, however, was not to have legal force except in relation to a new charter. The Graduates further asked for the right to nominate a portion of the Senate; and here the negotiation broke off. It appears by the paper now submitted, that the two parties really differed in essentials; the Senate only intending to concede a "titular honour," while the Graduates deired a "real and constitutional influence." It appears, too, that the law officers of the Crown have advised that the proposal of the Senate is inadmissible: it being "repugnant to the nature of a corporation to vest the whole authority in the Senate, leaving to the Graduates the name only, but none of the ordinary functions of corporators." The Graduates now point out that this legal difficulty has solely arisen from the refusal of the Senate in respect of the fourth point, and renew their claim to its concession.

One of the Burnett Prize Treatises, 'On the Proofs of the Being of a God,' has been published. It is the one written by Principal Tulloch, of St. Andrews, to which the second prize of 600*l.* was awarded. It is of course a book of merit—for a prize essay. This is quite as much as we can say in its favour. The work by Mr. Thompson, which obtained the prize of 1,800*l.*, will be shortly published; and on its appearance we may notice the two works together.

An Irish Archaeologist writes—"In the notice

of the *Ulster Journal of Archaeology*, in the *Athenæum* of the 16th instant, you very properly point out some improvements which may be made in it, and correct one or two errors, which, as you say, have escaped the Editor's vigilance. If you allow me, I will now correct a slip of the pen in your notice. Dr. Petrie, whom I met on my way home this evening, 'hale and healthy looking,' is mentioned in your notice as 'the late Mr. Petrie.'"
"Dublin, June 19."

Flower shows have been the fashion of the week in many parts of the country as well as in London. On Monday last, a most unfavourable day, the Exhibition of American Plants was held at the Botanic Gardens in Regent's Park. On Wednesday, under a sunny sky, the June gathering of the Horticultural Society took place at Chiswick. A late summer, and continued cold winds, had told unfavourably on the vegetation. The roses were still in bud, and the lilacs and laburnums had prematurely perished. But the rhododendrons were in great force, and in some other respects the Gardens were in high beauty.

Letters from New York state that the Arctic Expedition in search of Lieut. Kane sailed on the 3rd of this month. The Expedition will proceed up Baffin's Bay, visiting the most prominent headlands, in order to look for traces of Lieut. Kane and his party.—We may take this occasion to state, that at the late *conversazione* in the Royal Society's apartments, Capt. Collinson exhibited some articles which are supposed to have belonged to the Franklin Expedition. They consist of part of a door-frame, with a catch for a latch, on which the Admiralty broad arrow is stamped. A piece of iron, which may have formed part of the steam machinery of the Erebus and Terror. This had been used by the natives as a hatchet. A piece of copper, with the broad arrow, also used by the natives as a hatchet. These articles were found in Victoria Strait, in the course of Capt. Collinson's voyage.

The De Rothesay Collection, which has been dispersed under the hammer of Messrs. Sotheby & Wilkinson, contained a number of curious works—especially in Portuguese and Spanish literature. Some of the chief lots, with the prices realized, we subjoin:—Baron de Breteuil (Introduit des Ambassadeurs), ses Mémoires, detailing the whole of the Earl of Shrewsbury's Embassy, when Prior, the poet, acted as his secretary, and assigning as the true reason of its failure, that his Lordship and his secretary took umbrage at the Duchess of St. Simon neglecting to welcome the former with a kiss, as she had done his predecessor, 8*l.*—Pastissier François, the Elzevir Cookery of 1655, nearly all the copies of which must have been used up in our ancestors' kitchens, 6*l.* 10*s.*—the Official Manuscripts of the Marquis de Pombal, chiefly addressed to him while ambassador in London and Vienna, 35*l.* 14*s.*—Chronica de los Reyes Godos y de España, MS. of the 16th century, on paper, 16*l.* 15*s.*—Chroniques de Normandie, MS. of the 14th century, on vellum, 16*l.*—Chroniques d'Angleterre, MS. of the 15th century, on paper, 10*l.* 15*s.*—Chronique Scandaleuse, printed in black letter, 25*l.*—Damiens, a complete collection of the various papers relating to this celebrated criminal, 10*l.* 10*s.*, bought by Mr. Milnes, M.P.—Decor Puellarum, printed by Jensen in 1471, although falsely dated 1461, an exquisite specimen of book-binding, 79*l.* 10*s.*—Discipline Militaire, MS., on vellum, with seven miniatures, and having the autograph "Charles Prince of Wales," 18*l.*—Dante Comedia, with commentary in Italian by the author's son, MS. of the 14th century, on vellum, 127*l.* 1*s.*—De Bry Collectio, Peregrinationum, 25 parts in 11 vols., all first editions, 250*l.*, bought for America, —Flacci Illyrici Missa Latina, a very small but famous work, printed in 1557, showing what the original Mass was in the year 700 after Christ, 10*l.* 15*s.*—Hooke's Negotiations for the Pretender, original MS., 10*l.* 10*s.*—Hull on Tugboats, 1737, the earliest printed treatise on the subject, 8*l.* 12*s.*—India, a collection of papers relating to the Portuguese possessions, probably made for the Marquis de Pombal, when he contemplated throwing open the trade thereto, 41*l.* 10*s.*—Inquisition, a curious and important collection of MS. and

printed papers, containing the lists of the victims at the various Autos da Fé, including priests, nuns (one described as *my hermosa Monja*), learned men, nobles, &c., punished for heresy, Judaism, sorcery, compact with the devil, and other imaginary crimes, 18*l.*.—Johnson's Dictionary, with numerous MS. additions by Edmund Burke, 8*l.* 10*s.*.—Mirouer Historial, a magnificent MS. on vellum, written in 1459-63, by Gilles Gracien, and profusely illuminated, 55*l.* 10*s.*.—Petit Justification du Duc de Bourgogne, the celebrated defence made for Jean Sans Peur Duke of Burgundy, when he had caused the Duke of Orleans to be assassinated, MS. on vellum, 33*l.*.—Officium B. Virginis Mariae, a very small MS. on vellum, with four exquisite miniatures, by Giulio Clovio, 11*l.* 10*s.*.—Cortes do Reyno de Portugal, MS., 29*l.*.—Rabelais, (Œuvres, 2 vols., the Elzevir edition, 11*l.*.—Rabelais, Vie de Gargantua, Lyon, 1537, 12*l.* 5*s.*.—Sachs, a collection of small poems, by the witty Hans Sachs, in 1 vol., 12*l.*.—Shakespeare's Plays, third edition, 1664, 50*l.*.—Voltaire's Pucelle, translated by a Lady, 2 vols., rigidly suppressed by the family, 11*l.* 11*s.*.—Acuna, Nuevo Descubrimiento del Gran Rio de las Amazonas, Madrid, 1641, a pamphlet of a few leaves, but extremely rare, having been rigidly suppressed to prevent the Portuguese from deriving any advantage from its perusal when they revolted and wrested Brazils and the colony of Para from Spanish dominion, 10*l.*.—Arauso, Vida de La Monja, Alferéz, a nun, who for twenty years served as a soldier and obtained a commission as Alferéz (Ensign), 5*l.* 15*s.*.—Brazil, a collection of all the documents relating to Brazil from its discovery to 1757, in 26 vols., MS., made, probably, for the Marquis de Pombal, 69*l.*; secured for America instead of our national library.

ROYAL ACADEMY OF ARTS, Trafalgar Square.—The EXHIBITION OF THE ROYAL ACADEMY IS NOW OPEN.—Admission (from Eight to Seven o'clock), 1*s.*; Catalogue, 1*s.*. JOHN PRESCOTT KNIGHT, R.A. Secretary.

SOCIETY OF PAINTERS IN WATER-COLOURS.—The FIFTY-FIRST ANNUAL EXHIBITION IS NOW OPEN, at their Gallery, 5, Pall Mall East, close to Trafalgar Square, from Nine till dusk.—Admission, 1*s.*; Catalogue, 6*d.* JOSEPH J. JENKINS, Secretary.

BRITISH INSTITUTION, Mall Ball.—The Gallery, with a COLLECTION OF PICTURES BY ANCIENT MASTERS and deceased BRITISH ARTISTS, IS OPEN DAILY, from Ten to Six.—Admission, 1*s.*; Catalogue, 6*d.* GEORGE NICOL, Secretary.

GALLERY OF GERMAN ARTISTS.—The THIRD ANNUAL EXHIBITION OF THE WORKS OF MODERN GERMAN ARTISTS, IS NOW OPEN, daily, from 10 till 6.—Admission, 1*s.*; Catalogues, 6*d.*—Gallery, 168, New Bond Street, next door to the Clarendon.

The SECOND ANNUAL EXHIBITION of the FRENCH SCHOOL of the FINE ARTS IS NOW OPEN daily, from 10 to 6 o'clock, at the Gallery, 121, Pall Mall, opposite the Opera Colonnade.—Admission, 1*s.*; Catalogue, 6*d.*

WIDOWS AND ORPHANS OF BRITISH OFFICERS who fell in the WAR with RUSSIA.—The EXHIBITION of the ROYAL DRAWINGS and upwards of 1,200 Works of Art, by Amateurs and others, in aid of the Fund for the relief of these most interesting objects of their country's sympathy, IS NOW OPEN at BERLINGTON HOUSE, Piccadilly.—Admission, 1*s.*.—All the Works are for Sale.

CHALON EXHIBITION, SOCIETY OF ARTS.—This Collection of the Paintings, Drawings, and Sketches of the late JOHN CHALON, Esq., R.A., with a selection from the Works of ALFRED E. CHALON, Esq., R.A., IS NOW OPEN, at the Society's House, Adelphi.—Admission, 1*s.*

PHOTOGRAPHIC EXHIBITION.—An Exhibition of the finest English, French and Italian Photographs IS NOW OPEN at the PHOTOGRAPHIC INSTITUTION, 168, New Bond Street.—Open from 10 to 5. Admission, with Catalogue, 1*s.*

THE BATTLE OF THE ALMA.—NOW OPEN, from 10 until 6, at the Egyptian Hall, Piccadilly, the GREAT PICTURE of this important Military Event, Painted by Mr. COOMANS, from studies made during four months spent in the Crimea during the present war. Admission, 1*s.*

ADAM AND EVE.—This great original Work, by JOSEPH VAN LEHIUS, IS NOW ON VIEW at 57, Pall Mall, opposite Marlborough House, from 11 to 6 daily.—Admission, 1*s.*

ROYAL GALLERY OF ILLUSTRATION, 14, Regent Street.—Additional Pictures.—English Mortar Battery, the Mamelon and Rifle Pits, General Pelissier's Night Attack, and Mr. Ferguson's New System of Fortification, are now added to the Diorama, "The Events of the War." The Lecture by Mr. Stocquerel, Daily at 3 and 8.—Admission, 1*s.*, 2*s.*, and 3*s.*

ST. MARTIN'S HALL, Long Acre.—Grand PANORAMA of CREATION, SCIENCE, and CIVILIZATION, WILL BE OPENED, for a short time only, on MONDAY NEXT, developing a plan of PRACTICAL EDUCATION for the MILLIONS, and NEW HOMES for the PEOPLE. Daily at 3 and 8. Monday Mornings only excepted; doors open half-an-hour previous.—Admission, 1*s.*; Reserved Seats, 2*s.*; Stalls, 3*s.*. Children, Half-price.—MONDAYS, HALF-PRICE for all parts.

LONDON SEASON BY DAY.—On Saturday, at 3 o'clock, Mr. LOVE will present, for the second time, his NEW ENTERTAINMENT, called "THE LONDON SEASON," by day.—LOVE'S ENTERTAINMENTS.—VENTRILOQUISM EXTRAORDINARY.—REGENT GALLERY, 69, Quadrant, Regent Street.—Mr. Love will appear every Evening at 8, except Saturday; Saturday at 3.—Monday and Tuesday Evenings at 8, and on Saturday Morning at 3, Mr. Love, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, called THE LONDON SEASON. Wednesday, Thursday, and Friday, the Entertainment, LOVE IN ALL SHAPES, to be followed by a ZOOLOGICAL CONCERT, and LOVE'S LABOUR'S LOST.—Pianoforte, Miss Julia Warman.—Stalls, 3*s.*; Area, 2*s.*; Gallery, 1*s.*

ROYAL POLYTECHNIC INSTITUTION.—LAST WEEK OF SINDBAD THE SAILOR, which will be shown every Morning and Evening.—LAST WEEK OF THE MAGNIFICENT SILVER CANDELABRUM, SEVENTEEN FEET HIGH, one of four made for the EGYPTIAN GOVERNMENT, by Messrs. Williams, of 223, Oxford Street, which will be ILLUMINATED every Evening, at Nine o'clock, by the ELECTRIC LIGHT.—The LECTURES and EXHIBITIONS, as DELIVERED before HER MOST GRACIOUS MAJESTY and HIS ROYAL HIGHNESS PRINCE ALBERT, the PATRON of the INSTITUTION, will be CONTINUED.—LAST TWO LECTURES by Mrs. CLARA LUCAS BALFOUR: "SUMMER HOURS with the POETS," on June 28 and July 2, at Eight o'clock in the Evening.—Monday Evening, June 25, LECTURE ON ASTRONOMY, by Dr. BACHOFFNER, at Eight o'clock.—DIORAMA OF SAM SLICK, &c. &c.

SCIENTIFIC

SOCIETIES.

ROYAL.—June 14.—Lord Wrottesley, President, in the chair.—The following papers were read:—"Remarks on the Rev. H. Moseley's Theory of the Descent of Glaciers," by Prof. J. D. Forbes.—"Researches on the Foraminifera," by Dr. Carpenter.

ASTRONOMICAL.—May 11.—M. J. Johnson, Esq., President, in the chair.—Rev. F. Silver was elected a Fellow.—"On the Measured Distance of 70 Ophiuchi," by the Rev. W. R. Dawes.—"Observation of an Occultation of Venus by the Moon," by Mr. J. Ferguson.—"Account of the Operations for determining the Longitude of Fredericton, New Brunswick, by Galvanic Signals," extracted from a Report to the Lieutenant-Governor.—"Elements of Leucothea," by M. Bruhns.—"Note relative to a Phenomenon seen in the Planet Venus," by the Rev. W. R. Dawes.—"Extract from a Paper by Eyre B. Powell, Esq. on the Orbit of a Centauri."—"On several Stars which have disappeared from his Ecliptical Charts," by M. Chacornac.

GEOLOGICAL.—May 30.—W. J. Hamilton, Esq., President, in the chair.—The Rev. Mr. Knowles and Mr. J. M'Cann, were elected Fellows.—The following communication was read:—"On the probable Extension of the Coal Measures beneath the South-Eastern parts of England," by R. Godwin Austen, Esq.

June 13.—W. J. Hamilton, Esq., President, in the chair.—Dr. C. F. Naumann, of Leipzig, was elected a Foreign Member; Dr. G. D. Gibb was elected a Fellow.—The following communications were read:—"On the Rock Specimens, Organic Remains, and Fossil Wood, collected in the Arctic Archipelago by Capt. McClure and Lieut. Pim," by Sir R. I. Murchison.—"On the Remains of *Dicynodon tigriceps* from South Africa," by Prof. Owen.—"On a fossil Sirenoid Mammal from Jamaica," by Prof. Owen.—"On the Earthquakes at Brussa," by Mr. Consul Sandison.—After the lapse of six weeks from the first great shock, and its succeeding lesser tremors, a far more severe shock occurred on the 11th of April, at 8 P.M. The shock, which lasted thirty seconds, and was succeeded throughout the night by incessant and alarming shakings, together with an awful conflagration, has totally destroyed the city. Several neighbouring villages also suffered severely. The earthquake appears to have spent its shocks immediately under Brussa and the country within a radius of about two leagues from that centre. This earthquake was accompanied by the outbursts of new springs of hot water at the sites of the hot mineral baths; and the former streams have been greatly increased in volume.—"On the Section of the Old Red Sandstone and Crystalline Rocks at the Eastern Extremity of the Grampians," by Prof. J. Nicol.—"Notice of some raised Beaches in Argyllshire," by Capt. E. J. Bedford, R.N.—"On Sandworn Granite near the Land's End, Cornwall," by Mr. R. W. Fox.—"On the Brown Coal Formation of North Germany," by Prof. Beyrich, with Observations by Mr. Hamilton.—In a letter to Mr. Hamilton, Prof. Beyrich pointed out that in-

stead of there being two brown coal formations in North Germany, as stated in the President's Address for 1855, on a misconception of M. Plattner's observations on the subject, there is but one.—"On the Umret and other Coal Fields of India," by the Rev. Messrs. Hislop and Hunter.—"On some Fossil Seeds from Lewisham," by Dr. Hooker.—"On some small Fossil Seed-Vessels from Bovey Tracey," by Dr. Hooker.

ASIATIC.—June 16.—Prof. H. H. Wilson, President, in the chair.—The Secretary read "Some Notes upon the Zend Language," by John Romer, Esq., in addition to those already published. Mr. Romer maintained, that the Zend and Pehlevi languages of the Parsi books were mere inventions, and were never spoken languages.—Mr. Bosanquet read a paper on the subject of certain corrections required in the Canon of Ptolemy, in order to bring it into harmony with the eclipse at Jerusalem, in B.C. 689, and the eclipse of Thales, in B.C. 585.

SOCIETY OF ANTIQUARIES.—June 14.—J. P. Collier, Esq., V.P., in the chair.—The Council's nomination of the Rev. Joseph Hunter to fill the vacant seat in that body was read to the meeting.—Mr. Josiah Goodwin was elected a Fellow.—The conclusion of Mr. Goodwin's "Memoir on the British Gun-Trade" was read.—Mr. Wylie communicated a translation of a communication, made to the Society by the Abbé Cochet, "On Leadon Crosses," with the form of absolution, found on the breasts of skeletons, on the site of the ruined Church of Bouteilles, near Dieppe.

ENTOMOLOGICAL.—June 4.—John Curtis, Esq., President, in the chair.—Herr Dohrn, President of the Entomological Society of Stettin, and W. Atkinson, Esq., were elected Members of the Society.—Mr. Stevens exhibited a splendid specimen of the new *Ornithoptera Brookiana*, recently taken in Borneo by Mr. Wallace.—Mr. Foxcroft sent for exhibition some Coleoptera, just captured in Perthshire, including the rare *Dendrophagus crenatus*; also a bred specimen of the moth *Anarta cordigera*.—The President exhibited some small insects sent from Ceylon by Mr. Thwaites to Mr. Spence, including a Carabideous beetle, which infests the nests of a small black ant. Mr. Spence presented the insects to the Society.—The President read a note, received from M. Delarouze, of Paris, announcing the discovery there of the singular beetles *Anommatus 12-striatus* and *Langelandia anophthalma*, in the wood of an old water-butt.—Read: a note by W. S. M. D'Urban, Esq., on *Saturnia cecropia*, a species which the author thinks might be introduced from Canada into England with advantage.—A note by Mr. Newman on the Wing-rays of Insects, in which the author maintains, in opposition to the published views of Herold, Kirby and Spence, Oken, Westwood, and other distinguished entomologists, that the wing-rays are the supports of the membranous portion of the wing, and in all respects the analogues, although not the homologues, of the wing-bones of the bat, and that the passage of air, blood and nerves through their channels is simply a provision of Nature for their maintenance in a healthy and efficient condition.

INSTITUTION OF CIVIL ENGINEERS.—May 22.—James Simpson, Esq., President, in the chair.—The discussion was renewed on Mr. F. Braithwaite's paper, "On the Infiltration of Salt Water to the Springs of Wells under London and Liverpool."—An improved Sliding Rule was exhibited, and explained by Mr. Charles Hoare, by whom the modifications had been devised.—At the ballot, the following candidates were elected:—Messrs. C. E. Amos, as a Member, and Messrs. E. Crosley, R. P. Spice and M. B. Williams, as Associates.

ROYAL INSTITUTION.—April 27.—The Duke of Northumberland, President, in the chair.—"On certain Trains of Erratic Blocks on the Western Borders of Massachusetts, United States," by Sir Charles Lyell.

SOCIETY OF ARTS.—June 13.—General Meeting.—Viscount Ebrington, Chairman of Council, in the chair.—The Annual Report of the Council on

the close of the One Hundred and First Session was read; and it was announced that the One Hundred and First Anniversary Dinner will be held at the Crystal Palace on Tuesday, the 3rd of July, when the Duke of Argyll will preside.

SYRO-EGYPTIAN.—June 12.—Dr. W. Camps in the chair.—The Ven. Archdeacon Raymond was elected a member.—A paper was read, 'On the Origin of the Cuneiform Character,' by L. J. Abington, Esq.—The author argued that the peculiar form of the literal character, properly called wedge-shaped, had its origin in a locality to which such a manner of writing was suited rather than any other. It was first used in an alluvial region, where men had 'bricks for stone and slime for mortar.' The form of the letters indicates the material upon which they were first written. Used upon clay tablets, the same form showed at a glance how the tablet should be placed for reading. Mr. Layard has given us an idea of the stamp which was used to produce the characters by impressing them. It is essentially a ceramo-graphic character, and would never have been chosen for petro-graphic work; and it was only by necessity that it became engraven on the gypsum slabs of Assyria and the limestone rocks of Persia.—Dr. Benisch read a paper, in which he critically examined the Hebrew texts referring to the Exodus, and from the passages analyzed arrived at the following conclusions:—1. The oppression of the Israelites commenced under an invader who came from a foreign country, in all likelihood from or through Palestine. 2. The Exodus took place in the reign of his grandson. 3. The Pharaoh of the Exodus had a son, who was fellow king. 4. That son, being the first born, perished at the Exodus. 5. The conquest or subsequent submission of Egypt was gradual, and was at first attended with wars. 6. The conquerors ultimately coalesced with the native population.

MEETINGS FOR THE ENSUING WEEK.

- MON. Institute of Actuaries, 7.—'On the Results of the Operations of the Gotha Life Assurance Bank for the first Twenty-five Years, particularly as regards the Mortality amongst the Lives assured,' by Herr Hopf.
—Geographical, 8½.—'On the Geographical Results of his late Researches in the Arctic Regions, in H.M.S. Enterprise,' by Capt. Collinson.—'Exploration of the Desert of Adama,' by Dr. Philippi, communicated by Mr. Bollaert.
TUES. Zoological, 9.—Scientific.
WED. Royal Society of Literature, 8½.

FINE ARTS

Giotto and his Works in Padua. By John Ruskin.—Eight Engravings on Wood by Messrs. Dalziel, from Mr. W. Oliver Williams's Drawings from the Frescoes by Giotto in the Chapel of S. M. dell' Arena, at Padua. Part II. Printed for the Arundel Society.

The present number of this Society's publications embraces short descriptions of several of Giotto's most remarkable works. 'The Salutation,' 'The Nativity,' 'The Wise Men's Offering,' 'The Presentation in the Temple,' 'The Flight into Egypt,' 'The Massacre of the Innocents,' 'The Young Christ in the Temple,' and 'The Baptism of Christ.'

'The Salutation' is the first of a series of familiar subjects, which enables us to compare Giotto with later masters. The earlier subjects were apocryphal: he now enters a region of reality, and his beings are no longer dream figures or vapoury abstractions. Mr. Ruskin boldly asserts, and we feel no inclination to dispute the point, that in no rendering of 'The Salutation' are the pure depth and plain facts so perfectly given as by Giotto. The fact is, the scene is scarcely fit for the painter, who can only represent two women meeting at the doorway of a house. We fully agree that the Elizabeth is full of "intense love, and joy, and humbleness," and the Madonna of "tenderness and dignity."

In Mr. Ruskin's remarks upon 'The Nativity' he grows super-subtle, and describes his own feelings when he thinks he is conveying those of the painter. We do not believe that by the mountain horizon Giotto had any intention of conveying a sense of the exposure and loneliness of the birth, or that the hills were a type of the world which was the cradle of the heavenly babe. We cannot,

however, as a balance to our animadversion, resist quoting a remark of Mr. Ruskin's, which is marked by his finest vein of poetical shrewdness and acute perception. We have more pleasure in quoting it, because it applies to all early pictures. He is speaking of the way in which Giotto puts on his angels' wings:—

"There is noticeable here, as in all works of this early time, a certain confidence in the way in which the angels trust to their wings, very characteristic of a period of bold and simple conception. Modern science has taught us that a wing cannot be anatomically joined to a shoulder; and in proportion as painters approach more and more to the scientific, as distinguished from the contemplative state of mind, they put the wings of their angels on more timidly, and dwell with greater emphasis upon the human form, and with less upon the wings, until these last become a species of decorative appendage,—a mere sign of an angel. But in Giotto's time an angel was a complete creature, as much believed in as a bird; and the way in which it would or might cast itself into the air, and lean hither and thither upon its plumes, was as naturally apprehended as the manner of flight of a chough or a starling. Hence Dante's simple and most exquisite synonym for angel, 'Bird of God;' and hence also a variety and picturesqueness in the expression of the movements of the heavenly hierarchies by the earlier painters, ill replaced by the powers of foreshortening, and throwing naked limbs into fantastic positions, which appear in the cherubic groups of later times."

Of course, we can no more expect a page from Mr. Ruskin without a blow at the Renaissance, than we can a sermon from certain ecclesiastics without a stroke at the Pope.

Byzantine or anti-Byzantine, Giotto is full of conventionalisms. He introduces the flocks of the Bethlehem shepherds at the foot of the Virgin's bed, and turns the inn into a mysterious chapel. The chief touch of nature—and there is always something to redeem Giotto's barbarism—is the way in which he makes the Virgin turn upon her couch to help the child. It was not till the human mother began to change into the Queen of Heaven that she was represented as exempt from suffering.

'The Wise Men's Offering.' Mr. Ruskin himself acknowledges to be the worst of the series. It is full of errors, and has little merit. The camels are monsters, and the kings are puppets:—while an attendant angel receives the gifts. Giotto was a fine observer, and a religious man, but not the possessor of much imagination. The child is struggling to escape from Simeon to the arms of its mother:—a plain fact, which no Byzantine painter would have dared to represent. An awkward angel in the background Mr. Ruskin transforms into the Angel of Death, sent to receive the soul of Simeon, (the Angel of Death being, by the bye, a creature of Mohammedan and Rabbinical origin rather than Christian).

'The Flight into Egypt' Giotto has treated in a quiet, deliberative spirit. Night is expressed entirely in a symbolic manner,—for the lights glitter and the attendant's dress is dark, but the figures are all seen as at the fullest noon.

'The Massacre of the Innocents' is miserably drawn. The figures are mere types, and the whole scene symbolic. Mr. Ruskin thinks that Giotto thought the scene, in its strange agony, unfit for brush or pencil.

'The Young Christ in the Temple' is equally poor, though here Giotto was unfettered by precedent. The touch of nature is the old story of the Madonna stretching her arms to embrace her Son:—no very deep reach of thought.

'The Baptism of Christ' Mr. Ruskin also frankly acknowledges, with much self-denial, to be "gravely and strangely deficient in power of entering into the subject,"—but thinks this failure is a common fatality of all painters. The gesture of Christ has no meaning; the humility of John is unexpressed; and Giotto has added shores to the wave which half covers our Saviour,—an awkward attempt to unite allegory and perspective. The painter had endeavoured to combine the eastern and western types of the Jordan, for in real Byzantine compositions the river god, with his oars or his reed sceptre, was frequently introduced.

On this subject Mr. Ruskin launches out into one of his cleverest futilities, and blows a bubble as bright-coloured and evanescent as we have ever known him blow.—

"Now in this mode of representing rivers there is something more than the mere Pagan tradition lingering through the wrecks of the Eastern Empire. A river, in the East and South, is necessarily recognised more distinctly as a

beneficent power than in the West and North. The narrowest and feeblest stream is felt to have an influence on the life of mankind; and is counted among the possessions, or honoured among the deities, of the people who dwell beside it. Hence the importance given, in the Byzantine compositions, to the name and speciality of the Jordan stream. In the North such peculiar definiteness and importance can never be attached to the name of any single fountain. Water, in its various forms of streamlet, rain, or river, is felt as an universal gift of heaven, not as an inheritance of a particular spot of earth. Hence, with the Gothic artists generally, the personality of the Jordan is lost in the green and nameless wave; and the simple rite of the Baptism is dwelt upon, without endeavouring, as Giotto has done, to draw the attention to the rocky shores of Bethabara and Aenon, or to the fact that 'there was much water there.'"

Can one seriously suppose that Giotto—so unimaginative, so essentially Italian—knew or cared anything about the actual Jordan, which he simply borrowed from old forms? Such fantasies as these must eventually lessen the respect which people feel for the works of so gifted and poetical a mind as Mr. Ruskin's.

BRITISH INSTITUTION.

THIS Exhibition opened last week. It contains 165 pictures, of the most miscellaneous and ill-assorted character. That Italian-Chinese, Zoffany, seems the presiding deity; his chief qualities being hardness, smoothness, clearness, and insipidity. There are by him various pictures of Queen Charlotte and the royal children. His most clever bit of character is *Reading the Direction* (No. 131); the man with the hare being a fine study for Hogarth or Wilkie, as even Zoffany has thrown some humour into him.—There is also a celebrated Hogarth—*The Examination of Bainbridge, the Gaoler, before a Committee of the House of Commons* (148)—a very early work of this great master. The portraits, though very true, and in their day renowned, look all alike.—Crowds of the dullest and most conventional pictures jostle out all such humble merit as Wilkie's famous *Rabbit on the Wall* (137). Sprawling, hot Albanos—such as that caricature, the *Triumph of Venus* (162), or such tea-board Poussins as *The Women of Megara gathering the Ashes of Phocion* (82), without nature or life—look poor beside the gem of the room,—Sir J. Reynolds's *Misses Horruick* (12),—one of the most graceful, lovely faces we have seen; though, like most female faces, none the better for age.—In rivalry of this picture hangs Sir T. Lawrence's *Duchess of Devonshire* (134).—After these contrasting styles, look at Rembrandt's *Head of a Rabbi* (65),—bold and unmannered,—but with his weird light just specking some jewels of the turban.—The lovers of portraiture should then observe Spagnoletto's *Portrait of Himself* (100), in which body is given, but little of the mind; yet so vigorous that it seems rather modelled than painted.

Several heads, by Velasquez and Vandyke, make this an interesting place of study for lovers of portrait painting. There is Vandyke's *Earl of Stafford* (18), with the black malignant brow and firm mouth, the very type of ambition and conspiracy; and there is Zuccheri's *Earl of Essex* (79), a man of noble nature, who, like Stafford, ran against an axe. There are also several portraits by Murillo, and one of himself. A portrait by Tintoretto, of himself, completes an interesting collection of grand portraits.—Ostade's *Advocate* (39) is a good specimen of the master so far as character goes, but not perhaps as to tone.

Among other pictures, we observe:—*Boys Fishing* (117), by Collins,—and *Conway Castle* (161), by Turner;—a grand Vandyke—*Christ's Charge to Peter* (141),—a miserable *Saying Grace* (148), by Sir W. Allan,—several works by Morland,—Sir T. Lawrence's beautiful *Gipsy Girl* (114), ill drawn and conventional, yet very graceful,—and a great sketch in chalk, by Raphael, beaming with love, tenderness and religion.—The Dutch masters are represented by Cuyp, Terburgh, Vander Neer, Both, Vander Heyden and Ruysdael. The Italian by Titian, Carracci, Sassoferrato, and S. Rosa.—The *Hawking*, by Wouvermans (63), is a delicious example of the master, and presents a scene full of animation and picturesque life. To effect any good for Art, these pictures should be arranged chronologically, or in schools, and some dozen of

them turned away, as unfit for exhibition and as miserable specimens of the Art of any age.

FINE-ART GOSSIP.—We are sorry to hear—for the sake of Leeds itself, its credit and its honour, even more than for the interest of the artists concerned—that nothing has yet been done to rectify the injury sustained by those painters who were good enough to lend their pictures to the Yorkshire sight-seers. The pictures are still, we understand, detained at the railway station; and no one is able to recover his own property until the whole bill for carriage is discharged. Under these circumstances, a Correspondent suggests a meeting of the complainants.—"I am one among the many unfortunates whose picture is detained in railway bondage after the Leeds Exhibition. I do not presume to tax you with giving advice how I should proceed to recover my property, but if it be in accordance with your feelings, may I ask you to name in your next number that it is suggested by a very humble individual that there should be a meeting of those who are situated like myself, to determine what they should do? A PAINTER."—We do not see that anything better could be done. If a Committee were named to recover the pictures, it is possible that some gentlemen of Leeds—jealous of the honour of their town—would even now aid in the work, and help to close a very painful transaction.

We are glad to see the Committee of the Architectural Museum offering prizes for wood-carving and stone-carving.

A statue of Allan Ramsay is to be erected in Edinburgh, where a memorial to the poetical barber has long been a desideratum. It will stand at the end of a terrace near the head of the mound.

An American has devised an iron wall. It is light and strong, say the American papers, may be easily taken to pieces, and erected with little labour or expense.

Signor Monti delivered his Fourth Lecture on Wednesday. He began by a review of the Phidian age,—proceeding to a review of the works of Praxiteles and Scopas,—noticing the achievements of the Rhodian and insular schools,—and ending by adverting to the Roman sculptors and the 'Arch of Titus.' In the works of Praxiteles he perceived a growing tendency to materialism, which in the 'Fighting Gladiator' becomes a wonderful anatomical study; and in the Rhodian school—as, for example, in the 'Laocoon'—displays a love for dramatic ostentation, sometimes morbid, and frequently—as in the 'Farnese Hercules'—exaggerated.

The Roman works evinced no creative power. The early Græco-Roman works showed that they were the labour of slaves; but the portrait-statues of Augustus and of the later Emperors indicated a nation growing accustomed to their conquerors, and even grateful for their patronage. The earlier busts, as of Sylla, seemed repulsive; as if the Greek workman had striven to intensify the bad passions that dominated in the face. The later works showed the total decline of all love for Art, and were literally shapeless and barbaric. In conclusion, Signor Monti delivered a few remarks upon the subject of chromatic sculpture. He expressed it as his strong opinion, that all statues were coloured before Praxiteles, who ventured to produce a nude Venus in public, and left it white to accustom the people to the novelty. According to the authorities, said Signor Monti, the marble was heated, and then waxen colours were rubbed in upon the heated surface, the application being renewed several times. It was, however, his strong conviction that such colour was never allowed to hide the grain or surface of the marble, and only, indeed, toned it. The lecturer then proceeded to remark the correspondence of ancient and modern sculpture in their way of working, as to tools, and even as to system. A working sculptor might go from Paris or London and visit Pompeii, and entering there the statuary's shop, take up the tools and be scarcely conscious that he was not in his native shop.

The present day is full of anomalies. A new apartment in the Vatican is hung with tapestry presented to the Pope by the Sultan. What a concatenation!

Architecture seems likely to remain for ever in a swamped state in New Zealand, as, to avoid earthquakes, houses there are in future to be built of only one story.

Mr. Arkwright, who purchased the old Town Hall at Leominster, intending to re-erect it near his own seat at Hampton Court, has presented it as a museum and reading-room to the people of the town.

A valuable collection of sixty modern pictures, the property of Messrs. Lloyd, of Ludgate Hill, who had purchased them for engraving, have been sold by Messrs. Foster. The most conspicuous among them were two pyrotechnic pictures, in Turner's last and worst style—perfect alto-relievos with paint—and done evidently by a blinded man, working out dreams fretfully by rule of thumb. There are imagination, and colour, and power, in these works, but neither form, shape, outline, nor Nature. These works were the two Academy pictures, 'The Grand Canal at Venice,' and the 'Burning of the Parliament House.' In the latter, the bridge is smoke, and not stone; in the former, the water is like that of a dye vat, and has actually more colour than the objects from which it is supposed to receive its tincture. Mr. MacIse's 'Spirit of Justice,' unusually hard, dry, and livid, is full of genius. Mr. Frith's works, though uninteresting in subject, were striking from their being painted in a thin, cold manner, so different from his present miniature finish. The 'Child saying its Prayers on its Mother's Lap' surpassed the others,—which were, a 'Housemaid' and a 'Lady Hawking,' the latter with a merry, arch vivacity such as few can throw into a face better than Mr. Frith. There were also 'Cromwell and Mrs. Claypole,' and 'Nelson on the Eve of Trafalgar,' by Mr. Lucy. The 'Wood Nymphs,' by Mr. Frost, a beautiful specimen of his style, being warmer and less stony than he now paints. Mr. Ansdell's 'Battle of the Standard' excited much interest. There were also some old-fashioned but honest landscapes by Müller, and a Spanish figure by Mr. Phillips, vigorous, but rather coarse.

MUSIC AND THE DRAMA

MUSICAL UNION.—H.R.H. PRINCE ALBERT, PATRON. —TUESDAY, June 26, half-past Three, WILLIS'S ROOMS. Quartett, E flat, Op. 50, Spohr; Sonata, Piano and Violin, in F, Beethoven; Quartett, No. 7, E minor, Op. 49, Beethoven. Solo, Pianoforte. Artists: Ernst (last performance this Season), Cooper, Hill, and Piatti. Pianoforte, Mrs. Joseph Robinson (from Dublin).—Visitors' Tickets to be had of Cramer & Co.; Chappell; and Olivieri, Bond Street.—The eighth and last Matinée will take place July 10. J. ELLA, Director.

HARMONIC UNION. HANOVER SQUARE ROOMS.—NEXT WEDNESDAY, June 27, will be performed, for the first time in this country, MOLIQUE'S MASS in F. A selection from Mendelssohn's Organ Sonatas will be performed by Mr. Rea, and Rossini's Stabat Mater will be repeated. Vocalists: Mdlle. Emilie Krail, Miss F. Rowland, Miss Lascelles, Mr. Sims Reeves, and Mr. Weiss.—Tickets, 5s., 7s. 6d., and 10s. 6d., at the Music-sellers.

HEINRICH WERNER begs to announce that he will give his GRAND MORNING CONCERT, at the QUEEN'S CONCERT ROOMS, Hanover Square, on SATURDAY, June 30, assisted by eminent artists. Further particulars will be duly announced.—Tickets, 7s. 6d.; Reserved Seats, 10s. 6d.; to be had at the principal Music Warehouses and Libraries, and of Heinrich Werner, 17, Rathbone Place, Oxford Street.

ST. MARTIN'S HALL.—Mr. ALFRED MELLON, respectfully announces that the last ORCHESTRAL UNION CONCERT this season will take place at the above Hall on FRIDAY EVENING, July 6. Vocalists: Mdlle. Emilie Krail, Miss Dolby, and Signor Bianchi. Soloists: M. Alexander Billek, Mr. F. Edward Bache, M. Sainanton, and Botesini. Conductor, Mr. Alfred Mellon.—Stalls, 7s.; Reserved Seats, 5s.; Galleries, 2s. 6d.; Area, 1s.; to be had at all the Music-shops, and of Mr. Mellon, 134, Long Acre.

CONCERTS OF THE WEEK.—"A supplement" would be required by the *Athenæum* were the critic mathematically to suit his paragraphs, as regards space, to the "bill of fare" offered by Mr. Benedict yesterday week. Foreigners keep such programmes in albums as curiosities; home lovers of entertainment look back to them as registering a hard day's pleasure,—but that the public still recognizes their profusion, might be seen at *Covent Garden Theatre*, which possibly was never more crowded.—Our record must confine itself to Mr. Benedict's own compositions. A sparkling *Andante* and *Rondeau*, played by himself, is a welcome addition to our brilliant concert music. His two three-part songs for female voices are very fresh and pleasing; and they were executed to perfection by Mesdames Novello

and Viardot and Miss Dolby. Besides these, a *Tyrolienne*, sung by Madame Bosio, was new to us. Most important of all was an Overture to Shakspeare's 'Tempest.' This is full—too full—of good things. Mr. Benedict's over-solicitude has been noticed by us in other of his compositions. His ideas are apt to jostle one another, in place of falling harmoniously into place and sequence. The opening of the Introduction to this 'Tempest' Overture, and the opening of the *allegro*, are capital,—but in both movements the ear is subsequently allowed to lose itself in the maze of intimations, suspenses, and ingenious contrivances. By thinning the score—as gardeners thin a bunch of grapes—a concert-overture of the first class might be produced. At present, we recollect in it nothing so effective as the opening to Mr. Benedict's '*Fest-Overture*,' or as his entire Prelude to the 'Minnesinger,'—the last so graceful and individual a composition that it should long ere this have been given at a *Philharmonic Concert*.

Holding the views that we hold respecting novelty, we must thank that clever young violinist, Herr Deichmann, for commencing his concert with a pianoforte Quartett by a composer little known in England, Herr Kufferath. But we cannot get beyond the praise due to good intentions, since the work can only be listened to experimentally,—seeming to us both lame and tame as music; busy without spirit, elaborate without effect. Something more promising was the first appearance of a young Viennese gentleman, who sings as Signor Bianchi, and who possesses as powerful and legitimate a bass voice as has often been heard. If, besides an Italian name, this aspirant will adopt the Italian methods which have trained the great singers, he may prove an acquisition to our theatres and concert-rooms of no common value.

On Monday evening the *Society of Female Musicians* held its annual concert. The programme gave proof that disregard for "advice unasked" is not—as misogynists have declared—a necessary attribute of "the sex." Or was it coincidence only, not compliance, that led to the selection, as a feature of the evening's entertainment, of some "numbers" from the Oratorio of Mrs. Mounsey Bartholomew, a measure advised in this journal?

The programme of M. Halle's *Second Pianoforte Recital* speaks for itself, and him, as follows:—

"Sonata in D, Op. 10, No. 3, Beethoven; Adagio in E, and Finale Scherzo in A flat, from Op. 71, Dussek; Rondo Andante in A minor, Mozart; Grand Sonata in E flat, Op. 81, Beethoven; Serenade in C sharp minor, Op. 56, Heller; Lieder Ohne Worte, Mendelssohn; Berceuse in D flat, Op. 57, and Mazurkas, Chopin."

—To many of the audience, the *adagio* and *finale* from Dussek's charming *Sonata* were "as good as new." To those already acquainted with them, they were infinitely better than the novelties without novelty which are now so cruelly inflicted on the public. Something, however, which is new in date, as well as in style and in idea, is M. Heller's *Serenade*; a movement of rare beauty—fantastic, but not far-fetched—delicately imagined, and firmly knit. A time must surely come for this music by M. Heller to be as generally relished as the music of Chopin is now; but are we to wait till the reputation of the most individual living writer for his instrument is a matter of posthumous fame? These "Recitals" bid fair already to become some of the most popular chamber entertainments in London. We have certainly never had among us such a consummate pianist (*not a composer*) as M. Halle; whose style seems to ripen, deepen, and refine itself year by year.

Mr. Ella's *Sixth Musical Union* was what he calls "the Director's Matinée"; otherwise, a meeting more laid out "*ad captandum*" than the other seven of the series, and in which the instrumental selections are interspersed with vocal music. As the pianist, stringed quartett, and marvellous *contra-basso*, who appeared, have been again and again commended, and as they performed nothing new on the occasion, it may suffice to say that the *Matinée* was successful—that the singer was Herr Reichardt, who on this occasion was declaiming so much less violently and singing so much more delicately than formerly as to justify the good hope from him which we expressed not long

ago. The accompanist was Signor Fiori, a newcomer, whom we expressly notice as something superior to the usual run of Italian newcomers professing to accompany. Too many such *Signori* (who even arrive at employment and position among foolish persons of quality) are given to playing wrong chords, and to leaving out all such passages as are difficult to their ignorance. Signor Fiori is apparently both a good pianist and a good musician,—and as such deserves welcome.

On Wednesday evening, Mr. Hullah gave the last of his eight Choral Concerts at *St. Martin's Hall*. This time the selection consisted of music unaccompanied by the orchestra, including specimens by Croce, Mendelssohn, a new serenade by Mrs. Mounsey Bartholomew, one of Sir H. Bishop's glees, and other *morceaux*. These entertainments have now taken a firm root in London, and deservedly,—as fulfilling a separate function, and collecting a separate public of their own. Music so good on terms so easy would have been held by our fathers as among the impossibilities.—On Wednesday evening, too, a chamber-concert was given by *M. Paque*, a gentleman who is rising into repute as a steady and agreeable violoncellist.

ROYAL ITALIAN OPERA.—In fulfilment of our resolution to pass over the inevitable ravages wrought by Time on great artists, we shall only notice a point or two, here and there, in the late performances given at the *Royal Italian Opera* to audiences more crowded than any assembled there in years when there were no war—no domestic anxiety—no double income tax. The representations of 'Norma,' give us occasion to speak of Mdle. Marai—those of 'Lucrezia Borgia,' to commend Madame Nantier Didiée—for the services rendered by them in secondary parts. Covent Garden has never in this respect been so well served as now by these ladies. Each of the two, moreover, seems to make progress.—'Il Barbiere,' as given on Thursday week, made it evident that neither allowance nor silence is needed on behalf of Signor Mario, on his good nights. He sang and played *Almaviva* to perfection, excited, it would seem, by the stupid tyrannies of Signor Lablache (*Dr. Bartolo*), and by the brilliancy and humour of Madame Viardot's *Rosina*. The last is new to London. Perhaps the Lady's *cadenzas* in 'Una voce' are over-exquisite; but as a display of science, charm, and vocal finish, her singing of the part, as a whole, cannot be exceeded; while her acting is as quiet and complete in its comedy as if she were only a quiet actress, unable to play *Valentine*, *Rachel*, *Fides*, the gipsy *Azucena*, and the peasant *Zerlina*.—Such variety of power is a quality perversely undervalued by the average playgoer. An impression made by many impressions, is not so readily prized as the repetition of a few looks and gestures—of a smile—or of a sneer—or of a c above, or of a c below, the line.—But, on opposite grounds of adjusting reputations, Mdle. Mars was, to our thinking, a higher artist than Madame Rachel; and Madame Viardot stands in our record above all her operatic compeers and most of her predecessors. Herr Formes was the *Basilio* of the cast;—as usual, he had disdained to learn his *recitatives*. Our public is much-enduring; but we hope, for the sake of M. Meyerbeer, that the German *basso* will show more respect for his public while preparing 'L'Etoile,' since there a few dozen wrong notes more or less, and a few entrances missed, will be of consequence.—M. Meyerbeer has arrived in London.

ADELPHI.—Mr. Tom Taylor is a daring playwright, and has frequently astonished us by the painful elaboration of his pieces. On Wednesday, however, he excelled himself. 'Helping Hands' is a drama in two acts, which occupied three hours in the performance, and is considerably longer than an ordinary five-act play. The argument is a trifle—the loss of an old fiddle to an old blind fiddler. The first act drops on his despair, and the second on his exultation at the recovery of his beloved "Straduarus." The intervals between these points are, in great part, devoted to the illustration of the musical sentiment in one *Lorente*:

Hartmann (Mr. Webster). Fallen into poverty, he is supported by his daughter *Margaret* (Madame Celeste), who copies music unknown to him. The other incidents are not unlike those of 'Monsieur Jacques'; but the interest excited is of a sterner kind. Mr. Taylor has, in fact, aimed at the dignity of an Art-drama. He is much indebted to the excellent and persevering acting of Mr. Webster for his success. Art, however, has no exclusive defence against misfortune; and for the rent of their miserable garret, a distraint and an appraisalment take place. But one of the Shoe-black Brigade, personated by Mr. Keeley, having saved 10*l.*, is enabled to become the purchaser of the inventoried articles, and thus gets possession of the "Straduarus," for which he compels the broker to give him 150*l.*, designing the money for the blind musician and his daughter. Nothing, however, can console the former for the loss of his incomparable violin. Mr. Taylor in these incidents has brought out into strong relief, not only the characters of the benevolent *William Rufus*, or *Vinkin*, or *Shockey*—formerly a thief, but now an industrious convert from the Ragged School—and of the lodging-house servant, *Tilda* (Mrs. Keeley), but also those of the Jew broker and his appraiser, *Isaac Wolff* and *Lazarus Solomon* (Mr. C. Selby and Mr. C. J. Smith), whose chuckling over their anticipated bargain was revoltingly characteristic. Indeed, all these persons are broadly painted; and the play is indebted for its extraordinary length to the prominence bestowed on such individual portraiture. By way of contrast to these, we have in the second act the more courtly delineations of *Lord Quaverly* (Mr. Garden), the *Hon. Calverly Hautbois* (Mr. Leigh Murray), and *Mr. Merton* (Mr. Parselle), a physician, in love with *Margaret*. The violin, the occasion of so much pathetic demonstration, has been sold at the advanced price of 250*l.*, with a fantastic pedigree, by Wolff to his lordship, who indulges a mania for collecting fiddles. But our friend of the Shoe-black Brigade again steps in to defeat Wolff of his unjust gains; and the result is, that Merton obtains the coveted "Straduarus" as the fee for having restored his lordship's child to health, and makes glad old Hartmann by restoring it to his possession. With that and the 150*l.* for taking father and daughter to Italy, both have a fair chance of recovering their health, and the latter that of receiving a husband in the kind-hearted physician. A drama so minutely elaborated, and so ostentatiously prolonged, was pronounced slow by the majority of the audience, who were nevertheless interested by the truthfulness of the manners and the pathos of the suffering. Mr. Taylor has bestowed on it his most careful touches, and it may be commended as a masterpiece, both in construction and dialogue. On these two elements, indeed, the prosperity of the experiment depended; and bold as the reader must readily apprehend it was, there was not during the performance, notwithstanding an occasional sense of weariness, a moment of doubt as to the power of the author to carry on his well-purposed and thoroughly mastered development to a triumphant conclusion. The play is stated to be entirely original, though we have some recollection of a story of Hoffman's that bears no slight resemblance to the main interest of its argument.

EAST-END THEATRES.—We stated about a month ago that Mr. Charles Mathews was engaged at the CITY OF LONDON; and last week he, with some of his Lyceum pieces, duly appeared on the stage of that theatre. The salary reported to be paid to him is one hundred and fifty pounds a week.—At the STANDARD, to oppose him, Messrs. Wright and Paul Bedford have also been engaged, and likewise appeared on Monday week, in certain of the Adelphi pieces. What we anticipated has occurred. The fashionable trifles in which Mr. C. Mathews has too long delighted have proved unattractive; while the rival house has been crowded to the roof to witness the sturdier and less refined productions which Mr. Webster had provided for a healthier, if more homespun, taste. The different classes of pieces have now been brought to the

real test of popular appreciation, at a distance from the place of their first production, and apart from the individual vanity of their respective actors; and we have no longer any reason to wonder why the Lyceum has proved a failing and the Adelphi a successful theatre. The drama fitted for the British public must be of a robust sort;—whether classic, romantic, or domestic, the Anglo-Saxon understanding requires that it should be strong, full, healthy, teeming with life, interest, and story. Above all, it requires that it should be moral. It has no sympathy with the *vaudeville* of French intrigue; it respects the obligations of marriage, and despises frivolity, vice, and that false wit which would laugh virtue and earnest merit out of countenance.

MUSICAL AND DRAMATIC GOSSIP.—We have before us a copy of the Laws of the *Philharmonic Society*—forty-four in number. Two score of these are devoted to the election of directors, auditors, subscriptions, memberships,—to such formalities in short as, we are rash enough to fancy, might be provided for in half-a-dozen explicit sentences. The musical provisions contained in this code are three.—*Law the First* announces that—

"The primary object of the *Philharmonic Society* is the encouragement of the superior branches of music by the establishment of a Concert, and combining therein the highest talents that can be procured, for the purpose of forming a full and complete orchestra."

The italics in the foregoing and following extracts are ours.—*Laws the Sixteenth and Seventeenth* run as follows:—

"The Directors, immediately after their election, shall be empowered to engage performers: they shall have the management of the Concerts of the Society, and of all matters appertaining thereto, subject to the control of a general meeting."

"The Directors shall have the power of making bye-laws for the regulation of their own meetings—a copy of which shall be delivered to the Secretary, and forthcoming at any general meeting."

According to law the first, the combination of "the highest talents that can be procured" is promised for the *Philharmonic* orchestra. How has this promise been kept?—by Directors electing themselves and one another as performers, without reference to their conductor, long after they ought to have been superseded by more competent men;—by Directors appearing at their desks, not in person, but by deputy? How has the statute in law the sixteenth—of the Directors subjecting their management to the control of a general meeting—been observed? To point the moral of our inquiries, let us ask who controlled, or authenticated, or directly or indirectly sanctioned the engagement of Herr Wagner? At the time present, when this spirited measure has borne the fruits of all measures of party pique,—disappointment, loss, disgrace to those who promoted it,—we hear of one director shifting the responsibility to another—of Mr. A. declaring that it was all Mr. B.'s fault—of Mr. B. stoutly denying the charge, and assuring his congregation that so strange an appointment would never have happened, save from Mr. C.'s representations. But what boots such "fending and proving"? A simple adherence to the statutes of the Society would have enabled any one, whether acquiescent or affronted, to fix the responsibility on the parties really responsible. The whole order, or disorder, of the *Philharmonic* mismanagement is summed up in the elastic provision of law the seventeenth, which allows the Directors to make "bye-laws." It must have been by sanction of such statutes that the plurality of conductors was abolished,—that visitors were shut out from rehearsals,—that the singular evasions in recompense of solo performers have been carried through. Seeing that the laws of the *Philharmonic* Society contain no indications of any musical course or principle to be followed,—and that they amount to little more than a promise that some concerts of some music shall be somehow given, in accordance with some bye-laws,—we recommend all who are interested in stirring up "this slough of despond" to its depths, to demand the production of the Directors' book of bye-laws, as they are empowered to do by law seventeen; and with a view to future check and reconstruction, to ascertain how far the capricious course—now indicating reform, then verging on ruin—which has

distinguished the proceedings of the *Philharmonic Society*, has been really a series of measures, decided by votes, recorded in minutes, proposed and carried at general meetings,—how far it has been a case, on the one side, of supineness, on the other of precedent violated without consistency or common sense to serve the purposes of self.

One of the most notorious musical illustrations of England during the half century just ended—Robert Lindley, our great violoncellist—died so quietly a few days ago, that many musicians, both amateur and professional, might have overlooked the fact, save for the notice of the event in a late number of the *Musical World*. Lindley was born at Rotherham, in Yorkshire, according to the periodical just cited, in 1772 (the date of 1777 being given by a 'Biographical Dictionary of Musicians' before us). He was the son of a man who loved music, and could teach it a little. As a boy, he gave signs of great musical promise. These brought him under the notice of the Italian violoncellist Cervetto, who gave Lindley lessons, and to such good purpose, that in the year 1794 (only two years after Mozart's death—while Beethoven was only "in the bud"—upwards of a quarter of a century ere Weber was heard of—and a score of seasons, or thereabouts, before Signor Rosini's time) young Lindley took the desk of first violoncello in our Italian Opera orchestra,—and with it all the first appointments in our choice orchestras, and as *solo* player at festivals. It is not many years since he retired in favour of younger men from this long course of public service and public favour. The latter never failed him:—the sight of the comely old man winding his way into the orchestra was, in nine cases out of ten, signal for a hearty round of English applause and welcome.—In some important respects Lindley's popularity was thoroughly merited. Though his execution, it is true, was exceeded in his own day by that of such great foreign players as Merk and Romberg, and in ours entirely outshone by Signor Piatti,—Lindley drew from his strings a tone such as no other violoncellist whom we have ever heard, or heard of, commanded. Then, his style might not be up to the mark of our present musical requisitions,—for he was not a cultivated man, and flourished, too, during the worst period of English taste. Thus, he was comparatively heavy and uninteresting as a quartet player,—monotonously fond of frivolity and trick in his *cadenzas* and ornaments,—puerile and commonplace in the concoction of his *solos*. But, on the other hand, he was excellent—a tower of breadth and strength—in the orchestra; capital in accompaniment,—and thoroughly versed in some of those old traditions (for instance, the support of recitatives) which demand from the instrumentalist a basis of sound musical knowledge, not always built on by showy solo-players now-a-days. He had little to say, and that little was marred by an impediment in his speech. It seemed as if the brotherly companionship which existed betwixt himself and Dragonetti for so many years must have been a sympathy of strings and bow, rather than a verbal interchange of anecdote and opinion,—since betwixt the English violoncello's no-language and the Venetian *contra-basso's* every-language-in-one, their discourse was to listeners totally unintelligible. Let it be added, that Lindley delighted in his profession, and was conscientious accordingly,—never careless at rehearsals, never slovenly at performances. In short, according to the measure of his capacity, his culture, and the bad times in which he was trained, he was a thorough and honest artist; and some tablet should somewhere or other record this much, for the benefit of players and hearers to come.

The week before the Birmingham Festival, the meeting of the Three Choirs at Hereford is to take place, commencing on Tuesday, the 21st of August. The principal artists engaged are Mesdames Novello and Grisi, Miss Dolby, and Mrs. Weiss; Signor Mario, Mr. Sims Reeves, and Mr. Weiss. Little Arthur Napoleon, too, is to play at Hereford, for which we are heartily sorry,—conceiving every appearance of the kind as another step towards the ruin of the gifted child.

Madame Castellan has arrived in London.

'Les Vêpres Siciliennes,' by Signor Verdi, after

having been in rehearsal since October last (!), was produced at the *Grand Opéra* of Paris on the 13th. Should 'Les Vêpres' keep the stage, we may be able to speak of it under guidance of our own ears and experience; but the "should" seems problematical, though we fully recognize the progressive improvement made, and making, by Signor Verdi, and though we perceive that the success of the first night is described as having been triumphant. Private information describes the *libretto* of this opera as weak, foolish, and ill-contrived, though it be by M. Scribe:—a re-arrangement of 'Le Duc d'Albe,' which was written for Donizetti to set—while, so far as we can gather from facts recorded it does not seem as if any one act of the five was so complete as the last act of 'Il Trovatore.' The melodies, however, (it is fair to add) are said to be combined with care and charm,—the instrumentation is praised as ingenious,—and the *airs de ballet* are commended for their grace and variety.

M. Thalberg's second theatrical work, 'Christina di Svezia,' has been produced at Vienna with every sign of approval; and (we are informed by Mr. Ella's *Musical Record*) the composer has passed through London on his way to Rio Janeiro, where he is engaged for some concerts. Such a move seems to us an odd sequel to a real triumph. But what is success, after all? In some collection of theatrical anecdotes we remember the whimsical commentary of Kenney on the manager who declared himself as "really proud of his pit," on a night when his pit was counted by Kenney to contain some five-and-twenty persons.—Again, we find the *New York Musical Gazette*, for the benefit of innocent America, chronicling the crowds and the increasing enthusiasm in London which attend on the evolutions of Herr Wagner's *bâton*! We heard of like triumphs, too, the other day, when we were at Düsseldorf. Pleasantly apart, statements like these are very sad, or very silly—or both.

We have been invited, by one in whose judgment we place reliance, to believe in the good accounts which reach us of Mdle. Tietjens, a young German *soprano*, who is described as promising us a real artist and vocalist. She is now, we perceive, singing at the Opera of Berlin.

It appears that we were misinformed regarding the abandonment of the Paris speculation in English theatricals,—since we now perceive that, yesterday week, 'Macbeth' was played in the *Théâtre Ventadour*, with Mr. and Mrs. Wallack as the *Thane of Fife* and the *Lady*. The tragedy seems to have been found too long; and the interpolated witch-music failed to please, because, say the journals, it was "out of tune."

MISCELLANEA

Attempt to sound Niagara Falls.—The gentleman who has been trying the experiment of sounding the river below Niagara Falls, writes as follows:—"Another attempt was made with a similar iron of about 40 lb. weight, attached to a No. 11 wire, all freely suspended, so as not to impede the fall of the weight. I then let the weight fall from the bridge, a height of 225 feet. It struck the surface fairly, with the point down—must have sunk to some depth, but was not longer out of sight than about one second, when it made its appearance again on the surface, about 100 feet down the stream, and skipped along like a chip, until it was checked by the wire. We then commenced hauling in slowly, which made the iron bounce like a ball, when a cake of ice struck it, and ended the sport. I am satisfied that no metal has sufficient specific gravity to pierce that current, even with a momentum acquired by a fall of 225 feet. The velocity of the iron when striking must have been equal to 124 feet per second; and, consequently, its momentum near 5,000 lb. Its surface opposed to the current was about 50 superficial inches. This will give an idea of the strength of that current, and at the same time hint at the Titan forces that have been at work to scoop out the bed of the Niagara river."

TO CORRESPONDENTS.—C. R.—E. C.—V. B.—H. S. E.—received.

THE WESTMINSTER REVIEW.

NEW SERIES.—No. XV. JULY, 1855. Price 6s.

Contents.

- I. Spinoza.
- II. International Immortality.
- III. Self-Education.
- IV. The Physiological Errors of Teetotalism.
- V. The Decline of Party Government.
- VI. The Earth and Man.
- VII. The Foreign Policy of the United States.

Mary Wedlake & Co. 118, Fenchurch-street.

A DAILY LONDON NEWSPAPER FOR 1s. PER WEEK.
The Proprietors of the DAILY NEWS have determined that upon the Repeal of the Compulsory Stamp, their Evening Paper,

THE EXPRESS, price TWOPENCE, Unstamped, Shall be produced complete in all the features of an Imperial Newspaper. The EXPRESS will report Public Meetings, the Money, Stock, Share and General Markets, the Courts of Law and Police, the Events of the Day, and all matters of general interest to the hour of publication. *The War and Foreign Intelligence of The Express will be full, late, and reliable.* The EXPRESS will contain at least Twenty-two Columns of News and Intelligence; and any increased demand by Advertisements on its space will be met by an increase in the size of the Paper. It will be published so as to reach any place within Seventy Miles of London, by Railway, by an early hour on the same Evening.

Orders from the Country for unstamped Copies must be given through an Agent in the Country Town, and may be addressed to the Publisher, W. King Hales, at the Office, 14, Bouverie-street, Fleet-street, London.

PICTURE TIMES. PRICE TWOPENCE.
Every Saturday, commencing JUNE 30, 1855, will be published, a LARGE NEWSPAPER, price only 2d., full of Pictures. The Trade must order immediately, as the demand is already enormous. Ask for the PICTURE TIMES.—Office, No. 1, Crane-court, Fleet-street.

THE OVERLAND MAIL.—On July 10th will appear the First Number of THE OVERLAND MAIL, a Newspaper, published on the mornings of the 10th and 26th of each month, for despatch to India, China, Singapore, Ceylon, &c. &c., by the Overland Mail, via Marseilles. Contents—Political and Social Intelligence, Military and Naval News, Commercial and Monetary Articles, Legal Reports, Reviews of Books, Literary, Artistic, and Musical Gossip, Abstract of Sporting Events, &c. &c., with all the most important News up to the morning of the day of publication.

The price of THE OVERLAND MAIL will be 9d. per copy, or 18s. per annum, payable in advance; and the postage, via Marseilles, 3d. each number, or 6s. per annum.

Subscribers' names may be sent to the Proprietors, Messrs. Smith, Elder & Co., Cornhill, or the Publisher, the Overland Mail man in Town or Country. Communications for the Editor are to be addressed to the care of Messrs. Smith, Elder & Co. Cornhill.

* * * Advertisements intended for insertion in the First Number should be sent not later than the 5th of July.

ILLUSTRATED TIMES.—NOTICE.—Some explanation is due to the Public and the Trade in respect of the inconvenience both were put to in their laudable endeavours to procure a due supply of copies of Nos. I. and II. of the ILLUSTRATED TIMES. The Proprietors, foreseeing the probability of a large demand, adopted the precaution of producing the Paper in duplicate, and with the aid of two machines working night and day—each machine, too, throwing off about 1,000 copies every hour—they anticipated that even their most sanguine expectations would have been kept pace with. They were, however, doomed to a disappointment, which, however agreeable to themselves, was they are nevertheless aware, productive of the greatest annoyance to the public. For the future, the Proprietors feel satisfied that their arrangements will insure the due delivery of a quarter of a million copies of the ILLUSTRATED TIMES into the hands of the Public before the Evening of Saturday in each week.

No. III. of the ILLUSTRATED TIMES, (price 2d., Stamped 3d.) is now ready. Office, 148, Fleet-street, London.

CHARLES EDWARD MUDIE, 510, New Oxford-street, London, and 76, Cross-street, Manchester.

**PHOTOGRAPHIC CHEMICALS,
APPARATUS, and LENSES.****R. W. THOMAS,****CHEMIST, &c., 10, PALL MALL,**

SOLE MAKER OF THE XYLO-IODIDE OF SILVER,

AND

MANUFACTURER OF PURE PHOTOGRAPHIC
CHEMICALS AND APPARATUS.*In the APPARATUS DEPARTMENT of this
Establishment every kind of first-class Photographic
Apparatus may be seen, including—*

CAMERAS, folding and rigid, of superior construction.

Folding and other STANDS, of the best make.

GLASS BATHS, arranged for carrying the Silver Solution, thus dispensing with the use of a bottle and funnel.

GUTTA-PERCHA BATHS, mounted, to carry the Silver Solution for Glass Plates, up to 15 by 12 inches.

Jointed LEVELLING-STANDS and SPIRIT-LEVELS.

COLLODION PLATE-HOLDERS, for preparing large plates with facility. Pneumatic, ditto.

PLATE-CLEANERS.

COLLODION GLASSES.

A Choice Collection of PASSEPARTOUTES, made expressly for this house, from original patterns.

Albumenized and other PAPERS, French and English.

A great variety of Glass, Porcelain, and Gutta-Percha DISHES.

Also, a large assortment of ROSS'S Portrait and Landscape LENSES.

PHOTOGRAPHY ON PAPER.

Every requisite for practising the Calotype process may also be seen in the Apparatus room, including Buckle's Brushes, Shallow Glass Dishes for developing negatives, with case and covers, Deep Porcelain Dishes, for Washing the Iodized Paper, &c. &c.

An excellent Negative Paper, well adapted for Iodizing, after the method followed and recommended by Mr. Sutton, price 4s. per quire, or 32. 10s. per ream, 19 by 15.

N.B. The stock (50 reams) has now been kept two years. This paper may also be had ready iodized.

XYLO-IODIDE OF SILVER.

This important photographic preparation is exclusively used at all the Photographic Establishments. Its superiority is universally acknowledged. Testimonials from the best photographers and principal scientific men of the day warrant the assertion, that hitherto no preparation has been discovered which produces uniformly such perfect pictures, combined with the greatest rapidity of action.

In all cases where a quantity is required, the two solutions may be had at wholesale price in separate bottles; in which state it may be kept for years, and exported to any climate. Full instructions for use.

CAUTION.—Each bottle is stamped with a red label, bearing my name and address,

RICHARD W. THOMAS, CHEMIST,

10, PALL MALL,

to counterfeit which is felony.

NITRATE of SILVER BATH for the above preparation may be always obtained of R. W. THOMAS, ready made, at a cost little more than the price of ingredients used.

CRYSTAL VARNISH.

PREPARED FROM THE FINEST AMBER.

This valuable Varnish, for protecting Negative Pictures, does not require the application of any heat to the plate. The coating will be found free from stickiness, hard, and transparent. It dries immediately.

HYPO-COLOURING BATH.FOR RENDERING THE POSITIVES ON PAPER DARK
AND RICH IN COLOUR.**CYANOGEN SOAP.**FOR REMOVING ALL KINDS OF PHOTOGRAPHIC
STAINS

The genuine is made only by the inventor, and is secured with a red label, bearing this signature and address,

RICHARD W. THOMAS, CHEMIST,

No. 10, PALL MALL,

Manufacturer of Pure Photographic Chemicals and Apparatus.

And may be procured of all respectable Chemists, in pots, at 1s., 2s., and 3s. 6d. each, through Messrs. EDWARDS, 67, St. Paul's Churchyard; and Messrs. BANCALAY & Co., 95, Farringdon-street, Wholesale Agents.

VIOLETS.

H. BREIDENBACH, Distiller of Flowers
and Eau de Cologne to the Queen, has now in great perfection several EXTRACTS of the WOOD VIOLET. It has a lasting odour, and will not stain the handkerchief. Violet Pomade, Cold Cream of Violets, Violet Sachet Powder, and several toilet preparations of the same flower equally fragrant.—157 B, New Bond-street, London.

A CLEAR COMPLEXION.—GODFREY'S
EXTRACT OF ELDER FLOWERS is strongly recommended for softening and purifying the skin and giving it a blooming and charming appearance. It is a fragrant perfume and delightful cosmetic. It completely removes tan, sun-burn, redness, &c., and by its balsamic and healing qualities renders the skin soft and free from dryness, scurf, &c., and keeps every complexion pure, fresh, and bright. By continuing its use only a short time, the skin will become and continue soft and smooth, and the complexion clear and beautiful. In the process of shaving it is invaluable, as it annihilates every pimple and all roughness, and affords great comfort if applied to the face and throat after shaving. It is also a most valuable skin dressing with directions for using it, by all Medicine Venders and Perfumers.

DO YOU WANT LUXURIANT HAIR,
WITH KEBS, and? No other compound for the Hair has
produced such an enduring result as EMILY LEWIS'S
CRINILENE. It is guaranteed to produce Whiskers, Must-
aches, Eyebrows, &c. in a few weeks, and restore the Hair in
baldness, from whatever cause, strengthen it when weak, prevent
its falling out, and effectually check greyness in all its stages. Price
1s. 6d. per Pot. Sent by post, on receipt of 2 penny postage stamps, by MISS DEAN, &c., Manchester-street,
Gray's Inn-road, London. Sold by every Chemist in the world.—
"In one fortnight it produced a beautiful set of mustaches," *W.
Adams*.—It has prevented my hair falling out," *J. Hickson*.—"It has
given me the hair of a young man," *W. G. Alder*.
Beware of imitations under similar dissimilar names.

METCALFE & CO.'S NEW PATTERN

 —Put up in a Beware of the words "From Metcalfe's," adopted by some houses.
METCALFE'S ALKALINE TOOTH POWDER, 2s. per box

DR. DE JONGH'S
LIGHT-BROWN COD LIVER OIL.

THIS pure and genuine transparent Light

This pure and genuine transparent Light Brown Cod Liver Oil, long known and justly appreciated on the Continent, has now acquired the general confidence of the Medical Profession in this country, by whom it has been extensively and successfully prescribed, and with almost immediate and remarkably beneficial results—in many instances where ordinary Cod Liver Oil has been copiously, though ineffectually, administered.

Being invariably and carefully submitted to chemical analysis—and supplied in sealed bottles, so as to preclude any subsequent admixture or adulteration—the physician and the patient may alike rely upon a genuine medicine, and, so far as is possible, anticipate a uniform, regular, and certain result.

Sold in bottles, capped and labelled, with Dr. de Jongh's Stamp and Signature, WITHOUT WHICH NONE ARE GENUINE, by ANSAR, HARFORD & CO., 77, STRAND, LONDON, Dr. de Jongh's sole accredited Consignees and Agents; and IN THE

Half-pints (10 ounces), 2s. 6d.; P nts (20 ounces), 4s. 9d.; Quarts (40 ounces), 9s. IMPERIAL MEASURE.

DEAFNESS and NOISES in the HEAD.—Free of Charge, for the Protection and Instant Relief of the Deaf, a Book of 30 pages.—An extraordinary Discovery.—Just published, sent free by post to any deaf person, writing first.

[illegible]

MEDICINE OF MOST DECIDED EFFICACY.—KAYE'S WORSDELL'S PILLS thoroughly purify the blood, and promote the healthy action of the liver, stomach, and bowels. Sold throughout the Empire, 1s. 1d., 2s. 9d., and 4s. 6d. Wholesale Depot, 22, Bread-street, London.

LITERARY MEN, STUDENTS,
TEACHERS, CLERGYMEN,
and others, whose care and most anxious thought is constantly
directed forth, may have for their little pleasure in their

being called forth, can hope for but little pleasure in their high and important undertakings, unless seconded by a proper preparation of the mind. The following is a list of the medicines which are the first consideration of every thoughtful individual; and the fine balsamic preparation, PARK'S LIFE PILLS, of all medicines is without dispute the best calculated to produce a fine flow of an individual's, a clear head, and a ready perception.

Sold by E. Edwards, 37, St. Paul's Church-yard; Barclay & Sons, 4, Farringdon Street; G. Tutton & Co., 10, Abchurch-lane; Han & Co., 10, St. Dunstons, 50, Fleet-street, London; and by all respectable Chemists and Medicine Venders in Town and Country. In Boxes, prices 14s., 2s. 9d., and in Family Packets, 11s. each.

HOLLOWAY'S OINTMENT AND PILLS.
HOLLOWAY'S Remedies for the CURB OF SKIN DISEASES.
 Mr. W. L. ALLEN, of St. Louis, Mo., writes: "I suffered for more than two years from dreadful scabidic humours in both his legs, which extended from the knee to the foot, and formed one complete sore. The pain also was most excruciating, and notwithstanding the various remedies I used, they were worse and more, until I at length thought mortification would take place. At this critical juncture he commenced using Holloway's Ointment and Pills, which speedily cured his legs, and his health has since become far better than ever it was."
 Agents, 244 Broadway, New York. Holloway's Establishments, 244, St. and London, and 50, Maiden-lane, New York.

Now ready, in 2 vols. post 8vo.

THE WABASH; or, ADVENTURES of an ENGLISH GENTLEMAN'S FAMILY in the INTERIOR of AMERICA. By J. R. BESTE, Esq.

"This narrative is highly interesting, from its graphic character. It exhibits the American world in striking and evidently truthful colours. The volumes possess a high value, from the important information which they contain for the guidance of persons contemplating emigration to the United States."—*John Bull*.
"As charming a book of travels and adventure as it has been our good fortune for some time past to light upon."—*Messenger*.

Hurst & Blackett, Publishers, successors to Henry Colburn, 13, Great Marlborough-street.

THE ASYLUM FOR IDIOTS, EARLSWOOD, RED HILL, SURREY.

Patroness.

HER MOST GRACIOUS MAJESTY.

His Royal Highness PRINCE ALBERT has appointed TUESDAY, July 3, for the OPENING of this Institution.

Trains run to Red Hill hourly. It is half-an-hour distant from London. Special Trains will be provided, and will start from the Asylum at reduced charges. They will depart at one, and return at five and at seven. The charge for Return Tickets will be: First Class, 3s.; and Second Class, 2s.

Ladies having Purse to present, and other persons holding Seated Tickets, will have Reserved Seats. Ladies presenting Purse with Five Guineas and upwards will take part in the ceremony. Purse and Copies of the Ceremonial may be had on application.

Gentlemen, Stewards, and others, will be supplied with an opportunity of making their offerings on behalf of the Charity. Artists are invited to contribute something of their stores to ornament a great national institution. Form and colour are great means of education, and of gratification in the training of such a family.

Persons within a reasonable distance are invited to give cheerfulness to the day, by the presentation of Plants and Flowers. Presents also, adapted to the cultivation of the little farm, which is to be mainly worked by the family, will be very appropriate and acceptable.

The Musical arrangements instrumental and vocal, are in the hands of Mr. BENEFIT, who has generously offered his services. No other pledge need be given of their excellence and proficiency.

Refreshments of the best kind will be provided by Mr. Bathe, of the London Tavern, at regulated charges.

No Admission without Tickets. Each Subscriber is entitled to one Free Ticket, 2s. 6d. each to other persons. They are to be shown, but not given up. They are to be had at the Office of the Stewards, or at the Gate on the day of Opening.

All contributions will be thankfully acknowledged. Every information may be had at the Office.

We plead for those who cannot plead for themselves. Those who have most mind will pity those who have the least. The greater the necessity the greater the charity. It is more blessed to give than to receive.

JOHN CONOLLY, M.D. D.C.L. } Gratuities
ANDREW REED, D.D. } Secretaries.

N.B.—The Board request a perusal of the last Report, which may be had gratuitously at the Office, 20, Poultry, where Subscriptions and Donations will be thankfully received, and all papers and needed information cheerfully supplied.

Donors—Smith, Payne & Smiths, Lombard-street.

* * * Donations and Subscriptions will be received by Messrs. Drummond, & Co., 49, Chancery-lane, 16, New York, and for Scotland, Samuel Scott, Bart. & Co., 1, Cavendish-square; and Messrs. Richard Twining & Co., 215, Strand.
Office, 29, Poultry, June 18, 1855.

NAVIGATION SCHOOL, under the direction of the BOARD OF TRADE. Separate Classes for Masters and Mates in the Merchant Service at 6s. per week, and for Seamen at 6d. per week, meet daily at the Sailors' Home, Wells-street, London Docks. Apprentices admitted free. Application to be made at the Sailors' Home.

TO WIDOWERS.

A LADY of many years' experience in the care of the **AND MANKIND** of CHILDREN wishes to meet with **ENGAGEMENT** in the Family of a Gentleman, in addition to her undertaking the Education of his Children, her thorough knowledge of Housekeeping will be found an acquisition. She is competent to impart a solid English Education, also Music, French (acquired in Paris), Italian, Drawing, &c. Having for years had the sole charge of a motherless little girl, she feels fully qualified to watch over the health and comfort of her Pupils, and being most respectfully connected, would expect to be treated entirely as a member of any family she might enter. Most unexceptionable references offered, and a moderate Salary only required.—Address Miss BENNET, Post-office, Hatfield Row, Whitehall, Units.

LIBERAL EDUCATION.—Mr. JAMES SHERRAT, M.A., has recently opened MANOR HOUSE, BATTERSEA, for the reception of Pupils. A careful grounding is guaranteed. Speaking French constantly practised. Healthy exercise secured. Moral and Religious training earnestly attended to. Mr. Sherratt is both a Mathematician and a Linguist. He brings the principles of Comparative Philology to bear upon the teaching of Languages; progress is thus greatly accelerated, while from the very commencement the reasoning faculty is exercised as well as the memory. Terms (inclusive) from 60 to 80 Guineas. The Sons of Widows of limited means received at a reduced charge. The highest references given.

BONN ON THE RHINE.

GERMAN PROTESTANT ESTABLISHMENT FOR YOUNG GENTLEMEN, opened 1847, under the direction of HERR THOMAS, a native of Bonn, combines the advantages of a sound Classical and Commercial EDUCATION with all the comforts of an English home. German, French, and English taught by most eminent Masters. Terms moderate. Apply by letter to Th. Th. Messrs. Dulan & Co. Booksellers, 37, Soho-square; or to the Director, at Mr. Mann's, Guild Pitts, Stratford-on-Avon.

EDUCATION IN GERMANY.—Parents desiring to send their Sons to Germany for the purposes of Instruction, or EDUCATION, may suitably place them with a German Family at Hanover. Good references given and required.—Apply to Mr. SOMME, Hanover, care of Royal Hanoverian Railway Direction.

SCHOLASTIC.—FRENCH AND GERMAN taught, Grammatically or Conversationally, Privately or in class, limited to Six Pupils, by HERR KOCH, Professor at the Philological School, London. Schools and families attended. Translations done.—For Prospectus, terms, &c. apply at 48, Upper Albany-street, Regent's Park.

DR. ALTSCHUL'S LECTURES AND READINGS.—To Literary Institutions, Schools, and Families.—LECTURES (in English), combined with Dramatic and Literary Readings, are delivered by Dr. ALTSCHUL, M. Ph.D., Examiner Royal Coll. Preceptors, Professor of the German, Italian, and French Languages and Literature.—Chandos-st., Cavendish-square.

SCHOOL ASSISTANTS, duly qualified, in search of Engagements either in Ladies or Gentlemen's Establishments, are invited to register their Names, Qualifications, and References, in person, at Messrs. RELFE BROTHERS, School Booksellers and Stationers, 120, Aldersgate-street, London.

These Registers are opened Half-Yearly, for One Month, from the 1st of December and June. No charge is made, the object being to provide Messrs. R.'s connexion with Assistants of ability and worth.

MISS POLE, having made arrangements for the reception of EIGHT YOUNG LADIES as RESIDENT PUPILS, in addition to her Morning Pupils, has the honour of announcing that the Studies commenced April 4th, at her residence, 23, Chancery, Bath, where the Plan of Study and Prospectuses may be obtained.

TO PUBLISHERS OF SCHOOL BOOKS.—

The usual Half-yearly EDUCATIONAL NUMBERS of the MANCHESTER WEEKLY ADVERTISER will be published on July 7th, 14th, and 21st, when, as usual, copies will be forwarded to the principal Scholastic Institutions throughout the kingdom in addition to the regular circulation, which embraces all the Educational Establishments of importance in Manchester and the surrounding district. The already very extensive circulation of the Advertiser will now be immensely increased in consequence of the regular of the Newspaper, which has just commenced into operation. Advertisements are requested to be sent without delay, addressed to the Proprietors, GALT, GENT & Co., 55, Market-street, Manchester.

A FIRST CLASSMAN (Classical Honours, Durham, 1855), is desirous of meeting with one or more PUPILS, who should be well grounded in the ensuing Vacation, either in England or on the Continent.—Address B. A., Darling's Clerical Library, Queen street, Lincoln's Inn.

WANTED IMMEDIATELY, A LADY of good natural powers, and of sound Church of England principles, to undertake the daily instruction of the INFANT CLASS, in the CHURCH LADIES' COLLEGE FOR YOUNG LADIES. Good references will be required.—Address the LADY VICE-PRINCIPAL, Cambury House, Cheltenham.

TRAVELLING or RESIDENT MEDICAL ATTENDANT—A Gentleman, who has been residing in Italy with an English Nobleman during the past winter, wishes for a KEENING MENT. He is highly educated, generally as well as professionally, has seen much of the world, and the Continent, and speaks French fluently.—For references, &c. address M. R. C. S., care of Mr. C. H. May, 33, Gracechurch-street.

BRIGHTON.—A LADY, residing in one of the best situations in Brighton, is anxious to secure, either for the summer or permanently, YOUNG LADIES (or children) accompanied by a governess, a good French nurse, and a cook.—Address S. B., care of Mrs. Roe, 36, Western-road, Hove.

TO PARENTS and GUARDIANS.—An ARCHITECT and SURVEYOR in extensive practice has a VACANCY for a gentlemanly, well-educated youth as a PUPIL. The best references will be given and required.—Address E. G. Messrs. Waterlow & Sons, Parliament-street, Westminster.

TO PARENTS, &c.—Mr. GEORGE HAYES, 66, Conduit street, Regent-street, has a VACANCY for a PUPIL. He would be fully instructed in Mechanical as well as Operative Deutistry of the highest order, would join the family circle, and receive many useful advantages. If desired, he could attend the Classes at either of the Colleges.

BEN RHYDDING HYDROPATHIC ESTABLISHMENT.

PHYSICIAN—Dr. William Macleod, F.R.C.P.S. SURGEON—Mr. Tait. Prospectus and Terms to be had of Mr. R. C. TAYLOR, House Steward, Ben Rhydding, Otley, Yorkshire.

HYDROPATHY.—MOOR PARK MEDICAL and HYDROPATHIC ESTABLISHMENT, near Farnham, Surrey, within three miles of the Camp at Alpersholt. This Institution is now open for the reception of Patients under the Superintendence of Dr. EDWARD W. LANE, A.M., M.D., Edin.—Dr. Lane may be consulted in London every Tuesday between half-past 12 and 2 a.m., Conduit-street, Regent-street.

HANOVER SQUARE ROOMS.

MARTIN'S EXTRAORDINARY and SUBLIME PICTURES, VALUED AT 8,000 GUINEAS. THOMAS MARTIN, Publisher, 115, Pall-mall, has much pleasure in announcing to the Nobility and Gentry of London, that he has made arrangements to exhibit, from July 3, and following days, for a limited period, in the Hanover-square Rooms, the three unrivalled Works of Art—

THE LAST JUDGMENT,

THE PLAINS OF HEAVEN,

AND THE GREAT DAY OF HIS WRATH.

Painted by the late John Martin, painter of "Belshazzar's Feast," &c. &c. and finished 5 or 6 months prior to his death. These wonderful productions have been on view in the City for the last two months, where upwards of 70,000 persons inspected them, and created universal admiration.—Hours of exhibition, from ten till six daily, admission by Invitation Card, or 6d. each.

SPECIMENS OF PATHOLOGY.—The QUEEN'S COLLEGE, Galway, being desirous of increasing its PATHOLOGICAL MUSEUM, is ready to PURCHASE MORBID SPECIMENS, properly put up, and accompanied by authenticated details of the Cases.—Applications, stating full particulars, to be addressed to the Dean of the Medical Faculty, Queen's College, Galway.

ORNAMENTS for the Drawing-room, Library, and Dining-room, consisting of a new and elegant Assortment of Vases, Figures, Groups, Candlesticks, Obelisks, Inkstands, beautiful Inlaid Tables, Paper-weights, &c., in Italian Alabaster, Marble, Bronze, Terrestrial Spar, &c. Imported and manufactured by JAMES T. LLOYD, 149, Strand, London.

Mr. Tennant arranges Eminent Collections of SHELLS, MINERALS, and FOSSILS, which will greatly facilitate the interesting study of Mineralogy, Conchology, and Geology, at 2, 5, 10, 50, to 100 guineas each.

COATS OF ARMS.—A Figure of a Knight, with Coat of Arms recently embossed, to order, on the Shield, for the 1st—Bust of a Knight, with Crest and Motto, 10s. 6d. A most unique Ornament for Halls, Libraries, &c.—A beautiful Collection of Casts from Armour, in exact imitation of the Originals—Oak Carvings, and thousands of Engravings at unheard-of Prices.—J. A. T. & Co., 12, Strand.

NOTICE OF REMOVAL.—DAVID KEAY begs to inform the Book Trade that he has removed from No. 13, Good-square, to more commodious and accessible premises, No. 10, BOLT-COURT, entrance at 121, FLEET-STREET.

D. K. has just received a new and complete List of ILLUSTRATED and ANNOTATED FAMILY and POCKET BIBLES, and PRAYER BOOKS published by him, and will forward it, post-free, to any Bookseller on application. Illustrated Bible Warehouse, London, June 29th, 1855.

THE CLERGYMAN (Cambridge, Sen. Opt.) of a healthy and pleasantly-situated Village in Lincolnshire, wishes to receive and prepare for the UNIVERSITY, or he would accept of a MANUSCRIPT from any ENGLISHMAN; or he would read with them for the voluntary Theological Education and Ordination. Apply to the Rev. J. D. P., Kirkby Latham, near Seaford.

TO AUTHORS, CLERGYMEN, &c.—A SHORT-HAND WRITER wishes to obtain an ENGAGEMENT as a MANUSCRIPTIST to any person who has much literary work to perform, and to whom time is an object, this method is invaluable. Terms moderate.—Address G. F., 20, Southampton-street, Strand.

TO ARTISTS.—THREE large, lofty STUDIOS TO LET, near Regent's Park. Uninterrupted North light, gas, water laid on, capital separate entrance, together with the desirable furnished Gothic house attached, which might be divided into chambers with each Studio, or the whole would well suit a Sculptor.—Apply, Library, Mornington-street, Gloucester Gate.

MR. MAYALL, PHOTOGRAPHER, begs to announce that he has entirely REMOVED from West Strand, to 224, Regent-street, corner of Argyll-place.

MAYALL'S PORTRAIT GALLERY, 224, REGENT-STREET, corner of Argyll-place.

PHOTOGRAPHS of every size and style, uncoloured or highly finished. DAGUERREOTYPES, plain or tinted. STEREOSCOPIC Portraits, singly or in groups. COPIES on Plate or Paper.

TAKEN DAILY. "Mr. Mayall's portraits represent the high art of the daguerreotype, they are as superior to the generality of such pictures as a delicate engraving is to a coarse woodcut."—*Edinburgh*, Nov. 1853. "More pleasing, and far more accurate than the generality of such pictures."—*Times*, July 17, 1854.

GREAT WESTERN RAILWAY.—SUNDAY, July 8, an EXCURSION TRAIN to BATH and BRISTOL, will leave Paddington at 7 45 A.M., and return the same evening from Bristol at 4 30 and Bath 7 o'clock. Fares: Bath, 3s. and 5s.; Bristol, 10s. and 12s.—No Luggage allowed.

TOURS IN IRELAND, in 1855, commencing the 1st of JUNE, and terminating the 30th of SEPTEMBER.—The Public is respectfully informed, that arrangements have been again entered into by the Chester and North Wales Railway Company with the principal Railway Companies in England, Scotland, and Ireland, and with the City of Dublin Company, by which FIRST and SECOND CLASS IRISH TOURIST TICKETS will be issued at the following stations and prices:—

NEW EDITION OF THE ABBÉ HUC'S WORK ON CHINA.

In 2 vols. 8vo. with coloured Map, price 2*s.*THE CHINESE EMPIRE. By the
Abbé HUC, many years Missionary Apostolic in China.
Translated with the Author's sanction. Second Edition.

"We know no book of mere travel which contains so full a body
of systematic information upon all aspects of Chinese society, as
the volumes now before us." *Examiner*.

"The reader must consult for himself a work which is as in-
structive as a scientific treatise, as full of new facts as a journal,
and as amusing as a romance." *Daily News*.

"His volumes teem with valuable information, and contain one
of the best pictures of China we have met with since the days of
the Dominican pilgrims. . . . His description is real and pic-
turesque. . . . It unfolds the life of China, it displays the character
of the people, and evinces a thorough knowledge of Asiatic history
and manners." *Athenæum*.

London: Longman, Brown, Green, and Longmans.

Just published, in post 8vo. price 7*s.* 6*d.*THE CHRIST OF HISTORY: An Argument
grounded in the Facts of His Life on Earth. By the Rev.
JOHN YOUNG, M.A., late of Albion Chapel, Moorfields.

"The argument is sustained with great dignity, and is recom-
mended by its literary ability as well as by its intrinsic import-
ance." *Athenæum*.

"Taking up ground altogether new, the writer of this volume
has confronted the growing infidelity of the day with a boldness of
mind, an intellectual force and moral power, against which no
sophistry can stand, and no cavil can avail. . . . We would com-
mend the perusal more especially to minds of a high order, tainted
with the scepticism of the day; for them it is more especially de-
signed: But we would commend it no less to all who, apart from
controversy, love to dwell on the character of Christ; and above
all, we would commend it to the preachers of Christian truth, who
may derive from it many valuable hints for the homiletic treat-
ment of the sacred text." *John Bull*.

London: Longman, Brown, Green, and Longmans.

TO BOOK CLUBS, READING SOCIETIES, AND
READERS IN GENERAL.

Now ready, No. I. of

NOTES on BOOKS; Being an Analysis of the
WORKS published during each Quarter by Messrs. LONG-
MAN & CO.

The object of this publication is to enable Book-buyers readily
to obtain such general information regarding New Books and New
Editions published by Messrs. Longman and Co., as they would
derive from the perusal of well-arranged tables of contents or ex-
planatory prefaces.

With this object each notice is confined to an ANALYSIS of the
CONTENTS of the work referred to: Critical opinions and laudatory
notices are excluded.

Copies are sent free by post under the new Treasury Minute to
all Secretaries, Members of Book Clubs and Reading Societies,
Heads of Colleges and Schools, and Private Persons, who forward
their addresses to Messrs. Longman and Co. for this purpose.

. The Second Number will appear on August 31st.

London: Longman, Brown, Green, and Longmans.

NEW BURLINGTON-STREET, June 30.

NEW WORKS AND NEW EDITIONS,

Just published by MR. BENTLEY.

I.
LIVES OF THE QUEENS OF ENGLAND of the HOUSE of HANOVER. By Dr. DORAN, Author of 'Habits and Men,' 'Table Traits.' 2 vols. with Portraits, 21s.

II.
ASPEN COURT: a Tale of Our Own Time. By SHIRLEY BROOKS, Author of 'Miss Violet and Her Offers.' 3 vols.

III.
HISTORY OF OLIVER CROMWELL AND THE ENGLISH COMMONWEALTH to the Death of Cromwell. By M. GUIZOT. Second Edit. 2 vols. 8vo. 28s.

IV.
WORLDS BEYOND THE EARTH. By MONTAGU LYON PHILLIPS. Small 8vo. with an Illustration, 6s.

V.
LAMARTINE'S MEMOIRS OF CELEBRATED CHARACTERS. Second Edition; to which is added, a Life of Milton. 2 vols. crown 8vo. 12s.

VI.
HISTORY OF CHARLES I. AND THE ENGLISH REVOLUTION TO THE DEATH OF CHARLES I. By M. GUIZOT. Second Edition. 2 vols. 8vo. 28s.

VII.
HISTORY OF MODERN ITALY, from the first French Revolution to the Year 1850. By RICHARD HEBER WRIGHTSON. Post 8vo. 10s. 6d.

VIII.
CHARLES READE'S WORKS.
1.
CHRISTIE JOHNSTONE. Second Edition. Post 8vo. 10s. 6d.

2.
PEG WOFFINGTON. Post 8vo. 9s. 6d.

3.
PLAYS by TOM TAYLOR and CHARLES READE: 'Masks and Faces,' 'Two Loves and a Life,' 'King's Rival.' Small 8vo. 5s.

IX.
OUR ANTIPODES; or, RESIDENCE AND RAMBLES IN THE AUSTRALASIAN COLONIES. With a Glimpse at the Gold Fields. By Lieut.-Col. MUNDY, Author of 'Pen and Pencil Sketches in India.' New Edition, large 8vo. with Illustrations, 15s.

"To all who take an interest in our noble southern colonies—to all who love spirited narrative of adventure and lively description of distant lands, we cordially recommend Colonel Mundy's book."—*Blackwood's Magazine*.

X.
KERTCH, SEBASTOPOL, SIMPHEROPOL, INKERMANN, &c.—For full Descriptions of these and all the most important Places in the Crimea, see Mr. SCOTT'S NEW WORK on the CRIMEA, BLACK SEA, &c., a Third Edition of which is published This Day, in post 8vo. 7s. 6d.

XI.
THE CAMPAIGN IN THE CRIMEA; with an Account of the Battles of Alma, Balaklava, and Inkermann. By Lieut. G. S. PEARD, 20th Regt. Small 8vo. 6s.

XII.
HISTORY OF CHRISTIAN CHURCHES AND SECTS, from the Earliest Ages of Christianity. By the Rev. J. B. MARSDEN, A.M., Author of 'The Early and Latin Puritans.' Parts I. to V. inclusive. 37s. 3s. 6d. each.

13, GREAT MARLBOROUGH-STREET.
HURST & BLACKETT,
Successors to Mr. Colburn,
HAVE JUST PUBLISHED
THE FOLLOWING NEW WORKS.

VOLS. III. and IV. of THE
DUKE OF BUCKINGHAM'S MEMOIRS of the COURT and CABINETS of GEORGE III., from Original Family Documents. Completing the Work. In 8vo. with Portraits.

"These volumes worthily complete an undertaking which will earn for the house of Buckingham the thanks of not a few historians. We have before us the secret movements of parties, the motives of individuals, the minute anatomy of every political act and word laid bare. All the town gossip has been preserved; we have innumerable authentic anecdotes and full personal details about every person on the public stage; and as for the King and his unhappy family, we have their sayings and doings, their whims and blunders, and every scrap of scandal connected with their domestic affairs, made out for nearly every day in every year."—*Examiner*.

THE OLD COURT SUBURB.
By LEIGH HUNT. 2 vols.

THE MONARCHS of the MAIN;
Or, ADVENTURES of the BUCCANEERS. By GEORGE W. THORNBURY, Esq. 3 vols.

"Up to this time, the history of the Buccaneers remained unwritten, although their career was of the most exciting description. Mr. Thornbury has taken up that history, and the result is a work, the terrible interest of which is not surpassed in any language."—*Observer*.
"They performed deeds of heroic enterprise, daring, and endurance which read like the exploits of the heroes and demigods of mythology."—*Athenæum*.

THE WABASH; or, ADVENTURES of an ENGLISH GENTLEMAN'S FAMILY in the INTERIOR of AMERICA. By J. R. BESTE, Esq.

"This narrative is highly interesting, from its graphic character. It exhibits the American world in striking and evidently truthful colours. The volumes possess a high value from the important information which they contain for the guidance of persons contemplating emigration to the United States."—*John Bull*.
"As charming a book of travels and adventure as it has been our good fortune for some time past to light upon."—*Messenger*.

THE NEW NOVELS.

THE JEALOUS WIFE. By Miss PARDOE. 3 vols.

"In these volumes Miss Pardoe renews her welcome acquaintance with the public with another of her singularly powerful descriptions of real life. In whatever path of literature Miss Pardoe walks she is invariably successful. She is one of the very best female historians of the present time; whilst as a novelist, every feature is discernible in her fictions which adds a charm to the female character and brings out its well-directed peculiarities, so as to do honour to her own sex and to prove the value of its influence upon society. These points are especially noticeable in 'The Jealous Wife,' which is one of the very best specimens of Miss Pardoe's talents."—*Weekly Messenger*.

DISPLAY. By Mrs. MABERLY. 3 vols. [Immediately.]

THE NEXT-DOOR NEIGHBOURS. By MRS. GASCOIGNE, Author of 'Temptation; or, a Wife's Perils,' &c. 3 vols.

"Of this new novel, by the Author of 'Temptation,' we may say, it is one of the best of its class. The sketches of character and pictures of life are distinctly drawn."—*Literary Gazette*.
"A most admirable tale."—*John Bull*.
"Passion, pathos, and humour are happily combined in this interesting story."—*Morning Post*.
"The author has successfully portrayed the manners of the day in one of the best novels that have lately appeared."—*Herald*.

EUSTACE CONYERS. By JAMES HANNAY, Esq. Author of 'Singleton Fontenoy,' &c. 3 vols.

"All people of thought and culture will derive that useful pleasure—combined instruction and amusement—from this tasteful and artistic work. It is singularly interesting throughout."—*Daily News*.
"Mr. Hannay's ablest, wisest, and maturest work."—*Athenæum*.

THE SECRET MARRIAGE; or, Contrasts in Life. By Miss FANNY WILLIAMS. "One of the best novels of the season."—*Literary Gazette*.

COLBURN'S UNITED SERVICE MAGAZINE and NAVAL and MILITARY JOURNAL for JULY contains:—

Narrative of the Naval and Military Operations of the Month, with all the Despatches, Gazettes, and Casualties—Military Vindication of Lord Raglan—The Republic of the 13th of June—Errors on the subject of the Present State of the Army—The French Commissariat—Examination of the Report of the Sebastopol Committee—The Duke of Wellington's Opinions on Newspaper Attacks—Russian Official Reports of Engagements in the Crimea, with the Return of the Force engaged—Military Education—the Hang Tragedy—Miss Nightingale—Colonel Cole's Cartridges—Property in Commissions—Appointments, Promotions, Correspondence, &c.

MR. NEWBY'S NEW PUBLICATIONS.

Second Edition, now ready, in 3 vols. 42s.
THE LIFE AND CORRESPONDENCE OF THE COUNTESS OF BLESSINGTON.

. In this Second Edition nearly a hundred new letters and other documents, together with an engraving from Chalon's celebrated Portrait of Lady Blessington, have been added, and the work has undergone complete revision.

By R. MADDEN, Esq. Author of 'Travels in the East,' 'Life of Savonarola,' &c.

"Dr. Madden has not only produced a work of intense interest, but the very best contribution to literary history which has been given to the world during the present century. Letters from all the celebrated men of the era may be found in it, forming a collection of wit and wisdom unrivalled in any modern published literary correspondence, for variety, extent, and interest. It will take permanent rank in the world of letters, not merely as the life of one individual, but as a miniature biographical encyclopedia of all the modern celebrities of England."—*Dublin University Review*.
"Almost every man of mark in the world of intellect and fashion appears with more or less of prominence, and with the effect of a gallery of celebrated portraits. The book contains a variety of matter bearing upon the social history of the century, which it is well to have preserved."—*Spectator*.
"It will provide abundance of food for the curious in search of information and amusement."—*Morning Chronicle*.
"It is one of the most interesting and valuable collections in the English language and illustrates in a remarkable degree the history of our times. It will have an historical value apart altogether from the light it sheds on the career of Lady Blessington."—*Freeman's Journal*.

"Not only the most interesting work of the day, but also the most interesting work of the class to which it belongs."—*Evening Packet*.
"We may, with perfect truth, affirm, that during the last fifty years there has been no book of such peculiar interest to the literary and political world. It has contributions from every person of literary reputation—Byron, Sir E. Bulwer (who contributes an Original Poem), James D'Israeli, Murray, Savage Landor, Campbell, L. E. L., the Smiths, Shelley, Jenkin, Sir W. Gell, Jekyll, &c., &c.; as well as Letters from the most eminent Statesmen and Foreigners of distinction, the Duke of Wellington, Marquis Wellesley, Marquis Donno, Lords Lyndhurst, Brougham, Durham, Ashurst, &c."—*Morning Post*.

"The book is rich in matter which must interest, and will furnish its quota of anecdote to the literary records of the first half of the century."—*Athenæum*.
"This book will be found to answer expectation. It contains something about every one who has been a name for the last quarter of a century, of either sex and all countries, from the Duke of Wellington to Lola Montes—from Brougham to Bonaparte—from 'Boz' to Rachel—from Charles Mathews to the Queen of England."—*Liverpool Advertiser*.
"It is without exception the most valuable book of the last half-century."—*Tribune*.

"Comprises letters from every illustrious name who has taken a permanent or temporary seat in the Temple of fame."—*Leader*.

In 2 vols. price 10s. with Plates.
NINE YEARS IN RUSSIA.
By ROBERT HARRISON.

"Mr. Harrison's volume is an acceptable contribution to our knowledge of Russia. It appears trustworthy, and is full of information."—*Athenæum*.

"This is a much more reliable book than the 'Englishwoman in Russia,' and gives a far better insight into Russian life and Russian character than any book hitherto published."—*Evening Post*.
"The opportunities enjoyed by the author have been turned to good account; and some really genuine and novel observations on the Russian manners and customs are the result."—*Daily News*.
"Since the day that De Custine published the remarkable narrative of his visit to Russia, there have been few books that have conveyed more accurate information and a closer insight into the social, moral, and political condition of that remarkable people."—*Liverpool Advertiser*.

THE POPULAR NEW NOVELS.

In 3 vols. 31s. 6d.
CATHERINE IRVING.

"The Author of 'Jane Eyre' is again before us in this most original novel. It has the same sharp and well-defined characters—the same touching pathos—the same smart and racy dialogue—the same curl yet graceful style; and, like 'Jane Eyre,' will secure an amount of popularity that few fictions have attained."—*Evening Post*.

"A vigorously-written novel of the school of Currer Bell. The author possesses a strength of thought and a proportionate force of diction, united by links of nature and impulse, indomitable resolution, and strong ebullitions of temper, amidst glimpses of serene beauty and scenes of the deepest emotion and passionate tenderness."—*Dispatch*.

"There has been no novel of equal talent since 'Jane Eyre'; and we shall not be alone in asserting that it comprises all the beauties, and few only of the defects, of that popular fiction. It is truly a masterpiece both as regards conception and style."—*Tribune*.

In 3 vols. 31s. 6d.
THE CAREER of a RISING MAN.

"M. Viener shows great skill and capacity for novel writing. His conception is distinct, his delineation forcible, his narrative easy."—*Spectator*.

"It is a clever and ambitious book."—*Athenæum*.
"The author has a deep perception of what is holy and beautiful in thought and feeling. Judicious readers will estimate the depth of information, the knowledge of the human heart, the healthful tone of mind, and the grace, delicacy, and purity of sentiment to be found in every page."—*Morning Herald*.
"This is emphatically a most excellent novel."—*Dispatch*.

Now ready, in 3 vols. 31s. 6d.
EVELYN LASCELLES.

By the AUTHOR of 'THE GRENBLER,' 'OURATE of WILDMERE,' &c.

Just ready, in 3 vols. 31s. 6d.

ARISTOBULUS:
A TALE OF JERUSALEM.

By M. KAVANAGH.

Just ready, in 3 vols. 31s. 6d.

COUNTY FAMILIES:
A NOVEL.

LONDON, SATURDAY, JUNE 30, 1855.

REVIEWS

Catalogues of the Imperial Library: Catalogue of the History of France—[*Catalogues de la Bibliothèque Impériale, &c.*]. Tom. I. Paris.

A good catalogue of books is a very rare production; a good printed catalogue is rarer still; but a printed catalogue, whether good or bad, of a large library is the rarest production of all. We do not, of course, speak of booksellers' or auctioneers' catalogues: these are not legitimate objects of criticism, and are good enough if they enable their compilers to sell their wares. But the catalogue of a large public library stands upon a different footing. It must be a guide to the student and an inventory for the guardians of the collection. Every entry consists of several facts, each of which must be stated with precision, or the catalogue ceases to be a guide, and becomes positively mischievous. Names, and dates, and sizes are abstract things, and consequently errors are easily committed in transferring them to paper; and a small blunder may make a strange alteration in a title itself. We remember once seeing a German title, in which by writing *a* instead of *u* the word *Fussreise* became *Fassreise*, and thus a journey *on foot* was turned into a journey *in a tub*. When to such points, which require only minute care, are added the more serious difficulties arising from the different forms of the same name as presented in different languages, and sometimes in the same language,—the embarrassments arising from works published anonymously,—from serial and periodical publications,—from collections,—from works the true or entire contents of which are not shown by the title-pages,—some idea may be formed of the labour imposed upon the conscientious cataloguer who wishes to tell "the truth, and the whole truth." These are the difficulties which James, and Fisher, and Audiffredi have described so eloquently in the prefaces to their respective works;—works which they desired to make what they ought to be—true and complete. These are the difficulties which every practised librarian experiences in his daily labours, and knows how to appreciate. These are the difficulties which have made the progress of the new Catalogue of the British Museum slow; and these, no doubt, were some of the difficulties which retarded the progress of the Catalogue of the Imperial Library of Paris prior to the year 1852.

We have been induced to make these remarks, because in the Catalogue which stands at the head of this article we find no recognition of the difficulties attending the construction of every good catalogue; and because we find a promise of rapid execution, which we conceive cannot be redeemed but at the expense of the utility of the work itself. Before examining this volume, we will give a short account of its previous history.

In the year 1838 the Minister of Public Instruction directed his attention to the state of the catalogues of the various collections in the Royal Library at Paris, and obtained a credit for 1,264,000 francs, or 50,560*l.* sterling, to be expended in the preparation of a catalogue of the printed books, in supplying deficiencies, and in binding. After the lapse of twelve years—that is, in 1850,—a commission was nominated for the purpose of inquiring into the progress made in the work, and the time and amount of money that would be required to complete it. The chief officer of the catalogue department made a report upon the subject in June 1850, wherein he stated that the number of titles prepared for the Catalogue of Printed

Books was 171,190,—that ten years would be required to complete it,—that that portion of it comprising the History of France would be finished in less than a year, and that it would not be possible to commence the printing before the beginning of the year 1852. He further undertook that titles should be prepared at the rate of 140,000 per annum. At the commencement of 1852 it would appear that he was not prepared to redeem his promise of going to press; and in the month of January of that year was carried into effect a suggestion, made by the Commission of 1850, that an officer should be appointed who should be alone responsible for the preparation of the Catalogues. Such a labour was clearly incompatible with the ordinary and arduous duties of the principal officer of the Department of Printed Books. M. Taschereau was, on the recommendation of the Minister of Public Instruction, appointed to this office. By a report made to M. Taschereau in the following February, it appeared that during the last twenty months 68,826 titles of works on French History had been prepared, leaving a vast deal in this class still to be done both in cataloguing and classification; while to the other classes of English History, Medicine, Universal History, Jurisprudence, Greek and Roman History, Science and Art, and Dramatic Music, the increase had only been 8,642; or in other words, the efforts of the cataloguers had been directed almost exclusively to the division of French History,—with which it was proposed to commence the printing of the new Catalogue. After enumerating some of the difficulties which retarded the progress of the work, the chief of the catalogue department declared his inability to advance more rapidly, and shortly afterwards resigned his post. M. Taschereau proceeded at once to remodel this branch of the service. In June, 1852, it was found that 250,660 titles were prepared, of which 135,783 belonged to the class of French History.

We are not told when the printing of the volume before us commenced; but the Report of M. Taschereau to the Minister prefixed to it, and announcing its completion, bears date December 25, 1854. It is divided into three chapters, the first comprising what the compiler terms 'Preliminaries and Generalities,'—that is to say, bibliography, general treatises, geography, and descriptions of France, statistics, general history and collections. The second chapter embraces the history of France by epochs,—viz. ethnography, Celtic and Gaulic history, origin of the Franks, generalities of the first, of the second, and of the third race, of the French Revolution, and of the Imperial dynasty, and works relating to several reigns. The third chapter comprises the history of France by single reigns, and is carried down to the reign of Louis the Fourteenth. All these divisions have their sub-divisions, amounting altogether in this volume to about 250. The total number of entries is 16,036, of which 9,322 are original works, 4,284 are subsequent editions of works previously entered, and 2,430 are duplicate entries or cross-references. The subsequent volumes of this class, French History, will comprise journals and periodical publications, ecclesiastical history, constitutional history, administrative, diplomatic and military history, manners and customs, archæology, numismatics, local history, nobiliary and genealogical history, and, finally, French biography. M. Taschereau proposes to print a supplementary volume to this class, which shall embrace all the current additions to the library which may have been received too late for previous insertion,—all those which may have been over-

looked, and all those which are contained in the other public libraries of Paris.

Prefixed to the volume are twenty-six rules, which have been followed in its preparation. A classed catalogue has this advantage over one that is alphabetical, that the titles not requiring headings—a most fruitful, perhaps the most fruitful source of difficulty—is avoided. It is nothing to the cataloguer that he finds the name Buckingham spelt in nine different ways, and that of Raleigh in eleven. He gives the name as he finds it, and puts off settling the proper form until the index is prepared, which may not be done in his time, or may not be done at all. The greater part of these twenty-six rules refer, as a natural consequence, to pure technicalities, such as the signs to indicate an abridged title and other points of equal indifference. There are one or two, however, which deserve notice. One of the rules is, that all languages, other than Greek, Latin, and their derivatives, of Western Europe are followed by a translation in French. In practice, this rule has been modified, for only a few words of the foreign title are given, and then follows the translation of the entire title. This practice may be convenient for the cataloguer; but it is very objectionable, as it destroys the means of identifying a title, and consequently a book.

Another rule is, that the name of the printer is not given excepting in those cases where there is no name of a publisher, or where the name of the printer constitutes the sole difference between two editions. This rule, in a great number of instances, has not been followed in the case of early printed books; and here the actual practice is certainly far better than the rule, which is good enough for books printed in the latter part of the seventeenth century and subsequently, but ought never to be applied to those printed previously.

One important feature in the compilation of this Catalogue is, the rule adopted with respect to collections. When the titles of the pieces contained in the collection are indicated on the title-page, cross-references are given from them; but when the title-page does not set out the several pieces contained in the collection, no cross-references are given. Thus, under the several divisions of this Catalogue, we find the works contained in the collections of Guizot, Buchon, Petitot, Michaud et Poujoulat, and the *Pantheon littéraire*,—the contents of which any one may know by looking at their title-pages,—while the important pieces contained in *Du Chesne*, *Dom Bouquet* and others find no place here, because their title-pages leave the reader in the dark as to their special contents. Where assistance is most needed it is withheld, and this in order to add a little to the rapid progress of the compilation of the Catalogue. This is a very grave error. M. Taschereau, in his report to the Minister of Public Instruction, prefixed to the volume, alleges as his reason, that collections of this nature are *innumerable*, and that to give these cross-references would extend "*sans mesure*" the number of volumes of the Catalogue. He does not deny their importance, and, by thus showing their extent, shows the extent of the loss his system imposes upon those for whom his Catalogue is intended.

M. Taschereau informs us, in his Report, that the collections, of which he only gives the title-pages, will, so far as they refer to French History, be analyzed by one of the assistants attached to the Library, M. Guérin. But this labour is to be performed by M. Guérin as a private work, and during his leisure hours. The benefit, in its fullest extent, will only be partial,—that is, it will only extend to the History of France, and will depend entirely

upon the zeal, health and leisure of a private individual.

Again, when a work is published anonymously, or when the name of the author does not occur upon the title-page, but in some other part of the work, the name is supplied between parentheses; no distinction being made between the work which is anonymous and the work which is not. This is, to say the least, an extremely loose mode of proceeding. And here we may observe *en passant*, that the names of the authors of anonymous works are not always given even when supplied by Lelong.

We have already said that the preparations for this Catalogue commenced as early as the year 1838, and that by the month of June, 1852, as many as 135,783 titles were prepared. Many, no doubt, have been added since. Indeed, the volume itself bears evidence of inequality in its execution. Although M. Taschereau in his Report reminds the Minister that his duty was to compile a catalogue and not a bibliographical work, many of the titles, especially those of early printed works, contain a great deal of important bibliographical description, and give evidence of great care and skill in their preparation,—while others are clearly drawn up under the order to stick to the title-page and make good speed. The compilers may have been slow prior to 1852, but the work they did was done well, if the titles of the books in the Reserve may be taken as a sample.

In the objections we feel it our duty to bring against this volume of the Imperial Catalogue, we have no inclination to include blunders which may arise from inadvertence or accident. Such are inseparable from every work, especially from a work of this description. The sixty errata corrected at the end of the volume constitute an ample admission that the compilers do not lay claim to be immaculate. We have noticed others ourselves, such as No. 617, on p. 332, where the date 1589 is printed 1859; and No. 2,457, on p. 560, where we are not told, as we ought to have been, that Joannes B. Æduus is a pseudonyme for Nicolas Rigault. But we strongly protest against a system of which the following will serve as an example. At p. 70, No. 120, we find:—

“Histoire de France depuis l'établissement de la monarchie française dans les Gaules, ... par le P. Gab. Daniel, ... Paris, S. Benard, 1696, 1 vol. in 4to. (Le premier volume a paru seul. L'ouvrage entier n'a été publié qu'en 1713.)

“E.—1755-1757. Augmentée de notes, de dissertations critiques et historiques de l'histoire du règne de Louis XIII. et d'un journal de celui de Louis XIV. (par le P. Griffet), et ornée de plans, de cartes géographiques et de vignettes. ... Paris, chez les libr. associés, 17 vol.” &c.

This last entry refers to another edition of Daniel's work having a title similar to that of the first edition, with the addition of the words commencing “augmentée,” &c., and of course any one seeing these two entries would suppose that the edition of 1755-57 was accompanied by dissertations, and that the first edition was *not*. Lelong, on the contrary, informs us, in his ‘Bibliothèque Historique de la France,’ that at the end of the first edition there are no less than eight dissertations, six of which have not been reprinted in the later editions. Again, at p. 280, No. 297, we find:—

“Bref et sommaire recueil de ce qui a été fait et de l'ordre tenu à la joyeuse et triomphante entrée de... Charles IX. de ce nom roy de France, en sa bonne ville et cité de Paris, ... le mardi sixiesme jour de Mars. Avec le couronnement de... Madame Elizabeth d'Autriche son épouse, le Dimanche vingt-cinquesme. Et entrée de ladite dame en icelle ville le Jeudi xxix. dudict mois de Mars, M.D.LXXI. (Par Simon Bouquet V.) Paris, O. Codoré, 1572, in-4to.”

—At the end of this volume, there is a poem by the celebrated Étienne Pasquier, occupying eighteen pages, entitled ‘Congratulation de la Paix faite par sa Majesté entre ses subjectz l'unziesme jour d'Aoust, 1570.’ This poem is passed over in the Catalogue altogether, although important from its subject and interesting on account of its author. Neither are we told that a part of this volume, comprising the account of the coronation of Elizabeth of Austria, has a title-page bearing date 1571. These are the natural consequences of the rule that the Cataloguer is not bound to look beyond the title-page. And these are omissions which, it must be borne in mind, M. Guérin's supplementary work will not supply.

The Commission, in 1850, named twelve years as the period within which the Catalogue of printed books would be completed, and eighteen years for printing it; and estimated the number of volumes in quarto at from 65 to 72. M. Taschereau adopts the number of volumes, promises the completion of the work within the twelve years, and anticipates that the time estimated for printing may be much curtailed. Energy and determination will work marvels, but there are limits which even these noble qualities cannot exceed. The Emperors Napoleon the First and Third have accomplished great things by a determined will,—but they never made a Catalogue; and we strongly suspect that M. Taschereau, as his experience enlarges, will be induced to moderate his promises. We have seen that the class of French History was greatly advanced very soon after M. Taschereau entered upon his duties. He had therefore, fortunately for the public and himself, a large fund to commence with; and the energies of his department have been principally directed towards the completion of this class. By confining himself to the title-pages of his books, and ignoring bibliography, his titles can be prepared more rapidly, although at the expense of a great deal of usefulness; by entering the same work in two classes he gets over a great difficulty in the preparation of a classed catalogue,—that of deciding upon the proper place for a work which may belong to more classes than one; although, again, by so doing, he greatly increases the bulk of his Catalogue. He has, thus, much in his favour; but still 250,000 titles, the number ready in June, 1852, will only fill about fifteen volumes like the present. Seventy-two such volumes would require upwards of 1,100,000 titles, and each class must, or ought to, be completed before the printing of it commences. As it is, the work will be burthened with supplementary volumes for the current additions, &c., and undue haste will only add to this evil.

Without entering into the question of the relative advantages of alphabetical and classed catalogues, we feel bound to express our opinion that for those who wish to find a particular book this Catalogue with its numerous and minute subdivisions will not afford very ready facilities. One example will suffice to explain our meaning. There is a subdivision of “Ouvrages relatifs à plusieurs règnes à partir de François premier.” A student wishes to find the work entitled ‘Histoire véritable des Guerres entre les deux Maisons de France et d'Espagne, durant les règnes des très-chrétiens rois François I., Henri II., François II.,’ &c. If he look for this under the division mentioned above he will not find it, but he must turn to another, for books classed as “Généralités des Guerres d'Italie et de la Rivalité des Maisons de France et d'Autriche,”—under which the work in question is placed.

We do not make these remarks in a captious spirit; but we have felt it our duty to make

them because the contemplated Catalogue is too important not to create a natural anxiety that its execution should correspond with its importance,—that the student and the scholar should derive the greatest possible benefit from the enlightened liberality of the French Government,—that a work in this first instalment of which so much is really good, should not be spoiled by over-haste, by energy wrongly directed.

In addition to the Catalogue of Printed Books, there are in course of preparation those of the Manuscripts—of the Medals and Antiques—of the Geographical Collection, and of the Prints. Altogether, this series of volumes, if properly executed, will form one of the most important and extraordinary works that ever issued from any press in the world.

The Private Life of an Eastern King. By a Member of the Household of His late Majesty Nussir-u-deen, King of Oude. Hope & Co.

OUR readers have already heard of this strange book. The writer—now in this country—has been accused beforehand of a design to provoke popular indignation against the Court of Lucknow, and of a desire to aid the agitation, now growing warm in the Presidency of Bengal, in favour of extinguishing the native dynasty of Oude, and of annexing that fine province to the Anglo-Indian Empire. After fair perusal of what he has written, we acquit him of all such serious thought. His object is to amuse. The depository of a good deal of strange experience, he seems to have felt a call to contribute his mite to a better understanding in his native land of the marvellous phantasmagoria of Lucknow Court life. How far the knowledge placed at our service—the vistas opened to our view—may influence public opinion for or against those agitators in Calcutta who call on the Imperial Government to step between an oppressed people and a despotic rule, is not his affair. The writer almost ignores politics. He paints the royal household as he saw it. His object is to make an interesting book; and we must admit that in this purpose he has attained a complete success.

The whole story reads like a lost chapter from the Arabian Nights, as our readers will see by a few extracts. Here is our author's first interview with the King of Oude.—

“No one must approach an Eastern monarch empty-handed. A nuzza, or present, must always be offered, and is offered by every one, even at the ordinary levees, the king returning another of greater value subsequently. * * I remained at the end of a walk to await his arrival. My present (five gold mohurs) rested on the open palm of my hand, a fine muslin handkerchief being thrown over the hand, between it and the pieces of gold. The palm of the left hand supported the right, on which the muslin handkerchief and the money were placed. In that attitude I awaited his majesty. It was my first lesson in court etiquette; and I could not help thinking, as I stood thus, that I looked very like a fool. My hat was resting on a seat hard by. I was uncovered, of course; and the day was sunny and hot. Before the king came round, I was in an extempore bath. At length the party approached. His majesty was dressed as an English gentleman, in a plain black suit, a London hat on his head. His face was pleasing in its expression, of a light, a very light sepia tint. His black hair, whiskers, and moustache contrasted well with the colour of the cheeks, and set off a pair of piercing black eyes, small and keen. He was thin, and of the middle height. As he approached, he conversed in English with his attendants. What they were talking about I forget, although I heard their conversation; I was too much taken up with myself, in fact, to pay much attention to it. The king drew near, smiled as he approached me, put his left hand under mine, touched the gold with the fingers of his right hand,

and then observed: 'So you have decided on entering my service?'—'I have, your majesty,' was my reply.—'We shall be good friends. I love the English.' So saying, he passed on, resuming his former conversation. I joined the attendants. 'Put your gold mohurs up at once,' whispered my friend, 'or some of the natives will take them.' They were slipped into my pocket forthwith. I took up my hat, and followed the party into the palace."

The King was fond of Europeans—of Europeans not in the Company's service, and the chiefs of his household were men of English birth. Some of their offices were little worse than Court sinecures. For instance,—

"One was nominally the king's tutor, employed to teach him English. The king valorously resolved over and over again to give up an hour a day to study; for he was anxious to speak English fluently. As it was, he was often obliged to eke out his sentences with a Hindostanee word. I have seen his majesty sit down by the tutor, some books on the table before them.—'Now master'—(he always called his tutor 'master')—'now master, we will begin in earnest.' The tutor would read a passage from the *Spectator*, or from some popular novel, and the king would read it after him. The tutor would read again. 'Boppery bopp, but this is dry work!' would his majesty exclaim, stretching himself, when it came to his turn to read again; 'let us have a glass of wine, master.' The glass of wine led to conversation, the books were pushed away, and so the lesson ended. Such lessons seldom occupied more than ten minutes. The tutor got about fifteen hundred pounds a year for giving them."

—Of these members of the royal household—a real historical personage—was one, the King's barber, who might have stepped out of the Arabian Nights bodily:—

"The barber was the greatest man of the five. His influence was far greater than the native prime minister, or Nawab. He was known to be an especial favourite, and all men paid court to him. His history, truly and honestly written, would form one of the oddest chapters of human life. All that I knew of him was this:—He had come out to Calcutta as cabin-boy in a ship. Having been brought up as a hair-dresser in London, he had left his ship, on arriving in Calcutta, to resume his old business. He was successful; he pushed and puffed himself into notoriety. At length he took to going up the river with European merchandise for sale; he became, in fact, what is called there a river-trader. Arrived at Lucknow, he found a resident,—not the same who was there when I entered the king's service,—anxious to have his naturally lank hair curled like the governor-general's. The governor-general was distinguished by his ringlets; and the governor-general is, of course, 'the glass of fashion and the mould of form' in India. The resident would be like him; and the river-trader was not above resuming his old business. Marvellous was the alteration he made in the resident's appearance; and so the great saheb himself introduced the wonder-working barber to the king. That resident is in England now, and writes M.P. after his name. The king had peculiarly lank, straight hair; not the most innocent approach to a curl had ever been seen on it. The barber wrought wonders again, and the king was delighted. Honours and wealth were showered upon the lucky *coiffeur*. He was given a title of nobility. *Sofrus Khan* ('the illustrious chief') was his new name, and men bowed to him in Oude. The whilom cabin-boy was a man of power now, and wealth was rapidly flowing in upon him. The king's favourite soon becomes wealthy in a native state. The barber, however, had other sources of profit open to him besides bribery: he supplied all the wine and beer used at the king's table. Every European article required at court came through his hands, and the rupees accumulated in thousands. 'What shall be done unto the man whom the king delighteth to honour?' is a question as apt now in every oriental court as it was when the Jewish queen recorded it. Nussir put no bounds to the honours he heaped upon the fascinating barber; unlimited confidence was placed in him. By small degrees he had at last become a regular guest at the royal table, and sat down

to take dinner with the king as a thing of right; nor would his majesty taste a bottle of wine opened by any other hands than the barber's. So afraid was his majesty of being poisoned by his own family, that every bottle of wine was sealed in the barber's house before being brought to the king's table; and before he opened it, the little man looked carefully at the seal to see that it was all right. He then opened it, and took a portion of a glass first, before filling one for the king. Such was the etiquette at the royal table when I first took my place at it. The confidence reposed in the favourite was, of course, soon generally known over India, or at all events in Bengal. The 'low menial,' as the *Calcutta Review* called him, was the subject of squibs, and pasquinades, and attacks, and satirical verses without number; and marvellously little did the low menial care what they said of him, as long as he accumulated rupees. They had the wit and the satire, and he had the money; so far he was content. Of the newspapers, the most incessant in its attacks on the barber was the *Agra Uckbar*, a paper since defunct. Shortly before I left Lucknow, he employed a European clerk in the resident's office to answer the attacks of the *Uckbar* in one of the Calcutta papers with which he corresponded; and for this service the clerk was paid 100 rs. (10*l.*) a-month. So that, if the barber had not his own poet, like the tailors in London, he had, at all events, his own correspondent, like the *Times*."

An Oriental interior to match this portrait of an Oriental favourite is offered in the following scene,—a quiet household dinner:—

"We had no sooner taken our seats, than half-a-dozen female attendants, richly dressed and of great beauty, came from behind a gauze curtain or screen that occupied one end of the room. I was warned not to gaze upon these ladies too curiously, as they were supposed to be kept from the eyes of man, like other ladies of the harem; supposed so only, however. During the evening I found many opportunities of regarding them without subjecting myself to observation, or without appearing to take any notice of them. They were all young and handsome. Their colour was of the brunette tint of an Andalusian belle, not darker; and their jet-black hair, taken back from the forehead, and twisted in rolls behind, ornamented with pearls and silver pins, formed a pleasing contrast with the delicate tint of their skin, and the flush of excitement which tinged their cheeks. An outer covering of thin semi-transparent cloth, richly embroidered, was thrown over the form, and partially rested upon the back of the head. The outlines of the shoulders were quite distinct through the thin envelopes in which they were enrobed, all more or less transparent. The heaving of the chest, as they waved gently fans, made of peacock's feathers, backwards and forwards over the king, was beautiful to see. The lower portion of the person was hidden in wide *pyjamas*, or Turkish trousers, made of satin, of a bright crimson or purple colour. These *pyjamas* fitted closely to the waist, and gradually became looser and more voluminous as they descended. They were collected above the ankle with gold-embroidered belts, corresponding to those dimly seen through the gauze cloak at the waist. They took their stations noiselessly behind the king's chair. He made no remark. No one seemed to regard them at all. It was the ordinary routine of the dinner-table; nothing more. Their arms were bare nearly to the shoulder; and as they waved their feathery fans gently about, two at a time, gracefully drawing them in succession above and about the king's chair, it was a sight worth seeing. If the females of India excel in any species of physical beauty, it is particularly in the fine mould of the limbs. A statuary might have taken those delicately-shaped arms and hands as models for his *Venus*. There they plied their graceful task silently and monotonously the whole evening, fanning and attending to the king's hookah by turns, relieving each other in regular succession, until his majesty left the table, or (as was more generally the case) was carried from the table into his harem."

—These dinner-parties, with their gay surroundings and the suggestive glimpses which they sometimes offered into the luxurious mysteries of Eastern life, have evidently a hold on

the imagination of the English servitor. Another dinner gave him further opportunities for observation:—

"On my first appearance at the royal table, the amusements for the evening were a puppet-show and the usual nauch-girls. His majesty laughed heartily at the performances of the little burlesques of men and women; laughed heartily, and enjoyed himself. The barber saw that his majesty was pleased, and condescended to express his approbation also of the show. The nauch-girls exhibited their fine figures in graceful attitudes, advancing and retiring, now with one hand held over the head, now with the other. Their faces were not so captivating as those of the female attendants behind his majesty; but their forms were perfectly moulded, and they managed their limbs with a graceful dexterity not to be surpassed. Voluptuous is, perhaps, the title that most correctly indicates the entire character of their performance. Attendant musicians played upon a species of lute and tamborine behind them, advancing and retreating with them, and accompanying the instruments with their voices. The instrumental seemed the principal part of the musical performance; the voice accompanied it, rather than it the voice. But nothing of all this graceful attitudinising and profuse exhibition of fine forms was attended to by the king or his party. The nauch-girls danced, and their attendants played and sang; but no man regarded them, unless it was myself. The king was taken up with the puppet-show, and every one looked at it and praised it. At length his majesty gave a whispered order to the barber, who went out, brought something in his hand, and gave it to the king. The regal chair was pushed back, and his majesty condescended to advance to the front of the puppet-show, going round the table as if to inspect it more closely. The owners exerted themselves to give still more satisfaction, regarding their fortunes as made. The king watched for a little; his hand was advanced suddenly, and as suddenly drawn back, and one of the innocent marionettes fell motionless upon the stage. It was quite plain that his majesty had a pair of scissors in his hand, and had cut the string. The performers must have been as well aware of this as we were, but they gazed in affected wonder at the catastrophe. Natives of India require no training in simulation or dissimulation. The king turned round, his face beaming with fun, and looked at us knowingly, as much as to say, 'Did I not do that well?' The barber laughed loudly in reply, and other courtiers joined in the chorus. But this was not the whole of the royal wit. The hand was pushed forward and drawn back again and again; and again and again did one after the other of the puppets fall dead and immovable upon the stage, every successive fall eliciting a shout of laughter from the table, and a blank look of astonishment from the general manager of the show, who was visible directing and superintending. When nearly all had fallen, the royal wit was satisfied, returned to his chair, ordered a handsome present to be given to the owner of the show, and it was withdrawn. During the rest of the evening the dancers and singers were criticised with more freedom than delicacy, the wine circulating freely, and his majesty indulging in it to a far greater extent than prudence would warrant. It will not be supposed that during all this time I kept my eyes altogether away from the gauze curtain drawn across one end of the apartment. I had been told previously that some favourites of the harem were allowed by his majesty to witness the dinner-parties from behind that screen, and that it would be rude to be observed gazing intently at it. I found many opportunities, however, of inspecting it without violating etiquette. It was thick enough to prevent our recognising faces or figures behind, although we could see faintly the outline of shadowy masses of drapery passing to and fro. One principal figure was seated on a cushion,—the reigning favourite, doubtless; and her jewelled arms and neck glared brilliantly ever and anon as the light flashed upon them. We heard, too, a sweet feminine laugh, as the puppets were cut down, issuing from behind the screen; for although we could not see distinctly through it on account of our distance from it, those on the other side no doubt could. The revel proceeded; songs were sung. His majesty became gradually more and more

affected with the wine he had taken, until his consciousness was almost gone; and he was then assisted by the female attendants and two sturdy eunuchs behind the curtain, and so off into the harem. It was astonishing how like a drunken king looked to an ordinary drunken unanointed man."

We have exhibited only one side of the royal character—its luxurious frivolity; its darker shade may be sought for in the book itself. The combats of wild beasts are well described, and with touches of nature and actual observation which answer for their literal truth. Altogether, this 'Private Life of an Eastern King' is a curious and interesting addition to the Oriental library.

Art-Hints: Architecture, Sculpture, and Painting. By James Jackson Jarves. Low & Co.

THIS book is interesting from its being the first work by an American author which embraces the subject of universal Art. It is a proof of the time having come when America desires to achieve intellectual, as she has already done material, triumphs. It was the author's observation of the indifference of a party of American tourists to the paintings of Titian in the church of Santa Maria della Salute, at Venice, as contrasted with the devotion of a fanatic student, that led him to write this useful and fervent book.

Mr. Jarves devotes a chapter to each of the great epochs of Art, and passes, by easy stages, from Greece to Rome, from Rome to Byzantium, thence to Florence and Milan, till he leaves Paris and enters London, in a panoramic view:—all the world's painters defile before us, and we, perforce, fall moralizing on their fates.

The lives of the great painters are much more full of incident and adventure than the lives of great authors.

It is true that Cervantes was a slave to the Moors, and lost an arm at Lepanto,—and that Harvey studied while shot were flying around him at Edgehill; but these are exceptions to a rule. We know little of even the faces of the great poets and great thinkers in comparison with the minute details that history has left us of such men as Cæsar or Alexander. We read that Horace was stout and bald and had weak eyes—that Milton was pale and gouty—that Chaucer, like Wordsworth, kept his meditative gaze bent upon the ground:—but how scanty are these facts compared with those that enable us to see, clear as in a mirror, Robespierre in his neat blue coat and yellow waistcoat, with his pale face bent down to smell the huge bouquet that he always wore at his button-hole—Or Charles the Ninth blowing himself into a consumption with his huge hunting-horn, when tired of practising with his jewelled arquebuss at a covey of Huguenots!

But from the days of Fra Angelico the monk, to Paul Rubens the ambassador, the lives of painters have been variegated with the strangest adventures and the wildest alternations of fortune. Poets by nature, yet called from circumstances into active life, independent in aspiration, yet dependent upon the religious and the noble for existence, recruited from every rank and grade, their biographies present us with tragical scenes, less important in their results but no less interesting than those found in the histories of nations. From Giotto the shepherd, Murillo the street urchin, and Andrea del Sarto the tailor's son, to Perugino the errand-boy, Tintoretto the dyer, and Ghirlandaio the goldsmith, we see men of all classes and of all nations urged forward by a kindred aspiration,—some reaching the highest honours and others perishing miserably, victims of their own passions, of their rivals' jealousy, or of their patrons' avarice. Fiction cannot furnish us with stranger

facts than Margaritone dying from vexation at the Byzantine style being subverted by the reforms of Giotto,—Francia in despair at reading of the fame of Raphael,—or Dominico Veneziano stabbing his rival Andrea del Castagno, in order to obtain the sole honour of inventing oil-painting. How we mourn for Raphael dying at thirty-seven, and Giorgione at thirty-four! How we delight in Michael Angelo at eighty-nine still fervid in the art he loved, and Titian at ninety yet holding a palette on his thumb! What poet has given us a scene so touching as Del Sarto dying of the plague in solitude, deserted by his base mistress and timorous friends,—or Signorelli painting the portrait of his dead child? We remember Guido dying in a sponging-house, and Correggio in the obscure poverty. How we delight to look back on Dante reciting his poem to his friend Giotto as he is painting his likeness,—on Fra Bartolommeo relating to Raphael the divine thoughts on Art that he had once heard from Savonarola beneath the damask rose-tree in the garden of the Convent of St. Marco,—or on Jordaens and young Teniers bending over the shoulder of Rubens as he paints his 'Peace and War,' while Vandyke, his keen eyes sparkling with fun, is painting bright blue the nose of the vagabond Brauwer, who is fallen in a drunken sleep at his easel.

Then for the triumphs of painters. Do we not remember how all Florence flocked to the house of Cimabue, inasmuch that that quarter of the city acquired the name of *Borgo Allegri*, the "Joyful Quarter," and how a few days after the painting was carried in solemn procession to the Church of Santa Maria Novella to the sound of trumpets and the music thunder of the bells? We see Charles stooping to pick up the pencil that Titian had dropped,—Velasquez jesting with the gloomy Philip,—Bellini presenting fierce Mahmoud with a picture,—Fra Sebastiano, the poor musician, turned painter, seated among the rich princes of Venice,—and Annibale Carracci, the tailor's son, feasted in the Palace of the Farnese. Art is essentially republican; and we find in the history of Art that real genius always rises to its proper level. The son of the unknown painter of Urbino was the companion of Popes, and had he lived would have himself become a Cardinal. Fra Lippi was a poor Carmelite; Fra Bartolommeo, like Fra Angelico, a humble Dominican,—yet the noble Da Vinci and the high-born Buonarrotti are now enshrined with these in one common record of genius.

But to return from our wanderings to the author and the book before us. Mr. Jarves's language occasionally has a rich flow of harmony, and displays a strong nervous structure, that indicates a strong thinker. Take, for instance, the following thoughts on Art.—

"Without an intimate knowledge of Nature we are incompetent to judge of Art, because Art, correctly speaking, is but the mirror of Nature. Whenever it steps beyond what we see and know of the natural world, it seeks the superhuman, and, therefore, strictly speaking, the impossible. Still there are conceptions with which the artist may clothe his work that savor so directly of spiritual life, finding their being in his imagination, as to elevate our feeling above the ordinary range of creation, and bring us nigher to the throne of God. Yet even in these cases it will be found that all forms are borrowed of earth, and made typical or supernaturally beautiful, only through the ennobling power of imagination, seeking its ideal form in realms of perpetual bliss. So, when imagination descends to draw up from the depths of everlasting misery, shapes and passions steeped in crime, conscience-wrecked souls that have become the sport of devils, helpless and hopeless for eternity, amid torturing fires that annihilate but to recreate, and consuming flames that eat up all spirit matter, but keep alive the sensual, it still borrows

the forms of the natural creation." It typifies fiendish joy, and depicts demon forms with their food of human woe, and retribution of human sin, in shapes that savor of earth, while borrowing their foul garments, prolific horror, and hideous natures from their homes of filth, falsehood, and ugliness. Such is the unfathomable power of that faculty which stops not upon the confines of nature, but ever strives to fathom the invisible and explore the future."

About Turner Mr. Jarves raves, though he does not see in him all perfection. He says:—

"To no artist is the lover of Nature more indebted than to Turner; for he has established a standard of truth in Art from which the world will not readily forgive departure. The universality of his genius in this respect is remarkable. Other landscapists have contented themselves with being distinguished in parts; but he aimed at the great whole. Nothing that God had created and endowed with beauty, from an Alp to a limpet, escaped his notice. His true field was Nature; but in the works of man he could equally distinguish himself. Few artists had ever drawn architecture like Turner; witness his Cathedral at Rouen, in his 'Rivers of France.' Ships, too, were his delight; he revelled in ocean sublimity and mountain grandeur. His heart was no less open to the joy of the plains and the quiet of valleys. Whatever he undertook he touched lovingly; at times carelessly, it is true, and even wantonly, but always with power and meaning. In no respect is his genius more apparent than in his management of Nature, by which, in general, he instinctively seized upon her happiest moments and most beautiful aspects. The trivial and commonplace seldom found sympathy in him, because he felt that in interpreting Nature, his mission was to be faithful to her highest instincts."

But he allows that he failed when he aspired to the supernatural. He had not an equal feeling for colour as for form, and his oil painting was poor beside his water-colour painting. His later works seem the deeds of a madman, and are full of unmeaning variety. They are opaque, and the solids are transparent and the liquids solid, while the skies are spotty and hard.

We think he is just in making the variety of Nature Turner's great characteristic. His eye saw more in Nature than any other did, and yet it was all there, is there, and always has been there. In every mother's embrace there is Raphael's tenderness,—in many a street boy's face Hogarth's humour,—but till the right eye sees them they pass unnoted. Turner was the real founder of Pre-Raphaelitism in painting, just as Wordsworth was in poetry.

Mr. Jarves has great feeling for artistic effects, and much power in throwing that feeling into words. How well he touches the beauty of the angelic visitors in Raphael's 'Heliodorus'!

"St. Michael, stripped of wings and celestial insignia, mounted on a naked steed, unearthly, not in form, but in fire and action, attended by two spirits, with their hair streaming back from their heads, comes sweeping over the marble floor, the three gliding through the air, which seems to part before them from the rapidity with which they dart upon the sacrilegious wretches, who cower before the unexpected apparition. You feel them rush through the atmosphere. The eye is fascinated at the uplifted arm of the archangel, and watches, tremblingly, for the annihilating blow. Rubens was capable of giving human motion, but Raphael alone could impart supernatural power to Art in forms of earth."

No less admirable, and full of harmony and force of style, is the following description of some portraits by Titian:—

"The other portraits betray the brush and flat surfaces. These are surrounded with atmosphere. The heads project from the canvas. Lines are so softened and blended, that no trace is left of Art; color rivals Nature in the cool softness of its hue; the skin is flexible and elastic; blood and bones lie beneath it; perfect harmony is felt in its tints; indeed, no one thinks of colour at all, but of the living face, which glows with individuality. The expression of the unknown portrait, that man of stern resolution

and intellectual power, is unrivalled. His eyes flash thought. There is that about his look that fascinates; and yet the spirit shrinks before it. We feel that such an individual had a will and intellect to dare all that man can do. What he may have done is unknown; his very name is lost. This adds the charm of mystery, for we know that Titian did not waste his time on common men."

We conclude our notice of this clever and well-written book by expressing our satisfaction that America has at last produced a writer who may help to educate her in Art, guide her infant steps, and point out the pitfalls that surround the pilgrim of Art on his way to the unattainable peak of perfection.

Food and its Adulterations. By Arthur Hill Hassall, M.D. Longman & Co.

THE public are pretty well acquainted with the contents of this volume,—from the circumstance of their having formed the reports of Mr. Wakley's Analytical Sanitary Commission in the *Lancet*, and from the fact that whenever they have been favourable to particular dealers they have been reproduced as advertisements.

From the nature of the subject the task entered on by Mr. Wakley and Dr. Hassall is one of no ordinary difficulty. The very first article on the list of substances examined is a proof. Coffee is found to be adulterated with chicory; but if persons prefer their coffee mixed with chicory, this can hardly be called an adulteration, even if it be a misnomer to call the compound coffee. We know a coffee-dealer, who, wishing to avoid the imputation of adding chicory to his coffee, gave up the practice, when, to his great surprise, his coffee trade fell off to such an extent that his only alternative was shutting up shop or returning to his chicory. On adding chicory his trade again revived, and we see his name in Dr. Hassall's list as selling coffee "adulterated with chicory." To those, however, who prefer pure coffee it will be some consolation to know that the use of the microscope is a means by which this addition as well as many others can be detected. We think Dr. Hassall was unfortunate in taking up coffee at the outset. There are adulterations of food which all would agree to be bad; but the addition of chicory to coffee seems to many persons very desirable.

Passing from coffee we come to Sugar; and here it appears that little or no adulteration is practised. A little mite, belonging to the same family as those which attack our figs, dates, cheese, and other kept food, is found in brown sugar, but not in lump. It is different with sweetmeats and *bonbons*. Children are really exposed to the swallowing of such trash, which sometimes proves fatal, in these compounds, that it would be a wise and safe rule to give them nothing but lump sugar in indulging their taste for this article of diet.

Arrowroot seems subjected to an adulteration in the shape of potato flour. This is a great fraud, for whereas genuine arrowroot costs one shilling or eighteenpence a pound, potato flour is not worth more than threepence or fourpence. The difference in form of the starch grains of potatoes and the arrowroot plants renders this fraud not difficult of detection. There is, however, one great comfort attendant upon this adulteration; and it is, that, so far as the ultimate action of potato starch on the system is concerned, it is precisely the same as arrowroot. This is not a poisonous adulteration.

Dr. Hassall reproduces in this work his microscopic examination of the drinking Waters of London. The representations of microscopic animals in the different waters supplied to London are also given again here. An objec-

tion was raised to these pictures that they gave the notion that certain animals were characteristic of certain waters, and that each drawing represented a real drop of water. Dr. Hassall would have done better to have given a separate account of the organisms found in all impure waters, and thus have prevented the charge of exaggeration to which he has been exposed. This water report should be read by those interested in drinking or washing in pure water. It shows very clearly the wretched nature of our present water supply in London. Dr. Hassall speaks of the new arrangements as likely to improve the character of the London water,—but except that the Companies will have to supply water from higher up the Thames, it is questionable whether the new requirements will not positively increase the impurity of the water. One of the new laws is, that every company shall cover up the water it supplies. If this is done with impure water it prevents the only means of purification employed by nature:—the development in it of plants and animals, which clear off the impurities. When water is pure to begin with it may be advantageously covered.

Every one will naturally turn to Bread as the staff of life, and inquire how much it is exposed to adulteration. With the exception of a little alum, in so small a quantity as to be questionable whether it is really pernicious, this important article of diet seems not to be exposed to any great amount of adulteration. The alum seems added on account of an absurd demand for white bread. If people knew what was best to eat, brown bread would become the staple diet.

The reports on Beer are not so full as could be wished, with one exception, and that is on Allsopp's bitter ale. The assertion of a French chemist that the strychnia, manufactured so largely in France, was used in England for adulterating bitter beer, put our brewers upon their mettle; and Mr. Allsopp was the earliest to place specimens at the disposal of the chemist for analysis. As was to be expected, no strychnia was found in these ales, nor any other kind of adulteration. It would, indeed, be hard upon the British public, after paying the absurdly high price they do for their India pale ale, if it had turned out to be anything but malt and hops. Although most persons are acquainted with brewers' druggists and the narcotics they sell, London porter is either not adulterated with those narcotics, or they defy the skill of the chemist. We suspect the latter is the case. For strychnia an easy test was found; but it is not so with other narcotic agents known to be supplied to brewers and publicans. The adulterations most frequently detected in London porter are salt and treacle.

From beer we turn to Milk,—and here nothing more deleterious than water could be discovered to have been added, and this only in eleven cases out of twenty-six.

Next in point of importance to the necessities of life we have mentioned, comes Tobacco. Here we were prepared for revelations; and we almost doubt chemistry and the microscope when we are told that tobacco presents no adulteration. From the halfpenny cheroot to the sixpenny Havannah,—from shag at twopence an ounce to Turkish at eighteenpence,—all specimens presented the marks of being true tobacco. This in some measure caricatures the whole Commission; for, after all, it is not the genuineness of a thing the public cares about, but whether it is agreeable. It is of slight use to tell a man that the villainous cheroots which are sold at a halfpenny are genuine tobacco, if he find from experience that their taste is vile, and their effects are

poisonous. We suspect that Dr. Hassall does not smoke.

Snuff takers, however, need to be on their guard. Into this gentle stimulant of the nasal membrane is often introduced lead, and in more than one case lead colic and painter's palsy have been induced by the use of snuff.

We can only refer to spices, preserves, pickles and anchovies as articles of diet in some instances adulterated with injurious substances.

On the whole, we have risen from the perusal of this volume with a higher notion of the morality of our tradesmen than we had before. In by far the larger number of articles examined there was no adulteration. In another set of cases, the alleged adulteration, as in the case of chicory with coffee, is a matter of taste, and not of fraud. In another class of cases, and these a very large majority of the adulterations, the substances, though fraudulently added, were not injurious,—as in the case of water with milk.

We do not think Dr. Hassall has made out a case for the institution of a special medical police:—his work, however, will do good, by drawing the attention of the public to the question. That protection is by far the best which the public secure for themselves by their own intelligence. It is undoubtedly the duty of the Government to protect the life of the community; but it is very clear from the result of Dr. Hassall's researches, that life is hazarded to a very inconsiderable extent by any of the adulterations he has discovered. The sphere in which Government is imperatively called upon to exert itself is that in which thousands of lives are sacrificed to removable causes. The construction of houses, courts and alleys,—the absence of drainage,—the defilement of water,—the neglect of vaccination, are all causes of an alarming amount of mortality, which the ignorance of the public and the supineness of the Government allow to exist from year to year.

The Wabash; or, Adventures of an English Gentleman's Family in the Interior of America. By J. Richard Beste, Esq. 2 vols. Hurst & Blackett.

Mr. Beste's book is interesting, because Mr. Beste took the first step to writing a curious book by doing a curious thing. It is too generally neglected—this preliminary—by the writers who come in our way. For what is literature but an expression of life? and common-place life necessarily produces common-place literature.

Mr. Beste shall tell us in a sentence or two how he came to write anything about the Wabash. He was blessed, it seems, with "twelve children—six boys and six girls—of ages varying from two to nineteen." Accordingly—"it was for those boys that we were about to undertake the voyage to America. From the time of the birth of my second son, I had determined that emigration to the back woods would be the happiest lot for all of them during my life; for all, but the eldest, after me. Fond of a country life myself, I had resolved that the chances of happiness were greater to young men who (first endowed with classical education such as is given in Europe) should occupy lands of their own in the New World, and see their children grow up around them to a similar lot, than they would be to the same young men if harnessed to any of the professions in England, through which they perhaps might, by the time they were sixty, earn a competence on which to marry and breed up another race of aspiring paupers."

The family are at Bordeaux when the book opens, in the comfortable opulence of a substantial English squire. We accompany them to Havre, where they take "all the saloon and the state cabins" of the *Kate Hunter*, bound for New York, and carrying 360 German emi-

grants. We need not meddle with Mr. Beste's account of New York: boarding-houses, mint-juleps, and so on, being as familiar to us all through travellers in the States, as are nargilleys and backsheesh through travellers in the East. Mr. Beste embarked with his large family on the Hudson, and proceeded to Albany,—and thence took rail on the banks of the Mohawk, and went to Buffalo. When we found our traveller near Niagara, we became alarmed for fear he should be carried away into a description. He "does" the inevitable description very creditably; but we shall wait for a quotation till he gets on newer ground. We mount with him the steamer on Lake Erie,—the regular track for agricultural emigrants to the West, who, having come to Buffalo, find unbounded water-carriage by the great lakes.

The party went on to Indianapolis; and here Mr. Beste prepared his wagon and horses for emigrant travel in earnest. He very sensibly gives us an account of his expenses every now and then, and we learn that the bill for the wagon was seventy-eight dollars. On a June day in 1851 the household clambered up into the vehicle, and started off "on our journey across the prairies of Illinois to the banks of the mighty Mississippi."

In due time they arrived at Terre Haute, intending to get as far into the State of Illinois as possible, shortly. But at Terre Haute sickness attacked the family. A large family accustomed to a very different style of living, was suddenly imprisoned in a little village in the Far West under melancholy circumstances.

"I gladly, however, write down that all in the hotel were kind and sympathising in word and manner. The black cook did not grumble at having to make chicken broth at unusual hours; the man in the bar, who had the charge of the lumps of ice, and who supplied the tank of iced water, ever kept in the bar of every American inn, he alone grudged his trouble in having to break up the lumps of ice, and replenish the saucers that were taken to him to be filled at all hours of the day or night. For both invalids were encouraged by their doctors to suck these lumps of rough ice; and those only who have tried, can tell the luxury of such to a parched and feverish mouth. The other inmates of the hotel, however, would stop my children whenever they met them, and 'how's your father?' 'how's your sister?' 'I hope they'll soon be better,' were said by all in sympathising tones."

Mr. Beste lost one of his daughters here, and had a severe illness himself. He found that the climate would not do after all, and resolved to leave two sons at the Cincinnati College, and to return to Europe. Some such considerations are expressed in the following paragraph written by a young lady of the family may have helped to clinch the resolution.—

"'It was now my turn,' continues Louie, 'to be delighted: for I longed to see Europe again; and I was heartily tired of America, where none of us had been ever well for two days together. Besides, I did not like to be treated as the inferior of every one about me, and to hear my father and mother designated as 'the man' or 'the woman,' by a person who talked in the same breath of 'the gentleman who takes charge of the bar,' and 'the lady who makes the pastry.'"

In mere literary merit this book is above the majority of books of travel. It deserves consultation from all who may wish to receive a candid, sensible, and fair account of the author's experience.

An English-Irish Dictionary. By Daniel Foley, B.D. Dublin, Curry & Co.

It is not an easy task to compile an accurate Dictionary of the Gaelic tongue as now spoken by great numbers of the Irish peasantry. The modern Irish language does not contain those

literary treasures which enable a lexicographer to fix the terms of his vocabulary with precision. Hence, it would scarcely be fair to expect in an "Irish" dictionary that precision which we require in philological performances in more classical dialects.

But, though we make this allowance, we think that the author of this Dictionary might have made his work more useful to the student. We infer from the tone of his Preface that it is designed to help controversialists who desire to argue with the Celtic peasantry. The first and last words of the Preface are worth extracting. Mr. Foley thus commences:—

"In committing this work to the press and the public,—the result of much labour and anxiety,—I may profess, without presumption, that my first object is the good of my Irish-speaking countrymen, and the glory of God thereby."

—And he concludes in the following words:—

"In now sending it forth, I bow my knees for that blessing from above without which it cannot prosper, in humble hope that I may be found to have thus done something in the cause of Ireland—the land of my birth and best affections."

On turning to the Dictionary introduced with such solemnity, we are at once struck with the omission of any Introduction, explaining concisely the grammar of the Irish language, its alphabet, consonants, labials, diphthongs, &c. There is at present a most arbitrary use of the terminations in the modern mode of speaking Irish; and the compiler of this volume coolly says in his Preface, that the rules which guided him as to these terminations

"are made upon principles which I have explained and shall explain to the Students attending my Irish classes in College, whose information is my first care, and which, I hope, will be satisfactory generally to persons capable of forming a candid judgment."

We think that when a Professor publishes a dictionary the "information" of the persons to whom it is addressed ought to be the "first care" of the compiler. If Mr. Foley had placed on his title-page "for the use of my private pupils," we might understand the absence of an explanatory Introduction such as generally precedes most performances in lexicography.

We are compelled to be more particular in noticing this work, as it appears to be partly sanctioned by the authorities of the University of Dublin. Mr. Foley is the "Professor of Irish" in that University, and he acknowledges in his Preface the patronage which has been extended to him:—

"I am deeply indebted to the Irish Society, by whose encouragement I was enabled to undertake the work, for affording me the aid of one of my own College pupils—a Bedell Scholar—to labour with me so long as I required his assistance in the details. And I have also gratefully to acknowledge from the Board of Trinity College a liberal grant towards the expenses of its publication."

The Dictionary should have been rendered as available as possible to the numbers of adults in different parts of Ireland, who could not repair to Mr. Foley's classes at Dublin. Ethnologists, also, in other parts of the empire, making researches in Celtic languages, would wish to have an exact key to the rules on which this Dictionary was compiled.

Neither is there prefixed or appended by the author the usual tables of names of persons and places. There is no Irish given in this Dictionary for the names of the four Evangelists—Matthew, Mark, Luke, and John! The very patron saint of Ireland, "Patrick," has not the honour of his name being noticed! Neither the prophets of the Old, nor the apostles of the New, Testament have their names Hibernicized in this work, issued apparently for the use of controversialists. Nor could any one referring to

popular names in Ireland—such as "Henry Grattan" or "Daniel O'Connell"—learn from this dictionary how to speak their Christian names in Gaelic.

Nor does the author explain the differences between the uses of the terms which he heaps together as equivalents to English words. For the verb active "to beat" he gives sixteen different meanings in Irish, but he does not exemplify any of them,—so that a learner, unless he had Mr. Foley by his side, would find it almost impossible to select the right Irish term for any of the various uses of that verb. The commonest elementary dictionaries in use at schools give some help in this respect to the learners; and these precedents should have been followed by Mr. Foley.

His English vocabulary, also, strikes us as extremely pedantic. He says:—

"I have not taken all the words in Johnson's English Dictionary, for this would make the book too expensive; but, as a general rule, I have omitted only such as are of unusual occurrence in the English language, and therefore unnecessary for intercourse with the peasantry of Ireland."

—But he has throughout retained a vast number of Johnson's artificial English. Thus, in a single page, after "to cavil" and "caviller," we read "cavillation" and "cavillous"; and then lower down we have "cecity," "celature," the adjective "celebrious" (with three Irish terms for it), "celstude," "cephalalg." He is most arbitrary in his selection and rejection of English words. Thus we find him giving three Irish terms for the English substantive "tuz," and an equivalent for the word "tutty"; and for the interjection "tut" he gives three Irish terms. He also finds equivalents in modern Gaelic for the words "Xenodochy," "Xerophagy," "Xiphoides," and "Xylography."

Yet with all his undoubted copiousness of Irish words, the Dublin Professor has contemptuously passed by both "blarney" and "whiskey"; which terms are now naturalized by various English song-writers and dramatists. It is told, that there was a Pacha of Egypt once, who knew but a single word used by English subjects, and that was—"blarney"; but Mr. Foley may plead in defence that he has given three Irish equivalents for the English verb active "to butter." The omission of "whiskey" is more remarkable, as he has given Irish for "claret." We did not know that the Irish peasantry were accustomed to *vin de Bordeaux*; but we are aware that after copious libations of "whiskey," they were only too ready to tap "claret" at the expense of each other, in a style that the pens of Miss Edgeworth and Mr. Carleton have described. The word "peninsula" has latterly become unpopular; but it could scarcely be in deference to that feeling that the Professor, after treating us to "claret" à l'Irlandaise, should not have even offered us "sherry" or "port wine," though Ireland has a considerable trade in the latter article, and supplies many of the best military messes and London clubs, through Irish firms, with their long-established emigrant connexions of other times.

As illustrations of his arbitrary choice of English words, we observe that Mr. Foley offers Irish for "bloodhound," but not for "wolf-dog"; and though the species of that latter specimen of the canine race is extinct, it is still one of the national symbols of Ireland,—as the Cock of France, or Bear of Russia, or our old favourite "the British Lion," still roving fiercely through the speeches of our rhetoricians. He gives Irish for "Jew's-harp," but not for "the Jews"; and though he notices "priest," "priesthood," and "priestly," he omits "priestcraft" altogether, and banishes it in company with

"blarney" and "whiskey." We almost expected not to find "potato" in its right place, but, on searching for it, we see it properly placed close to "pot"; though there is no "Patrick" near it to assist, by the aid of "whiskey," in turning it into human nature, according to Sydney Smith's recipe for a Milesian population.

In its present state, without an explanatory Introduction, concisely giving the substance of what Mr. Foley's Preface says he reserves for his pupils, we cannot receive this Dictionary as satisfactory. There ought also to be tables of Christian names and places; and the use of the various equivalent terms should in several cases be exemplified after the manner of other dictionaries.

Dante and the Origin of the Italian Language and Literature—[*Dante et les Origines de la Langue et de la Littérature Italiennes*]. By M. Fauriel. Paris, Durand; London, Nutt.

The subject of the Course of Lectures originally delivered, in 1833 and 1834, by the late M. Fauriel, as Professor of Foreign Literature at Paris, is far more comprehensive than might be inferred from the title-page that is prefixed to them now they are edited by M. Jules Mohl. The second of the two thick octavo volumes is entirely of a philological nature, with little or no reference to the great poet whose name is at the head of the work.

To the first volume alone does the name of Dante properly belong. Here he is the principal figure, though the accessories are numerous, and we have as much about the circumstances from which Dante sprang, and among which he lived and worked, as of his own living and working. This fact, in a measure, constitutes the value of the book. "Lives" of Dante have been written over and over again; but an *aperçu* of the times and the state of literature and knowledge, which were the necessary antecedents to the 'Divine Comedy,' given by a literary antiquary so ardent and laborious in research and so agreeable in delivery as M. Fauriel, is a real boon to the student of Italian poetry. Dante, like Dryden, sticks firmly by the roots to his native soil, and cannot be detached from it, like those poets whose subject belongs not to their age, but is deliberately chosen by them of their own free will. A leading politician, in a turbulent republic, during a turbulent period,—also a recluse student, versed in the scholastic theology of his times,—the 'Divine Comedy,' which, by the laxity of its form, was susceptible of almost any contents, was a huge vessel into which Dante poured all the thoughts and feelings of his age, as reflected in himself. Even the political relations of Dante were as complex as those of an Englishman of the present day,—when "Whig" and "Tory" are scarcely definable terms. He is commonly called the "Ghibeline poet";—but how little is conveyed in that expression,—and that little how imperfectly! Dante starts in life as a Gueff, but he belongs to the *White*, or popular Gueffs (*I Bianchi*), and these are bitterly opposed to the other Gueffs, who are aristocratic, and called "Black" (*I Neri*). He holds office when the "Whites" are in power;—he is exiled when the Grand Pacificator (*Il Paciario*) Charles of Valois comes down to Florence in the interests of Pope Boniface the Eighth and the Blacks;—and then comes a new shade of politics, that of the White-Ghibeline, formed by a coalition between the exiled Gueffs and the Ghibelines, and to be clearly distinguished from the Ghibelines proper. It is not till the Emperor Henry the Seventh suddenly makes his appearance across the Alps, and with great pomp and circumstance does—nothing, that the White Gueff of former days becomes a Ghibeline in

the true sense of the word,—and, in a high-sounding epistle, welcomes the Luxembourg Emperor as the "Sun of Peace,"—the "Glorious Cæsar,"—the "Lion of the Tribe of Judah,"—forgetting for a moment, while extolling this magnificent personage, how unceremoniously he has thrust into the infernal regions that noble chief of the Ghibelines, who, in the history of the earliest Italian literature, always shines forth as a bright and benignant star—the Emperor Frederic the Second.

These facts will be found drily stated in any biography of Dante; but M. Fauriel spreads them broadly before his hearers.—Florence does not appear as a mere appendage to Dante,—as if the chief purpose of Providence in regulating her fortunes had been to afford ample materials for Dante's commentators; but her origin, her revolutions, and the state of her parties, are fully, though succinctly, set forth,—and the poet rises as a natural product from the ground which has been so carefully prepared.

In collecting the literary antecedents of Dante,—which are far less accessible than the political,—M. Fauriel displays great industry, and happily brings to bear a department of erudition in which he is renowned as one of the most eminent of *savants*. These Lectures on 'Dante and Italian Literature' are, in fact, a continuation of the other series, on 'Provençal Poetry,' by which he inaugurated the Chair of Foreign Literature, and which has been published since the time of their delivery (1831-2) as 'L'Histoire de la Poésie Provençale.' So universal throughout Italy was the taste for Provençal poetry, whether it appeared in the native language of the Troubadours or in the language of the adoptive country, that it was necessary to show how the eminently national Dante emerged from the foreign element. Before he begins, the literature never becomes properly Italian. The princes have Troubadours at their courts, and the people learn, from vagabond Jongleurs, those legends of Arthur and Charlemagne which form the substance of early French romance.—The following extract shows how these illustrious monarchs became naturalized in a new soil:—

Everybody knows that, according to the romances of the Round Table, the Britons believed that their King Arthur was not dead; that he had only disappeared for a time, and would one day return to regain his crown and deliver his people from Saxon oppression. In expectancy of this glorious day, he remained hid in some unknown retreat, the site of which every one varied at pleasure, while always keeping it within the limits of Bretagne. The Italian imagination further elaborated this fantastical theme; and that it might give Italy a share in the wondrous fame of the British chief, it assigned to him Mount Etna for a retreat. Strange accidents, it was said, sometimes led to the discovery of this retreat; and many marvels were related of it. Gervase, of Tilbury, was acquainted with this popular belief of the Sicilians; in fact, it is he who has pointed it out to us, in a passage so curious that I deem it right to translate it:—"In Sicily is found Mount Etna, called by the inhabitants *Mont Gibel*. These inhabitants say, that, even in our own time, the great King Arthur has appeared in the solitudes of the mountain. One day, they say, the groom in the service of the Bishop of Catana, having well curried the palfrey entrusted to his charge, the horse, being fat and spirited, escaped all of a sudden, and directed his course towards Mount Etna. The servant, having followed him, sought him a long time among the precipices and wild parts of the mountain. However, not having found him, and feeling his anxiety increased, he began to look for him in the shady parts; and, at the end of his march, found himself on a very narrow, but even road, by means of which he reached a vast plain, filled with all sorts of delights. Here, in a palace, constructed with wondrous art, he saw Arthur stretched on a bed of royal magnificence.

Arthur perceiving the stranger, and having asked him the nature of his visit, was no sooner made acquainted with it, than he sent for the lost palfrey, and had it returned to the groom, that it might be conducted back to his lordship's stable. Arthur then stated, that he had been hidden in this place for a long time, suffering from wounds, which reopened every year, and which he had received in a battle while fighting against his nephew, Modred, and Childeric, chief of the Saxons. This is not all," adds Gervase, of Tilbury; "I have heard the country people say, that King Arthur availed himself of this opportunity to send, as a present, to the Bishop of Catana several articles, that have been seen by many persons, and have been admired by everybody as wonderful curiosities." Gervase, of Tilbury, wrote this about 1211, and we must, of course, suppose that the fables which he narrates, as objects of faith, were some years earlier than that date. Although it was at a later time, and with more circumspection, that the Lombards followed the example set by the Sicilians, they also pretended to possess, on their soil, monuments of the ancient renown of the Breton chevaliers. At the beginning of the fourteenth century, a report, which found credit, was spread through all Upper Italy, that in the neighbourhood of the famous Castle of Seprio, near Milan, a marvellous discovery had just been made. In the tomb of an ancient Lombard, it was said, was found the sword of Tristan, the famous knight of Queen Yseult. There was no room for doubt; the fact was attested by an inscription in French verse, engraved on the blade of the sword. So much for the romances of the Round Table. With respect to those of Charlemagne, it was Tuscan which had desired to appropriate to itself, in some manner, both the subject-matter and the heroes. There is at Fiesole a sort of cavern, called in the neighbourhood "*la buca delle fate*" (the Fairies' Hollow). Now, according to the popular tradition of the country,—tradition long kept alive, but only of late collected by writers,—this fairy cavern was a venerable sanctuary of chivalry. It had been (so ran the tradition) visited by Charlemagne;—Roland had been there favoured with the charm which rendered him invulnerable;—and there Mangis had learned necromancy. From this sort of belief to the introduction of fictions, concerning Charlemagne and his Paladins, into the history and antiquities of Tuscany, there was but one step,—and this step was taken without scruple. No Florentine of the thirteenth century doubted that Charlemagne was the second founder of Florence,—that he had raised the city from the heap of ruins into which, as was said, Attila had converted it. It was also to Charlemagne that the Siennese attributed the foundation of the towers of their ramparts. To the Italian population all this was a way of associating themselves with the romantic glory of Charlemagne, and, consequently, of satisfying their chivalric vanity. All this, in fact, was a result of the fabulous histories of the French monarch and his *preux chevaliers* and a measure of the place they had taken in the popular imagination of Italy. Now, it would have been strange if fictions, which had struck such deep root into the national belief, had not passed, in some measure, into the habits and usages of actual life, both civil and domestic. They did pass into it, and in more than one manner. It was an indubitable consequence of the interest taken in the romances belonging to the cycle of Arthur and Charlemagne, that, from the twelfth century, the Italian nobles contracted a habit of giving themselves and their children the names of the heroes of those romances. Having just seen the popularity of these heroes, we cannot be astonished to find in Italy, among the feudal chiefs and their followers in the thirteenth century, so many Lancelots, Tristans and Percevals,—so many Rolands and Olivers;—and among the ladies, so many Ginevras and Yseults. * * Muratori, in his large collection of the historians of Italy, has given us a Lombard Chronicle, which appears to be no more than the *résumé*, or repetition, of many others. This chronicle records many acts of strength and prowess performed by a Milanese, to whom it gives the name of Uberto della Croce, and who lived in the first half of the thirteenth century. Many of these acts are hard to believe, and probably much exaggerated. But we are not concerned here with their just

measure of truth; it is only of the reminiscences to which they are attached that we have to take note, and of these it will be sufficient to cite one. Happening to be, at a siege of Pavia, Uberto della Croce hurled a certain stone, huge both in weight and in volume. But this was not a stone found by chance, a mere ordinary block; it was, on the contrary, a celebrated block, the same which had been formerly flung, on the same spot, by the Paladin Roland. This trait is doubly curious, proving that local fables respecting Roland circulated in Lombardy, and, also, that these fables were not without influence on the imagination of the Lombard warriors.

While adopting the legends brought to them from the South of France, the Italians also adopted the language of the same country; and although there was a living native literature at the time when the stories of Arthur and Charlemagne first crossed the mountains, it was not in the Italian tongue that the sentiments of chivalry were expressed. The princes and nobles vied with others in the protection of Provençal poets, who were Gueif or Ghibeline according to the politics of their patrons, but sang to an audience exclusively aristocratic. The first lisings of the Italian chivalric muse were mere imitations of Provençal lyrics, while the invention of knightly stories was not even attempted. The glories of Lancelot, Tristan, and Roland, assimilated to the soil by popular belief, furnished enough chivalric fable to satisfy the epic predilections of the Italian poets, and leave them free to sing in lyric strains exclusively.

It was from the midst of a number of these Provençalized Italian poets that Dante emerged; and, according to the testimony of M. Fauriel, the poetical genius that preceded him must have been of a very humble kind. In collecting a list of these *poetæ minores*, Italian in little besides their language, and in characterizing the best of the number, M. Fauriel has shown great industry,—though we wish his editor had now and then given a specimen of the original Italian, where M. Fauriel has merely introduced a prose translation of his own. Guitone d'Arezzo and Guido de' Cavalcanti were very famous in their day, but their fame has not made their works current among ordinary readers.

For the idea of his poem, Dante had many precedents, which are more nearly related to the 'Divine Comedy' than the descent of Æneas into the lower regions. Visions of the other world had abounded for many centuries when the great poet of Tuscany began to sing of Hell, Purgatory, and Paradise; and M. Fauriel is liberal in supplying us with a catalogue of dream-literature.

The obvious inference to be drawn from this dream-literature of the Middle Ages is, that as far as the grand outline of his work was concerned, the inventive faculties of Dante were little brought into requisition. But the use made of the scheme handed down to him was so completely his own that the old visions no more disprove the originality of the 'Divine Comedy' than the production of the puppet-show play of Germany militates against the reputation of Goethe's 'Faust.'

The Paganism which appears in Dante's immortal poem is examined with great acuteness by M. Fauriel, who cannot believe that the reckless fashion of using heathen gods and goddesses—so common at a late period—could have obtained a footing in the grave and believing fourteenth century. The notion, prevalent of late years, that the Florentine poet was, not a good Catholic, is rejected by M. Fauriel with something like abhorrence; and it is in his very Paganism that he finds strong evidences of his Christian mind. Ancient Rome had still a sort of traditional life in the Italy of the Middle Ages, and as Latin was still the language of the higher literature, it followed,

as a necessary consequence, that the scholar had a Pagan side to his character. Now the object of M. Fauriel's criticism is to show how completely Christianized this Pagan element becomes in the particular case of Dante. He selects certain details from the 'Inferno.'—

In the Greek mythology the Acheron is a real river, which has its original source in the earth over which it flows. The Acheron of Dante is a mysterious, imaginary stream, which has its source in the unknown cavities of Mount Ida, and flows from the colossal figure of an old man, which is composed of divers materials:—a symbol of time and of the different ages of the world. The two pictures are totally different, and in that of the Italian poet all is his own invention, except the mere word Acheron, which, misplaced—I may almost say, gone astray (*égaré*)—in this fashion, has nothing mythologic about it, or at any rate cannot be looked upon as belonging to a settled, definite system of mythology. Neither is the Charon in Dante's Hell, properly speaking, a copy of the Pagan Charon. The latter is a deity, a veritable deity, though of an inferior order, and participates more or less in the general attributes of Pagan deities. The Charon of Dante is a demon, a devil, one of the spirits who fell from Heaven with Lucifer, and have become instruments of divine justice in the infernal regions. One feature more, in the relation of the two fables to each other, will make us better feel the different spirit in which each of the two poets has conceived his own. They have both represented the wandering souls on the outward bank of Acheron, pressing and crowding to throw themselves into Charon's barque, so great is their anxiety to cross the river. In Virgil, nothing is more simple nor more natural than this eagerness,—the majority of the shades having in their Hades the chance of a more happy and peaceable condition than that of ceaselessly wandering along the bank of the melancholy stream. In the Hell of Dante the case is different,—the only shades upon the banks of the Acheron are destined to undergo eternal torment, and it does not seem that they ought to be so anxious to cross the river, which is the only barrier that now separates them from their misery. But Dante has invented a motive for this singular haste, and this he has done by a sublime trait, which probably would not have occurred to a Pagan imagination, even though equal or similar to that of Dante. * * We must recollect that, in the third canto, Dante and Virgil have both arrived at the bank of Acheron, and that the first, struck by the innumerable number of souls that he meets, asks his guide what this crowd signifies.—

Figliuol mio, disse il maestro cortese,
Quelli, che nunjon nell'ira di Dio
Tutti convengono all'ira di Dio
E pronti sono al trapassar del rio,
Che la divina giustizia gli sprona,
Sì, che la tema sì volge in disio.

—Now in this trait there is, once again, something mystical, elevated, austere, and so far Christian, which Dante has opportunely hit upon in order to impress the image borrowed from the Pagan mythology with the seal of his own creed and his own epoch. The Cerberus of the Dantesque "Hell" has scarcely a closer resemblance to that of Virgil or of the ancient Greek poets; none of those poets would have recognized him by the description of Dante, who makes of him a huge worm (*gran verme*), a great dragon, rather an apocalyptic or Biblical monster than a Pagan creature in the Greek or Roman manner. Nor is it always by accessories derived from a lofty standard of morality that Dante modifies the figures he has borrowed from Paganism; sometimes he adopts an easier and more vulgar method. Apparently regarding physical ugliness or deformity as a sort of symbol or complement to moral ugliness, he has confined himself to painting as imaginary or hideous the beings which he borrows from the Pagan mythology, and which this mythology had made or supposed beautiful. This is what he has done, for instance, with Plutus, the god of riches, whom he has given as a guardian to the circle of spendthrifts and misers. He gives him for a voice a sort of clucking (*gloussement*), and for a language words calculated by their sound alone to terrify those who hear them. He treats him as an "accursed wolf," a ferocious beast, and does not leave him a single trait by which

we could take him for a Greek symbol of wealth. To conclude, Dante sometimes adopts a course still more simple, to bewilder all who would endeavour to find the Pagan mythological beings among those of his personages who are named after them. He envelops them in the most ignoble attributes with which the vulgar imagination ordinarily depicts to itself devils and demons,—he gives them horns and a tail. Here we have another method of *unpaganizing* (*dépaganiser*) persons with Pagan names; and the astounding vigour of imagination with which he sometimes makes use of this method, scarcely allows us to think it strange—certainly does not allow us to consider it vulgar. This observation applies above all to the figure of Minos,—the supreme judge of the damned, seated at the entrance of Hell. The name of Minos given to this judge of course recalls to our mind the old Minos of Crete, whom Pagan mythology likewise made a judge of the dead. But this first resemblance, this first reminiscence, stops short amazed and disconcerted by what follows. The Minos of Dante is in every respect a Dantesque figure. He is a demon of melancholy mood, of terrible aspect, who is eternally gnashing his teeth, armed with a long tail, which is capable of winding nine times round his body, and which serves him in the place of language, as it is by the number of turns made by this tail that he marks the circle of Hell into which every sinner is to be plunged.

M. Fauriel detests all crotchets in the interpretation of Dante. To the theory that the immortal Beatrice is no real woman, but an allegory of theology, he turns a deaf ear, in spite of the arguments to be drawn from the 'Convito' of Dante himself; and he insists that the Beatrice of the 'Divine Comedy' is the veritable Beatrice Portinari, with whom the poet fell in love at the early age of nine,—and nobody or nothing else. Nay, the exaltation of Beatrice—the *bona fide* flesh-and-blood Beatrice—was one of the poet's chief objects in the entire work. With little favour, too, does M. Fauriel regard the commonly accepted explanation of the three animals in the First Canto of the 'Inferno,' to the effect that the panther is sensuality; the lion, ambition; the wolf, avarice. These abstractions suit not his positive mind: he prefers the historical theory, which regards the panther as the Florentine democracy; the lion as Charles of Valois; and the wolf as the faction of Black Gueifs.

Not the least curious part of M. Fauriel's 'Lectures' is the history of the fame of Dante; for the reputation of the poet after his decease underwent as many vicissitudes as the poet himself during his life. In the latter part of the fourteenth century, the honour paid to his memory amounted almost to an apotheosis; and everybody recollects the Chair founded at Florence, in 1373, for the explanation of the 'Divine Comedy,' and its occupation by Boccaccio. Pisa and Bologna followed the example of Florence, and became distinguished by the Dante-Professors, Buti and Imola; and Galeazzo Visconti set up a Chair at Piacenza. In the fifteenth century, the growing passion for classical antiquity diminished the interest for a native poet,—the chairs were suppressed,—the Professors sank into private teachers;—and while, on the one hand, Dante was merely valued for his Pagan side, he was despised, on the other, as a mere concocter of barbarous trivialities. In the sixteenth century, the taste for the Italian language revived, but the effect of the revival was to exalt Petrarch, not Dante; and when, in 1570, a grammarian named Benedetto Varchi published a work on the Italian language, entitled 'Ercolano,' in which he extolled Dante above the chief poets of antiquity, he not only was ridiculed himself, but raised a new host of adversaries against the memory of the Florentine poet. One of these wrote a discourse to prove one of two positions—viz. that the 'Divine Comedy' was not a poem at all,—or

that if it was, it was the very worst ever written. Nevertheless, in spite of this depreciation, the old poet had still numerous admirers; and the publication of his poem at Florence, by the Accademia della Crusca, in 1595, after a careful criticism and collation of manuscripts, was a remarkable monument to his fame. In the seventeenth century, regarded by the learned as the dark age of Italian literature, even Petrarch was greatly neglected, and Dante was little heeded. However, in the last decade of that century, a new taste began, and with it revived a predilection for the old poets. In 1713, the jurist Gravina, in a short work on 'Poetics,' extolled Dante as the Homer of Italy; and shortly afterwards, the more celebrated Vico expressed himself in a similar strain. About the same time poets arose, whose chief glory was to write from the inspiration of Dante. At their head was Alfonso di Varano, who treated the memorable events of his own age in a series of short 'Visions' conceived in an anti-Pagan spirit. A new enemy arose in the person of Betenelli, a Jesuit, who in some 'Letters,' supposed to be written by Virgil in the Elysian fields, abused the old Italian poets in general, and Dante in particular; but a new friend, who arose in the person of the fantastic dramatist, Gasparo Gozzi, answered the 'Virgilian Letters' in the spirit of Vico and Gravina. The struggle ended in the triumph of Dante; and from the end of the eighteenth century may be dated that uncontested fame, which has gone on increasing to the present day.

FRENCH FEMALE TOURISTS.

The Other World—[*L'Autre Monde*]. By Marie Fontenay (Madame Manoël de Grandfort). Paris, Bibliothèque Nouvelle.

The Journey of a Woman to Spitzbergen—[*Voyage, &c.*]. By Madame Léonie d'Aunet. Paris, Hachette & Co.

OUR correspondent, M. Philarète Chasles, a few days since, in a *feuilleton*, recalled a complaint which some years ago he registered against the writer of the 'Letters from the Baltic.' Our English Lady, he said, had undervalued the French female tourist. We do not fear that he will complain of the *Athenæum* as a plotter of treasons against the Anglo-French Alliance if we declare that our countrywoman did not make a charge at random. The really good and amusing books of travel published during the past score of years by French authoresses could be numbered on the digits of a hand.—While Mrs. Trollope, Mrs. Boddington, Miss Martineau, Miss Costello, Mrs. Jameson, Mrs. Hamilton Gray, Madame Calderon, Mrs. Meredith, Mrs. Colin Mackenzie, Miss Howitt, Mrs. Quillinan, and some fifty matrons and maids of smaller note, have made lively or valuable contributions to our literature concerning foreign countries and their manners,—we can merely recall Madame Dudevant's notices of her residences in Venice and Majorca as the French books which may challenge comparison with the works and sketches of the English Ladies enumerated. M. Chasles, we know, asserts that French women have put forward too many travelling experiences,—but since he does not name names, we may be forgiven for relying on our own knowledge of contemporary *belles lettres*, and for stating that few of these can have possessed the attributes which distinguish printed paper from waste paper.

Here are two of the newest records of French female travel. First comes a little volume on America, just now as universally exhibited in the shop-windows of the *Boulevards* as our own 'Roving Englishman' or 'Heroes of the Crimea'

are in the "libraries" of the Strand and Fleet Street. "Marie Fontenay" is the travelling name for Madame Manoël de Grandfort; but we cannot help asking whether either "Marie" or Madame Manoël is a French Lady?—whether a Lady at all?—or whether each name may not be an *alias*, worn to mask some *Hercules* flinging about *Omphale's* distaff with a more awkward hand than usual? The suggestion is due as a courtesy to womanhood, since "Marie Fontenay" treats us to incidents and expressions which are neither "maidenly nor modest." The few facts and prejudices which 'The Other World' contains might have been picked up in any *cabinet de lecture* in Paris; nor do we like them the better because they are overlaid with a fictitious sauce which is neither piquant nor delicate. So coarse a Lady, with the aristocratic "*de*" before her name, we have seldom met. So dull a piece of ill-nature has rarely been published, even by Englishmen, about America; or by Americans about England. "Marie Fontenay" overlooks the striking phenomena which distinguish that vast continent; so suddenly and miscellaneously peopled by communities strangely including the extremes of old and new civilization. The enterprise and energy of the trader and the worker, the hectic eagerness of the gifted and the lettered to appropriate the pleasures and the treasures and the associations which can only belong to an ancient past with all its good and evil, might have no existence in America for any trace of them to be found in this 'Other World.' But "Marie Fontenay" has plenty of mischief to put forth concerning the "emancipated woman" of America,—and tells a terrible story of a New York belle who lolled on the shoulders of a fascinating French stranger at a public assembly. Of more sublime females with their congenial spheres and supernatural sympathies, she has never heard, apparently; but she is prosy on the arrangements of boarding-house life, also on the disarrangements of Bloomer costume. The women of America, says she, are affected,—the men, dirty, overdressed, and lawless; the Blacks are an inferior race; and all these pleasing truths are stated with the utmost bitterness that can exist independent of power.

Madame Léonie d'Aunet is a traveller of altogether a different species, and her 'Voyage' is a book of lively light reading. Is it altogether new,—or merely a cheap issue of a work which has already appeared in a more costly form?—The journey described was accomplished many years ago; M. d'Aunet, having been one of the companions of M. Gaimard in the well-known expedition of *La Recherche*. Some of the first stages, too, of Madame d'Aunet's northern pilgrimage were made in the *diligence* betwixt Rotterdam and the Hague, before railway conveyance existed. But whether these letters be partially known or now given to print for the first time, they will be a welcome boon to most English readers of French. Strange scenes, and fatiguing, if not positively perilous adventures, are pleasantly pictured in them. Madame d'Aunet's route was one which has been taken by few of her sex. We do not remember any published sketches of Hammerfest, by a man, more recent than Sir Arthur de Capell Broke's. Yet Hammerfest is only, as it were, the starting point for the Frozen Ocean.

Did the climate, with its prevalent fogs, permit many opportunities of observation, Spitzbergen has little to show save frost and sky to the hardy pilgrim. But what do we Southerners (for the English are Southerners in the eyes of those who reach the Pole) know of the grandeur and variety of ice-pictures when these are seen

under a firmament which might never visit during three months of the year? Madame d'Aunet describes with vivacity the animation and tumult, the glittering sights and the unearthly sounds, which distinguish a day of thaw in the Frozen Ocean. But if there be a wild elvish joy on the sea (to speak fancifully) at such times, the shore of Magdalen Bay, where the passengers of the anchored *Recherche* witnessed the pageant, presents an unchanging spectacle of ghastly melancholy. The strand thickly strewn with the bones of those uncouth sea-monsters, the seal and the morse,—the burying-ground in which the bodies of a few mariners have been laid on the ice (deeper graves being not manageable), and hemmed in with large stones, as a defence against the ravages of the white bear,—excited the imagination of Madame d'Aunet almost as powerfully as the moving glacier picture. To complete the impressions of this place of sojourn, she was favoured by a dialogue—not intended for her hearing—in which her shipmates discussed the chances of the *Recherche* being shut up for the winter in the ice of Spitzbergen, and calculated how long, in case of such a casualty, the life of the one woman on board could be expected to last. Such a piece of eaves-dropping, and the emotions it was calculated to produce, make up a capital remembrance for a chimney-corner in Paris; but the real experience must have been fearful.

On her deliverance from Magdalen Bay, Madame d'Aunet was so little wearied of adventures as to undertake a home journey across Lapland,—and this at the worst time of the year, when Autumn is fading into Winter, and the rains are heavy and the mud is deep, ere the cold has hardened the ground so as to prepare it for sledge-travelling. There was a chance, moreover, that Madame d'Aunet, besides wearing male attire, might be compelled to undertake her ride of some weeks as men ride on horseback, astride,—but from this she was rescued by a providential old English side-saddle which turned up at Kaafjord. Even with such an "easement" (as *Jeanie Deans* called the post-coach) the journey proved rough and exhausting enough. The little caravan had sometimes to pitch its tent on a spongy bit of marsh island in the midst of a sea of liquid mud, after the day's rain had so drenched everything as to preclude the possibility of dryness or warmth. The Lapland guide, Abo, however, seems to have been strong, faithful, and intelligent in his savage way,—and once or twice the poor worn-out French Lady arrived at an oasis in the midst of a wilderness so dreary without sublimity. As a specimen of her manner, we will paraphrase her description of one of these halting-places.—

On the evening of the 7th of September, we saw the wooden houses of Kautokeino, the Lapland town, defined against the clear sky. Town I call Kautokeino, but I am not sure if it merits such honour,—since, to speak properly, it is neither town, nor hamlet, nor even village, but the only collection of habitations to be found in North Lapland, consisting of merely ten or a dozen wooden houses, surrounded by some twenty little barns. These inclosures, raised up on stones, are so many magazines, in which the Laplanders keep their forage, their food, and their clothes,—the largest part of which belong to wandering tribes, who return to their storehouses, from time to time, as may be needful. Was it by comparison, the aspect of Kautokeino enchanted me? From the point at which I saw it first the place looked thoroughly rural. On the top of a hill is the church, the red mass of which was harmoniously relieved by the pale grey sky,—half way down the hill, the separate houses, crowned each with its hood of green thatch, and raised up on pillars formed of tree-trunks, looked like so many bee-hives. Lower still, long posts planted in the earth supported hurdles,

on which the hay from the harvest was drying; on the grass by the water-side were little children gaily playing with young reindeer. The river, forming a large circuit, made a border of changeful silver to this fresh and calm picture. It charmed me. * * While they were unloading the horses, and we were opening our bundles, we were surrounded by all the inhabitants of Kautokeino. They examined each of us curiously, and every item of our baggage, making both the subject of a lively conversation, which, unluckily, I could not understand. In the midst of these groups a little hideous old woman was bustling about, and chattering with a shrill, worn-out voice. Never was malevolent fairy more perfectly horrible dreamed of. Picture to yourself a heap of the skins of beasts scarcely three feet and a half high, out of which were thrust a pair of little lean hands, as dry and black as a monkey's, and a little face, so wrinkled, crumpled and leathery as to remind one of a piece of boot-leather, which had been exposed for many a long year, first to fire and then to water. This witch (for the true witch of romance she was), bolder than her companions, came quite close to us; looking at and tumbling over our possessions, without troubling herself with anything that our interpreter said. She minded him not; but went on peeping and meddling. By chance she fished out of our bags the female dress which I had ready for the day when I could dispense with my man's clothes. Among the articles of this costume was a blue chenille shawl, very large and very warm. Though it was frayed and not a little discoloured by its journey at the bottom of the leather bag, this seemed to delight the old woman. She seized it, amazed at the softness of the unknown fabric; plunged and replunged her abominable little claws into the folds with grotesque rapture, and tried to draw out a shred or two by which she might discover of what so downy a material could be made,—interrupting herself to speak to a young Lapp, to whom she gave a peremptory direction. He went away reluctantly; and I called François and the interpreter, curious to find out what the hag had wanted. "Ask," said I to the man, "what she has sent the boy for."—"Madam, she has sent for her mother."—"Her mother," I replied, "you must be mistaken. This old creature can have no mother. She must be at least ninety years of age. Make her tell how old she is."—"Only eighty-four, Madam."—The interpreter's "only" made me laugh.—"If her mother be alive, how many ages old must she be?"—"Her mother is a hundred and three."—This was precise enough; I became impatient to see the centenarian Laplander. Nor had I to wait long. In about ten minutes there appeared a sort of mummy that could move. This was the mother. There was but slight difference betwixt herself and daughter:—she was not more than three feet high. She walked briskly enough, leaning on a stick; and her little eyes, though watery enough, glistened with life. On the whole, her age considered, she was much better than her daughter. She entered into the other woman's admiration for the shawl, and made them ask me what was the animal, of which the wool was so soft.—"It is wool—it is silk."—This "silk" they did not understand; and when my interpreter went on to explain that the animal which produced this material was a species of worm, they looked hurt, and smiled sarcastically, evidently thinking that I was making game of their credulity.

The above extract, we fancy, may direct English curiosity and attention to Mdlle. Léonie d'Aunet's book.

OUR LIBRARY TABLE.

View of the State of Europe during the Middle Ages. By Henry Hallam, LL.D. Vol. I. (Murray).—At the end of a long life given up, with a rare devotion, to historical studies, Mr. Hallam has arrived at that point of popularity when the reprint of his works is no longer a speculation. His place is taken—his success assured. The present reprint—the first volume of a general re-issue of Mr. Hallam's Works—is the eleventh edition of the 'Middle Ages,' and contains the "Notes" published as a Supplement in 1848. When the series is more advanced we shall devote

an article to a precise estimate of Mr. Hallam's place in the republic of letters, and of the services rendered by him to historical literature.

Catherine Irving: a Novel. By the Author of 'Ada Gresham.' 3 vols. (Newby).—'Catherine Irving' is not without interest, but the interest lies rather in the intention than in the execution. The solitary, miserable, oppressed childhood of the heroine under the domination of her stern, disappointed aunt is well conceived, and excites sympathy for both parties; but the details are so huddled and hurried, that the impression left is vague and exaggerated. The progress of Catherine, from being an ignorant, passionate girl of fifteen, into a beautiful highly-educated young woman of genius in the short space of two years, exceeds the licence of even dramatic time, which is allowed to compress many more miracles into a short space than could be expected from the works and days of ordinary life. A certain air of proportion and probability is needed to soften the abruptness of the results,—and proportion is precisely the grace that is lacking in the novel before us. Three volumes, each containing upwards of three hundred pages, is "ample room and verge enough" to unravel the most perplexed web ever woven by Destiny, if judiciously managed. In 'Catherine Irving' no sort of proportion is observed between what has to be said and what has to be done, so much space is consumed in conversations upon different theories of life and morals, that the incidents of the story are huddled and precipitated to a degree that makes them appear arbitrary and improbable. The character of Paul Erskine, the artist, has some true touches of artist nature about it; and Larry Allison, the deformed child, is excellent, and makes the chief interest of the book. There is a tendency in this novel against which we protest; it is, that high principle, the gifts of genius, excellence in the discharge of the duties of life, are treated merely as so many modes for the attainment of personal happiness and well-being. "Happiness," as "our being's end and aim," has seldom met with so lyrical a recognition;—it is the only motive of action brought forward. It is, we admit, far pleasanter to read novels where all ends comfortably, and virtue receives a handsome reward; but heroes and heroines are not expected to go through the three volumes passionately demanding to be made happy:—and Catherine Irving resembles a little girl at a party, who begins to cry because the servant delays to hand her the plum-cake, far more than a young woman to whom the "leading business" of a novel has been committed, and who ought to work out the ideal excellence of the book.

A Smaller Latin-English Dictionary, abridged from the Larger Dictionary. By W. Smith, LL.D. (Murray).—With that strong practical instinct for which Dr. W. Smith is remarkable he has here adapted his recently-published 'Latin-English Dictionary' to school purposes. The abridgment, which has been made under his superintendence, contains all that portion of the larger work which is required for the study of the classical authors read in schools, and retains all the characteristic excellencies of that work—its clearness and correctness of explanation, simplicity of arrangement, sufficiency of illustration, exhibition of etymological affinities and modern derivatives, and careful accuracy of typography. At the same time, by omitting words not likely to be wanted by those for whom the book is intended, the editor has been enabled to give all requisite information within a moderate compass. The remarks in the Preface on the difficulties experienced by young persons in the choice of suitable meanings, and the desirableness of devoting some time to an explanation of the proper mode of using a dictionary, are evidently written by a practical teacher, and deserve the attention of all whose duty it is to instruct beginners in Latin.

The Midsummer Night; or, Shakespeare and the Fairies. From the German of Ludwig Tieck. By Mary C. Rumsey. (Printed by C. Whittingham).—Mr. Singer ushers in this new translation of a poem, giving beautiful glimpses into Fairy Land, with a Preface which tells its history. A youthful trifle, undervalued and thrown aside by

its gifted author, it was brought to light and given to the world by a judicious friend. The history of the translation is similar to that of the original. It is published on the persuasion of Mr. Singer. Imitation has seldom been closer than this translation—not to Tieck, but to that which Tieck himself imitated, the Oberon and Titania portion of the 'Midsummer Night.' Our readers will remember a very beautiful version of the same poem which appeared in the *Athenæum* two years ago, also made by a Lady.

Three Hunting Songs. By R. E. Warburton, Esq. With Illustrations by H. K. Browne, Esq. (Chapman & Hall).—These three spirited songs—as good as anything since 'Tom Moody'—are entitled 'We are all of us Tailors in turn,' 'A Word ere we start,' and 'Hard-riding Dick.' Fox-hunting oracles—local deities who preside over "bullfinches" and "raspers"—who smile at "croppers," and at red-coated gentlemen who "come to grief"—may for the first time open a book and laugh over its pages. "Phiz" is excellent in his smart illustrations,—from the "bit of blood" with the bang tail, hot eye, and dilated nostril, with the veins standing out like net-work in relief over the glossy skin,—to the red jaws and white tails, glimmering about in hot competition for the rich morsel of bloody, muddy fur that was lately a fox, and is now a shade—a name—a heap of dust. And see, the second whip shouting, and the fat farmer wiping his forehead, and the groom looking to his horse's knees, and the "vet." tightening the girth round the splashed belly of the flea-bitten grey. Why this brings the "view halloo" up in our throat. And now like black specks, over ditch and hedge, the hunt is rolling in,—roan and chestnut, and sorrel and bay; and Hard-riding Dick at the head of this regiment of very irregular cavalry.—Not less full of character, talent, and animal spirits (no small gift in an Englishman) is the illustration of 'We are all of us Tailors in turn.' There is the shying horse and the jibbing filly, the bolter, the hard-mouthed mare, and the real thing. How well the fallow and grass are hinted, and the scrubby willows, and the straggling switchy hedge, and the marshy lane, and the sky of drifting windy grey.—'A Word ere we start' is good, for the skill with which, by a few scratches, the author brings to our mind drear-nighted November, with the cold stubble, the leafless oaks, and the sharp, bristling thorn. The ugliest leap of the day is sketched with much humour. One horse is flying over with his front legs bent under his broad chest, his eye maddened with the fun of the sport and the music on the wind. The rider's eyes stare keen, and his knees are grown into the pig-skin. Behind him are grim and depressed faces, craning with ominous distrust. A spring is groping through, and is already shooting out of his seat with a velocity that seems likely to send him home feet foremost, and leave the lands of Little-brain Hall without an heir. The whipper-in is breaking through, with a surly patience and a light swinging seat. One hound is scrambling out of the ditch, much quicker than our fat friend, who is left there to spend the rest of the day, pursuing his horse and not the chase. 'Hard-riding Dick' is perhaps the best of the three. Mr. Warburton has given a spirited sketch of one of those dwarfs, generated in stables,—kept to due diminutiveness with gin,—warranted to have broken every rib in their bodies by the age of twelve,—conquerors of two cups at sixteen,—second whip of a pack at seventeen,—winner of the Derby at twenty. He traces his course, from the cock-horse and the old jackass that he kicks up the lane,—capped, booted, and spurred, till he becomes the king of the dogs,—treats them as a sheep-dog does a flock,—twists round them, curses, flogs, drives on the slow, reprehends the rash,—

Can comb down a hair with the point of his lash,—is ready in all weathers, rain or shine,—starlight, or any sort of light,—moor country, upland or marsh, plough or open;—he flies like a swallow, swims like an otter, creeps like a mouse, crawls like a cat. His whip is his sceptre, his saddle his throne, the horse his kingdom, whose rebellion he restrains with steel and cord. He has the property of many

beasts, but the warm heart of a man:—supports his old mother—is the buck of the village,—but will eventually die a-field, and be carried to a green grave under the yew by four huntsmen, with brushes in their hats and horns in their hands, to give a tally-ho! over the black chest that is his coffin.

Printing: its Antecedents, Origin, and Results. By Adam Stark. (Longman & Co.)—The art of printing, in its successive developments and in its existing perfection, is discussed by Mr. Stark. Too much extraneous matter is introduced. If a sketch of the origin and improvement of the printing press warrants an allusion to tablets and inscriptions of all nations and ages, Mr. Stark's category is incomplete; if not, his discursiveness leads him into irrelevancy. Among antecedents he quotes from Mr. Layard a description of an Assyrian palace,—and among results some well-known anecdotes of the House of Commons, entirely apart from his subject. Nor is this all: Mr. Stark occupies himself with the French Revolution—repeats many platitudes concerning Robespierre—sets down the last generation in France as fit only for despotism—and writes with enthusiasm about George the Third. What has all this to do with Printing? Mr. Stark had surely no space to spare in so small a volume dedicated to a topic so interesting.

A History of the Chartist Movement. By R. G. Gammage. Part VII. (Holoake.)—The narrative is now complete. It has conducted us from the origin to the dissolution of the "Chartist" body. Mr. Gammage writes his final summary in an admirable spirit, deploring the discussion which destroyed and dispersed a political sect that might have become a party, had its leaders been men of temper and education. The hint we gave on the importance of quoting authorities has induced Mr. Gammage to indicate the sources of his information.

Designs, Sketches, and Plans for Villas and Cottages; with Estimates of Cost, &c. By G. J. Rhodes. (J. R. Dale.)—The members of Building Associations, who superintend the erection of their own dwellings, now constitute a large class. Mr. G. J. Rhodes advises such persons that art and grace may be applied to the structure of a cottage, as to that of a Norman castle or a Roman villa. Nor is a tenement the more costly because its chambers are of good proportions, or freely ventilated. The Estimates contained in the volume before us sustain this proposition, which, indeed, is almost self-evident. In point of taste, some of Mr. Rhodes's designs are admirable,—though others exhibit a slavery to spiked globes, pear-shaped excrescences, and prison-windows. Generally, however, the Sketches are suggestive of picturesque elegance, the reverse of that bald commonplace which defaces so many of our suburbs.

Annual of Scientific Discovery; or, Year-Book of Facts in Science and Art for 1855. Edited by David A. Wells. (Boston, U.S. Gould & Lincoln.)—Mr. Wells has done for America what Mr. Timbs has done for England; but his plan is better. He places before the reader a clearer survey of the most important discoveries and improvements of the year in Science and in the appliances of Art, and adds a full list of publications and patents, with an obituary of learned men. The classification of subjects is good; nor should mention be omitted of the excellent spirit in which the editor combines his view of American progress with that of England. There is no tone of jealousy or of depreciation in his enumeration of the advances made by European professors in comparison with those by which the explorers and experimentalists of the United States have sustained an honourable rivalry with them. The proceedings of learned Societies, in Europe and America, are briefly detailed by Mr. Wells. Not a few scientific movements have been originated or developed in the United States during the past year; their objects being, for the most part, practical, and not simply curious. The New York Academy of Medicine offers a prize for the best Essay on 'The Nature and Treatment of a Particular Form of Cholera'; and, reckoning education among the high sciences, the National Society holds out a similar reward

for the most philosophical treatise on that subject. But Prize Essays, we fear never supply the cream of knowledge or of philosophy. In science, as applied to industrial production, good progress is reported. The Cashmere goat, whose fleece is woven into the unrivalled shawls that have made its native valley renowned, has been acclimatized in South Carolina. It was introduced, several years ago, from Asia Minor; but its habits and necessities are now more fully understood, and it is successfully reared in North Carolina, Georgia, Alabama, Tennessee, and Florida, where a mixed breed has also been created. The hair is perfectly white, curly, soft, and glossy, resembling that of the Chinese sheep. Though delicate in shape, the goat is hardy, and when in a herd will protect itself against dogs,—a great advantage in districts where dogs are as vermin of a larger growth. But the hair described by Mr. Wells is not that which is used in the most exquisite fabrics of Cashmere, which is a fine down, growing under the upper coat of hair, and found also on the yak, and on the dog of Thibet (whence the greater quantity comes). It is washed by a delicate process, with water the cleansing properties of which are increased by the admixture of rice-flour. We question, too, whether the Thibetan goat, any more than the Merino sheep, thrives to full beauty on any other than its native pastures. However, any attempt to acclimatize the animals of Africa and Asia is meritorious. Scarcely fifty have been domesticated in the United States out of the thousands which exist. Many foreign fish have been introduced, with methods for their artificial propagation. In machinery, in scientific agriculture, and in geology, discoveries of considerable value are placed to the account of last year. Mr. Wells adds a body of information, collected from the scientific journals of the Union, on investigations in natural philosophy, chemistry, botany, and zoology. His work is completed by a list of men eminent for their learning and for their successful pursuit of science, who passed from among us in 1854. The American names are few:—Catherwood, the companion of Stephens the traveller—Dr. Burnett, the physiologist—Darby, the geographer—Elliot—Henry and Robert Patterson—and Schattuek, of the American Academy. We notice that M. Caillet's announcement of a tailed race of Africans, and Prof. Owen's attack on Lord Monboddo's doctrine, excite much interest in the United States.

A Manual of Ancient History, from the Remotest Times to the Overthrow of the Western Empire. By Dr. Leonhard Schmitz. (Edinburgh, Black.)—Dr. Schmitz has constructed this manual for the use of students, and has sought to render more clear than is usual in similar abstracts the connexion between the Greek and Roman and other great nations of antiquity. Avoiding the annals of the Jewish race, partly as superfluous and partly as distinct, he first presents a geographical sketch of Asia and of the earliest social and political forms in vogue among Asiatic communities. The outlines of Chinese, Indian, Bactrian, Median, Persian, Assyrian, Babylonian, Phœnician, Lydian, and Egyptian history succeed, in order,—and next the records of Greece are opened, from the mythical period to the disruption of Alexander's Empire. The Roman and Carthaginian annals fill a third section of the work, which closes with the retirement of Augustulus. The history is constructed with art, and every leading event is surrounded with such accessories as will place its importance clearly before the mind. The difficulty, rarely overcome by compilers of manuals, is, to present a broad, historical view extending uniformly over a vast space of time, and including many nations and systems, and to reconcile the introduction of characteristic details with the general proportions of the narrative. Mere abridgments, stripped of all attraction, are too dry to be pursued with interest or pleasure; while incidents, portraits, and scholarly reflections if too abundantly accumulated are apt to displace less fascinating particulars which are required to complete the outline. Dr. Schmitz has happily surmounted these hardships of his task, and has produced a full and masterly survey of ancient history. His Manual is one of the best that can be placed in the student's hands.

Types and Figures of the Bible, illustrated by the Art of the Early and Middle Ages. By Louisa Twining. (Longman & Co.)—Miss Twining's object is to bring Art to the aid of Theology in illustrating the typical character of the Old Testament. The type and the antetype are placed side by side on the same page, in illustrations derived from the Catacombs at Rome, the Pomfret and Bedford Missals, the 'Biblia Pauperum,' and a few other authorities of high value, both printed and manuscript. We cannot estimate very highly the theological character of such teaching, but as a collection of curious materials for the history of Art, many of them derived from sources which are difficult of access, Miss Twining's book merits high commendation. She seems herself to have copied the illustrations on stone, and, we doubt not, with as much fidelity as spirit.

The Bible: What is it? Whence came it? How came it? Wherefore came it? To whom came it? How should we treat it? Excelsior Library, No. I. (Shaw.)—"The Excelsior Library" does not sound like a title to win its way to popularity; but its first publication is a very excellent one. The author treats upon the Canon of the Bible, with its many cognate subjects, and, amongst them, those of Inspiration and private Judgment. His arguments are occasionally a little too subtle for popular appreciation, but it is not easy to imagine a treatise on the whole better adapted for popular reading. Clear in style, candid in the statement of difficulties, and direct in the answers, it is just the kind of book which is likely to please readers whose wish is to obtain a general view of the subject discussed. To those who have the leisure and means, it will operate as an incentive to further study.

The Nation of Refugees: A Memorial, Historical, and Political, addressed to the British and French Nation. By General Mieroslawski. (Holoake.)—By far the most lucid and temperate summary of the Polish question that we have seen. General Mieroslawski explains practically the desires and hopes of his nation, and meets on fair ground a number of objections raised by sceptical sympathisers. The "Memorial" displays considerable extent of political knowledge, and, though full of enthusiasm, is neither violent nor declamatory.

The War Pamphlets are diminishing. Mr. Oliphant contributes one on *The Coming Campaign*. He urges an enterprise in the Trans-Caucasian provinces, and declares that Russia should be repelled to its frontier on the Terek and the Kouban. —*The Dangers of England and the Duties of Englishmen* is a letter to the electors, couched in terms of weak and pompous declamation. In *Sketches of the War* by Philip O'Flaherty, we have a soldier's letters from the Crimea absurdly annexed to a rabid denunciation of "the sons of Maynooth."—Count Krasinski, in *Opinions of Napoleon the First on Russia and Poland*, reiterates his appeal in behalf of his countrymen; and Mr. Llewellynn Jewitt, F.S.A., contrives to tack his *Stroll to Lea Hurst, Derbyshire* to the skirts of the war by rhapsodizing about Miss Nightingale. Stentor could not have recited Mr. Jewitt's long sentences without many a pause, so elaborately inflated is this effusion.

In singular union we have two tracts, from one pen, entitled severally *The Voice of Elijah*, and *The London Coal League Company*. Of their unhappy author nothing can be said; but the printer, whose name is withheld, is to blame for having aided in the production of these frightful ravings,—more pitiable than any we had ever before met with.—The Baron I. Corvaja's *Perpetual Peace to the Machine*, by the *Universal Millennium*, or the *Sovereign Bankocracy and Grand Social Ledger of Mankind*, classes men into ministers, geniuses, artists, savans, traders, manufacturers, and husbandmen. He bids "Socialism" suspect the French Emperor.—On the more tangible subject of education we find a letter, by the Dean of Salisbury, on *The Church and the Education Question*,—an interesting account of the *Common School System of America*, by Mr. J. Rawlins,—a plea for *Domestic Economy, Gymnastics, and Music*, as branches of public instruction, by "a Bystander,"—and some valuable *Hints on the Discipline appropriate to Schools*, by Arthur Hill.—An *Essay on the Art of Writing* attempts to cultivate penmanship by rules

and models; but not, we should conceive, with much chance of success.—The great topic of "Administrative Reform"—the pedestal of Mr. Layard—is dealt with in *The Re-Organization of the Civil Service*, by a Subordinate Therein, as well as in *A Letter of a Provincial to a Friend on Administrative Reform*, by "a Trinity Man," who is flippant and shallow.—*The Navy List and the Navy* is well worked perusal.—On Reform in other directions Mr. Fearon's *Endowed Charities* is a most elaborate analysis,—and Mr. J. W. Wilkins's *Letter on Cambridge University Reform*, a criticism displaying much special and applicable knowledge.—*The Cambridge Senate before Whitgift's Statutes and the University Bill of 1855* is a protest against the recent Act, as inadequate and inoperative.—*An Inquiry into the Truth of the Accusations made against the Marquis of Clanricarde* is a reprint of the deprecatory affidavits in this cause.—More or less of general information is supplied in *A Few Words on Paper, Flax, Hemp, and Plantain Fibre, and Description of the Wac-paper Process, Employed for the Photo-Meteorographic Registrations at the Radcliffe Observatory*, by Mr. W. Crookes.—*The Unity of Science* is a reprint of a paper read by Mr. McCormac before the Queen's College Literary Society.—Prof. Solly has published his excellent lecture *On the Mutual Relations of Trade and Manufactures*, delivered at the Society of Arts.—A kindred subject is discussed in Mr. Swinton Boulton's *Liverpool Treatise on Trade and Partnership: the Relative Duties and Proper Liabilities of the Merchant and the State*.—The First Two Books of Grotius *On the Truth of the Christian Religion* have been literally translated, as a study, by a Graduate of Cambridge.

Among our remaining miscellanies we have *How to See the Crystal Palace in a Visit*, a neat and clear little handbook; and a very interesting paper reprinted from that excellent repository the Universal Bibliotheca of Geneva, on the direction of the gold deposits in California. The writer's conclusions agree with those of Sir R. Murchison.

LIST OF NEW BOOKS.

A Sabbath at Home, post 8vo, 3s. 6d. cl.
 Alshoford Miscellaneous, 7 vols. 8vo, 1s. 6d. each, bds.
 Alison's Europe, 10th People's Edition, Vol. 10, 12mo, 4s. cl.
 Aristotle on Vital Principle, tr. with Notes by Dr. Collier, 8s. 6d. cl.
 Barhaud's Hymns in Praise for Children, large type, 2nd edit. 1s.
 Bell's English Poets, 7 Chaucer, Vol. 5, 6s. 2s. 6d. cl.
 Bernham's Rev. G. J. Natural French Grammar, 4th ed. 6s.
 Bettsworth's Interest Tables, by Goodluck, new edit. 18mo, 2s. 6d.
 Bonin's Extra Vol. "Hephaestus of Margaret of Navarre," 3s. 6d.
 Bonin's Philos. Lib. "Kant's Critique, trans. by Meiklejohn," 5s. cl.
 Bonin's Scien. Lib. "Proust's Chemistry, Meteorology, &c." 5s. cl.
 Bonin's Standard Library, "Goethe's Wilhelm Meister," 4s. 6d. cl.
 Braithwaite's Retrospect of Medicine and Surgery, Vol. 31, 6s. cl.
 Buntou's Pilgrimage to El Medina and Mecca, Vols. 1 & 2, 2ss. cl.

 Trevelyan's (G. O. L. G.) City of the Crescent, 2 vols. post 8vo, 21s. cl.
 Tylor's General History, Continuation by Nares, new edit. 14s. cl.
 Villiers's (Hon. and Rev. H. M.) Family Prayers, 2nd ed. 3s. 6d. cl.

THE UNIVERSAL EXPOSITION.

THE wonders of Parisian Art-workmanship which now glitter along the northern line of the Palace of Industry are likely to be the most attractive of all the manufactures of taste in the Universal Exhibition. They are the latest results of centuries spent by the various governments of France in developing the artistic genius of the working classes. Their story runs back to remote days—to the times of Jean Cousin, Bernard de Palissy, and to Pinaigrier. It traverses the dark times, when the corporations oppressed the industries they pretended to protect, and gave to

their chiefs the titles of kings and princes. It may be remembered that Francis the First issued an ordinance requiring the heads of corporations to assume less ambitious titles, and that Henri the Fourth was compelled to re-issue this order, because some corporations, and especially that of the Paris mercers, had refused to depose their king. But the workmen soon found that these corporations—first organized to combat feudal tyranny—became petty absolute governments. Some sought the title of Royal from the sovereign—this title giving the corporation the power of putting their porter in royal livery, and exemption from the duty of lodging the king's soldiers. Some of the workmen were also exempt from militia service. Protection in its worst form thus clogged the way of progress. Manufacturers cared little about improvements, being free from the dangers of competition. Heavily were the apprentices and journeymen taxed and ground down by sordid laws before they reached the dignity of freemen. Every man who had suffered these taxes and submitted to these laws was not willing to give up privileges so dearly bought; so that working men who suffered by the tyranny of the corporations in early life lived generally to support them, because they generally reached the ease of free membership. But, as time wore on, it added to the grievances which, at last, sufficed to crush these unwholesome combinations. Before a man could become a freeman of a corporation, he must produce a *chef-d'œuvre*. Thus, no obnoxious journeyman was ever held to have produced one; and so he was kept without the privileged pale. The freedom of a corporation became a heirloom in certain families. The freemen heaped all kinds of rights and privileges upon themselves, to the disadvantage of workmen who did not happen to be their relations or friends. The merchants were banded in like manner. Constant broils and law-suits arose between rival corporations—as between the tailors and the second-hand clothesmen,—and a grave discussion settled the line of demarcation between a new coat and an old one. A locksmith dared not make the nails, necessary to the completion of his locks, because the manufacture of nails belonged to another corporation. Colbert, the good genius of French industry, was the first man who dared to strike, with a strong hand, at some of these antiquated laws and regulations. It was the mission of the woollen-merchant's son to infuse his eager spirit of industrial progress into the national heart. He struck down the Custom-house barriers between province and province; he encouraged the improvement of agriculture; he created a French navy; he planned the great canal of the South; he called lacemakers from Venice and from Flanders. At his invitation, Vaubois entered France, from Holland, to found the great cloth-manufactories of Abbeville. He installed the stocking-loom at the Château de Madrid, in the Bois de Boulogne. To him the French owe the Gobelins, now glowing upon the walls of the Panorama building; and people, pausing before the great St.-Gobert glass in the nave of the Palace of Industry, may choose to remember that Colbert contributed to the establishment of this manufactory also. To him the French owe their Academies of Science, of Inscriptions, of Painting, Architecture and Sculpture. But the requirements of the treasury stopped him when he approached the corporations. He could destroy various antiquated and unprofitable regulations, but this system was beyond his reach. On the contrary, he was forced to add to the number of privileged bodies that of "sellers of oysters in the suite of the Court," "testers of salt-butter," &c. These privileges were coolly made objects of barter by the Court. Money was screwed from the pockets of the monopolists at every turn, sometimes on pain of an increase in the number of freemen. The story of the difficulties which these monopolies threw in the way of men like Argand and Lenoir are among the remarkable episodes of the History of Industry. Turgot has the honour of having planned the abolition of the corporations;—the first French Revolution counts among its benefits that of having effected Turgot's position.

From the fall of the corporations, the rise of Parisian industry may be dated. The royal manufactories had nursed a class of working men who could bring Art to beautify the highest skill;—and the history of modern French industry is the history of working men who have risen to high places. Lyons owes its renown to working men;—to Garon, Jurines, Falcon, Bouchon, and Lasalle. To see that this remark applies to the great industry which produces Paris Articles—or *Articles Paris*—the Exhibition visitor need only seek to know the stories of such men as Jeauselme, whose stall of wonderfully-ornamented furniture is one of the curiosities of the Palace. He began as a poor workman in the Faubourg St.-Antoine;—he has now a gigantic establishment in which about 300 men find wages. He is not a man of extraordinary fortune;—on all sides close copies of his history may be read. He declares that his only advantage over hundreds of workmen was, that he knew something of drawing,—a something derived from a gratuitous drawing-school in his native province.

And here we approach the secret of those wonderful Paris Articles. Without entering into the question of the advisability or non-advisability of paying for the Art-education of working men out of the revenue of the State, it may safely be stated that to these purely gratuitous drawing-schools,—to institutions as liberal and comprehensive as the Conservatoire des Arts et Métiers,—to the constitution of the Gobelin-tapestry establishment,—where pupils chosen from provincial towns were sent at the cost of the State to learn the best dyeing processes, &c., and to carry back this knowledge to their native place,—and to the Museum of Natural History, where the raw produce necessary to industry was classed and tested,—the working men—not only of Paris, but of Lyons, Mulhouse, Rouen, and Abbeville—owe that grace and that intelligence which have enabled them to command markets in which foreigners had only the advantage of durability of material. Indeed, it would appear to many people that Art has been here cultivated, not in aid of, but at the expense of all the solid qualities of manufacturing industry. In their haste to print the pattern they have neglected the modest office of the loom. In their admiration of a brilliant dye they have forgotten the uses of a solid thread. We are told their furniture is splendid with golden trellis-work, marvellous for the rich grouping of costly materials; but as yet no Paris door swings fairly upon its hinges. In cotton cloth they cannot approach the inartistic genius of Manchester. English steel defies the competition of the first Gallic manufacturers. We are reminded that we might even carry the distinction from the *salon* where glows the furniture of Jeauselme to the kitchen where, in the disciples of Brillat de Savarin preside. Light as air,—daring to rashness,—gorgeous till the eye aches and is fatigued,—is the style of Art at which France has arrived in her workshops. The draughtsman here knows no bounds. All that floats to the surface of his brain goes direct, without a second thought, to the tip of his pencil. He wants a handle to the jug upon which he is engaged:—two crocodiles, one with its hind-quarters in the ample jaws of the other, are not too formidable for his purpose. A tailor gives him an order:—the Obelisk of Luxor becomes a stripe down the leg of a pair of trousers. Hieroglyphics tell upon flounces. Coins that would enrich any museum, are effectively strung together for a lady's hair. A stack of arms, with Napoleon in a contemplative attitude before them, are an apt combination for a tooth-pick stand. A chiffonier, with his basket at his back and his lantern in his hand, stands in bronze, with a load of lucifers behind and a spirit-burner in his lantern, at the convenience of the smoker. The marriage of the Emperor is not a composition too complex for the embroiderer of shirt-fronts, as the reader may notice in the French Gallery of the Universal Exhibition. Neither is the French designer inconvenienced by "Puritanic stays"; as his designs, realized in sugar and chocolate, and displayed in gorgeous shops on the Boulevards and in the Rue Vivienne every New Year's Day, fully testify. He can be graceful for the jeweller, grotesque for

the tobaccoist, and indecent for the vendor of chocolate. One day he will design a rose-leaf, with a diamond dew-drop upon it, for a brooch,—on the morrow Dutchmen carousing over a tub grow under his fertile pencil for a tobacco-box,—and from the tobacco-box he will wander to designs for a milliner. He has always a new idea at the disposal of his customers. If, last month, rosebuds and grapes were worn in Lucy Hocquet's bonnets, this month he produces cabbage-roses and plums and cherries. Last month coronets of bright green leaves encircled the fashionable heads of Parisian ladies:—for this month he has a new idea,—he paints garlands of seared and withered leaves. From cherries, now worn bright and juicy, he will probably advance to windfalls, or to fruit half consumed by sparrows. At the present moment he has turned out a fashion which exhibits a complete dessert in every lady's bonnet. Cherries, grapes, black currants, and acorns are now the popular bonnet ornaments:—next month, nothing will be left but strawberries and melons; or almonds and raisins may be prettily introduced into an August wreath.

This tendency of French designers to deal in the extravagant has been undoubtedly fostered and developed under the Empire. At the present time, to be costly is to be fashionable. That simplicity, which formerly charmed us in many of our neighbours' fashions, and that Art which gave to common objects and cheap materials the value of simple beauty of form, are unknown. The present Exhibition is an evidence of this craving for gold and marble; for lace, at once heavy and priceless; for furniture, at once uncomfortable and dazzling. The Bordeaux bookcase, carved in solid wood, is perhaps the only simple piece of French furniture in the Universal Exhibition. The rest surprises you chiefly because it is worth so many thousand francs. A child's chair value 20*l.*—an arm-chair priced at 80*l.*: these are the objects of attraction in the nave of the Palace; and these alone in the furniture department. We look in vain for household goods of common material wrought with taste;—we seek, without result, china specially designed for the cottage. We admire these tables studded with costly enamels; these bookcases laden with gold; these clocks resting upon golden cupids, or serving as battle-ground for warriors in bronze: this goldsmith's work peppered with diamonds and rubies. Marvellous monuments of human patience are these heavy flounces of lace, which only an Imperial purse, unchecked by an unimaginative House of Commons, can buy! Very splendid is this gigantic bird-cage of elaborated oak, set in hot-house flowers, and filled with birds worth their weight in gold. Perfect, perhaps, is the taste herein displayed. One workman's hand must have wondrous skill before it can realize this microscopic carving—this faultless polish! But few are the people who can pluck turquoise forget-me-nots, or dally with enamel rose-leaves bright with diamond dew! We accept these rare products as so many *tours de force*,—and then we turn to seek the art which elevates the humble home by simple forms of beauty.

But the artist-workman of Paris does not produce in common materials. It is not his mission to diffuse a sense of beauty over his country. If he can conceive any errand beyond that which enables him to frequent his *Barrière* ball, it is to show how ornament may be added to ornament—how silver may be wedded to gold, and ebony to satin-wood. In the *Fable* for Critics, we are assured that—

Over-ornament ruins both poem and prose,—
Just conceive of a Muse with a ring in her nose!

Now the art-workman's Muse has a ring in her nose. Not a plain gold ring, if you please; but a circle, studded all round with gems! His Muse wears nothing plain. Her bonnets are orchards; her dresses employ hundreds of hands to each; her fingers display the revenue of a State; and upon her bosom lies the wealth that would feed armies. To this Muse the Paris workman turns his eyes unceasingly, looking out from a *mansarde* where a pot of flowers bought near the *Madeleine* after market-hours is the only beauty. For, it is remarkable that Paris, the city where Art is the passion

of the masses, is conspicuous for the tastelessness of its common household goods. Angular straw chairs, deal tables, thick clumsy crockery, and frightfully barbarous stone-ware, make up the poor man's *ménage*. With the middle classes, you see a gaudy *salon*, with a splendid clock, chairs elaborately ornamented, handsome lace curtains,—but here household grace ends. A tea-service is permanently placed upon the *salon* table for the inspection of visitors, and very beautiful this service is, often; but proceed to the dining-room, examine the crockery in daily use, and you will be thoroughly disenchanted; for these will invariably be found coarse and ugly. It is not that the master of such a *ménage* has no appreciation of Art-manufacture: the truth is, he loves it; but it is beyond his means. All he can afford is a *salon* furnished, as he expresses it, with *luxe*; and there being no medium between *luxe* and positive plainness and ugliness, he is compelled to adopt the style, or want of style, perceptible in his dining-room.

OUR WEEKLY GOSSIP.

WHEN the Expedition to the East was first planned, we believe the Government had a sincere desire to send out with the military power a Scientific Commission, such as the French did to Egypt; but, in deference to martinet, they were induced to give up the better part of the proposal, and contented themselves with sending out a photographer. The destruction at Kertch is the result. A valuable museum—full of ancient gems, arms, pottery, crowns, bracelets, statues, and inscriptions, beautiful as the finest specimens of Etruscan art, and priceless as illustrations of ancient manners and ancient history,—has been lost, it is feared irrecoverably, for want of care and knowledge, and a stain has been cast upon our national honour not so easily effaced as the memory of a reverse before Malakoff and the Redan. We may return to the assault of these batteries,—where we failed at first we may succeed at last,—but no after action can recover into one collection a series of gems and ornaments dispersed among a savage soldiery and a population of Jews, Tartars, Turks, Italians, French, Armenians and English. A mere soldier may care very little about such things. A Babylonian brick may be to him a piece of baked clay, and nothing more; yet it is by their susceptibility on such points that nations rise or fall in intellectual estimation. Nor is the home government blameless. The Kertch expedition was not suddenly conceived or executed; it was in agitation during the winter months; it was finally prepared in the spring and early summer; yet, during all this time, although Downing Street is within whispering distance of Lord Raglan's headquarters, and the correspondence on the subject must have been intimate and constant, no hint as to the existence of a world-renowned museum at Kertch seems to have been offered to Sir George Brown or Sir Edmund Lyons. When it was too late—after the expedition had sailed—the subject being privately forced on Sir Charles Wood's attention—a telegraphic message was sent to the Crimea to protect the Museum and other works of Art. After this lamentable evidence of its necessity, will Ministers still hesitate to send out a Scientific Commission to the Black Sea?

The Society of Arts will hold their anniversary dinner this year at the Crystal Palace, Sydenham, on Tuesday next (3rd of July). The Duke of Argyll will take the chair.

Our readers may be reminded that the anniversary dinner of that excellent charity, "The Booksellers' Provident Institution and Booksellers' Provident Retreat," will be held next Friday (July 6th) at the Crystal Palace, with Mr. M. Milnes in the chair.

The Fourth Annual Conference of the Representatives of the Institutions in union with the Society of Arts, is to be held at the house of the Society on Monday next. The importance of these annual meetings may be judged from the fact that the number of institutions now in union amounts to nearly 400. In accordance with the usual custom, the Chairman of Council, who this year happens to be Viscount Ebrington, M.P., will preside.

A Correspondent, writing from the far East, offers a suggestion to our publishers worthy of consideration. He says:—

"Mussoorie, 28th of April, 1855.

"Residents abroad are very much indebted to you for the information conveyed with so much fullness and clearness in your paper of the 3rd ultimo, relative to the new Book Postage. To render the value of the information complete, booksellers, in advertising a publication, should now state the *weight*, as well as the price and other particulars. I have once or twice ordered a single volume, but I should now always send for a number of publications, the united weight of which would allow of my profiting by coming *close* to a limit; which was not possible when only a single volume, no matter how light, was permitted under each cover. As respects the book trade to India, I expect the new rules, if adhered to with good sense and good faith, will effect a great revolution; for we should then be independent of the enormous local prices, and of the excessive rates demanded for carriage by the steam company; to say nothing of the vexatious delay and detention of parcels between landing and delivery at remote stations. I almost fear the boon is too good to last, however. You are aware that we got a system of Local Postage, on the 1st of October last, very similar to yours in England. Our rates differ from yours in most respects. The lowest rate is 2 pice (about $\frac{3}{4}$ d.) for a note 45 grains in weight,—a restriction which you might find beneficial at home, as necessitating the use of light paper, and the economy of materials for that manufacture. For $\frac{3}{4}$ d., a letter of the weight specified is conveyed from Calcutta to Peshawur, not exactly at express train speed, but within ten days; and the change is hailed as a great improvement.—Yours faithfully, O. S."

Reviving a good custom, Mr. Buckstone, lessee of the Haymarket Theatre, has placed an Author's Night at the disposal of Mr. John Saunders. The poem, 'Love's Martyrdom,' so disastrously presented on the first night, has never recovered the golden opportunities then thrown away to the poet's loss; and the play has been withdrawn from the bills. The author, however, is desirous of presenting his story to one good house, so as to have its dramatic capabilities tested under a more faithful interpretation of his meaning,—and Wednesday evening next is fixed for the last performance at the Haymarket of 'Love's Martyrdom.' On that occasion, the Storm scene,—referred to in our notice of the play as necessary to the poetical development of the hero,—will be given for the first time.

The communication made by Sir Roderick Murchison to the Royal Society at the last meeting of that body, on a supposed meteorite found in the heart of an old willow tree at Battersea, created a very lively interest and produced an animated discussion, in which Prof. Owen, Dr. Hooker, Mr. C. Darwin, and Dr. Shepard took part. When the specimen was first seen its scoriaceous and peculiar aspect, when coupled with the evidence of persons living on the spot, showing that the tree was seriously blighted on one side in a storm which occurred about sixteen years ago, had led to the suspicion that it might be a meteorite,—and when nickel, cobalt, and manganese were detected in the metallic portions of the mass the suggestion was strengthened. Dr. Shepard, Professor of Amherst College, United States, who has long studied the subject, and who is in England, expressed his belief in the extraneous body being a true meteorite,—and it was under these circumstances that Sir Roderick Murchison thought it right to have the matter thoroughly investigated. Independently of the origin of the substance, the manner in which the tree had grown round it was of deep interest to botanists, including Mr. R. Brown, Dr. Lindley, Dr. Hooker, Prof. Henslow, Prof. Huxley, and Mr. Bennett. Sir Roderick said the discovery of stones, metals, and even of manufactured articles in the hearts of trees was a well-recorded phenomenon, and stated that, in the present instance, the true character of the extraneous body must mainly depend upon the ultimate chemical analysis by Dr. Percy, to whom he had submitted not only a fragment of the included mass, but also of two separate portions found by Mr. Reeks near the root of the tree, one of which is undistinguishable from the supposed meteorite. The results which have been obtained since the notice was written have, we understand, justified to a great extent the suspicion entertained, that the substance was simply a portion of slag; for whilst both the fragments found on the ground (one of them obviously a manufactured slag) contained nickel, cobalt, &c., as well as the mass in the tree, it is the opinion of Dr. Percy that they

can all be paralleled with the known refuse of furnaces. This result will throw considerable doubt upon the origin of many so-called metallic meteorites, which, though they have not been seen to fall, have had an extra-mundane origin assigned to them from their containing nickel, cobalt, &c. The specimen is now to be seen at the Museum of Practical Geology, Jermyn Street.

Earl Stanhope, with that thoughtful literary courtesy which marks so pleasantly the character of our "noble authors," and which particularly distinguishes the historian of 'England since the Peace of Utrecht,' has signified to the Vice-Chancellor of Oxford University his intention to give during his life, and to bequeath at his death, an annual prize of 20*l.* for the best composition on a modern history subject.

Prince Albert visited the Royal Society on Monday last, for the purpose of examining the celebrated Swedish Calculating Machine in the Society's apartments. The machine was explained by Messrs. Gravatt and Donkin, and specimens of the printing were presented to His Royal Highness.

Byron complained of our scant knowledge of Assyrian life. His gorgeous drama of 'Sardanapalus'—the conception of the hero, and the moral setting of the play—rose out of the poet's mind rather than from known materials. The scene was a creation. Thirty-five years have passed, and, thanks to Rawlinson and Layard, the English public are already as familiar with the Assyrian Court as with that of Egypt. Our knowledge, too, is daily deepening. Among the many curious illustrations of Assyrian life brought home by Col. Rawlinson from the East, and now on view at the British Museum,—where they have been visited during the week by the Majesty of England,—are, an alabaster vase, containing some remains of sweetmeats, various objects in gold and ivory, part of the throne of Sardanapalus, many inscriptions relating to the deeds of men celebrated in secular and sacred history—such as Nebuchadnezzar, Sardanapalus, and Tiglath-Pileser,—gems and other personal ornaments; together with a series of drawings, made by artists on the spot, from slabs impossible to bring away from their ancient resting-places, representing the more heroic forms of antique relaxation—lion hunts, banquets, and the like. How strange to think of these spoils of the proud dynasty of Semiramis, after three thousand years, being visited in a London Museum by a Lady who reigns in all feminine gentleness over a mightier empire than obeyed the "ancient belldame,"—who from the ends of the earth stretches a benignant sceptre over that very India from which the successor of Ninus returned baffled and discomfited!

Oldham is to have a New Lyceum—a handsome building in the Italian style, to be erected at a cost of 5,000*l.* A large gathering of people took place to witness the ceremony of laying the foundation. Of the sum named as necessary for the payment of costs, more than 3,000*l.* is already in hand,—2,000*l.* being the profit on the local Industrial Exhibition, and the remainder the first part of a subscription undertaken by the President of the Society, Mr. James Platt.

A house in Raquet Court, Fleet Street, has been taken by the London Society of Compositors for use as a library and news-room. By this initiative the members have proved the reality of their want, and the disposition on their own part to supply it. At this point it is not premature to appeal for help. The members have, therefore, issued a modest circular, calling on those for help in their laudable design whose connexion with Literature is loftier and more remunerative than their own. We notice this course of action with hope,—and we fancy that many of our wealthier literary brethren, seeing the compositors put their own shoulders to the wheel, will feel it their pride and pleasure to assist them by donations of their works or otherwise.

We see it announced in the papers that Sir Hugh Munro, of Foulis, Bart., has bequeathed his estate of Milton, in Ross-shire, to found a Free School in Perth, for the education of the children of tradesmen belonging to the town. The rental

of the property, being about 300*l.* per annum, is to be applied to the support of the institution; and the sum of 1,000*l.* is left for the building of the school-house. The school is to be in connexion with the Established Church of Scotland, and under the superintendence of the Presbytery, and is to be visited by the Government Inspector.

Prof. Adalbert von Keller, of Tübingen, is preparing for publication a 'Schwäbischer Sprachschatz,' similar to the 'Thesaurus of the Bavarian Dialects' by the late Prof. Schmeller, of Munich. The Suabian Glossary is to comprise the dialects of Hohenzollern, Württemberg, Baden and Bavaria, so far as they belong to the Suabian idiom.

Among the many commemorations of Schiller's fiftieth death-day, that at Dresden has been distinguished by the creation of a Schiller-Fund, the interest of which is to be employed in behalf of the families of such deceased German poets as have not been able to provide for their widows and children. The plan, we understand, has met with universal sympathy, and the result of the first subscriptions is said to be more important than is generally the case in Germany.

An interesting theatrical representation, serving to illustrate the history of the German drama, and for the benefit of Count Platen's monument, has taken place, by special command of the Grand Duke, on the classic boards of Weimar. It embraced scenes from the plays of Hans Sachs, Andreas Gryphius, Gottsched, Gellert, Leisewitz, &c., and closed with Platen's comedy, 'Der Thurm mit sieben Pforten.' The plan of the monument, we learn, has been altered. It is to be a colossal statue, instead of a simple stone, as originally intended. Hence the increased expense, and the necessity of appealing repeatedly, and in a variety of forms, to the public.

Wise retrenchment is the motto of our time. But unwise retrenchment is a folly as absolute as unwise extravagance. Is this latter never advocated by way of warning to the cautious how far they interfere with vested rights and as a practical illustration of the danger of "opening the flood-gates"? A Melbourne paper, commenting on the new budget of the Australian colony, says:—"It is matter of regret that the retrenchment of the Government establishments has had reference to three officers of great importance to the colony. The reduction of the amount of grant to the Botanical Gardens, Melbourne, from 4,192*l.* to 2,000*l.* will necessitate the abolition of the office of Government botanist, hitherto held by Dr. Müller, a gentleman whose scientific acquirements are of the highest order, and whose enthusiastic pursuit of the inquiries in which he was engaged had already secured, and promised yet more fully to secure, the most advantageous results for the colony and for science. The vote of 2,000*l.* for the Museum of Economic Geology, and of a similar amount for the Museum of Natural History, is dropped from the amended estimates altogether. This will involve the abolition of the offices of Government Geologist, and of Curator of the Public Museum. Mr. Selwyn and Mr. Blandowski, the gentlemen who held these offices, have already done the colony good service, and the greatest benefits might have been anticipated from their exertions upon a field of usefulness so little explored as ours."—We are not acquainted with all the circumstances which have led to the adoption of a budget likely to throw these public servants out of their employments; but we read in the Australian papers that public attention has been called to these reductions, and that Mr. Greeves, one of the Members for the city of Melbourne, has given notice of a motion which will bring the whole matter under the consideration of the Legislative Council.

ROYAL ACADEMY OF ARTS, Trafalgar Square.—THE EXHIBITION OF THE ROYAL ACADEMY IS NOW OPEN.—Admission (from Eight to Seven o'clock), 1*s.*; Catalogue, 1*s.*. JOHN PRESQUIT KNIGHT, R.A. Secretary.

SOCIETY OF PAINTERS IN WATER-COLOURS.—THE FIFTY-FIRST ANNUAL EXHIBITION IS NOW OPEN, at their Gallery, 5, Pall Mall East, close to Trafalgar Square, from Nine till dusk.—Admission, 1*s.*; Catalogue, 6*d.* JOSEPH J. JENKINS, Secretary.

THE SECOND ANNUAL EXHIBITION OF THE FRENCH SCHOOL OF FINE ARTS IS NOW OPEN daily, from 10 to 6 o'clock, at the Gallery, 131, Pall Mall, opposite the Opera Colonnade.—Admission, 1*s.*; Catalogue, 6*d.*

WIDOWS and ORPHANS of BRITISH OFFICERS who fell in the WAR with RUSSIA.—THE EXHIBITION OF THE ROYAL DRAWINGS and upwards of 1,200 Works of Art, by Amateurs and others, in aid of the Fund for the relief of these most interesting objects of their country's sympathy, is NOW OPEN at BURTON HOUSE, Piccadilly.—Admission, 1*s.*—All the Works are for Sale.

CHALON EXHIBITION, SOCIETY OF ARTS.—This Collection of the Paintings, Drawings, and Sketches of the late JOHN CHALON, Esq., R.A., with a selection from the Works of ALFRED E. CHALON, Esq., R.A., is NOW OPEN, at the Society's House, Adelphi.—Admission, 1*s.*

PHOTOGRAPHIC EXHIBITION.—An Exhibition of the finest English, French and Italian Photographs IS NOW OPEN at the PHOTOGRAPHIC INSTITUTION, 108, New Bond Street.—Open from 10 to 5.—Admission, with Catalogue, 1*s.*

ADAM AND EVE.—This great original Work, by JOSEPH VAN LERUUS, is NOW ON VIEW at 57, Pall Mall, opposite Marlborough House, from 11 to 6 daily.—Admission, 1*s.*

LONDON SEASON BY DAY.—On Saturday, at 3 o'clock, Mr. LOVE will present his NEW ENTERTAINMENT, called 'THE LONDON SEASON,' by day.—LOVE'S ENTERTAINMENTS.—VENTRILOQUISM EXTRAORDINARY.—REGENT GALLERY, 69, Quadrant, Regent Street.—Mr. Love will appear every Evening at 8, except Saturday; Saturday at 3.—Monday and Tuesday Evenings at 8, and on Saturday Morning at 3. Mr. Love, universally accepted as the first Dramatic Ventriloquist in Europe, will present his NEW ENTERTAINMENT, called 'THE LONDON SEASON,' Wednesday, Thursday, and Friday, the Entertainment LOVE IN ALL SHAPES, to be followed by a ZOOLOGICAL CONCERT, and LOVE'S LABOUR'S LOST.—Fianfortre, Miss Julia Warman.—Stalls, 3*s.*; Area, 2*s.*; Gallery, 1*s.*

ROYAL POLYTECHNIC INSTITUTION.—THREE REMARKABLE NOVELTIES.—First, Lecture by J. H. PEPPEY, Esq., on the DISCOVERY OF THE TRANSMISSION OF THE HUMAN VOICE AND VOCAL MUSIC through SOLID CONDUCTORS, being a novel addition to the Lecture delivered before HER MOST GRACIOUS MAJESTY and H.R.H. PRINCE ALBERT, the Patron of the Institution.—Second, DAILY, a COMPLETE ARCTIC COLLECTION, by Jno. BARROW, Esq., of the ADMIRALTY, including some interesting RELICS OF THE EXPEDITION OF 'SIR JOHN FRANKLIN.'—Third, A 'SINGING MUSE' which EMITS SOUNDS SIMILAR to those of the LINNET.—In addition to the above, all the other EXHIBITIONS, LECTURES, DISSOLVING VIEWS OF the late BATTLES, DIORAMA OF SAM SLICK, &c. &c.

SCIENTIFIC

SOCIETIES.

ROYAL.—June 21.—The Lord Wrottesley, President, in the chair.—The following gentlemen were elected Foreign Members. Prof. Plücker of Bonn, Prof. Rathke of Königsberg, and Prof. Rümker of Hamburg.—A paper by Sir Roderick Murchison, 'On the Discovery of a supposed Aerolite in the Heart of a Tree,' elicited considerable discussion, in which Prof. Owen, Mr. Darwin, Dr. Filton, and others took part.—The titles of eighteen papers were then read, and the Society adjourned over the long vacation.

GEOGRAPHICAL.—June 25.—Sir Roderick Murchison, V.P., in the chair.—A collection of geological specimens, brought by Capt. Collinson from the Arctic Regions, was exhibited on the table,—and a series of sketches of the Sandwich Islands, by Mr. Sawkins, was likewise displayed; and also of various parts of Australia—such as the Brisbane and Burnett rivers, the Elm Creek, the Darling Downs, the Burning Mount Wingen, the Turon and Sofala gold-mines, Mount Victoria and the town of Bathurst, and many other localities from Moreton Bay northwards.—'On the Volcanic Mountains of Hawaii, Sandwich Islands,' by James G. Sawkins, Esq.—'On the Geographical Results of his late Researches in the Arctic Regions,' by Capt. Collinson, R.N. The prior discovery of Prince of Wales Strait by Capt. M'Clure, in 1850, and that of Dr. Rae on Victoria Island, have deprived the voyage of the Enterprise of much of its interest. Yet the Enterprise penetrated furthest to the eastward; she approached nearest to the spot reached by the Hecla in 1819; she was successfully extricated from the ice; and one important consequence has been the extension of the whale fishery through Behring Strait to the Mackenzie River, on the northern shores of the continent.

SOCIETY OF ANTIQUARIES.—June 21.—Edward Hawkins, Esq., V.P., in the chair.—Joseph Hunter, Esq., was elected to fill the vacant seat in the Council. Mr. John Young Caw was elected a Fellow.—The Rev. Thomas Hugo exhibited a branks or scold's bride, of unusual form.—Mr. Henry Stevens exhibited a copy of the Bible of the time of Charles the First, printed by Barker & Lucas, condemned for its numerous gross typographical errors.—Mr. Henry Cooper, by the hands of the Sub-Dean of Salisbury, exhibited a knife

and fork, in a leather case, found behind some panneling in the Blue Boar Inn.—Dr. Elton communicated a transcript of a letter of Cromwell.—Mr. Octavius Morgan exhibited a fine collection of ecclesiastical rings.—Mr. J. M. Kemble, in a letter to the Secretary, called attention to the shape and ornamentation of certain urns figured in 'Remains of Pagan Saxondom,' found at Eye, in Suffolk, and those discovered by himself at Stade, on the Elbe. Of these, Mr. Kemble exhibited drawings, observing that it appears, by these remains, that a Slavonic tribe, uniting with a band of Northern adventurers, had made a descent in East Anglia towards the end of the eighth century. The Secretary suggested that the urns in question were of an earlier period than that to which Mr. Kemble had ascribed them.—Mr. George Scharf, Jun., read 'Observations on a Picture in Gloucester Cathedral, and other Representations of the Last Judgment.'—The Society then adjourned to Thursday, November the 15th.

BRITISH ARCHEOLOGICAL ASSOCIATION.—June 13.—T. J. Pettigrew, V.P., in the chair.—Mr. Crafer exhibited a gold coin, the obverse presenting a figure of St. John the Baptist, with his leathern girdle and cloak of camel's hair, preaching and holding up the cross; the reverse a fleur-de-lis. This was lately obtained from Hastings. The Florentines were among the first people of Europe to revive the use of gold as a circulating medium. In the middle of the thirteenth century, to which this specimen is to be referred, they issued these pieces with the legend S. IOHANNES. B. and on the other side, with the fleur-de-lis, FLORENTIA. These beautiful coins were called *Florins*,—a name now most absurdly bestowed on our two-shilling pieces.—Sir S. Morton Peto exhibited two British Cledydys, leaf-shaped swords, in bronze, obtained at Waddingborough, in Lincolnshire, near the river Witham, in the neighbourhood of which a conflict had taken place, and whence the celebrated British shield in the Meyrick Collection was obtained. A third specimen (we believe from the Thames) was also exhibited by Sir S. M. Peto, the handle of which was peculiar, having a long narrow ovate slit down the centre of the tang, and one on each side of the lower part where it joins the blade. It measured 1 ft. 10 in. in length. Sir S. M. Peto also exhibited two Roman vessels,—one an *Olla*, or cinerary urn, 9 in. high; the other a *Guttus*, similar to one found at Chichester, and figured in the *Journal of the Association*, vol. iv. p. 158.—Mr. Gibbs exhibited a half-shilling of the second coinage of Elizabeth, discovered in his garden near Windmill Hill, Gravesend. It is in fine preservation, and bears the date of 1571, on either side the mint mark of a castle.—Mr. Gunston exhibited rubbings of various brasses:—a priest (circa 1420) from the nave of Haddenham Church, Bucks; a child, swathed like a mummy, from Stoke d'Audernore; a knight and lady from Dinton, &c.—Mr. G. N. Wright read a short paper on the various Portraits assigned to Shakespeare, and exhibited the original painting formerly in the collection of John Lord Lumley, now in course of publication by Vincent Brooks, and to be seen at Hogarth's, in the Haymarket.—Mr. Pettigrew read a paper on, and exhibited a large collection of specimens illustrative of, Egyptian Glass.—Dr. Lee exhibited five curious specimens of ancient Egyptian glass, belonging, according to Mr. Pettigrew, to a late period. They consisted of representations of a double asp, with a lion's head entirely in blue glass; a jackal (the guardian of the tombs) in blue, green, and white; a cow reposing, with the solar disc and feathers between the horns, assigned by Mr. Pettigrew to the Egyptian goddess Athor (Venus); a hawk-headed scarabæus, with extended wings, of blue glass, streaked with white; and a bull bound for sacrifice, of blue glass.—Mr. John Brent read a paper, 'On Canterbury in the Olden Times,' containing many entries from the Canterbury records.

STATISTICAL.—June 18.—The Right Hon. the Earl of Harrowby, President, in the chair.—Prince Albert was present.—The following gentlemen were elected Fellows of the Society, viz.:—The

Right Hon. M. T. Baines, M.P., and Messrs. George Becke, Christian Child, Layton Cooke, R. H. Coote, J. E. B. Curtis, Frederick Gosnell, W. D. Lewis, George Tomline, M.P., and W. A. Wilkinson, M.P.—M. Heuschling, Secretary to the Central Commission of Statistics in Belgium, and chief of a department in the Ministry of the Interior, was elected a Foreign Honorary Member.—'On the Mortality arising from Naval Operations,' by W. B. Hodge, Esq. The author commenced by stating that, from the number of returns upon various subjects that were annually laid before Parliament, it might be supposed that an ample store of facts existed with reference to questions so important to the nation as the strength and mortality of the Navy; but the contrary was the fact, and between the period of 1793 and 1815 we were chiefly indebted for the scanty information we possessed to the industry of one or two private persons. A table which he had prepared registered the results of 576 actions which took place in that interval, causing casualties to the amount of 19,382. He had taken 1 in 10 as the proportion of wounded in naval engagements who subsequently died of their wounds, that calculation being founded on Sir Gilbert Blane's account of the action fought by Sir George Rodney in the West Indies in 1782, and upon the return given in Col. Drinkwater's account of the siege of Gibraltar in 1779-83. Taking the whole of the casualties in action in the British service during the wars of the French Revolution, the proportion of those returned killed to the whole number injured in naval engagements was 100 to 398, or rather more than 1 in 4; while in engagements on land it was 100 in 529, or rather less than 1 in 5. He gave the following as the probable average result of 1,000 cases of injury received in a naval engagement:—Killed, 250; died of wounds, 75; total deaths, 325; recovered, but disabled, 95; recovered, fit for duty, 580—total, 1,000. The mortality caused by ships accidentally wrecked or burnt he found to be double that arising from injuries received in action. It might appear to some persons erroneous to attribute this class of mortality to the effects of war, seamen being apparently as much exposed to such risks during peace; but it was certain that those risks were greatly increased by the services required from the Navy in time of war, and it was obvious that a larger number became exposed to them from the additional force kept up. During the war, independently of those sunk or destroyed by the enemy, 28 line-of-battle ships, 62 frigates, 251 smaller vessels—in all, 341 sail—belonging to the Navy either foundered, or were wrecked or burnt from accidental causes, with a loss of 13,621 lives, or about 666 per annum of the period considered. On the other hand, it appears that from the end of 1815 to the end of 1850, a period of 35 years, the number of vessels similarly lost in the Navy, all of them being of the smaller class, was only 185, and the number of men 1,320, being 38 annually, or in the ratio of rather more than 1 for every 1,000 men employed. It was undoubted, therefore, that during the last war the risk of death to persons employed in the Navy from the accidental destruction of vessels was four or five times greater than it has been since the peace. The great improvements in shipbuilding had probably diminished the mortality; but allowing for this nearly double the average from 1815 to 1850, the total number of deaths on a peace establishment of 40,000 men would only have amounted to 1,636, leaving 11,985 still chargeable to the war. The period during which Great Britain was engaged in hostilities, from their commencement in 1793 to their final termination in 1815, was exactly 20 years and 165 days, or 20.45100 years. The mean strength of the Navy during that period was 110,180. The total number of deaths from hostile engagements was 6,663, from ships accidentally wrecked or burnt, 13,621. The annual ratio of the former was 326, of the latter 666. At first there appeared no reason why mortality arising from disease should be increased by war in the Navy, as was known to be the case in the Army, but an examination of the facts proved that it was so. The means which existed for forming a judgment on this point were limited, from the imperfect character of the returns, until

so recently as 1830. Mr. Hodge, however, deduced, from a variety of statistics, that the annual ratio of mortality to 1,000 mean strength in the whole naval force from 1776 to 1780 was, from casualties in action 5.1, drowned by shipwreck and died from disease and ordinary accidents 55.8, from all causes 60.9. In the West Indian fleet, from 1780 to 1782, the ratio of deaths was, from casualties in action 21.0, drowned by shipwreck 54.0, from diseases and ordinary accidents 58.0, from all causes 133.0. In the whole naval force from 1810 to 1812 the ratio of deaths was, from casualties in action 1.9, drowned by shipwreck 7.3, from diseases and ordinary accidents 38.3, from all causes 47.5. From the returns published since 1830 it appeared that the mortality throughout the Navy during peace did not exceed 16 per 1,000 annually, and he had therefore taken it at that ratio. If the returns for 1810-12 were to be relied on, they showed that the mortality from disease and ordinary accidents during the war was annually 38.3—16=22.3 per 1,000, or about 140 per cent. greater than in peace. This would no doubt be considered by many a rather startling result; but Mr. Hodge pointed out that it was confirmed in a very remarkable manner by the experience of the squadron on the East Indian station during the war with China. From parliamentary returns it appeared not only that the mortality on that station was more than doubled by the Chinese war, but that the principal increase was in the deaths caused by disease. The mortality from the latter source for the ten preceding years had averaged very nearly 15 per 1,000 annually, but during the war it rose to 36.78 per 1,000, being an increase of 21.78 per 1,000, or about 140 per cent. It seemed, therefore, Mr. Hodge contended, a fair and moderate estimate that the loss of life in the Navy from disease and ordinary accidents was doubled during the Revolutionary War, and that the increased mortality from those causes amounted to 16 per 1,000 annually, which, upon a force averaging 110,180 men, would give 36,051 for the total number of additional deaths during a period of 20.45100 years. This calculation, however, assumed that the 110,180 men would, had there been no war, have suffered the same rate of mortality as seamen in the navy during peace. Now, the peace establishment would not have exceeded 40,000 men, and the difference between that number and 110,180, or 70,180 men, were annually exposed to the increased mortality of naval as compared with civil life not included in the foregoing estimate, which only compares the mortality among seamen during peace with that among seamen during war. It was necessary, therefore, to compare the mortality of seamen with that of men of similar ages in civil life. Taking the average age of seamen at thirty years, and the mortality among the whole population at the same age, as 10 per 1,000 annually, and assuming 16 per 1,000 as the peace mortality in the Navy, the additional mortality among civilians converted into seamen would be at least 6 per 1,000 annually. To this additional mortality beyond that already referred to the increased force of 70,180 men required by the war were subjected, and the number of deaths thereby caused, calculated on the principle laid down, was 8,611, which, added to 36,051, the number before given, made an aggregate of 44,662 as the total number of additional deaths arising from disease and ordinary accidents caused by war. From the foregoing estimates the author concluded that the mortality in the Royal Navy in an average force of 110,180 men, during 20½ years of hostilities occurring between 1763 and 1815, showed the following results:—Deaths from casualties in action 6,663, drowned or destroyed in ships accidentally wrecked or burnt 13,621, from disease or ordinary accidents on board 72,102, total 92,386; the ratios of the preceding numbers to 1,000 mean strength were 3, 6, 32, and 41. The estimated number of deaths that would have occurred from the same causes during *peace* were, from casualties in action none, drowned or destroyed in ships accidentally wrecked or burnt 1,636, from disease or ordinary accidents on board 27,440, total 29,076. Thus showing an *excess* of deaths caused by *war* from casualties in action of 6,663, drowned

or destroyed in ships accidentally wrecked or burnt 11,985, from disease or ordinary accidents on board 44,662, total 63,310. Having determined with as much precision as the materials in his possession permitted the total loss of life in the Navy during the war, Mr. Hodge proceeded to consider the relative losses arising from the different species of service in which it was employed. He directed attention, first, to the statistics of actions between fleets and squadrons; second, to attacks upon land fortifications; and, lastly, to actions between single ships. Under the two former of these heads he had prepared tables containing the particulars of nearly every important engagement belonging to those classes that had occurred during the last seventy years, the battle of Navarino alone excepted; but, under the third head, he had only thought it necessary to select a sufficient number of cases to give a just idea of the losses to which such actions gave rise. The number of actions between fleets or squadrons were 13, giving deaths in action, including one-tenth of wounded, 2,335; deaths to 1,000 mean strength, 21; casualties to 1,000 mean strength, highest, 212; lowest, 19; average, 65. The number of attacks on land defences were 10, giving deaths in action, including one-tenth of wounded, 1,028; deaths to 1,000 mean strength, 21; casualties to 1,000 mean strength, highest, 147; lowest, 7; average, 65. The number of actions between single ships, in which the enemy's vessel was captured, was 18, giving deaths in action, including one-tenth of wounded, 252; deaths to 1,000 mean strength, 50; casualties to 1,000 mean strength, highest, 272; lowest, 4; average, 140. The number of actions between single ships, in which the British vessel was captured, was 11, giving deaths in action, including one-tenth of wounded, 246; deaths to 1,000 mean strength, 119; casualties to 1,000 mean strength, highest, 674; lowest, 180; average, 346. The number of actions between single ships, in which neither vessel was captured, was 6, giving deaths in action, including one-tenth of wounded, 108; deaths to 1,000 mean strength, 79; casualties to 1,000 mean strength, highest, 470; lowest, 67; average, 208. The following statement was given with the view of showing that the loss inflicted on us in our conflicts with the navies of other nations had been generally in proportion to the reputation of their seamen for skill and discipline:—

Action.	Enemy's Fleet.	Proportion of British Loss in Killed and Wounded.		
		To 1,000 of British engaged.	To 1,000 of the Enemy engaged.	To each ship taken or destroyed.
Cape St. Vincent.	Spanish	32	19	75
Trafalgar	{ Franco- Spanish }	100	78	94
Nile	French	112	91	82
Camperdown.	Dutch	100	115	92

By the above statement it is shown that the casualties of the British in the battle off Cape St. Vincent were only 32 per 1,000 engaged, while each of the enemy's ships taken or destroyed cost 75 men in killed and wounded. At the battle of the Nile each ship taken or destroyed cost only 7 more, or 82 men in killed and wounded, although the proportion per 1,000 engaged was 112, or between three and four times as many as at Cape St. Vincent. The paper was an elaborate one, and was illustrated by a series of tables and several large diagrams. A discussion followed, in which His Royal Highness took a prominent part.

An elaborate paper, entitled 'An Analysis of the Clearing House,' by Charles Babbage, Esq., was read in abstract after the conclusion of Mr. Hodge's paper.

ROYAL INSTITUTION.—May 18.—Rev. John Barlow, V.P., in the chair.—'On Dante and the "Divina Commedia,"' by Mr. J. P. Lacaita, LL.D.—The speaker, after a few preliminary remarks, proceeded to state that he should not attempt to give an account of the life of Dante, which was so connected with the chief events of

his time that it was impossible to sketch it with any degree of interest without entering into many details of the mediæval history of Italy. Carlo Troya and Count Cesare Balbo, two of the most profound Italian historians of this century, whose recent loss their countrymen have so much reason to regret, might be adduced as illustrations of the statement. Troya, by his researches on Dante's life, and on the meaning of the well-known lines—

Infìn che 'l Veltro
Verrà, che la farà morir di doglia—

was led to write a mediæval history of Italy; and Balbo, by a converse process, ended his studies on the mediæval history of Italy by writing a life of Dante. There was an event in that life, however, which he would not omit to notice, as it had a peculiar interest for an English audience. Dante visited, and most probably attended a course of theology at, Oxford. Boccaccio asserts, in some Latin verses, which he addressed to Petrarcha, in sending him a copy of the 'Commedia,' that Dante had been

Parisiis dudum, extremosque Britannos.

—Boccaccio, who was born in 1313, had certainly heard it from his father, who resided in Paris as a merchant; and who, being a Florentine, had no doubt known, and perhaps been familiar with, Dante. John, of Serravalle, Bishop of Fermo, in 1416, translated into Latin, and expounded the 'Commedia,' at the request of Cardinal Amadeo de Saluces and of the Bishops of Bath and Salisbury, whom he had met at the Council of Constance. In the preface to his translation, which is in MS. in the Vatican Library, Serravalle says: "Dantes dilexit Theologiam sacram, in qua diu studuit tam in Oxoniis in regno Angliæ quam Parisiis;" and again: "Se in juventute dedit omnibus artibus liberalibus, studens eas Paduæ, Bononiæ, demum Oxoniis et Parisiis." The lines allusive to the murder of the nephew of Henry the Third, in the church of Viterbo, by Guy de Montfort:—

Mostrocci un' ombra dall' un canto sola,
Diciendo, colui fesse in grembo a Dio
Lo cor che 'n sul Tamigi ancor si cula.

Inf. xii. 118-120.—

also evidence the same fact; for they convey an impression that Dante had himself seen the place in which the head of the murdered youth was preserved. His visit to Oxford must have been between 1308 and 1311, when, after leaving the Malaspinas, he went to Paris. The speaker expressed a wish that some one would inquire fully into the subject, to which as yet no attention had been paid.

June 1.—The Duke of Northumberland, President, in the chair.—'On the Currents of the Leyden Battery,' by Prof. Tyndall.

June 8.—The Duke of Northumberland, President, in the chair.—'On Ruhmkorff's Induction Apparatus,' by Prof. Faraday.

INSTITUTE OF ACTUARIES.—June 25.—John Finlaison, Esq. President, in the chair.—Two candidates were elected Associates.—Mr. Samuel Brown, one of the Honorary Secretaries, read a paper 'On the Results of the Operations of the Gotha Life Assurance Bank for the first twenty-five years of its existence, particularly with respect to the Mortality amongst the Lives assured,' by Herr Rath G. Hopf, of Gotha. The author stated that the Gotha Life Assurance Bank was founded at a time when there existed scarcely any knowledge of life assurance in Germany. Several previous attempts to found such a company had failed, and the few Life Assurances effected by Germans, especially in the Hanseatic Towns, could only be effected with English Companies. As it was the first German Life Assurance Company, so it had risen to be the greatest of its kind in Germany, and, as concerns the number of the lives assured, to be the greatest in Europe. It was founded in 1829, and in twenty-five years, ending in 1853, the number of members who had been admitted were 27,210; with assurances for 6,438,400*l.*, of whom 18,427 were the remaining members at the latter date, with assurances for 4,159,314*l.*—The author discussed the question of the difference existing between the mortality of

males and females, and the remarkable fact, that notwithstanding the general impression that the longevity of females was greater than that of males at all ages, and that married women were especially favoured in that respect, the experience of the Gotha Office had been just the reverse. The prevailing majority of the females assured by the Gotha Office, five-sixths, were married or widows; and only one-sixth not married. Nevertheless, their mortality, in the years of the capability of conception, under 40, exceeded that of men. Yet the Gotha Office did not assure women in the state of pregnancy, but delayed the assurance for a favourable termination, and provided the next six weeks were passed without interruption of health. A table was given showing that the effect of selection of life amongst males was a greatly diminished mortality at almost every age in the first five years from admission, as compared with the same ages after the members had been admitted more than five years, whilst on the contrary, amongst females the mortality was greater in the first five years than afterwards. The author looked for an explanation of this fact partly from the circumstance that women frequently concealed, even from their medical attendants, their bodily infirmities and irregularities of the system, and partly from the finer constitution of their nerves enabling them to feel earlier and before they were perceptible outwardly, those ailments and changes which might be going on in the system, and being thereby induced to avail themselves more readily of the advantage of life assurance. Other interesting results as to the intensity or frequency of various classes of diseases prevailing at different ages, of the proportion of suicides, the motives that led to them, and the mode in which they were committed, showed what materials for novel and useful inquiries might be extracted from the records of Life Assurance Companies. It would be desirable if similar reports could be made in this country by the various Companies whose stores of observations had been accumulating now for upwards of a hundred years.—The paper was followed by a discussion, in which Mr. Farren, V.P., Mr. Hodge, the Chairman, Mr. Lodge, and Mr. S. Brown took part.

MEETINGS FOR THE ENSUING WEEK.

FINE ARTS

An Account of the History and Manufacture of Ancient and Modern Terra Cotta; and of its Use in Architecture as a Durable and Elegant Material for Decoration. By J. M. Blashfield: Weale.

WE cannot award higher praise to this little artistic work, than by saying it contains hardly a superfluous word. It is an attempt to show the growing importance of a material used almost as early as stone. Terra cotta vases two thousand years old have been found in Etruscan tombs, as fresh as if just dismissed from the hand of the potter, free from stain and bright in colour. They are painted black, red, buff, blue and yellow, and are sometimes gilded. They are ornamented with laurel, ivy, and honeysuckle borders, and are adorned with mythological scenes or paintings of domestic life. Not merely Bacchus and Cadmus are there, but also the Greek lady with her polished mirror and the Greek youth with his lyre. Terra cottas, of the early Greek type, are found in Egypt, and in all parts of Sicily and Magna Græcia. The art of making them became extinct about 150 years before Christ. The Arabs, says Mr. Blashfield, were masters in the art of pottery, and no nation excelled them in raising superb buildings from cheap materials. From these infidels the Crusaders learned to make those encaustic tiles with which our old cathedrals are paved.

In the seventeenth century terra cotta works in conjunction with architecture were frequent in Italy, and were used by Bramante. The brick Tudor mansions of England were adorned with terra cotta ornaments, the work of Italian artists:

but their dull red colour soon led to a change in the fashion, which might have continued for a century had the modern warm-coloured clays been then known.

The merit of reviving the manufacture of terra cotta in England belongs to Mr. Josiah Wedgwood, who about 1770 established large works in Staffordshire. He employed Flaxman, and established a fresh branch of commerce in England. In 1790, Coade and Sealey's works, at Lambeth, produced large architectural works which have all outlasted the stone that surrounds them, and have withstood the corroding salt of coal smoke and the relaxations and contractions of frost, sun and rain.

The use of cheap and strong cements had undermined the trade, when the Great Exhibition again called it into activity. In that collection were all classes of work, from a Greek vase to a moulded brick. The Swiss exhibited their pendent flower-vases, and Mr. Minton his mosaics and encaustic tiles.

Of this material there are now made nearly two hundred classes of articles, including roof tiles, baths, brackets, busts, candelabra, corbels, fire-places, fountains and pavements. Its advantages are well summed up by Mr. Blashfield. He says:—

"There are now before the public a vast number of new building stones and artificial stones, but if these are submitted to severe chemical tests, they will not bear comparison with the best terra cotta, which is a species of vitreous stoneware, and allied to the stoneware pottery of which vessels are made for chemical purposes, and which are not affected by acids and alkalis. The atmosphere of London in particular, is impregnated with alkaline substances of a most destructive character to metal and stone, and however much the amount of smoke may be diminished, these volatile gases will still retain great power. A variety of clays can now be delivered in London at small cost. Pure white, every shade of buff, yellow and red, and a dark blue can be readily obtained. These clays may be manufactured in the form of bricks, or other shapes, in a semi-vitreous manner. An opaque face may be given to them, or they may be glazed with any colour, and in some cases even gilding may be applied. A sort of semi-glaze can be made, well-suited for bricks. Facades executed in this way could at all times be washed clean by the hose of a fire-engine, or a wet cloth or brush, and the great cost of scraping, pointing, and colouring, be got rid of. Bricks made on Prosser's principle, with buff and red clays, would be sufficiently smooth on the surface to be kept clean in this way at all times without being glazed. Terra cotta mouldings and ornaments are now made sufficiently smooth to be washed in the same way without glaze."

It is one of the oddities of modern science that the chief ingredient in the manufacture of terra cotta should be the powdered bones of the antediluvian monsters. So passes away Behemoth in the world's pantomime tricks, and—hey, presto!—he is a flower-basket, and the plaything of women.

FOREIGN CORRESPONDENCE.

Florence.

A picture has recently been produced here, which deserves to be mentioned in the records of contemporary European Art. The artist is Signor Servolini, second Professor in the Accademia della Belle Arti, of Florence. The facilities afforded to study by that institution, joined to the wealth of first-rate pictures Florence possesses, has for some years past attracted hither a portion of the foreign Art-students that every year brings to Italy. But if the Florentine school, under the influence of Signor Servolini, should show itself capable of conducting its scholars along the path of serious and conscientious study, which alone could have led to the production of such a work as the picture in question, it may be expected that the Academy of Florence will once again become the first school of Art in Italy.

The work I speak of is, as near as may be, nine feet in height by six in width. It represents an aged couple, St. Giovachino and his wife, met on the threshold of the Temple of Jerusalem by the high priest, who rejects the offering of a yearling lamb, which they had brought, as a means of inducing Heaven to remove the barrenness which had hitherto afflicted their union. The sixty years of the unhappy wife forbid, ecclesiastically it seems, as well as naturally, the propriety of any such offering, or any such hope. The majestic figure of the priest raised above those of the suppliants by the one or two steps before the door of the Temple, occupies the centre, and forms the most prominent figure of the composition. With

his left hand he motions back the humiliated husband, who, with his rejected offering supported on his left arm, while his right hand is half-raised deprecatingly, is turning away, sorrowful and abashed, from the Temple. The other hand of the inflexible priest, seconding admirably well by its action the grave and stern, though sorrowful rather than angry, expression of his features, is raised aloft in severe admonition to the unfortunate wife, who kneels on the spectator's left side, with a most speaking expression of implicit submission, mingled with a look of agonized supplication, which even yet refuses to give up all hope. But none remains for her in the mind of the spectator. The face, attitude, and action of the principal figure, admirably conceived and highly finished, tell unmistakably that the decree is irrevocable. The background of the picture is occupied by a glimpse of the altar within one of the courts of the Temple, and some four or five Levites, who are watching the scene. It is impossible to fail being struck by the simple grandeur of the composition,—by the speaking and most artistically varied expression of the three principal heads,—and by the singular force and clearness with which the story is told and the emotions of the spectators are roused.

Thus much for unprofessional criticism. The artist world, among whom, as indeed among our little public in general, the work has made no small stir, pronounce the central figure to be all that could be wished—head, hands, drapery, and attitude. The female head is also highly praised. That of the husband, though admirably painted and most expressive, is said to be rather too similar in type and *charpente* to that of the priest. And it is complained by some critics, that the drapery of the husband and wife is harder and less graceful than that of the central figure.

Whether these strictures be just or not, it is not for a layman to decide. Of this I am very sure, that, either on the walls of our own Academy or on those of the Louvre, Signor Servolini's picture would not fail to make itself a reputation among its competitors of the year.

But, alas! its destiny is a small, obscure, and ill-lighted church in Florence! The object of the benefactor, for whom it has been executed, and assuredly the ornamentation of the obscure spot for which it is destined, would have been sufficiently attained by some hastily-thrown-off production, which might have been achieved at less than half the cost to head and hand that Signor Servolini has bestowed on his canvas. But it was not by such considerations that those conscientious workmen were influenced who produced a heritage for their country, which is now pretty well all that remains to it. And it is in no such spirit that the genuine worshipper of Art, whom the Florentine Academy is fortunate enough to possess as its Professor, has lavished his labour of love on a work which the fame-bestowing world may never see, but which must in its production have given many an hour of genuine delight to the earnestly artistic spirit of its author.

T. A. T.

P.S. In case these lines may lead some traveller to wish to see this picture, so far as it may be possible to do so, when it shall have been consigned to its dreary home, it may be as well to mention that it will be found in the little Church of St. Giuseppe, near Santa Croce.

FINE-ART GOSSIP.—Mr. Wornum has published an account of the Library of Works of Art at Marlborough House, having carefully classified them and arranged them for visitor and student. The collection, containing about 5,000 volumes and 100 portfolios of prints and drawings, is now accessible by the humblest mechanic. From the excellent arrangement of this Catalogue, the unlettered man will be able at a glance to find out all the works which have been written in connexion with his own trade or study. All the best works in Art are here,—from Albinus, that Haydon raved over as he rolled on his garret floor, down to those gorgeous works that Mr. Digby Wyatt publishes, to charm both drawing-room and studio. A little longer—a few more years—and poverty will no longer have to lie pining for alms at the gate

of knowledge. We think no one can help praising the zeal and enterprise with which the authorities of Marlborough House carry out their great object. We still hope to set our foot upon the last chimney-pot hat,—and we still hope to see the last willow pattern preserved under a glass case.

A School of Art is about to be started in the old border town of Shrewsbury. The good cause advances.

There is a complaint, that, for some private reason, no prizes have been awarded by the Department of Art, at Gore House, to the Life and Anatomical classes. If the human figure is not to be studied, how can we expect great designers? Is this intended to deter artists from Marlborough House,—and, if from Marlborough House, from decorative design? Public bodies, who spend public money, are bound to give public reasons for their public acts.

Prof. Monti delivered his Fifth Lecture on Ancient and Modern Sculpture on Wednesday. His subject this time was Early Christian Art; having in the last lecture brought us down to the total decline of Greek Art, as displayed in the miserable shapeless figures on the Arch of Constantine. Pagan Art, the lecturer said, dealt with the external world:—Christian with the internal feeling. The one delighted in the material;—the other in the immaterial. The fear of idolatry and the necessity of concealment drove the Christian sculptors of the Catacombs to resort to symbolism—to represent Christ as the Shepherd, surrounded by the eagle and the bull and other types of the Evangelists. Sometimes he was represented as treading upon Sin, or having beneath him spirits supposed to preside over earth and water. The expression of Christ's face—at first a simple representation of contemporary Romans—grew rapidly more divine; although early Christian Art was imitative and timid. In Byzantine Art, as seen in ancient diptychs of the time of Justinian, the later conventionalism and severity have scarcely yet set in. The robes are formal, but flowing, and the expression of the face is good. The Art of Constantinople was affected, even as late as the Sassanides, by the remains of Greek Art still existing in Asia. The diagrams exhibited were chiefly tombs from the Catacombs and specimens of early Byzantine Art.

A colossal statue of Berzelius, the chemist, has just been cast and exhibited at the famed foundry in Munich.—A statue to General Drouot, by M. David, of Angers, was inaugurated at Nancy, on the 17th of this month, with great solemnity.

The Berlin sculptor Heidel has just completed four colossal statues, of Galileo, Cartesius, Ottavio Guericke, and Newton, for the Mineralogical Museum.

The eminent Düsseldorf engraver, Herr Theodore Janssen, has executed an engraving after one of the last pictures of the late lamented Hasenclever, representing the jovial painter himself, with a humour and an *abandon* which are quite delightful, reminding us, in a manner, of the self-representations of the jolly Dutch masters of the olden time. We see Hasenclever in his studio; before him stands the easel, with a canvas exhibiting the first outlines of his famous picture of 'Die Weinprobe,'—near him a cask, with bottles and glasses. With one hand he holds brush and palette; with the other he lifts a green bumper full of Rhenish wine, looking honestly and gaily into the beholder's face, and pledging, as it were, the whole world. The portrait is characteristic of the man as well as of the artist, and the likeness most surprising. Herr Janssen has fully done justice to the picture; and we doubt not but that his fine and faithful engraving will be a welcome present to the many friends and admirers who, a year ago, had to lament the untimely death of Hasenclever.

MUSIC AND THE DRAMA

ST. MARTIN'S HALL.—Mr. ALFRED MELLON respectfully announces that the last ORCHESTRAL UNION CONCERT this season will take place at the above Hall on FRIDAY EVENING NEXT, July 6. Vocalists: Mlle. Emilie Kral, Miss Dolby, and Signor Bianchi. Soloists: M. Alexander Bille, Mr. E. Edward Bache, M. Sainton, and Signor Bottesini. Conductor, Mr. Alfred Mellon.—Stalls, 7s.; Reserved Seats, 5s.; Galleries, 2s. 6d. Area, 1s.; to be had at all the Music-shops, and of Mr. Mellon, 134, Long Acre.

NEW PUBLICATIONS.
INSTRUMENTAL.

An *Essay on Fingering, chiefly as connected with Expression; together with some general Observations on Pianoforte-Playing*, by Charles Neate (published for the Author), is the sterling, thoughtful work of an able man, familiar with his subject, who is neither too antiquated in his caution nor too modern in his licence. In most of Mr. Neate's remarks and examples we agree and approve. Perhaps, however, thoroughly to complete a treatise on a subject of such interest and delicacy, our author might have added another chapter. One so little pedantic as he proves himself to be might have said something concerning physical differences. A long limber hand and a short stiff one are not precisely amenable to the same canon of discipline; and a certain licence should be allowed for possible diversities of organization. Such a chapter, however, might be easily appended to any future edition of the work; which as it stands has no ordinary value.

Macfarren's *Universal Library of Pianoforte Music*. (Jullien & Co.)—This seems to be a new publication, the peculiar feature of which consists in explanatory Prefaces written by the editor, who has had some experience in the art of Preface-making. The number before us owes its contents, we presume, to the recent disturbances in copyright law, which have destroyed English publishers' property in foreign music. The *entr'actes*, at least, if not the Overture to Mendelssohn's *'Midsummer Night's Dream,'* were not long ago conceived by Messrs. Ewer & Co. to be their possession; and we conceive that the pages of introductory letter-press issued on this occasion by Mr. Macfarren have been subjoined in order to give the semblance of additional value to the publication. But we like the old edition better, because it is more complete:—Mr. Macfarren's is chargeable with disarrangement, and includes neither the melo-dramatic music, the two-part song, nor the *finale*. These—his publishers might reply—do not come within the scope of a *Pianoforte Library*—but where are the *'Faery March'* and the *'Dance of Clowns'*? We would gladly sacrifice many fine words for a little real respect shown to the author idolized in print.

Trio (Sol Maj.) pour Piano, Violon, et Violoncelle. Par J. L. Ellerton. Op. 45. (Scheurmann & Co.)—Our amateurs are, day by day, becoming more and more remarkable as a body. By the number and nature of his works, Mr. J. L. Ellerton seems to aspire to "brevet rank" in the squadron, since during the last twenty years we have heard songs, quartets, chamber-music, masses, operas, (symphonies, even, we fancy), poured out with a profusion as indefatigable and steady as if music were his profession, not his pleasure. The intention, we know, goes far "to sanctify the deed," and there must be an earnestness of no common order to sustain its possessor during so many years, and throughout so wide a course of exercise and experiment. Then, fertility and versatility are among the sure signs of power and vocation; but, all this said, and all these good gifts and results counted and appreciated, the deciding point must still be settled,—the paramount question still remains to be put—"Is it a true thing?"—and this must be answered from the work produced, and not from the ambition of the producer. This *Trio* does not bring us a satisfactory reply. The phrases are elegant, but neither new nor vigorous;—the construction may pass, but it is construction according to receipt rather than dictated by purpose. Let us illustrate:—Onslow, we believe, was almost as much of an amateur as Mr. Ellerton; but in Onslow's very first *Sonatas* a peculiarity of idea, a nerve in grasping, and an ingenuity in working out his ideas are to be traced. In Mr. Ellerton's ambitious compositions we find the desire to write, not the justification; and while we remember him, by certain canzonets on Lord Byron's words, we cannot admit that this *Trio* is, in any respect, —though an advance on the *Trio* (in a flat, we think,) put forth by its writer many years ago.

Against such a work as the above a *bagatelle* is not to be measured; but having accidentally fallen

among the amateurs of England, we may here say that *La Gondola*, by Virginia Gabriel, (Chappell), is a *notturno*, with some elegance of form and expression of *cantilena*, by a Lady well known in the world of amateur-music;—what is more, a Lady whose fancies, it is evident, are neither her memory's nor her master's, but her own.

PHILHARMONIC SOCIETY.—It must be felt as a relief to every one concerned—Directors, audience, conductor—that the Philharmonic Concerts are over for the season. The eighth was little better, or little worse, than its predecessors, save that, the excitement of curiosity having subsided, the slovenliness and exaggeration which have marked the performances as a whole seemed to press on the audience with a weight of extra weariness. The solo player was Herr Pauer, who played Hummel's *Concerto* in A flat with great grace and delicacy. This excellent pianist gains year by year. The *Concerto* would have gained by being less coarsely accompanied; but the first movement, though full of elegant phrases, is languid,—and its languors injure the effect of the charming *Romanza* and *Rondo alla Spagnuola*, which follow; so much so, indeed, that they would be better relished as a concert-piece, we apprehend, if heard without such prefatory drawback. The singers were, Mdlle. Krall—who gave a caricatured version of the *scena* from *'Der Freischütz'*—and Miss Dolby.—It is said, that measures of entire reform are to be proposed at the coming General Meeting; but it will not surprise any one conversant with such proceedings and purposes if more be now said than will be done. The task of carrying through measures of cure for maladies of such long standing as those of which the *Philharmonic Society* is perishing is no holiday. Nerve, unselfishness and patience of no common order are required. There are truths which all admit, yet which many shrink from supporting when they are produced. There are not many who are able to separate principles from persons in prescribing their remedies or in adopting them when prescribed. But without courage, coolness and clear-sightedness at this juncture,—and unless a resolution to have done with old folly and prejudice be followed by more enlightened measures of management, without fear or favour towards native or foreigner,—the *Philharmonic Society* cannot live through many seasons more.

CONCERTS OF THE WEEK.—Yesterday week Signor Regondi gave his Concert, himself playing the guitar and *concertina* (on the latter leading one of Beethoven's Quartets, and appropriating Spohr's *Scena Drammatica* for the violin) with that *verve*, vigour and delicacy which make up the highest musical style, and, whatever be thought of the instruments elected, entitle its possessor to rank among the highest artists of his time. Used in moderation, the *concertina*, from its very strangeness of tone, is welcome as a variety. It could be used, we should fancy, in an orchestra, especially when picturesque and fantastic effects are required, with effect. It seems, from what we can hear in private circles, to be replacing that torment to listeners and exclusive delight of amateurs in the past generation, the flute; the violin, as an object of reasonable attainment, being beyond the scope of average English adroitness and English leisure. But the *concertina* may never find an expositor of higher class than Signor Regondi. Among other specialties of his Concert may be noticed some compositions for the harp, played by Mr. Boleyn Reeves. As a player, this gentleman wants charm; but his three movements, called "Melodies," though placed too late in the programme, and thus little listened to, struck us as having grace and character. Among the singers, we shall but name Miss Lascelles. She ought to turn out well, endowed as she is with a superb *contralto* voice; but her version of *'O Salutaris'* was not good. Her other song was a simple and expressive *Canzonet* by Miss Gabriel.

Mr. Cooper's last Quartet Concert gives us occasion for speaking of another new singer, Mr. Cooper's pupil, Miss Milner. She has a fine, powerful, clear *soprano* voice, well worth training,

and not, apparently, ill trained so far as culture has gone. If Miss Milner gains the command of so fine an organ as hers, and adds to the skill of a musician refinement and precision of articulation, she should do good service to music.—The Chamber Concert of Herr Louis Ries was also given yesterday week, at which a MS. Quartet, by his namesake and relative, was to be performed; and, besides this, a *Matinée*, for Herr Jansa, on Saturday last.

At the last meeting of the *Harmonic Union* for the season, Herr Molique's Mass in F was performed. The performance, however, was so little complete, that in justice to the excellent composer we shall not attempt any record of our impressions of the composition. The other act of the concert consisted of Rossini's *'Stabat,'* in which Mr. Sims Reeves sang the *'Cujus animam'* almost as well as that song can be sung. An announcement was circulated in the room that the arrangements for the next season's performances by the *Harmonic Union* are all but complete.

Among other concerts of the week that simply call for announcement are entertainments by Mr. and Mrs. Alfred Gilbert, and Miss Cole, by Baron Celli, and by Arthur Napoleon.

HAYMARKET.—The last few nights of Miss Helen Faucit's engagement have been devoted to a performance of *Rosalind*, in Shakspeare's forest play of *'As you Like It.'* Nothing more delicate in conception or execution was, perhaps, ever seen on the stage. The sentiment of it is as delicious as the delineation is exquisite. The utmost refinement in the art of histrionic portraiture is achieved. It is so elaborate that in every tone of the voice we may recognize a thought of the mind; it is so full of meaning, so thoroughly premeditated. On reflection we perceive that all this is artificial, and that were it less faultless it might please more. Such is the nicety of the mechanism that it looks like nature. Yet to be enjoyed completely it requires to be studied intensely. Miss Faucit might secure a triumph in this character, if instead of an occasional star, she were a fixed planet in a metropolitan theatre. As it is, the public are unprepared for the excellence of such acting;—hence the state of the house is seldom satisfactory. We were pleased on this occasion with Mr. Barry Sullivan, who, in the melancholy *Jaqes*, appeared sedulously to avoid the sin of exaggeration with which he has hitherto been justly charged. This submission to criticism, intended for his advantage however severely expressed, will go far to correct the provincial peculiarities that have grown into faults. Affectations of all sorts he should shun, particularly of pronunciation. These, however, in the case of *Jaqes* we are not willing to expose, the general excellence of Mr. Sullivan's impersonation and delivery commanding commendation. The play was well placed on the stage; but the acting was somewhat under the mark, the performers at this theatre seeming to be afraid to give to poetry the required intonations, which, however habitual to the Shaksperian actor, task the courage of artists accustomed to the prose play and the lighter species of stage-literature. The effect is to damage the performance by an amateur-like air, and to lower the tone of the whole, not only in regard to those who are incompetent, but to the leading spirits of the scene, who are thus placed in false relations with the subordinate characters, whereby the general harmony of the effect is interrupted.

OLYMPIC.—Sheridan's *'School for Scandal'* was revived on Friday week, on which occasion Mrs. Stirling was restored to the stage, in the character of *Lady Teazle*, which she acted with her usual tact and spirit. The chief novelty in the cast was, however, Mr. Wigan's *Joseph Surface*, which we need not state, in his hands, ceased to be the conventional stage-hypocrite, and was distinguished by subtle individual traits, which served both to interpret and to humanize the character. The exposure of his villany had more than a comic interest. Mr. Wigan contrived to express that it was the complete destruction of his social position—a doom irrevocable as fatal. Mr. Robson's

Moses was another new feature, remarkable for the genius bestowed on the illustration of a subordinate part, by which it was taken, at once, out of the category of small parts. Altogether, this revival of an elegant comedy is likely to become more than ordinarily interesting.

MUSICAL AND DRAMATIC GOSSIP.—By a letter from Paris which appeared in the *Daily News* on Saturday last, we learn that the speculation of English theatricals in Paris, after all, has been a disastrous one—dishonourable to its projectors, and ruinous to those subordinate actors who have had no means to meet the costs of residence in a strange capital when the treasury failed to yield them the day's crust and the night's lodging. The *entrepreneur*, M. Ruin de Fye, who "explained" to the English Consul on the occasion (representing that he had not been "backed" to the extent promised by an English capitalist), is the gentleman who some two years ago announced to Parisian artists the foundation of a "Choreographical Theatre" in London on a magnificent scale, and who even entered into negotiations with some of the principal functionaries required to conduct such an establishment. Something better has now to be told regarding this miserable transaction and its results. The correspondent of the *Daily News* states, that on being turned out of their lodgings the minor members of this English company came down to the *Théâtre Ventadour*, where they had been playing, to ask for succour in a foreign land,—and that "Madame Ristori, who was coming to rehearsal, saw them and gave them all the money she had about her (300 francs), which they gratefully received." This should not, and will not, be forgotten.—Meanwhile, the English troop has found means to continue its appearances under another management.—Another of our actors, Mr. George Vandenhoff, is announcing readings of Shakspeare and Sheridan in Paris, with Preliminary Discourse.

Among the few individual composers living, Herr Lindblad must be numbered, in right of some twenty *Lieder*, which (with the *Canzoni* of Signor Gordigiani and the *Romances* of M. Gounod) are the best contemporary songs before the world. There are ideas, too, though less happily displayed and completely proportioned, in chamber music by him which we know. So little, however, can the English beenticed out of the beaten track of favourite sympathies for favourite writers, that Herr Lindblad's name was slipping out of memory, when it was recalled the other day by a passage in a private letter from Stockholm, the writer of which mentions with admiration a new Symphony lately produced in the Swedish capital by this elegant and melodious writer.

We are informed that Signor and Madame Gassier have signed an engagement to accompany M. Jullien to America.

A monument by Signor Vela to Donizetti has just been placed in the Church of Santa Maria Maggiore, at Bergamo.

The pianoforte by Mr. Hesketh Hughes, regarding the principle of which we had a word or two to say when we saw it at *St. Martin's Hall*, has been added to the curiosities at the *Polytechnic Institution*:—its inventor (let us note) having entered on a partnership which indicates a purpose of working out and carrying through his idea.—Another of the popular establishments of London, which has tried to bring in music as an attraction (how far wisely or not is another matter), we mean the *Panopticon* in Leicester Square, is about to suffer loss in the departure of Mr. Best from its organ,—that gentleman being (as we have more than once stated) something like one of the best organists now "in playing."

Three new singers from the *Conservatoire*, Mdlle. Pannetra, MM. Dulaurens and Prilleux, have just appeared at the *Théâtre Lyrique* of Paris with some success.

A great singing match was held by the French and Flemish Choral Societies at Lisle, on the 17th of June, with distributions of prizes. The first French prize was carried away by the Orpheonists

(Crick-Sicks) of Tourcoing; the first Flemish prize was awarded to the *Grande Harmonie* of Brussels, and to the *Melomanes* of Ghent.

In printing the following passage of a letter from our Correspondent in Naples, dated May 26th, we call attention to one passage which it contains. It seems that we wrote, some months ago, too disparagingly of the Opera House at Bari. *Fanatic*, as opposed to men caring for graver interests, may draw comfortable hope of new Italian composers and new Italian singers, if it be true that *next* to the new church came the new theatre; and the port, which was to harbour trade, *third* in the list of public works.—"A new melo-dramatic piece is announced for performance in a few days in the Royal College of Music. The *libretto* is by Marco d'Arienzo; the music by Mensitieri, Vicconte, Vespoli, and Conte, students in the College. Another melo-dramatic piece from the same source, and entitled 'L'Orfano degli Orfanelli,' is also announced for performance in the *Albergo de' Poveri*. The Director of the College, Mercadante, has just returned from Bari, where his presence seems to have awakened a most extraordinary degree of enthusiasm. His 'Leonora,' superintended by himself, was performed in crowded houses, and in excellent style. The principal voices were Ortolani, Brignoli (*prima donna*), Conti, and Gionfrida. The *maestro* was called for continually, and was covered with flowers. The history of the Theatre of Bari is curious. Funds were collected to form a port: a sum, however, was abstracted,—first to build a church, then a theatre—one of the largest in Italy; and the residue was appropriated to building a port.—Palermo has been recently enlivened by the performances of our national company of *San Carlino*. Indeed, the whole theatrical world fled from Naples during the *Novena* of St. Januarius, but have now returned to the capital.—'La Violetta' is being performed at *San Carlo* and *Il Fondo*, with Signora Beltramelli as *prima donna*, Signor Mongini tenor, and Olivari baritone. The same opera, too, is now given at the *Teatro Nuovo*. Of the *prima donna*, Signora Cappelli, we say nothing. Villani is a fine tenor, and sings with much expression; whilst the *basso*, Signor Rossi, is excellent, and might aspire far higher than the *Teatro Nuovo*.—'Luisetta,' by Pacini, has also been given at the *Teatro Nuovo*."

A new play, by Herr Paul Heyse, 'Die Pfälzer in Irland' ('The Palatines in Ireland') has been represented at Munich; but has not met, we are informed, with a general success. The theme of the drama is taken from the 'Skizzen aus Irland,' by Herr V. A. Hubert; and though it is not denied that the play shows considerable dramatic power, yet the critics find fault with a certain want of harmony and an unpoetical accumulation of theatrical effects.

MISCELLANEA

Chouse.—Those who have read the Rev. Mr. Trench's two very entertaining and instructive little books—'On the Study of Words,' and 'English Past and Present'—will have observed the very large and frequent use which the learned and ingenious author has made of Dr. Richardson's 'Dictionary of the English Language,'—and will recollect the very handsome manner in which at the close of the former work he makes (in the second and subsequent editions) his acknowledgment of the many and great services he has received from so doing. In Mr. Trench's latter work he makes a few occasional references to the Dictionary, but not in the instance of the word *Chouse*. Your Correspondent, Dr. Asher—who, concurring with the critic in the *Athenæum*, speaks approvingly of what Mr. Trench has said on this naturalized exotic—should be informed that all and everything contained in 'English Past and Present' may be seen in the Dictionary of Dr. Richardson. As regards books that we read through, and the leading principles of which we study, general acknowledgments may perhaps be sufficient, as resemblances between the original author and his follower may be easily traced in the pages of their different productions. But with regard to a Dictionary the case is far otherwise. It is mainly a book of reference, and many a debt, and of no small amount too, if not specifically acknowledged by the borrower, may remain for ever unknown to the public. It would be well if this distinction were more faithfully borne in mind, even in cases where the claims are, as in the present instance, of but a moderate description,—those, namely of careful compilation and judicious selection. HOSGO.

Erratum.—P. 736, c. 3, l. 47, for "Misses Horruck" read *Miss Horneck*.

The SPANISH CONQUEST in AME-

RICA, and its Relation to the History of Slavery and to the Government of Colonies. By ARTHUR HELPS. Vols. I. and II. with Maps. 8vo.

This book is based upon 'The Conquerors of the New World and their Bondsmen,' two volumes of which were published some years ago. The author has, however, been obliged to extend its plan and enlarge its form. The publication of 'The Conquerors of the New World' will therefore not be continued, but purchasers of the volumes already published may receive, on returning them to the publishers, a copy of the first volume of 'The Spanish Conquest in America,' which comprises, as nearly as could be arranged, in a new and enlarged form, the matter therein contained.

LANDS of the SLAVE and the FREE;

or, Travels in Cuba, the United States, and Canada. By Captain the Honourable HENRY A. MURRAY, R.N. 2 Vols. with Illustrations and Map, 21s.

This work embraces observations on Society, Education, and Commercial Prosperity; remarks on the Constitution, Press, &c. of the Republic, and the State of Slavery within her borders; concluding with a Chapter on the Relations, Present and Prospective, between the United States and England.

 Edinburgh: A. & C. Black; and sold by all Booksellers.

W A R S O N G S.

By **W. C. BENNETT.**
 EFFINGHAM WILSON, Royal Exchange.

SKETCHES OF THE IRISH BAR.

Including a MEMOIR of CHIEF BARON WOLFE, and a JOURNAL of CONVERSATIONS with CHIEF JUSTICE
 BUSHE, now First Published; with other LITERARY and POLITICAL ESSAYS.

By **WILLIAM HENRY CURRAN, Esq.**

"Mr. Curran's Sketches have many claims on our attention. The author's name awakens expectations of brilliancy and lively thought, and the contents of the work show that the first of the family did not carry with him all his intellectual wealth to the grave. We accept these sparkling essays as characteristic of the time and country in which they were written. The 'Conversations with Chief Justice Bushe'—a charming collection of curious anecdote—are vivid and full of interest, and are now printed for the first time. Mr. Curran's own recollections of celebrated persons are just as striking as those of Chief Justice Bushe. The two volumes have genuine talent, and exhibit many of the best traits of Irish intellect."—*Athenæum*.

The ROMANCE of the ARIS-

TOCRACY; or, Anecdotes and Records of Distingu-
 shed Families. By **SIR BERNARD BURKE.** A New
 and Revised Edition, in 3 vols.

"These stories, with all the reality of established fact,
 read with as much spirit as the tales of Boccaccio, and are
 as full of strange matter for reflection and amazement."
Britannia.

Published for **H. COLBURN**, by his Successors, **HURST & BLACKETT**, 13, Great Marlborough-street.

Price 9½d.

CHAMBERS'S JOURNAL,

garden, London.

A TREATISE on the SCIENCE of MUSIC.

By DANIEL M. G. S. REEVES. Demy 8vo. cloth. This work contains not only a practical view of the laws of harmony, but a philosophical account of the musical system, possessing interest for men of a scientific turn, whether themselves musical artists or not; and comprising *inter alia* explanations of the constitution of the scale, on the musical ratios, on temperament, and on the causes of the pleasure which the ear derives from music.

Alfred Novello, 69, Dean-street, Soho, and 21, Poultry; also in New York, at 380, Broadway.

THE ORGAN.—In the course of a few days

will be issued, THE ORGAN: its History and Construction. By Dr. RIMBULT and E. J. HOPKINS, Esq. As the number of copies to be printed of this work is limited, intending Subscribers are respectfully requested to forward their names without delay. This is the first work undertaken in England on a scale of magnitude commensurate with the importance of the instrument described. The collection and arrangement of the materials have occupied the Authors ten years. Price to Subscribers, 21s.; to Non-subscribers, 31s. 6d.—Subscribers' names received by the Publishers, Robert Cooks & Co. New Burlington-street.

THE SEAT of WAR. by WILLIAM SIMPSON.

Messrs. PAUL & DOMINIC COLNAGHI & Co., 13 and 14, Pall Mall East, beg to announce that the First Series of the above Work, dedicated by permission to Her Majesty, is now complete, in 40 Plates, price, neatly bound in cloth, plain copies, 6l. 12s.; coloured, 10l. 12s.

There is scarcely a subject of life or death in the Crimea that is not descended upon by this lively and intelligent Artist. You may here follow the soldier, finding something novel and characteristic at every stage of your progress. —*Times*, May 28, 1855.

KERTCH—The SEA of AZOFF—The FINAL

OPERATIONS at SEBASTOPOL. THE SEAT of WAR. —Messrs. PAUL & DOMINIC COLNAGHI & Co., 13 and 14, Pall Mall East, Publishers to Her Majesty, beg to announce that they will immediately commence the issue of a Second Series of SKETCHES by Mr. WILLIAM SIMPSON, to be in every way uniform with the First Series. To be completed in 10 Parts, each Part with 4 Plates. Price to Subscribers, 25s. coloured. The First Part will contain the Scenes in the Sea of Azoff, from Sketches taken by Mr. Simpson on the spot.

Booksellers and Publishers to University College,

28, UPPER GOWER-STREET, and 27, IVY-LANE, PATERNOSTER-ROW.

DARLEY'S**SCIENTIFIC LIBRARY,**

FOR THE USE OF

SCHOOLS, PRIVATE STUDENTS, ARTISTS, AND MECHANICS.

It is the purpose of this Work to furnish a Series of Elementary Treatises on Mathematical Science, adapted to the wants of the public at large. To youth of either sex at public and private schools; to persons whose education has been neglected, or whose attention has not been directed in early life to such studies; and to Artists and Mechanics these little works will be particularly suited. The principles of the various Sciences are rendered as familiar and brought as near to our commonest ideas as possible; the demonstrations of propositions are made plain for the mind and brief for the memory; and the Elements of each Science are reduced not only to their simplest but to their shortest form.

I.

FIFTH EDITION.

A SYSTEM

OF

POPULAR GEOMETRY;

Containing in a few Lessons so much of the Elements of Euclid as is necessary and sufficient for a right understanding of every Art and Science in its leading truths and great principles.

seen in the Apparatus room, including Buckle's Brushes, Shallow
Glass Disks for developing negatives, with case and covers, Deep
Porcelain Dishes, for Washing the Iodized Paper, &c. &c.
An excellent Negative Paper, well adapted for Iodizing, after the
method followed and recommended by Mr. Sutton, price 4s. per
quiro, or 3l. 10s. per ream, 19 by 15.

N.B. The stock (50 reams) has now been kept two years. This
paper may also be had ready iodized.**XYLO-IODIDE OF SILVER.**

This important photographic preparation is exclusively used at
all the Photographic Establishments. Its superiority is uni-
versally acknowledged. Testimonials from the best photographers
and principal scientific men of the day warrant the assertion, that
hitherto no preparation has been discovered which produces uni-
formly such perfect pictures, combined with the greatest rapidity
of action.

In all cases where a quantity is required, the two solutions may
be had at wholesale price in separate bottles; in which state it
may be kept for years, and exported to any climate. Full instructions
for use.

CAUTION.—Each bottle is stamped with a red label, bearing
my name and address,

RICHARD W. THOMAS, CHEMIST,

10, PALL MALL,

to counterfeit which is felony.

NITRATE OF SILVER BATH for the above preparation may
be always obtained of R. W. Thomas, ready made, at a cost little
more than the price of ingredients used.

CRYSTAL VARNISH.

PREPARED FROM THE FINEST AMBER.

This valuable Varnish, for protecting Negative Pictures, does
not require the application of any heat to the plate. The coating
will be found free from stickiness, hard, and transparent. It dries
immediately.

HYPO-COLOURING BATH.FOR RENDERING THE POSITIVES ON PAPER DARK
AND RICH IN COLOUR.**CYANOGEN SOAP.**FOR REMOVING ALL KINDS OF PHOTOGRAPHIC
STAINS

application.

NOTICE OF DIVIDEND.

BANK OF DEPOSIT, No. 3, PALL MALL EAST,
LONDON. Established A.D. 1844.

The WARRANTS for the HALF-YEARLY INTEREST, at
the rate of 5 per cent. per annum, on Deposit Accounts, to the 30th
June, will be ready for delivery on and after July 10, and payable
daily between the hours of 11 and 3 o'clock. Parties residing at a
distance will, on application, have their Dividend Warrants for-
warded for payment. The Warrants will be paid on presentation
at the Head Office in London, or the amount may be received at
the various Branches or through Country Bankers.

June 21. PETER MORRISON, Managing Director.
Prospectuses and Forms for opening Investment Accounts sent
free on application.

RAILWAY ACCIDENT INSURANCE.—

16, 22, 11, 5s. have already been paid as compensation for Fatal
and other Railway Accidents, by the

RAILWAY PASSENGERS' ASSURANCE COMPANY.

Examples.

1,000l. was paid to the Widow of J. G. killed on the 24th Febru-
ary 1852, secured by a payment of 1l.

350l. was paid to H. C. H. J. who had his leg broken on the
31st Aug. 1853, secured by a payment of 1l.

2,000l. was paid to W. P., severely injured on the 19th September,
1854, secured by a payment of 1l.

For the convenience of frequent travellers, Periodical Insurances
are granted, which now cover the risk of Fatal Accidents while
travelling in any class carriage on any Railway in the United
Kingdom or on the Continent of Europe, and insure Compensation
for Personal Injury in any Railway Accident in the United King-
dom only.

To insure 1,000l. at an Annual Premium of 20s.

Ditto 2,000l. ditto 5s.

Insurances can also be effected securing the same advantages for
terms of five or ten years, or for the whole of life, at greatly re-
duced rates, which may be learned from the Company's Prospectus,
to be had at the Offices, and at all the principal Railway Stations.

A new class of Insurance has also been established in case of
Death by Railway Accidents alone, without compensation for
Injury.

To insure 1,000l. at an Annual Premium of 40s.

Ditto any sum not exceeding 1,000l. for the whole of life by a
single payment of 6s. per cent.: thus one payment of 3l. will secure
1,000l.

The Premiums charged include the Stamp Duty, this being the
only Company Insuring against Railway Accidents empowered by
Special Act of Parliament to pay a commuted Stamp Duty.

Lawyer's Office, WILLIAM J. VIAN,
3, Old Broad-street, London. Secretary.

The advantages offered by this Society are—Economy combined
with Security, and LOWER RATES of Premiums than those of any
other Office, which entitle the Assured to participate in the Profits,
and considerably lower than those of any other Mutual Assurance
Society.The WHOLE OF THE PROFITS are divided every fifth year
among the Assured, and a Bonus is added, after the Payment of
the Fifth Annual Premium, to every Policy-holder on the Part-
icipating Scale, if a claim accrue thereon prior to the next division
of Profits.The sum of 397,000l. was added to Policies at the last Division,
which produced an average Bonus of 67l. per Cent. on the Pre-
miums paid.

Number of Policies in force, nearly 7,000.

The MIDSUMMER Fire Renewal Receipts are now ready, and may be had on application at the head office of the Company, or of any of its Agents throughout the country.

Losses by explosion of Gas made good by the Company.
IN THE LIFE DEPARTMENT Four-fifths of the Profits divisible by the Company's Deed of Settlement allowed to Assurers, and the Company transacts all business relating to Life Assurance, Deferred Annuities, and Family Endowments, on the most liberal terms consistent with sound principles and public security.

No charge for STAMPS on LIFE ASSURANCE POLICIES. POLICIES granted on personal security, and the deposit of a Life Policy to be effected by the borrower.

To all Agents, Solicitors, Auctioneers, and Surveyors, liberal allowance is made.

By Order of the Board,
THOMAS PRICE, Secretary.

ANNUAL DIVISION OF PROFITS.

GREAT BRITAIN MUTUAL LIFE ASSURANCE SOCIETY.
14, Waterloo-place, London, and 30, Brown-street, Manchester.

Directors.

THE CHISHOLM, Chairman.
RICHARD HARTLEY KENNEDY, Esq. Alderman,
Deputy-Chairman.

Major-Gen. Michael E. Bagnold.
Francis Brodigan, Esq.
Alexander Robert Irvine, Esq.
John Indis Jerdein, Esq.

William Morley, Esq.
Robert Francis Power, Esq. M.D.
Archibald Spens, Esq.
Frederick Valiant, Esq.
Rev. E. W. J. Vickery.

This Society is established on the tried and approved principle of Mutual Assurance. The funds are accumulated for the exclusive benefit of the Policy-holders, under their own immediate superintendence and control. The Profits are divided annually, and applied in reduction of the current Premiums. Policy-holders participate in Profits after payment of five annual Premiums. The Annual General Meeting of this Society was held on the 30th of May, 1855, when a Report of the business for the last year was presented, exhibiting a statement of most satisfactory progress. It appeared that during the last two years, 1853 and 1854, between 800 and 900 new Assurances had been effected, producing an increase of Premium income amounting to 15,000 per annum. It also appeared that, notwithstanding the extraordinary mortality which prevailed during the last year in consequence of the visitation of the cholera, it had not been found necessary to reduce, in the slightest, the allowance previously awarded to the Policy-holders.

The Members present at the Meeting were fully satisfied with the Report, and resolved unanimously that a Reduction of 3½ per Cent. should be made in the current year's Premium payable by all Policy-holders now entitled to participate in the Profits. Credit is allowed for half the Annual Premiums for the first five years.

The following Table exemplifies the effect of the present reduction.

Age when Assured	Amount Assured.	Annual Premium originally paid.	Allowance of 3½ per Cent.	Annual Premium now payable.
20	£1,000	£20 17 6	£8 11 6	£14 6 0
30	1,000	25 13 4	8 1 8	17 11 8
40	1,000	33 18 4	10 13 8	23 4 8
50	1,000	44 16 8	13 7 8	33 9 0
60	1,000	75 17 6	23 18 0	51 19 6

Physician—Dr. Jefferies, 2, Finsbury-square.
Surgeon—W. Coulson, Esq., 2, Frederick's-place, Old Jewry.
Consulting Actuary—Professor Hall, M.A. of King's College.

ADVANTAGES OF ASSURING WITH THIS COMPANY.
The premiums are on the lowest scale consistent with security. The Assured are protected by an ample subscribed capital—an assurance fund of nearly 400,000, invested on mortgage and in the Government stocks—and an income of 20,000, a year.

Premiums to Assure £100.			Whole Term.	
Age.	One Year.	Seven Years.	With Profits.	Without Profits.
20	£0 17 8	£0 19 9	£1 15 10	£1 11 10
30	1 13 7	1 15 7	2 2 5	2 0 7
40	1 5 0	1 6 9	3 0 7	2 14 10
50	1 14 1	1 19 10	4 6 8	4 0 11
60	3 2 4	3 17 0	6 12 9	6 0 10

Mutual Branch.

Assurers on the Bonus system are entitled, at the end of five years, and afterwards annually, to participate in four-fifths, or 80 per cent. of the profits.

The profit assigned to each Policy can be added to the sum assured, applied in reduction of the annual premium, or be received in cash.

At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a reversionary increase, varying, according to age, from 68 to 28 per cent. on the premiums, or from 5 to 15 per cent. on the sum assured.

One-half of the "Whole Term" Premium may remain on credit for seven years, or one-third of the Premium may remain for life as a debt upon the Policy at 5 per cent., or may be paid off at any time without notice.

Claims paid in one month after proofs have been approved. Loans upon approved security.

No charge for Policy Stamps.
Medical Attendants paid for their reports.
Persons may proceed to or reside in any part of Europe or British North America without extra charge.

The Medical Officers attend every day at Throckmorton-street, at a quarter before 2 o'clock. E. BATES, Resident Director.

THE YORKSHIRE FIRE AND LIFE INSURANCE COMPANY.

Established at York, 1824, and Empowered by Act of Parliament.

CAPITAL, 500,000.

The attention of the Public is particularly called to the terms of this Company for

LIFE INSURANCES.

And to the distinction which is made between Male and Female Lives.

No Charge for Stamps on Life Policies.

FIRE INSURANCES.

Are also effected by this Company on the most moderate terms.

LONDON AGENTS:

Mr. William Pitman, Solicitor, 34, Great James-street, Bedford-row.
William R. Turner, Solicitor, 1, Field-court, Gray's Inn.

Agencies are also established at the various Towns in the Country.

W. L. NEWMAN, Actuary and Secretary, York.

GRESHAM LIFE ASSURANCE SOCIETY.
Head Office, 37, Old Jewry, London.

Instituted A.D. MDCCCLXVIII (7 and 8 Vict. cap. 110.)

Trustees.

Matthew Marshall, Esq.
Stephen Olding, Esq.
William Smees, Esq.
William Taber, Esq. Chairman.

This Office will be found highly eligible for every description of Life Assurance, its main features being the publicity of its accounts, and the systematic readiness of its transactions.

Perfect Security is guaranteed by an ample paid up capital, subscribed by persons of the highest character and respectability. The Company moreover being under public Act of Parliament, official copies of its accounts may be readily had at the Government Registrar's on payment of the usual record fee.

Policies may be effected without loss of time, formalities being carried through at the Office every day, from 10 to 4; Saturdays, 10 to 2; Medical Officer daily at 11. The Board assembles on Thursdays at half-past 12.

A great portion of the Society's Policies are upon first-class lives, but the Company being specifically established to insure the Insurance of individuals of regular and temperate habits, in whom health may be more or less impaired, the Board openly seek to transact business of this class at equitable rates, founded upon a careful consideration of these cases. Lives of this description, declined at some offices, are accordingly open to acceptance at the Gresham.

Loans may be obtained in connexion with Policies effected with the Company. The Directors have advanced, in this respect, upwards of £75,000, to the Members since July, 1854.

The range covered by English Rates in times of Peace and under ordinary circumstances is North of Gibraltar and Philadelphia. N.B.—Active and influential persons will be appointed as Agents, on liberal terms, in districts where the Society is not already sufficiently represented.

EDWIN JAMES FARREN, Secretary.

LONDON LIFE ASSOCIATION,

Instituted 1850.

OFFICE, 81, KING WILLIAM-STREET.

President—Charles Franks, Esq.

Vice-President—John Benjamin Heath, Esq.

THIS Society is essentially one of Mutual Assurance, in which the Premiums of its Members are reduced after seven years.

The rate of reduction of the Premiums for the present year is 70 per cent., leaving less than one-third of the original Premium to be paid.

The Society also undertakes other descriptions of Assurance, in which the Assured do not become Members, and having ceased to allow any commission to Agents, the Society has been enabled to reduce the Premiums for this class of Assurances to the following very low rates:—

Annual Premiums for the Assurance of £100.

Age.	£. s. d.	Age.	£. s. d.	Age.	£. s. d.
20	1 13 7	33	2 7 6	50	4 1 2
25	1 17 0	40	2 15 5	55	5 1 0
30	2 1 5	45	3 6 0	60	6 5 10

The Court of Directors are authorized by the Deed of Settlement to advance money on the security of Policies in this Association.

(lined). The utility and extreme cheapness of these garments is such, and the style so perfect, that no recommendation need be. FIRST-CLASS BOYS' SUIT, 11d. per inch, according to height.

GLENNY'S BALBRIGGAN STOCKINGS and SOCKS. MANUFACTURED IN BALBRIGGAN (IRELAND), for elasticity, softness, and durability, are unrivalled by the numerous attempts at imitation. Though manufactured from cotton, they are superior in comfort to silk, and more durable.
Sold only by the manufacturer,
CHARLES GLENNY, 33, Lombard-street, City; and
TRESHER & GLENNY, 152, Strand.

RUPTURES.—BY ROYAL LETTERS PATENT. WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of a steel spring, so often hurtful in its effects, is here avoided; a soft bandage being worn round the body, while the requisite resting power is supplied by the MOC-MAIN PAD and PATENT LEVER. This is a perfectly safe and close support, it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer, Mr. WHITE, 228, Piccadilly, London.

ELASTIC STOCKINGS, KNEE CAPS, &c. for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price, from 7s. 6d. to 16s. each; postage 6d.
MANUFACTORY, 228, PICCADILLY, LONDON.

THE PEN SUPERSEDED.—MARK YOUR LINEN.—The most easy, permanent, and best method of Marking Linen, Silk, or Book-ends, with the PATENT ELECTRO-SILVER PLATES. With these Plates a thousand articles can be marked in ten minutes. Any person can use them. Initial Plate, 1s.; Name, 2s.; Crest, 5s.; Numbers, per set, 2s. Sent free (with instructions) for samples, by the Inventor and sole Patentee, T. CULLETON, 2, Long-acre, one door from St. Martin's-lane.

SISAL CIGARS.—At GOODRICH'S, 416, Oxford-street, London, nearly opposite Halfway-street. Box, containing 14, for 1s. 9d.; post free, 6 stamps extra. None are genuine unless signed "H. N. Goodrich." No good cigars have ever been sold so cheap.

HAS-CHISCH.—This celebrated Oriental Sedative, used by all the upper classes in the East, by all the Continental writers, &c., is to be had of the sole Manufacturer in Europe, JAMES NOBLE, Chemist, 42a, Bedford-street, Strand, London.—Préparé selon la Méthode d'Orient.

SUPERIOR COGNAC BRANDY, at 52s. per dozen (duty paid), from the Docks; sparkling Champagne, 42s.; a delicate Rhine Wine (Hatzberg), 30s.; Claret, first-class quality (vintage 1854), 54s. WILLIAM WING HUGHES, 3, Dorset-street, Portman-square.

ROYAL CAMBRIDGE SHERRY.—This beautiful dry Wine is now supplied to the élite throughout England, under the patronage of H.R.H. the Duke of Cambridge, to nearly all the Clubs, and to Her Majesty's Household. It is guaranteed to be the pure Wine of Xeres undiluted. It is recommended to invalids by sound medical authority, while its rich character is appreciable to all who understand Sherry Wines. Can be had only of BELLINGHAM & COMPANY, 4, Beaufort Buildings, Strand, 3s. per dozen; or, in quarter cask, brand, O.A.M., 12l. 10s. Sample to be forwarded gratuitously.

ADAM HILL'S SYRUP OF LIMES, or Concentrated Lemonade, is a pint; a tablespoonful will make a tumbler.—Raspberry, 1s. 6d. a pint; Capillaire, 1s. a pint; Gingerette, 1s.—Pure Malt Vinegar, 2s. 6d. per gall, the best! Pickles per dozen, 8s.; per gall, 3s. 6d. (ditto)—Pauzic Spruce, 5s. per gall (ditto)—ADAM HILL, 2, 8, High Holborn.

CHOCOLAT.—F. MARQUIS, highly recommended by the faculty of France, l'Assesse des Panoramas and Rue Vivienne, Paris. This celebrated Manufacturer has appointed for his Agent, in England, J. CHACK, 38, Chancery-lane, Holborn, for the Wholesale of his superior Chocolate, to be had also, Retail, at Messrs. Fortnum, Mason & Co.'s, Piccadilly; and at all respectable Tea, Coffee, and Foreign Warehouses and Chemists in the United Kingdom.

SCHWEPPE'S SODA, POTASS, and MAGNESIA WATERS, and Aërated Lemonade, continue to be manufactured upon the largest scale at their several establishments in London, Liverpool, Bristol, and Derby. The celebrity of these well-known waters, and the preference they universally command, are evidences that their original superior quality over all others is well sustained. Every bottle is protected by a label, with the name of their firm, without which none is genuine, and it may be had of nearly all respectable Chemists throughout the Kingdom. Importers of the German Schtzer Waters, direct from the springs, as for the last thirty years.—51, Berners-street, London.

HARVEY'S SAUCE.—The admirers of this celebrated Fish-Sauce are particularly requested to observe, that none is genuine but that which bears the name of WILLIAM LAZENBY on the back of each bottle, in addition to the front label used so many years, and signed ELIZABETH LAZENBY, 6, Edwards-street, Portman-square, London.

MISS KIRBY, 23, Mortimer-street, Caven-dis-square, having received numerous orders for her EMERALD PINK MAKE for KESTONS the H.A.K. has appointed the following Agents:—Forster, 52, and Barton, 77, King's-road, Brighton; Savory & Moore, High-street, Cheltenham; Wells, Sarum-street, Dover; Chater, Chemist, Watford; Morris, 29, High-street, Kensington; Davies, Chemist, Bridge-street, Chester; Halliwell, 11, High-street, Loughborough; Dougal, 74, Regent-street; Adolphus, 10s, Oxford-street; and Barclay, Farringdon-street.

VIOLETS.
H. BREIDENBACH, Distiller of Flowers and Eau de Cologne to the Queen, has now in great perfection several sorts of the WOOD VIOLET. It has a lasting odor, and will not stain the handkerchief. Violet Pomade, Cold Cream of Violets, Violet Sachet Powder, and several toilet preparations of the same flower equally fragrant.—157 N, New Bond-street, London.

TO LADIES.
ROWLANDS' KALYDOR, an Oriental Botanical Preparation for IMPROVING and BEAUTIFYING the COMPLEXION. Eradicates CUTANEOUS DEFECTS and DISCOLORATIONS, and renders the SKIN SOFT, FAIR, and BLOOMING. It obviates all the effects of Climate on the Skin, whether with reference to cold and inclemency, or intense solar heat, and affords immediate relief in cases of sunburn, stings of insects, or incidental inflammation. Gentlemen after shaving will appreciate its softening and ameliorating properties.
Price 4s. 6d. and 8s. 6d. per bottle.

CAUTION.—The words ROWLANDS' KALYDOR are on the wrapper of each bottle, and their signature, A. ROWLAND & SONS, 20, Hatton-garden, London, in red ink, at foot. Sold by them, and by Chemists and Perfumers.

METCALFE & CO'S NEW PATTERN TOOTH BRUSH & PENETRATING HAIR BRUSHES.—The Tooth Brush has the important advantage of searching thoroughly into the divisions of the Teeth, and is famous for the hairs not coming loose, 1s. An improved Clothes Brush, incapable of injuring the finest nap. Penetrating Hair Brushes, with the durable unbleached Russian bristles. Flesh Brushes of improved graduated and perfect finish. Velvet Brushes, which wash in the most superior manner. Smyrna Sponges. By means of direct importations, Metcalfe & Co. are enabled to secure to their customers the luxury of a Genuine Smyrna Sponge. Only at METCALFE, BINGLEY & CO'S Sole Establishment, 130, Oxford-street, one door from Holles-street.
Beware of the words "From Metcalfe's," adopted by some houses.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL. Prescribed with entire confidence by the Faculty for its purity, and superior, immediate, and regular efficacy.

EXTRACTS FROM MEDICAL TESTIMONIALS:—ARTHUR H. HASSALL, M.D. F.R.S. M.R.C.P. Chief Analyst of the Sanitary Commission of the Lancet, Author of "Food and its Adulterations," &c. &c.
"I have more than once, at different times, subjected your Light Brown Cod Liver Oil to analysis—and this unknown to yourself—and I have always found it to be free from all impurity and rich in the constituents of bile. So great is my confidence in the article, that I usually prescribe it in preference to any other, in order to make sure of obtaining the remedy in its purest and best condition."

"We unhesitatingly recommend Dr. de Jongh's Light Brown Cod Liver Oil as the best for medical purposes, and well deserving the confidence of the profession."

Sold only in bottles, capsuled and labelled with Dr. de Jongh's Signature, WITHOUT WHICH NONE ARE GENUINE, by ANSAR, HARFORD & CO. 77, STRAND, London, Dr. de Jongh's sole Consignees; and in the COUNTRY by respectable Chemists.
Half-pints (16 ounces), 23s. 6d.; Pints (32 ounces), 48s. 9d.; Quarts (64 ounces), 94s. IMPERIAL MEASURE.

MEDICINE OF MOST DECIDED EFFICACY—KAYE'S WORKS' PILLS thoroughly purify the blood, and promote the healthy action of the liver, stomach, and bowels. Sold throughout the Empire, 1s. 10d., 2s. 9d., and 4s. 6d. Wholesale Depot, 22, Broad-street, London.

NO MORE PILLS NOR ANY OTHER MEDICINE.—For Indigestion (Dyspepsia), Constipation, Nervous, Bilious, and Liver Complaints, Asthma, Bronchitis, Cough, Consumption, and Debility. By DU BARRY'S delicious REVALENTA ARABICA FOOD, which saves fifty times its cost in medicine.

A few out of 50,000 cures are here given.
Cure No. 1.—Of dyspepsia, from the Right Hon. the LORD STUART DE DECIES—"I have derived considerable benefit from Du Barry's Revalenta Arabian Food, and consider it due to yourselves and the public to authorize the publication of these lines."
STUART DE DECIES."

From the Dowager-Countess of Castletown.
Cure No. 52,692.—Rostrevor, County of Down, Ireland, 9th December, 1854.—THE DOWAGER-COUNTESS OF CASTLETOWN feels induced, in the interest of suffering humanity, to state that Du Barry's excellent Revalenta Arabian Food has cured her, after all medicines had failed, of indigestion, bile, great nervousness and irritability of many years' standing. This food does more for the confidence of all sufferers, and may be considered a real blessing. Inquiries will be cheerfully answered.
Cure No. 59,832.—"Fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness of the stomach and vomiting, have been removed by Du Barry's excellent food."

"MRS. JOLLY, Waltham, Ling, near Diss, Norfolk."
11b, 2s. 9d.; 2lb, 4s. 6d.; 5lb, 11s.; 12lb, 22s.; super-refined, 11b, 6s.; 2lb, 11s.; 5lb, 22s.; 10lb, 33s. The 10lb. and 12lb. carriage free on receipt of a post-office order.—Barry Du Barry & Co. 77, Regent-street, London; London Agents, Fortnum, Mason & Co. Purveyors to Her Majesty, 182, Piccadilly; and also at 60, Gracechurch-street; 49, Bishopsgate-street; 4, Chancery; and 330 and 451, Strand; 55, Charing-cross; 54, Upper Baker-street.

HOLLOWAY'S PILLS preferable to all others for the CURE OF BILE and INDIGESTION.—Mr. Blackwell, resident at Halifax, was a great sufferer for several years, occasioned by indigestion and bile. He had an extraordinary good appetite, but never could partake of any of the luxuries of the table, fearful of the consequences that always ensued. He had consulted many medical men, and tried almost every kind of medicine, but without deriving that benefit he so ardently wished for. After all, by taking Holloway's Pills a permanent cure has been effected by them, and he can now enjoy any kind of food.—Sold by all Medicine Vendors; and at Professor Holloway's Establishments, 234, Strand, London, and 80, Maiden-lane, New York.

T. BOSWORTH'S NEW PUBLICATIONS.

THE NEW QUARTERLY REVIEW,
And DIGEST of CURRENT LITERATURE.

Price Half-a-Crown.

THE NEW QUARTERLY REVIEW recurs to the principles upon which Quarterlies were first started. It contains in each number, not half-a-dozen essays upon books long since read or neglected, but a complete review of the literature of the preceding quarter, and careful notices of all works that are worthy of any attention.

The object of the projectors of this Periodical has been, and will ever be, to heighten the standard of public taste in this country, and to place a full knowledge of the course of literature within the reach of every one. They have wished that for half-a-crown a quarter every one may have a full record of the performances of literary men—that for 10s., all may have in this review, bound in a volume, a perfect history of the Literature of the past year, and a complete record of that year's achievements in Science and the Arts.

Contents of No. 15. for July.

RETROSPECT OF THE LITERATURE OF THE QUARTER.

ALISON'S HISTORY OF EUROPE. NEW VOLUME.

RECOLLECTIONS OF THE MESS-TABLE AND THE STAGE.

MISCELLANEOUS NOTICES.

NOTICES OF NEW FRENCH BOOKS.

NOTICES OF NEW GERMAN BOOKS.

HISTORY OF THE WAR (continued).

NEW PUBLICATIONS.

1.

THE ISLAND EMPIRE; or, the Scenes of the First Exile of Napoleon I. Together with a Narrative of his Residence on the Island of Elba, taken from local information, the Papers of the British Resident, and other authentic sources. 2nd Edition, with coloured illustrations, price 12s.

"A monograph which we have read with deep interest. * * Many of his (Napoleon's) remarks read like prophecies, and have an interest as pressing in our time as when they were uttered."—*Athenæum*.

"A fresh subject, treated freshly without being overdone. It has interest in reference to present affairs."—*Spectator*.

"There is in this book that smartness and originality in tone and style which never fail to please. The same warmth of feeling that advocates our author in treating his main subject, accompanies him also in his rambles over the island, every building, field, hill, rock, or nook of which, in any way connected with the name or fortunes of Napoleon, he investigates with a gusto and graphic force which inspire us with as lively an interest in Elba, for its moral associations as for its natural beauties, and the character and customs of its inhabitants. As regards these several features, we have a series of sketches equally picturesque and instructive."—*New Quarterly Review*.

2.

RECOLLECTIONS OF the MESS-TABLE and the STAGE. By HENRY CURLING, Author of 'The Soldier of Fortune.' Post 8vo. cloth, price 7s. 6d.

"This is decidedly the best book which has issued from the press for this many a day. Can the author tell at the dinner-table his own anecdotes in the same charming manner as he has here set them down? If so, he is decidedly the lion of any circle he may happen to enter, for wit, fun and genial humour hang upon his smile."—*Morning Chronicle*.

"A book every way worthy of perusal, and which will not fail to afford the reader a great variety of entertainment, accompanied also by its truly singular illustrative anecdotes of some of the most eminent members of the stage and the army."—*Morning Advertiser*.

3.

THE PHILOSOPHY OF the FALL and its REMEDY. By the Rev. E. C. TOPHAM, M.A., Curate of Titchhurst, Sussex. Post 8vo. cloth, 8s. 6d.

4.

SCIENTIFIC CERTAINITIES OF PLANETARY LIFE; or, NEPTUNE'S LIGHT AS GREAT AS OURS; with various other hitherto unconsidered Facts connected with the Residence of Moral Agents in the Worlds that surround the Stars. By T. C. SIMON, Author of 'The Mission and Martyrdom of St. Peter,' 'The Nature and Elements of the External World,' &c. Fcap. 8vo. cloth, price 5s.

"This treatise is very superior to Sir David Brewster's in point of style and reasoning powers, and appears equal to it in general knowledge and ability. We have seldom read a more interesting book."—*Guardian*.

"Scholarly, argumentative, and ingenious, it will well repay perusal."—*Morning Post*.

5.

ON THE FUTURE DESTINIES OF the CELESTIAL BODIES. By HENRY DRUMMOND. 8vo. sewed, price 1s. 6d.

6.

THE FORMATION AND PROGRESS of the "TIERS ÉTAT," or Third Estate, in FRANCE. By AUGUSTIN THIERRY, Author of 'History of the Norman Conquest,' &c. Translated from the French by the Rev. FRANCIS WELLS. 2 vols. crown 8vo. 16s.

"M. Thierry composed this admirable book as an introduction to the documentary history of the Tiers État. It is, he tells us, the summary of his labours relative to France. His treatment of the subject is luminous and philosophical. It opens French history to its full dimensions, and surveys from an elevated range the sources, the currents, and the issues of those mighty events which in the eighteenth century accomplished the work of the Tiers État. M. Thierry's work is a fine historical study, and will add to the writer's high reputation. Mr. Wells has translated it clearly and gracefully."—*Athenæum*.

"These volumes must have as wide a popularity, and as enduring a fame, as his great work, 'The History of the Norman Conquest.'"—*Evening Mail*.

"The name of Augustin Thierry is sufficient to call attention to this learned work."—*Globe*.

NEW PUBLICATIONS.

7.

THE SPECTATOR. A NEW EDITION, with a Biographical and Critical Preface, and Explanatory Notes. Complete in 4 vols. crown 8vo. price 10s. sewed, 12s. in cloth, or 18s. neatly bound in half calf.

8.

THE SPECTATOR. With NOTES by ALEXANDER CHALMERS, A.M. A new Library Edition, in six handsome royal 8vo. vols. price 35s. cloth, or 37. 5s. whole bound in calf.

9.

THE POETRY OF CHRISTIAN ART.

Translated from the FRENCH of A. F. RIO. Post 8vo. cloth, with Frontispiece by SCHARF, price 3s.

"The name of Rio is well known to all lovers of Christian Art; and they will rejoice to see his charming sketch of its rise and development translated into English so well and smoothly, that we perceive no drawback upon the pleasure of reading it."—*Dublin Review*.

"To his charming and eloquent description of Christian Art I refer with ever fresh delight."—*Mrs. Jameson*.

10.

A REPLY to the Rev. ROBT. ISAAC WILBERFORCE'S 'PRINCIPLES OF CHURCH AUTHORITY.' By HENRY DRUMMOND. 8vo. sewed, 3s. 6d.

11.

THE ART OF CONVERSATION. By Captain ORLANDO SABERTASHI. 3rd Edition, fcap. 8vo. 1s. 6d.

"The volume overflows with humour, good sense, and good advice."—*United Service Gazette*.

"A lively and clever little work, written by one who understands both the form and essence of politeness."—*Tail's Magazine*.

12.

CAVALRY: its HISTORY and TACTICS. By the late Captain L. E. NOLAN (15th Hussars). 2nd Edition, with numerous coloured illustrations, 10s. 6d.

"A very valuable work. Even to the unprofessional reader the subject of this book must be full of interest, and the soldier by profession has, we should conceive, much to learn from its pages."—*The Times*, March 24.

13.

THE EXILE: a Tale of the Sixteenth Century. By PHILIP PHOSPHORUS. Crown 8vo. cloth, 6s.

14.

THE BIBLE in the COUNTING-HOUSE. By Dr. A. H. BOARDMAN, D.D. Edited by the Rev. ROBERT BICKERSTETH, M.A. 2nd Edition, crown 8vo. cloth, 3s. 6d.

15.

HISTORIES OF NOBLE BRITISH FAMILIES. By HENRY DRUMMOND. With Biographical Notices of the most distinguished individuals in each. Illustrated by their Armorial Bearings, Portraits, Monuments, &c. The First and Second Volumes of this splendid and truly national work are now completed, bound in half morocco, price 21s., or separately in Parts. The Families contained in the Two Volumes are Ashburnham, Arden, Cardene, Ardenre, Compton, Gosh, Hanley, Bruce, P-receval, Dunbar, Hume, Dundas, Drummond, Neville, and De Courcy.

"Mr. Drummond's work ought to be in the library of every English gentleman."—*Fraser's Magazine*.

Books for Presents and the Drawing-room Table.

1.

THE FINE ARTS: their Nature and Relations. By M. GUIZOT. With 14 illustrations by Scharf. 2nd Edition, medium 8vo. handsomely bound in cloth, 16s. 6d.; morocco extra, 21s.

"A work of exquisite judgment and consummate learning."—*Chronicle*.

NEW PUBLICATIONS.

2.

FEATHERED FAVOURITES. Twelve Coloured Pictures of British Birds. From Drawings by JOSEPH WOLF. Small 4to. cloth extra, gilt edges, 12s.; or morocco extra, 28s.

"Graceful in design, accurate and beautiful in drawing and colour."—*Morning Post*.

3.

THE POETS OF the WOODS. Twelve

Pictures of English Song-Birds, executed in Colours. From Drawings by JOSEPH WOLF; with Poetical Descriptions, selected from the best Authors. Small 4to. cloth extra, 15s.; or morocco extra, 28s.

"Gracefully planned and tastefully executed."—*Athenæum*.

"Delightful to look at, more delightful to read."—*Chronicle*.

4.

THE POETRY OF CHRISTIAN ART.

Translated from the French of A. F. RIO. Post 8vo. with Frontispiece by SCHARF. 15s. morocco extra.

"Perhaps the most delightful book on early and mediæval Christian art that exists."—*Rambler*.

New Children's Books.

1.

THE WATER LILY. A Tale. By HARRIET MYRTLE. With Twenty Illustrations by Hablot K. Browne. Imperial 16mo. handsomely bound in ornamental cover, price 3s. 6d. plain; 5s. coloured.

"The story itself, slight and unpretending as it is, is so gracefully told, and so beset with sweet fancies and descriptions, that it is quite worthy of Browne's charming illustrations. We heartily wish a copy of it could be placed in the hand of every young person."—*Globe*.

2.

THE THREE BOYS. A Child's Story.

Written and Illustrated by JANE ELEANOR HAY. With Eight Tinted Plates, price 3s. 6d.; or, with Coloured Pictures, 5s. Imp. 16mo. handsomely bound in ornamental cover.

"To write it was not only a happy inspiration, it was a joy of action, and it bears at every line the sweet impress of the hand and heart of a loving mother."—*Leader*.

3.

THE BUTTERFLY'S BALL and the GRASSHOPPER'S FEAST. By THOMAS ROSCOE. Illustrated with Seven Engravings by Kenny Meadows. Small 4to. in ornamental cover, 1s.; coloured, 2s. 6d.

"The exquisite and graphic sketches of Meadows are actually moving with insect life."—*Morning Post*.

4.

WILLIE'S FIRST LESSONS in DRAWING. Simple Lines of Nature, by a LADY. Illustrated with Forty Engravings by Philip DeLaMotte. In an ornamental binding, price 2s. 6d.

"A most useful and entertaining little volume."—*Morning Post*.

5.

A YOUNG TRAVELLER'S JOURNAL of a TOUR in NORTH and SOUTH AMERICA.

2nd Edition, with Sixteen Illustrations, 12mo. cloth gilt, 6s.

"The young lady describes what she saw very prettily and distinctly."—*Athenæum*.

6.

STORIES from the CLASSICS. Adapted for Young People. By MARY and ELIZABETH KIRBY. With Four Illustrations. 12mo. cloth gilt, 3s. 6d.

"A series of pretty stories prettily told."—*Athenæum*.

London: THOMAS BOSWORTH, 215, Regent-street.
